As the time draws near for the preliminary championship games, Marshall-Putnam, Peoria, and Tazewell all show leadership calibre. The latter recovered remarkably after a bad start by defeating Peoria and Woodford in the past two games. Peoria defeated Marshall-Putnam decisively by a 11 to 4 score on July 2, while Tazewell the same day was trouncing Woodford. If Tazewell beats Marshall-Putnam and Peoria wins from Woodford again, the Peoria nine may enter the finals a favorite for state honors. On the other hand, the strong Tazewell players have a good chance at the title if they win their remaining games.

Logan county is booked to win in the McLean-DeWitt-Logan division. DeWitt beat McLean in an early game only to be defeated by Logan 8 to 3 at Beason on July 4.

Henderson and Warren were scheduled to play on July 9 with Henderson county, a championship contender in past seasons, conceded to be the most likely winner. Cass and Morgan finally have arranged a game to determine which team shall represent the division in the preliminary championship series.

Farm Work Interferes

Adams, Brown and Schuyler are still head over heels in corn plowing, haying, and harvesting. Prospects are bright, however, for enough games to select a divisional leader this week and next.

The season has handicapped farm baseball beyond measure. Only 12 of the 20 county farm bureau teams had played up to July 9.

To be eligible, each player must live and work on the farm and be a farm bureau member or come from a member's family.

HAIL STORM HITS WHITESIDE COUNTY

THE most destructive hail storm in 30 years cut a path a mile wide through Whiteside county in Northwestern Illinois on July 6, beating down corn, oats, wheat, and clover, and doing much damage to fruit, gardens, farm buildings and poultry.

After cutting through Iowa in a Northeasterly direction, the storm swept across the Mississippi near Fulton and continued its rampage across Whiteside to the borders of Lee and Ogle counties.

Hailstones Large

Hailstones varying in size, with the largest like hens' eggs, rained down for an hour, stripping the corn and hammering the standing grain into the ground. West windows in houses and barns were broken, shingles beaten from roofs, trees blown down, and farm buildings moved from foundations. Hailstones were washed into gullies to a depth of three feet.

Oats and wheat in the storm's path are a total loss. Corn is expected to recover enough to make fodder or a light crop. Fay Peugh, south of Coleta, reported the loss of 30 White Leghorn pullets from hailstones. Even rabbits were killed. The damage is estimated at more than a half million dollars. According to reports no one in the storm's path was protected by hail insurance.

STATE OIL CO-OP SELLS 170 CARS

Twelve County Companies Now Affiliated; More To Join

ONE hundred and seventy carloads of gasoline, kerosene and lubricating oils have already been handled by the Illinois Farm Supply Co., the State cooperative engaged in centralized buying and selling for the county oil and supply companies. This is the encouraging report made recently by Manager Geo. R. Wicker. Additional orders totaling three carloads of lubricating oil will be filled shortly. This record was made in three months.

Favorable comments are coming in from members over the state who report that the fuel and motor oils are measuring up to the best of the old advertised brands. All fuel and motor oils are being brought on specifications subject to laboratory tests to insure their high quality.

Twelve county cooperatives are now affiliated with the state company, and six more are in the process of organization. Attractive savings are being made as a result of the large volume of business. These will be returned, after paying expenses, in patronage dividends to the member companies.

HEADQUARTERS TO BE ESTABLISHED

Replaces Peoria and Decatur Day In Recognition of Organized Agriculture

FRIDAY, August 26, will be known officially as FARM BUREAU DAY at the Illinois State Fair, this year. Official confirmation of the arrangement came in a telegram to President Smith from S. J. Stanard, State Director of Agriculture, just before going to press. No extensive exhibits or demonstrations have been planned but it has been definitely decided to set up headquarters and provide a check room where Farm Bureau and I. A. A. members may meet, rest, and exchange greetings. An effort will be made to bring out a large delegation of Farm Bureau members for this day.

W. L. COPE AND SONS ARE GOLF CHAMPS

W. L. COPE, fruit grower from Marion County and member of the I. A. A. Executive Committee from the 23rd district heads the greatest aggregation of farm champions in Southern Illinois.

In the recent golf tournament at Salem, Mr. Cope's two oldest sons, Loren and Howard placed first and second with scores of 74 and 76. The former also won the President's cup, the highest honor of the tournament. Mr. Cope, himself, won the contest for the best approach shot, one of the boys won the driving contest, and a young son, Allen clinched the family's supremacy by winning the horseshoe pitching contest held the same day. It was Cope's day. More than 100 competed in the sports program held at the Salem Country Club.

Following is the report of Don Robison, state superintendent of animal industry on the status of T. B. appropriation at the end of June, 1927:

APPROPRIATION		$2,000,000.00
Indemnity claims against the State paid since July 1, 1925	$1,101,215.87	
Amount of Federal claims paid by the State	231,675.87	
Expenses incurred since July 1, 1925	166,972.59	
Claims pending on 2,403 reactors secured since July 1, 1926, allowing $15 per head. (State share)	36,045.00	
Total claims and expenses paid and pending		$1,535,908.83
Free Balance of Appropriation		464,091.17

Henderson County's farm bureau baseball team defeated Warren county 4 to 0 on Saturday, July 9. The three Pence's, E. Pence, H. Pence, and C. Pence, who catch, pitch, and play left-field respectively were prominent in winning the game.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the farm bureau was organized, namely to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Edited by Department of Information, E. G. Thiem, Director, 608 South Dearborn Street, Chicago, Illinois. Entered as second-class matter October 20, 1925, at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Acceptance for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the ILLINOIS AGRICULTURAL ASSOCIATION RECORD. Postmaster: In returning an uncalled for or missent copy, please indicate key number on address as is required by law.

OFFICERS

President, Earl C. Smith.....Detroit
Vice-President, Frank D. Barton.....Cornell
Treasurer, R. A. Cowles.....Bloomington
Secretary, Geo. A. Fox.....Sycamore

We Draw a Goose Egg From Chicago

IN the heat of the debate on reapportionment in the legislature just closed, a prominent Chicago representative indulged in a ruthless tirade on the iniquities and lack of cooperation shown by the downstate legislators.

For campaign purposes or otherwise, Chicago legislators spoke fluently for more representation. Their goal was control of the General Assembly. They failed to get it. That hurt, and the cry of sectionalism, and lack of cooperation followed.

Let's examine the Chicago delegation on the same score. For our own information, the voting records of each legislator were checked on four major measures, namely, the gas tax, the state income tax, the Board of Trade control bill, and the Chicago tax raid measures. The first three were supported by the Illinois Agricultural Association, the last was actively opposed.

For affirmative votes on the first three and a negative vote on the last, a grade of 25 per cent each was allowed. Forty-seven representatives drew goose eggs on the test. Every one of these came from Cook county and practically the entire Chicago delegation was so recorded.

Here is a flagrant example of sectionalism. No downstate delegation ever voted so consistently against constructive measures, and in favor of one so destructive of economy and the State's welfare as the increased bonding bill. This is a fair sample of how the rest of the state would pay, and pay, and pay if Chicago were placed in the saddle.

Light from the East

"I AM one man from east of the Apalachian Mountains who believes in the principles of the McNary-Haugen bill," declared Dr. Clyde L. King, professor in the Warton School of Commerce, University of Pennsylvania, Philadelphia, in a recent address before the American Institute of Co-operation.

Dr. King is the Judge Landis on three large city milk markets in Pennsylvania. He is chief arbitrator between the milk producers and distributors in case of disagreement.

Such a statement coming from Dr. King is significant. He is no mere theorist like so many of his eastern neighbors. He has had experience in helping the Philadelphia milk producers solve their surplus problems. He knows something about the farmers' troubles. He admitted that he could think up more arguments against the McNary-Haugen bill than were presented in President Coolidge's veto message.

Nevertheless, he believes that western farmers are on the right road in advocating their surplus control plan. We congratulate Dr. King for his independence of thought in the face of the overwhelming eastern provincialism that surrounds him.

Help Stop Accidents

Nokomis, Ill., June 23:

One man was killed and five injured two miles east of here today when an Overland sedan suddenly swerved across the highway in front of a Litchfield car. The driver of the Overland had run off the pavement and while trying to get back on jerked the steering wheel quickly, throwing the car in the path of the other machine. Both cars were wrecked. The injured were taken to the hospital.

Such items from the newspapers are common. This one describes a familiar cause of many accidents on the state's paved roads. Boneheadedness, intoxication, or nervousness invariably result in grief, and here is an example of one or the other.

A movement to curb loss of life and property damage through education is now underway by our own mutual auto insurance company. Vernon Vaniman who has charge of the campaign believes that 75 per cent of such accidents are preventable. The American Farm Bureau is encouraging similar work among Farm Bureaus in other states. These efforts are tremendously worth while. We can all help by watching our own driving.

Our Privilege in 1928

"ROCK ISLAND county congratulates itself over the fact that the Illinois Agricultural association is to hold its annual convention in Rock Island in 1928. We are amply equipped to house the delegates to this important gathering of the agricultural interests of Illinois and consider ourselves privileged to be their hosts. We believe that nowhere in the state would the men who compose the membership of the farm bureaus be more cordially and sincerely welcomed. Through the Rock Island county farm bureau, which has been functioning successfully for years, we have a point of contact with this splendid state organization, and one of our representative farmers, W. H. Moody of Port Byron has been a member of its executive committee for a long period. Rock Island county is the home of many institutions which come into very close association with agriculture; indeed they have played a prominent part in the development of agriculture in the matter of farm implements, and in no small degree have contributed to its progress. The farm bureau

(Continued on page 8)

I.A.A. MEMBERSHIP GROWS STEADILY

Farm Bureau Never Stronger In Morale and Accomplishments

NEARLY 12 years after its birth, the Illinois Agricultural Association today is stronger in morale, potency, and accomplishment than at any time in its brief history.

The trend of membership is on the increase according to figures revealed recently by George E. Metzger, director of organization. Increases in membership in 38 counties during the past year amounted to a total of 4,105 over the previous three-year period. This is an average increase of 108 to the county. Mr. Metzger allows full credit for this remarkable showing to the members themselves working with their farm advisers to maintain strong, vigorous county organizations.

He sees in these results a vindication of the member-sign-member plan initiated some five years ago. A larger membership might have been signed through the paid solicitor plan but it is generally conceded that the training in leadership and improvement in morale resulting from the members bearing the responsibility of organization themselves, in paramount to all other considerations.

Better Feeling Evident

The records reveal that 24 counties obtained practically the same number of members as were signed three years ago. A loss was sustained in certain counties in the Chicago and St. Louis milk zones where the Farm Bureaus were blamed for initiating and promoting the tuberculin testing of cattle. This situation is regarded only as temporary. When such dairymen come to realize the importance of getting rid of tuberculosis for their own welfare, a reaction will take place that will eventually strengthen such county farm bureaus.

Dupage county, where opposition to the T. B. test hurt the last membership campaign, is already showing the effects of a changed sentiment. Here, the membership has grown steadily for the past eight or ten months until again the Dupage County Farm Bureau, in spite of extensive subdividing in the eastern section of the county has one of the strongest small county organizations in Illinois.

McHenry, Boone, Lake and Kane likewise are coming back and the turn of events is expected to result in larger Farm Bureau organizations in all these counties. The progressive thinking dairymen in this district who are working through the Pure Milk Association will eventually bring about improvements in both production and marketing conditions here that promise to bring untold benefits to the farmers of this section.

Collections High

L. O. Wise, farm adviser in Whiteside county, reports a growing membership. In the past two weeks, 10 new members voluntarily came into the Whiteside County Farm Bureau. There are now enough voluntary memberships coming in throughout the state, to more than offset the losses from death, moving out of the state, and retirements, according to Mr. Metzger.

Farm bureau collections of dues are the highest they ever have been. Collections have risen from approximate 50 to 60 per cent in 1920-21 to an average of 85 to 90 per cent today. Many counties report collections of 95 per cent and up of 1927 dues.

The counties showing increases in membership and the number in excess of the previous period are as follows: Adams, 167; Bond, 51; Brown, 8; Bureau, 109; Champaign, 125; Crawford, 50; DeKalb, 323; DeWitt, 53; Edwards, 60; Franklin, 41; Greene, 194; Henry, 140; Jackson, 35; Jo Daviess, 37; Knox, 157; LaSalle, 124; Lee, 78; Macoupin, 12; Madison, 108; Mason, 52; McDonough, 162; McLean, 652; Mercer, 3; Monroe, 104; Morgan, 157; Moultrie, 24; Massac, 204; Ogle, 200; Pulaski, 1; Richland, 3; Rock Island, 26; Scott, 91; Stark, 48; Vermilion, 29; Williamson, 28; Winnebago, 137; Woodford, 47; and Washington, 305. Washington and Massac counties, each become affiliated with the I. A. A. in the past year.

APPEL IS NEW BANKER HEAD

J. M. APPEL, of Highland Park was elected president of the Illinois Bankers' Association at the close of its thirty-seventh annual convention at Danville, June 24. Mr. Appel is president of the Highland Park State Bank and the Broadway National Bank of Chicago.

$75,000,000 A YEAR ALL FROM ICE CREAM

Ice cream consumption in the United States was nearly 2,000,000 gallons more than in 1925, but the consumption per person decreased from 2.80 gallons in 1925 to 2.77 gallons in 1926 according to the United States Department of Agriculture.

Ice cream production has increased remarkably in recent years. Estimated production in 1910 was 95,450,000 gallons; in 1920, 260,000,000 gallons, and last year it was 324,665,000 gallons, an increase in 16 years of 240 per cent.

Although ice cream manufacture is a small branch of the dairy industry, utilizing only about 3.8 per cent of the milk produced in the United States, the industry employs 50,000 persons and pays out in salaries $75,000,000 a year.

COUNTRY LIFE WEEK will be celebrated at the Michigan State College, East Lansing, July 30 to Aug. 5. Illinois farmers, county advisers and extension workers are invited.

AUTO INSURANCE AT HIGH MARK

More Counties Gain 20 Per Cent Quotas As Campaign Goes On

AUTO insurance applications received at headquarters approached the 5,000 mark shortly before going to press. The total of 4635 applications on July 8 is being added to at the rate of more than 100 per week, and before August 1, the 5000 mark will be exceeded according to predictions by Vernon Vaniman, in charge of the promotional work.

The ten district meetings for spreading the gospel of accident prevention and farm bureau insurance are now in full progress. These meetings were scheduled to close with the last at Centralia and Charleston on July 16. Discussion of all phases of auto insurance preparatory to staging an intensive drive during INSURANCE WEEK beginning July 25 was scheduled.

425 Per Month

Since the new mutual was launched April 1, policies have come in at the rate of 425 per month. Popularity of the new policy according to Vaniman is due in part to the fact that payment of the actual value of the car is made at time of loss by fire or theft. Knowledge that the company is owned and controlled by the Farm Bureau, with no persons privately interested for profit in the venture is another factor in its general popularity. Protection is extended likewise to anyone the owner allows to drive the car of legal age or 15 years old. Public liability protection may now be had up to $50,000 at small additional expense.

Claims numbering 107 had been received at the office up to June 30.

Many new counties have obtained their quotas of 20 per cent of the membership since the last report. Winnebago still leads with 347 policies signed, while LaSalle county is second with 242.

Other counties over the 100 per cent mark are Bond, Boone, Clinton, Cook, Dupage, Greene, Grundy, Johnson, Piatt, Stephenson. Other counties approaching the 100 per cent quota mark are Lee, Williamson, Washington, Rock Island, Pike, Morgan, Macon. The 12th congressional district leads with a total of 944 applications signed.

The 1927 Spring pig crop in Illinois is 7.6 per cent larger than that of last year says the State and Federal Departments of Agriculture. Increases in other corn belt states are Iowa 1.9 per cent, Indiana 8.1 per cent, Ohio 12.6 per cent, Michigan 13.6 per cent, Wisconsin 4.9 per cent, Missouri 5.6 per cent, and Kansas 6.4 per cent. Increases in bred sows for fall litters are 13.6 per cent for Illinois and 23 per cent for the corn belt.

Decreases were reported in three other Mid-West states. The rural mail carriers made the survey.

L. J. Quasey, Director,
I. A. A. Transportation Dept.:

"We received the railroad's draft covering the seed corn shortage. We appreciate your efforts immensely. I feel that your department gives the most real service and says the least about it of any."

B. W. TILLMAN,
County Agent, St. Clair County Farm Bureau

What the Counties Are Doing

TWENTY-ONE cars of limestone all in one train shipped over the I. C. R. R. were unloaded in Montgomery county on June 29-30. Farm adviser Alden Snyder and the agricultural department of the I. C. cooperated in putting on the project.

As the train pulled in to its destination near Litchfield, farmers were waiting to lend a hand to the train crews in getting the stone out of the cars.

The stone came in large coal cars fitted with tight self-dumping bottoms that let the stone slide out beside the track. Dumping places 40 feet long and 2½ feet away from the rails were skinned and made ready. Twenty to 30 minutes were required to dump each car. The limestone will be hauled away at leisure. Most of it will be spread on wheat and plowed ground this fall.

The limestone was shipped by the Dolese and Shepard Co., from their quarries in Northeastern Illinois. More than 12,000 tons were unloaded.

Williamson Picnic Aug. 25

Williamson county merchants will join with the farmers in a huge picnic to be held on August 25. Pres. Earl C. Smith of the I. A. A. will be the speaker of the day. Farm Adviser Dee Small believes in spreading the gospel of limestone and legumes through community meetings. "We are just starting a two-weeks campaign to drive home the value of crop rotations," he says.

Jersey Banner Township

Adviser Frank Shuman of Jersey county rises to present the name of Jersey Township as the greatest in Farm Bureau membership in the State. "This township has 138 members," he says. "Let's see someone show us a better record."

Scott Growing

Scott county has the fastest growing little farm bureau in Illinois. Five hundred and six farmers out of 700 in the county now belong to the Scott County Farm Bureau.

How Knox Did It

A 25 per cent cut in quadrennial farm land valuations in Knox County was declared at the April meeting of the Board of Review. This was accomplished through the efforts of the Farm Bureau tax committee working with its chairman, George Charles of Knoxville. Mr. Charles is treasurer of the County Farm Bureau, and a member of the Board of Review. The assessors have made most of the necessary reductions.

T. B. TESTING MAKES HEADWAY

WHILE more than 1,000,000 dairy cattle out of 30,000,000 head tested for tuberculosis have been destroyed, the industry is in better condition today than it was ten years ago when the campaign against the disease was inaugurated. This was the opinion of Dr. John R. Mohler, chief of the Bureau of Animal Industry, U. S. department of Agriculture, at the recent Eastern States Tuberculosis Conference. He also stated that the annual consumption of milk in the United States has increased more than 49 quarts per capita since 1918. During 1926 the public consumed 56 billion pounds of milk and cream, an increase of two billion pounds over the quantity consumed in 1925.

To date 874 cities have tuberculin-testing ordinances and 375 provide an option between the tuberculin test and pasteurization.

POOR WIRING STARTS MANY FARM FIRES

A CONDITION that exists to a greater or less extent in practically every rural community was revealed during the recent inspection of farm properties in Sun Prairie Township, near Madison, Wis. In a number of instances, electric wiring of dwellings was found in very poor condition, especially on farms where the wiring had not been up to the proper standard originally, or the insulation had worn off from one cause or another. In other cases, it was found that while the original wiring had been properly installed, extensions had been made by inexperienced persons, who did not realize the necessity of proper insulation when running the wires through partitions, or along the ceiling or floor of the building.

Another defect discovered by the fire preventionists, and one that not infrequently causes fire, was the overloading of the circuit. Originally installed for lighting purposes only, extensions to electric irons, washing machines, or other devices had been made from time to time, with the result that the system was taxed far beyond the limit of safety.

Attention is called to the fact that the most important part of an electrical equipment and the one least understood, as a rule, is the fuse plug, which is the safety valve of the system. An overloaded electric wire becomes heated and the greater the quantity of the current the higher the temperature. The rubber insulation on the wire vulcanizes when subjected to high temperature and loses its insulating value. To care for this contingency, the fuse is placed in the electrical circuit.

HOW THE SEAWAY WILL AID FARMER

Eight reasons for building the Great Lakes-St. Lawrence Seaway to benefit the farmer, according to the St. Lawrence Tidewater Association, are as follows:

First—It will cheapen the cost of carrying to market the food stuffs he exports.

Second—It will establish a new and higher level of prices for food stuffs he sells at home.

Third—It will give him a wider range of markets, and enable him to select a wider variety of crops adapted to such markets.

Fourth—It will give to all lines of regional excess production a wider marketing field, and will help to prevent local market gluts within this country—gluts that work havoc with producer prices throughout the area of surplus production, and that bring loss and farming instability to farmers within the regions of food supply shortage.

Fifth—It will extend to the farmer the benefits of lower transportation costs on imports consumed on the farm.

Sixth—The St. Lawrence Seaway will promote the growth of industries and of consumer population closer to the central area of farm production, thereby moving the factory closer to the farm and the consumer closer to the producer.

Seventh—It will benefit the farmers of the Atlantic, Gulf and Pacific coasts by placing their products within reach of the interior by direct, low-cost water transportation.

Eighth—It will help to stabilize American agriculture as a whole by stimulating a better distributed, more orderly, more efficient, and a steadily expanding home market. It will help to stabilize American agriculture as a whole by providing the best possible means for direct trade connection and low cost transportation to all surplus-consuming markets throughout the world.

GAS TAX GOES INTO FORCE ON AUGUST 1

ENFORCEMENT of the gas tax on Aug. 1 is predicted in spite of attempted injunctions by organized motorists to hold it up.

Forms for keeping records of all gasoline used in stationary engines, and tractors are being drawn up at this writing and should be ready for distribution by the end of the week, or by July 16. I. A. A. members are advised to write to the Department of Finance, State House, Springfield, Ill., for a supply in case the local oil distributor or filling station does not offer them.

All applications for rebates on gasoline not used in motor cars must be made within six months of time of purchase.

I. A. A. PICNIC, MOOSEHEART, AUG. 11, LOOMS AHEAD

I. A. A. Briefs

THE National Cooperative Milk Producers' Association, with headquarters at Washington, will assist the Pure Milk Association in working out its plan of organization in the Chicago milk zone. This was decided by the board of directors of the National Association at their recent meeting in Chicago.

An effort will be made to secure the cooperation of all organized dairymen in the Chicago milk shed toward stopping indiscriminate inter-market shipments of milk and cream. Orderly marketing and merchandising with controlled production will be sought. The dairy marketing department of the Illinois Agricultural Association was instrumental in bringing the problem and the need for united action to the attention of the national authorities.

A PRELIMINARY hearing on the question of discontinuing free telephone toll service between certain exchanges in Morgan, Scott and Greene counties was held recently at Jacksonville. The telephone companies interested petitioned the Illinois Commerce Commission claiming they needed more money to pay dividends. Farm advisers Fisher and Laible, Congressman Henry T. Rainey, and L. J. Quasey of the I. A. A. represented the farmer subscribers. Mr. Quasey will prepare briefs on the case for presentation at the next meeting.

New stock pens were installed recently at Ridgway in Gallatin county following an appeal to the railroad by the I. A. A. Transportation Department.

A reduction in freight rates on peaches from points on the I. C. R. R. south of the B. & O. in Southern Illinois to Mississippi Valley points was secured recently. The reduction amounts to seven cents a hundred, or $16.80 per car.

L. B. Palmer, president of the Ohio Farm Bureau, is the new secretary of the American Farm Bureau Federation. He succeeds Frank Evans who will return to his home in Utah.

The American Farm Bureau reports assets of $50,000 with practically no liabilities. This is a decided improvement over the financial condition of 1923 when the Federation was in debt $50,000. During the first six months of 1927, the Federation received fees from 31 states.

A. B. Leeper, director of fruit marketing, is aiding in the formation of a fruit and vegetable marketing unit in Saline county. "We will be busy marketing the peach crop throughout July and August," says Leeper.

The cheese producers of Illinois have appealed to the I. A. A. Dairy Marketing Department for help in federating and organizing a central sales agency. There are more than 160 cheese producers' associations in Illinois, each of which sells its products independently.

The Bloomington Milk Producers' campaign of organization is nearing completion. The Association is expected to start operating shortly. The Dairy Department is assisting in getting the new cooperative started and is expected to provide managerial service.

New dairy and poultry shipping and bargaining associations are in the process of organization at Bloomington, Bement, Milford, Cissna Park, Toulon, and Galva. Frank Gougler of the Poultry and Egg Marketing department is giving his time to this work.

Ray E. Miller, Director of Livestock Marketing, will assume his new duties August 1. He will visit the Producer Commission Associations at Chicago, St. Louis, Peoria, and Indianapolis, after which a series of district meetings will be held over the state to secure the cooperation of the county farm bureaus in carrying out the new program of coperative livestock marketing.

Details of legislative measures drawn by Donald Kirkpatrick and R. A. Cowles of the I. A. A. Special Grain Marketing Committee will be presented in the August issue of the RECORD.

Harvey Sconce of Vermilion county, reporting on the facilities offered for shipping and handling grain down the Mississippi River to New Orleans, has recommended that the I. A. A. appeal to officials of the federal barge line toward establishing a modern transfer elevator at Cairo.

COMMITTEES ACT IN PREPARATION

Baseball Diamond and Horseshoe Courts Made Ready For Contests

WITH only three weeks to go in preparation for the Eighth Annual I. A. A. picnic, committees and officials in charge of the event are bending to their tasks in making it a memorable one in agricultural history.

Out on the Moose reservation on the banks of Fox River, there is much speculation and more expectation of the coming State farm gathering on August 11. How many will be there seems to be the popular question. Fifty thousand is the optimistic estimate of the committee in charge. They are preparing for that many so don't disappoint them. The fear that August 11 may catch the corn belt in the midst of oats and wheat harvest is disquieting. Sizable crowds have come out to previous picnics, however, in spite of harvest, hail, or high water, and so the prophets are foretelling that all records will be smashed when Mooseheart opens its doors to the organized farmers of Illinois.

Preliminary plans call for the State championship baseball contest in the morning at 10. Horseshoes will start flying an hour before to continue until late afternoon.

Homer McCoy, Mooseheart's farm manager, says that all the pigs on the section will be shut up to prevent a stampede when the hog callers send forth their W-H-O-O-E-Y-S, P-E-E-G-I-E-S, and P-I-G-O-O-E-Y-S.

As the time and place of the other events are decided upon they will be released through the press and radio. For those who cannot come, the radio will be used to impart a picture of the crowds and contestants in action. City farmers from Chicago will mix with their neighbors from downstate. Invitations will be sent to all agricultural groups and organizations in Chicago.

In the afternoon, Senator Kenneth D. McKellar, Democrat, and farm leader from Memphis, Tenn., will lead the speakers. He will speak from the rostrum of the campanile or main building at the entrance to the grounds.

The ladies' program in the auditorium will be held in the morning as in previous years.

Professional umpires for the State championship baseball game have been engaged from the Midwest Umpires League, Chicago.

Army airplanes will be used this summer in the Pacific Northwest to protect national forests against fire.

I. A. A. TO BROADCAST FROM STATION WJJD DAILY

PROGRAM OPENS ON JULY 18

To Have Fifteen Minute Period Betwen 12:00 and 12:15 P. M.

THE Illinois Agricultural Association will be on the air again daily by the time this issue of the RECORD is off the press.

A 15-minute program beginning at 12 o'clock noon was arranged recently with Station WJJD, owned and controlled by the Mooseheart Foundation. Preliminary to the official opening on Monday, July 18, the period will be used in announcing the coming program and news of the Association.

The radio connection with the Mooseheart station follows an invitation extended by the latter six months ago. An official agreement signed by officers of the Loyal Order of Moose and the I. A. A. insures the latter freedom of speech and unhampered use of the 15-minute period for a definite time after which either party may cancel on due notice.

Wave Length 370 Meters

Station WJJD operates on a wave length of 370 meters. It is on the Radio Commissioner's preferred list and is included in a small group of the most powerful stations in the United States.

WJJD divides time with Station WEBH at Edgewater Beach. Both have the same wave length but broadcast from different stations. Musical programs of the stations are in charge of the Chicago Herald-Examiner. For the present, the I. A. A. period will be devoted to speaking. News of the Association, educational talks from staff members and others, crop reports, and the truth about the I. A. A.'s interest and activity in legislation and controversial questions will be told fearlessly.

Delay in getting the program under way earlier in the year due to uncertainties of new wave length and power allotments by the Radio Commission.

Send Letters

"There is nothing in the way now to hinder us in developing the most powerful station in the Middle West," said C. A. Howell, radio director for the Mooseheart foundation, recently. "We have been assured by the Radio Commission that if we need more power to reach out over the country we can get it. We are ready to spend whatever money is necessary.

"Our letters from over the state indicate that we reach every section of Illinois."

Comments from members will help us in checking up on reception. Letters are invited giving news of local and county organizations, community clubs, meetings and other events.

Preparation of programs and broadcasting will be in charge of the Director of Information.

When Chicago goes back on Standard Time in October, the period can be changed to 12:30 p. m. or later if listeners find such advisable. All letters should be addressed to George Thiem, radio director, 608 South Dearborn St., Chicago.

HAIL INSURANCE HITS $2,755,000

HAIL insurance written in 1927 already has exceeded that for 1926 by $1,155,000 according to a report submitted by George Tullock, chairman of the Business Service Committee, on July 8.

On that date, a total of $2,755,000 of hail coverage was in force on Illinois farm crops, and an additional coverage totaling $652,000 on fruit and garden truck. On June 29, Western Illinois counties were leading in the amounts subscribed with Henry, Mercer, Knox, Madison, and Warren counties in the order named.

Statistics reveal that in 1926 farmers were saved from $8 to $13 per $1,000 of hail insurance through the mutual company. The cost last year was $22 per $1000 of insurance coverage.

95 PER CENT OF BORERS KILLED

DESTRUCTION of more than 95 per cent of the European corn borers is the estimated result of a four months intensive spring campaign in defense of the nation's corn crop according to the United States Department of Agriculture. This campaign in New York, Pennsylvania, Ohio, Michigan, and Indiana is one of the most intensive ever waged against an insect pest in the United States. It was begun March 14 under authority of an act of Congress appropriating $10,000,000 for control of the borer, after the necessary legislation had been enacted by the States concerned.

Our Privilege in 1928

(Continued from page 4)

idea meets with support in Rock Island county, and it will be a pleasure for our people to meet the leaders of this great movement. This is to be their privilege because of the united efforts of Mr. Moody, our farm advisor, Sidney S. Carney, and Walter F. Archer, secretary of the retail bureau of the Rock Island chamber of commerce, strongly supported by leading business men. The convention is to be held in January and will bring in all probability more than 3,000 delegates to this community. The new year could hardly open more auspiciously.—Rock Island (Ill.) Argus.

ILLINOIS BANKERS WORK WITH I. A. A.

Express Approval of Committee's Action In Cooperating With Association

THE following resolutions adopted at the 37th annual convention of the Illinois Bankers Association, June 24, at Danville reveals the cooperative spirit and close working relationship existing between the bankers and the Illinois Agricultural Association:

"Of the many situations affecting our economic and social welfare, not only in Illinois, but throughout our country, none has more troublesome aspects than that in which agriculture finds itself. The causes are well known and need not be catalogued. Suffice to say that after these eight years since the World War, the farmer's crop dollar remains below the purchasing power of the industrial dollar. Equilibrium has not been restored to his relationship with industry, merchandising and manufactures. On the average the income from the farmer's investment of capital and energy in his business is not equitable.

"As banks are necessarily and inherently connected with, and their prosperity is based on the success of all legitimate business, and none more than agriculture, it, therefore, behooves us to give earnest consideration to all corrective and constructive measures.

"We charge the officers of our Association with the responsibility for close cooperation with the Illinois Agricultural Association and other agencies dealing with relief for agriculture. Our Association should give most carecul study to any plans proposed and lend its emphatic support to any sound proposal for the ultimate good for this fundamental Illinois industry, and we heartily approve the work of the committee on Agricultural Relations as shown by its report of the current year.

"As stated by President Crawford, the Committee on Agricultural Relations has sought to consistently pursue a course of cooperation with the established and recognized leaders for the solution of our farm problem, and we respectfully refer the suggestions contained in the splendid address of Mr. Chas. A. Ewing to the thoughtful consideration of the Administrative and Agricultural Committees."

I. A. A. AUDIT SERVICE TO HELP IOWA BUREAU

FRED E. RINGHAM of the I. A. A. audit service is on his way to Iowa to help the Iowa Farm Bureau Federation set up an accounting system for their supply department. The request for aid came through President Charles Hearst. The I. A. A. audit service was organized three years ago.

SPECIAL LEGISLATIVE NUMBER

The Illinois Agricultural Association RECORD

Issued Every Month for 63,000 *Thinking* Farmers

Volume 5 AUGUST, 1927

618-01
MISS MARY G. BURWASH, LIBR'N.
COLLEGE OF AGRI.,
UNIVERSITY OF ILL.
URBANA, ILL.
NL

Our Program in the 55th General Assembly

By The I. A. A. Legislative Committee

THE legislative policy of the Illinois Agricultural Association in the fifty-fifth General Assembly was adopted after much deliberation and study into the needs and rights of the farmers of the state. It was not a selfish policy. It sought to impose no hardship on any class or group. It had in mind the interest of the public at large but it recognized certain inequalities imposed upon farmers by present laws which it hoped to amend or adjust through the measures sponsored.

GAS TAX AND SECONDARY ROADS

ILLINOIS, through the adoption of two bond issues, is engaged in building the finest system of primary roads in the world. All automobile owners in the state are contributing to that system through auto license fees. However, when that system is completed more than seventy-five per cent of the farmers will not have reasonable connection with these highways. A real farm-to-market road system would still be far from an accomplished fact.

It has been apparent for many months that available funds from the $100,000,000 bond issue would not be nearly sufficient to complete this system within a reasonable period of time. It appeared necessary, therefore, to provide additional funds if we were to secure a prompt completion of this primary system. Recognizing these facts, the Illinois Agricultural Association, in its last annual meeting, endorsed a two-cent gasoline tax provided the funds derived therefrom were used for two purposes: namely, the completion of the bond issue system within a reasonable period of time, and the building and maintenance of a secondary system of highways. It further provided that the division of this fund should be made in an equitable manner.

Early in the session of the 1927 legislature, considerable discussion developed relative to a gasoline tax law. Representatives of the Illinois Agricultural Association sat in several conferences with those sponsoring a gasoline tax. Our position was made known repeatedly but it did not seem to meet with much favor from influential sources. Accordingly, administration bills were introduced in both houses levying a two-cent tax on all gasoline used for motor vehicles and providing therein that all the funds derived from such a tax should go towards the completion of the bond issue system. Representatives of the Association were convinced these bills had practically no chance of passage and predicted their early defeat.

First Bill Withdrawn

The bill was first tried out in the Senate and in the face of certain defeat was withdrawn from the calendar by proponents of the bill. Immediately thereafter, our association was approached and requested to make known the amendments that would be necessary to secure our support. We prepared the amendments necessary to embody the principles of such a law as authorized by our expressed position in resolution, and presented them to the house committee on roads and bridges. After being carefully explained to the committee by our representa-

THIS issue of the RECORD is devoted almost entirely to the major legislation in which the Illinois Agricultural Association was particularly interested in the 55th General Assembly. Never before has the I. A. A. put forth so great an effort in behalf of the farmers of Illinois as it did this year at Springfield. Staff members were called upon freely for assistance in drafting legislation, and in studying and reporting upon measures presented by others. This is the first time in the history of the Association that so complete a report to the members has been attempted. It marks the adoption of a policy to tell the whole story without bias or prejudice, and to set forth the voting records of each senator and representative. Credit is given where credit is due. Censure of legislators is withheld except in those cases where there was a clear-cut violation of confidence and betrayal of agricultural constituents and their interests.

Members are urged to read this report carefully, and to examine with a critical eye the records of their representatives. File the information away and use it as a basis for future voting. It is only by intelligent voting and coordinated, determined effort that we can expect to secure recognition of our rights and justice for the great industry we represent.—Editor.

WHY WE SUPPORTED THE STATE INCOME TAX BILL

tives, they were voted out by an overwhelming majority, and from that time on, the gasoline tax had the active support of the Illinois Agricultural Association.

Early in consideration of the measure, it developed that the lines were tightly drawn between the larger cities of the state and the more rural districts. Most of the city newspapers aggressively opposed the measure. So did the Chicago Motor Club. Farmer representatives were continually charged with asking the city motorist, not only to complete the bond issue system, but to construct and maintain the secondary road system.

What's In Bill

This amended bill contains the following provisions:

1. It levies a tax of two cents per gallon on all gasoline used in motor vehicles on the highways of Illinois.

2. It provides exemption for gasoline used for agricultural, industrial, and purposes other than in motor vehicles used on the highways.

3. It provides for the prompt completion of the bond issue system (one-half of the tax going for that purpose), thereby removing to a large degree the element of politics in designating which roads shall be completed.

4. It recognizes the secondary roads as a part of the state highway system. One-half of the gasoline tax goes back to the counties on the basis of the automobile license fees coming from such counties for the construction and maintenance of state aid roads.

5. It provides that county boards shall designate the state aid roads for improvement from this fund. However, the construction and maintenance of such highways is to be subject to the approval of the State Highway Department.

6. It provides that funds derived from the gas tax may be used to pay the principal and interest on county road bonds where such bonds have been issued for the construction of state aid roads, and where such roads have been built according to approved specifications.

7. It provides that county boards may, by resolution, use the funds derived from the gas tax to replace funds now levied against property for state aid road maintenance.

A close study of the following roll calls reveals and confirms our statement: The vote in the House was as follows:

YEAS—Acker, Allen, Arnold, Babb, Baker, Bauer, Baxter, Beckman, Branson, Bray, Breen, Browne, Bush, Choisser, Chynoweth, Cork, Corzine, Cutler, Davis, Eckley, Eisenbart, Ewing, Fahy, Foster, Hanley, Harrell, Hawkins, Hoar, Hoff, Hunter, Hutson, Jackson, Jenco, Johnson, E. A. W., Johnson, G. J., Kasserman, Kersey, Lager, Lipka, Lohman, Luckey, Malloy, Martens, Martin, McAdams, McCarthy, McCaskrin, Mester, Moore, O'Hair, Petri, Phillips, Porter, Reeves, Rennick, Rew, Rice, Robbins, Robinson, Roe, Rush, Ryan, Ed., Searle, Snell, Soderstrom, Sparks, Stanfield, Stewart, Teel, Tice, Trandel, Turner, C. M., Turner, S. B., Vaughan, Waller, Warren, Weiss, Whitely, Wilson, Wood, Wright, and Scholes.

NAYS—Baird, Bippus, Boyle, Bruer, Castle, Church, Clark, Coia, Devine, Douglas, Elrod, Fekete, Finneran, Franz, C. D., Franz, Matt., Gallas, Garriott, Gill, Gormley, Green, Griffin, C. A., Griffin, John, Hennebry, Holmgren, Holten, Hrdlicka, Igoe, Jacobson, Juul, Krump, Lee, Lyon, Marinier, McClugage, McSweeney, Miller, Minsky, Mugler, Murray, Noonan, O'Brien, O'Grady, O'Neill, Pacelli, Peffers, Perina, Powers, Propper, Rategan, Ryan, Frank., Schnackenberg, Shanahan, Steven, Swanson, Turner, E. W., Weber, Weeks, Wylie.

Here's Senate Vote

The bill was taken up promptly in the Senate and passed second reading without further amendment. On the vote on third reading, the bill failed to pass lacking one vote of the required constitutional majority. On the following legislative day a motion to reconsider the vote by which the bill failed to pass was carried and on a second roll call the bill passed by a vote of 30 to 19. On this roll call the members of the Senate voted as follows:

YEAS—Bailey, Barr, Bohrer, Boyd, Brown, Burgess, Carlson, Courtney, Cuthbertson, Deck, Flagg, Forrester, Haenisch, Hamilton, Jewell, Joyce, Lantz, Leonardo, McNay, Marks, Meents, Meyers, Roberts, Searcy, Smith, Sneed, Telford, Van Lent, Wilson, and Wright.

NAYS—Abt, Barbour, Boehm, Broderick, Carroll, Dailey, Denvir, Dunlap, Emmons, Hicks, Huebsch, Hughes, Kessinger, McDermott, Mason, Reynolds, Starr, Steinert, and Woods.

It is the opinion of those in touch with the legislative situation that the gasoline tax just passed is the best possible arrangement obtainable under present conditions. They believe further that at no future period would as satisfactory an arrangement have been possible.

The large cities have already been supplied with roads and have lost interest in the rural requirements. If this program had been deferred two more years, other communities would have grown cold to those needs. Never again would we have been able to secure substantial recognition for secondary roads.

We have made possible through the gas tax a comprehensive road program. The farmer's end of the road has been recognized. We may now look forward to the development of a real farm-to-market system of roads.

INCOME TAX--A TAX BASED ON ABILITY TO PAY

EXPERIENCE in the tax amendment campaign of 1926 demonstrated the extreme difficulty of securing tax reform through a change in the state constitution. It will be recalled that in that fight, although a large majority of those voting on the proposition voted in favor of the amendment, it failed to carry because of the Constitutional requirement that an amendment must receive a majority of all votes cast in the election.

It has long been generally conceded that a uniform property tax cannot be made to apply equitably to property conditions as they now exist. Under its operation taxes have borne down each year more heavily on tangible property until conditions are becoming unbearable.

In view of this situation, and because an amendment to the Revenue Article could not be submitted until the next General Assembly, it was thought advisable to see what could be done under present constitutional provisions. A state income tax bill accordingly was introduced in each House. In the Senate it was sponsored by Senators Lantz, Deck, and Sneed and in the House by Representative Arnold.

What It Provided

This bill in its final form provided for a tax of one per cent on net incomes up to $5,000; it allowed an exemption of $1,500 in case of unmarried persons and $3,000 in case of married persons or heads of families; and it provided for an additional exemption of $500 for each child under eighteen years of age, or other dependent. It provided a tax of two per cent on additional net incomes of $5,000 to $10,000, and three per cent on additional net incomes above $10,000.

It allowed the taxpayer to deduct his property taxes from his computed income tax. In case a man paid taxes on property, either real or personal, he must have received a very large income before he would be required to pay an income tax. The purpose of the measure was to secure contribution to the cost of government from persons of substantial incomes who, because they pay no property tax, contribute nothing directly to the cost of government.

READ ABOUT THE RAID ON THE ILLINOIS TAXPAYER

For example, take a married man with two children and a net income of $10,000 including exemptions:

Total income after deducting ordinary expenses	$10,000
Ordinary exemption	3,000
Additional exemption for children	1,000
Taxable net income	6,000
Tax on the first $5,000 at one per cent	50
Tax on the remaining $1,000 at two per cent	20
Total Income Tax	70

Taxes on any property paid by the taxpayer cited above would be credited against the income tax. A property tax of only seventy dollars would completely wipe out the tax on his income.

Killed In Committee

The House Bill was killed in the Revenue Committee of the House without the courtesy of a hearing. One-half of the members of this committee were from Chicago. The Senate Bill, on the other hand, was promptly passed out with a favorable recommendation, and with but two dissenting votes.

The introduction of the income tax bill created much protest which came mostly from the Chicago press. The opposition to the bill emanated largely from two sources, as follows:

(1) Those who were honestly or wilfully misinformed.

(2) Those who now pay no direct tax but whose incomes are sufficiently large to compel them to pay a tax had the bill become a law.

When the bill was considered on second reading in the Senate an amendment was adopted attaching a referendum to the measure. In spite of this weakening amendment, the Association determined to press the bill for passage. The amended bill, at least, would have furnished an opportunity to get an interpretation of the powers of the legislature with reference to the income tax under the present constitutional limitation.

How They Voted

The bill was passed by the Senate with a vote of 30 to 18. The roll call follows:

AYES—Abt, Bailey, Barr, Bohrer, Boyd, Burgess, Carlson, Cuthbertson, Dailey, Deck, Dunlap, Emmons, Flagg, Forrester, Hamilton, Hicks, Jewell, Kessinger, Lantz, McNay, Meents, Meyers, Searcy, Smith, Sneed, Swift, Telford, Thompson, Wilson, Wright.

NAYS—Barbour, Boehm, Carroll, Courtney, Denvir, Haenish, Huebsch, Hughes, Leonardo, McDermott, Marks, Mason, Reynolds, Roberts, Starr, Steinert, Van Lent, Woods.

The following down state Senators who voted for the bill on final passage also voted for the amendment attaching the referendum to the act:

Searcy, Dailey, Hicks, Kessinger, Wright.

The bill thus went to the House where it was handled by Rep. Reed Cutler. The same revenue committee that killed the bill earlier in the session passed the bill out with favorable recommendation after a fierce struggle.

At this point the Chicago press hurled charges of trading support on various bills. These charges were entirely without foundation. The Association was party to no deal with any political combination. It based its support or opposition to various measures strictly on the merits or demerits of the pending measures.

After the bill was placed on the calendar repeated attempts were made to secure consideration but without success. Consideration was postponed from time to time until it was caught in the famous filibuster on the bonding bills. On the morning of the last day of the session Association representatives awakened to find that the income tax bill had disappeared from the calendar.

The Last Fight

Late that last night, Representative Arnold made a motion under Rule 12, supported by more than five members, to call the bill up. Seventy-seven votes were required to carry this motion. The roll was called and the motion was lost 67-67. Following is the roll call:

AYES—Acker, Allen, Arnold, Babb, Baker, Bandy, Bauer, Baxter, Beckman, Branson, Bray, Bruer, Bush, Chynoweth, Cork, Corzine, Cutler, Davis, Fahy, Foster, Green, Hanley, Harrell, Hawkins, Hennebry, Hunter, Hutson, Jackson, Johnson, G. J.; Kasserman, Lohmann, Lager, Little, Luckey, Martens, Martin, McAdams, McCarthy, McCaskrin, McClugage, Mester, Miller, Moore, O'Hair, O'Neill, Phillips, Porter, Rennick, Rew, Rice, Robbins, Robinson, Roe, Rush, Searle, Sinnett, Soderstrom, Sparks, Stanfield, Teel, Tice, Turner, C. M.; Vaughan, Waller, Warren, Whitely, Wright.

NAYS—Baird, Bippus, Breen, Browne, L. O'N.; Castle, Church, Clark, Coia, Curran, Devine, Douglas, Durso, Eckly, Eisenbart, Elrod, Ewing, Fekete, Finneran, Franz, Matt; Gallas, Garriott, Gill, Gormley, Griffin, C. A.; Hoar, Holmgren, Holten, Hrdlicka, Igoe, Jacobson, Jenco, Johnson, E. A. W., Jewell, Kersey, Krump, Lee, Lipka, Lyon, McSweeney, Minsky, Mugler, Murray, Noonan, O'Brien, O'Grady, Overland, Pacelli, Peffers, Perina, Powers, Propper, Rategan, Ryan, Frank; Schnackenberg, Shanahan, Snell, Steven, Stewart, Sullivan, Swanson, Trendel, Turner, E. W., Weber, Weeks, Weiss, Wilson, Wylie.

Recorded as not voting—Boyle, Choisser, Franz, C. D.; Goode, Griffin, John, Hoff, Malloy, Marinier, Petri, Placek, Reeves, Ryan, Ed.; Turner, S. B.; Van Norman, Wood and Scholes.

Although the income tax bill failed to pass, much good was accomplished by its introduction. The whole tax problem received a tremendous amount of discussion in the press of the state. The inequality of the tax situation was never brought more clearly before the minds of the people. Never before has an income tax bill passed either House though one has been frequently introduced.

It is generally admitted by tax authorities that there is no fairer measure of a man's ability to pay taxes under modern conditions than the income he receives. This is not the time to feel discouraged. With continued effort extending even to the polls, we may look forward to a fairer taxing policy in Illinois in the near future.

THE RAID ON THE TAXPAYER'S POCKETBOOK

ON THE 17th of May, thirty-three days before the traditional final closing day of the General Assembly, the Chicago administration threw into the hopper 112 bills purporting to deal simply with the Chicago revenue situation. As a matter of fact, these bills as originally introduced would have doubled the bonding power of every taxing body in the state.

What was generally known as the key bill, S. B. No. 446, changed the basis of assessment from half to full value. The other bills cut the maximum tax rates in half. Mr. Watson, Tax Director of the Association, believed that the upsetting of the tax system, due to the passage of these bills, would result in greatly increased taxation. He based this opinion on past experience in Illinois.

These bills came into the General Assembly as the session was approaching its close with a crowded calendar and much major legislation demanding consideration. From the time of their appearance, these measures consumed almost the entire attention of the Assembly to the detriment of other legislation. The session ran two weeks longer than usual. Even then many important bills died on the calendar, including a number of great interest to agriculture.

HOW POLITICAL PRESSURE WHIPPED VOTES INTO LINE

Bills Rushed Through

Representatives of the Illinois Agricultural Association recognized the dangerous possibilities of this legislation and immediately organized to defeat its passage. A joint hearing was called by the Revenue Committee of both Houses. I. A. A. representatives appeared at this hearing and called attention to past experience and predicted that this upsetting of the basis of taxation would certainly result in greatly increased taxes, even though property taxes were already unbearably high. At the close of the joint hearing the Senate Committee met, and ignoring the question of a quorum raised by Senator Flagg, passed the bills out with favorable recommendations.

These bills were ruthlessly rushed through the Senate. The key bill passed the Senate by a vote of 27 to 20, with a bare one vote more than the constitutional majority required.

Following is the roll call:

AYES—Barbour, Barr, Boehm, Broderick, Carlson, Carroll, Courtney, Dailey, Deck, Denvir, Haenisch, Hicks, Huebsch, Hughes, Joyce, Leonardo, McDermott, Marks, Mason, Roberts, Searcy, Starr, Steinert, Swift, Van Lent, Woods, Wright.

NAYS—Abt, Bohrer, Boyd, Burgess, Cuthbertson, Dunlap, Emmons, Flagg, Forrester, Hamilton, Jewell, Lantz, McNay, Meyers, Reynolds, Smith, Sneed, Telford, Thompson, Wilson.

Fight Begins

With the passage of the key bill in the Senate the fight began in dead earnest. About that time the Farm Bureau presidents were called in and members of both Houses were interviewed by representatives of the folks back home. This had a wonderful effect and the bills met with a cool reception in the House.

The Chicago administration began to marshal its forces and every known means to get votes was used. After a bitter struggle in committee, the bills were passed out with favorable recommendation and the fight became intense.

From the introduction of the bills, the Illinois Agricultural Association exerted its every effort to defeat them. They were aided by a few civic organizations, including the Chicago teachers and others. The Chicago administration was at this time receiving some support from down state cities.

In spite of Chicago's strength and influence the Illinois Agricultural Association was able to deliver a body blow to the bills on the afternoon of June 21, when a roll call was had on a motion to strike the enacting clause which would have killed the bill. On this roll call the forces back of the bill were routed by a vote of 70-62.

Study This Record

The following roll call resulted on a motion by Mr. Schnackenberg of Chicago, to table the motion offered by Mr. Warren, to strike the enacting clause from the bill. Those voting in the *affirmative* are those who favored the bonding bills, those voting in the *negative* are the men who opposed the passage of the S. B. 446.

AYES—Baird, Beckman, Boyle, Church, Clark, Coia, Cork, Curran, Cutler, Douglas, Durso, Eckley, Elrod, Ewing, Franz Matt., Gallas, Garriott, Gill, Gormley, Griffin, C. A.; Hoar, Holmgren, Hrdlicka, Jacobson, Johnson E. A. W.; Juul, Kersey, Krump, Lee, Lipka, Lyon, Marinier, Martin, McCarthy, McCaskrin, McSweeney, Minsky, Mugler, Murray, Noonan, O'Brien, O'Grady, Overland, Pacelli, Perina, Phillips, Powers, Propper, Rategan, Rew, Ryan, Frank; Shanahan, Soderstrom, Steven, Stewart, Swanson, Trandel, Turner, C. M., Turner, E. W.; Weber, Weeks, and Weiss.

NAYS—Acker, Allen, Arnold, Babb, Baker, Bandy, Bauer, Baxter, Bippus, Branson, Bray, Breene, Browne, Bruer, Bush, Castle, Choisser, Corzine, Davis, Devine, Eisenbart, Fahy, Fekete, Finneran, Foster, Franz C. D.; Greene, Hanley, Hennebry, Holten, Hunter, Hutson, Igoe, Jackson, Johnson G. J.; Kasserman, Lager, Little, Lohmann, Luckey, Martens, McAdams, McCluggage, Mester, Miller, Peffers, Petri, Porter, Reeves, Rennick, Rice, Robbins, Robinson, Roe, Rush, Schnackenberg, Sinnett, Snell, Sparks, Stanfield, Sullivan, Teel, Tice, Vaughn, Waller, Warren, Whitely, Wilson, Wood, and Wylie.

Chaos and Disorder Reign

Here lack of control of the machinery of the House was fatal to the interests of the taxpayers of Illinois. Before the killing operation could be completed beyond hope of resurrection, the House was adjourned under the most arbitrary use of the gavel ever witnessed by veteran members. When the motion to adjourn was made there were at least twenty members on their feet demanding a roll call. The Constitution provides that where five members demand a roll call the request shall be granted.

In spite of the demand of the score of members; in spite of the Constitution; bang went the gavel and the House was adjourned. The clever wielder of the gavel in this instance was William Weiss of Lake County who was called to the Speaker's chair just as Senate Bill 446 was called for consideration.

At this time the votes of House members were reflecting the best judgment of the members and representing the interests and sentiment of the folks back home. Reference to this vote shows that the proponents of the bill still lacked 15 of the required 77 votes to pass the bill.

Much Night Work

At the evening session of the same day, with Representative Weiss again in the chair facing a renewed effort to kill the bill, the gavel was again used in adjourning the House and nothing was accomplished. Immediately things began to happen in rapid succession. Over night the most powerful political combination ever assembled in behalf of any legislative measure swung into action.

Just before taking up S. B. 446 in the House, the proponents of the debt raising program attempted to furnish an alibi for some down-state members by offering an amendment to S. B. 606. This amendment purported to limit the bonding power of all taxing bodies outside Cook County to two and one-half per cent.

The position of the Illinois Agricultural Association was in no way altered by the adoption of this amendment. It was the opinion of Mr. Watson, tax director, and Mr. Kirkpatrick, legal counsel for the Association, that the amendment was probably unconstitutional. Even if upheld by the courts, it would only meet one phase of the difficulty. We considered this amendment nothing more than a political palliative to get the necessary votes for the passage for S. B. 446. In no way did it justify any down state member in supporting the bill.

The result of this high pressure campaign was that within twenty-four hours a number of down-state representatives had succumbed to the lash of political domination and the last roll call on a motion to strike the enacting clause failed by a vote of 76 to 63. This wearing down process continued until enough votes had been clubbed into line to secure the passage of the bills.

All Sought Favor

It was a political effort by an organized political lobby for a political purpose. Every political influence and every politican with aspirations for political preferment vied with each other to secure the favor of the administration of the City of Chicago.

Members were routed out of bed at all hours of the night and every device known to modern politics was applied to induce them to swing into line. It was a combination that no force, relying on nothing but the righteousness of its cause could withstand.

STORY OF THE GRAIN EXCHANGE REGULATORY BILL

Finally in the most solemn and dignified meeting of the General Assembly, the roll call was on the passage of S. B. 446. As a result of that roll call the bill was passed by a vote of 80 to 64.

The roll call follows:

AYES—Acker, Baird, Bandy, Beckman, Bippus, Boyle, Church, Clark, Coia, Cork, Curran, Cutler Douglas, Durso, Eckley, Elrod, Ewing, Finneran, Franz, Matt.; Gallas, Garriott, Gill, Gormley, Griffin, C. A.; Hoar, Hoff, Holmgren, Hrdlicka, Jacobson, Jenco, Johnson, E. A. W.; Juul, Kersey, Krump, Lager, Lee, Lipka, Lyon, Marinier, McCarthy, McCaskrin, McSweeney, Mester, Minsky, Moore, Mugler, Murray, Noonan, O'Brien, O'Grady, Overland, Pacelli, Peffers, Perina, Phillips, Powers, Propper, Rategan, Rew, Rush, Ryan, Ed.; Ryan, Frank; Schnackenberg, Searle, Shanahan, Soderstrom, Stanfield, Steven, Stewart, Swanson, Trandell, Turner, C. M.; Turner, E. W.; Turner, S. B.; Weber, Weeks, Weiss, Wood, Wright, and Scholes.

NAYS—Allen, Arnold, Babb, Baker, Bauer, Baxter, Branson, Bray, Breen, Browne, Bruer, Bush, Castle, Choisser, Chynoweth, Corzine, Davis, Devine, Eisenhart, Fahy, Fekete, Foster, Franz, C. D.; Green, Hanley, Hawkins, Hennebry, Holten, Hunter, Hutson, Igoe, Jackson, Johnson, G. J.; Kasserman, Lohmann, Luckey, Malloy, Martens, Martin, McAdams, McClugage, Miller, O'Hair, O'Neill, Petri, Porter, Reeves, Rennick, Rice, Robbins, Robinson, Roe, Sinnett, Snell, Sparks, Sullivan, Teel, Tice, Vaughan, Waller, Warren, Whitely, Wilson, and Wylie.

Climax of Fight

The climax of the biggest fight of many sessions was reached on the roll call. Many members of the lower House had withstood tremendous pressure and some of them had been threatened with political annihilation unless they voted in favor of the bills. Farmers should scan this roll call with care and find out how their representatives voted on this measure.

They owe it to the representatives who withstood tremendous pressure from every angle and voted in their interest, not only a debt of gratitude, but their united support in the future endeavors of these men who thus fearlessly faced political death. Only by showing such support and gratitude can agriculture hope to build up a morale among members representing down-state communities that will assure proper attention to their interests in future years. Let us all back them up.

Farmers and Farm Bureaus must use particular vigilance with their Boards of Review and tax levying bodies in order that the raise in taxation due to this upsetting of the taxing system be kept as low as possible. Property valuations must be equalized and the strictest economy demanded of all taxing bodies if taxes are not to reach the point of confiscation of Illinois farms.

S. B. 148—GRAIN EXCHANGE SUPERVISION AND REGULATION

THIS Bill, in its final form, as passed by the Senate and remaining on third reading on the House calendar, defeated as the session closed, was prepared, drafted and sponsored by the Illinois Agricultural Association. It embodied needed legislation on the subject. It was intended to supplement existing Federal supervision imposed by the Grain Futures Act. It proposed, in the common interests of the grower, the grain trade, the grain exchanges and the public generally, to extend State supervision to grain trading on the public exchanges, and to the exchanges. It was proposed in view of the vast public interest in trading and the conduct of traders on grain exchanges.

The Bill was prepared and drafted in the light of experiences had by the Federal Grain Futures Administration, and in view of the findings of the Federal Trade Commission. The Association requested and received valuable information and assistance from representatives of these Federal bodies, in the preparation of the Bill. It was a constructive proposal, offered in the interests of the grain trade as well as in the interests of the grower. In our opinion, it would have done much to restore public confidence in trading on the Board of Trade of the City of Chicago—in assuring, under state supervision, equal opportunity to all traders with a resultant truly free, open, and competitive grain market at Chicago, as should be maintained.

Provided For Commission

The Bill provided for the creation of a commission within the Department of Agriculture, composed of three members of which the Director of Agriculture would be chairman. It provided for the licensing of public grain exchanges and operators on such exchanges. It gave co-operative organizations engaged in handling grain the right to seats on exchanges and protected them against discrimination. It gave the commission certain rights respecting rules that might be adopted. In short it gave to the State simply such regulatory power as it already exercises over practically every other public interest.

In the course of the debate in the Senate it was charged that the proposed legislation would destroy the Chicago Board of Trade or drive it out of the State. Recessions in the price of grain were attributed to the prospect of passage of the bill.

The Illinois Agricultural Association was pictured as a gigantic organization, attempting to overthrow the Board of Trade and establish a new system.

This was all old stuff to the Illinois Agricultural Association representatives. It is the stock argument of powerful interests in resisting public control. Proponents of the bill answered that it was not the purpose of the legislation to destroy legitimate business; that the public had a right to exercise certain supervision over a public market.

The Roll Call

After extended debate, the Bill passed the Senate by a vote of 30 to 11. The roll call is as follows: AYES—Abt., Bailey, Barr, Bohrer, Boyd, Burgess, Carlson, Dailey, Deck, Dunlap, Emmons, Flagg, Forester, Hamilton, Jewell Kessinger, Lantz, McNay, Meentz, Meyers, Reynolds, Searcy, Smith, Sneed, Starr, Telford, Thompson, Wilson, and Woods. NAYS—Barbour, Boehm, Broderick, Courtney, Denvir, Haenisch, Huebsch, Hughes, Joyce, McDermott, Marks, and Swift.

Senator Denvir of Chicago then changed his vote from "no" to "aye" and served notice that he would move to reconsider on the next legislative day. This motion was duly made, but failed to carry and the bill was passed.

Senator Cuthbertson, who was one of the active supporters of the Bill, was compelled to be away when the bill was passed, but was present and voted with the proponents against the motion to reconsider.

After passage of the bill in the Senate every known means of delay was resorted to, to obstruct its passage. Representative G. J. Johnson, who had been selected to pilot the bill through the House, had been assured by the speaker that it would be referred to the Committee on Agriculture. In spite of that assurance, after unwarranted delay, the Bill was referred to the Committee on License and Miscellany, composed largely of Chicago members.

The Illinois Agricultural Association representatives appeared at the Committee hearing and the Bill was reported out, but with the recommendations "that it do not pass."

When the report of the committee came on the floor of the House, Mr.

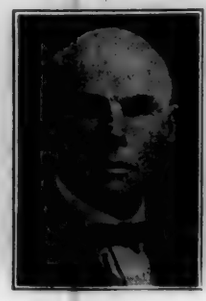
(Continued on page 8)

THESE STATE SENATORS HAD PERFECT VOTING RECORDS ON FO

THEY SHOWED COURAGE

IT REQUIRED much courage in many instances for these men and women to make the record that entitled them to a place on this page. They withstood alluring promises of political preferment. They faced threats of political ruin.

Such service must not be forgotten. If necessary party lines must be shattered. People should vote for candidates to the General Assembly who will consider legislation on its merits rather than its political effect; who will listen to the voice of the people they represent rather than that of powerful political influence.



If that is done the number of faces on this page will increase and the rights of the people will be protected.

HOW CHICAGO VOTED

DOWNSTATE legislators and organizations have been accused repeatedly of unfairness and lack of cooperation toward Chicago. Newspapers of this city have taken the lead in raising the question of downstate domination at Springfield.

Such accusations are best answered by presenting the vote of Chicago members on the four measures of utmost interest to agriculture. The roll call showed that only six Chicago senators and five representatives voted for the gas tax.

Not a single Chicago man was recorded in favor of the state income tax.

Only two Cook county representatives, Castle and Igoe, voted against the increased bonding measures.

Two Chicago senators and three representatives were recorded in favor of the Board of Trade bill.

There are 19 senators and 57 representatives in Cook county. Draw your own conclusions.

GRAIN STORAGE AND PUBLIC WAREHOUSING ACTS

(Continued from page 5.)

Johnson moved that the House nonconcur in the Committee report. At that stage friends of the bill had control of the situation and a substantial majority in the House. Therefore by agreement the report of the committee was not concurred in and Senate Bill 148 was placed on the calendar, without recommendation.

Continued Delay

Repeated attempts were made during the remaining days of the session to secure consideration of the Bill, but continued delay was encountered. As a final resort, on the last night of the session, Mr. Johnson moved that the bill be taken up out of order, under House Rule No. 12. He was supported by a number of down state members. A roll call was had upon that motion which was lost by a vote of 64 to 57 lacking 13 votes of receiving the required constitutional majority of the House. Following is the House roll call on Mr. Johnson's motion.

AYES—Acker, Allen, Arnold, Babb, Baird, Baker, Bandy, Bauer, Baxter, Branson, Bruer, Bush, Choisser, Cork, Corzine, Cutler, Davis, Eisenbart, Ewing, Fahy, Foster, Franz, C. D., Gallas, Harrell, Hawkins, Hennebry, Hoar, Hunter, Hutson, Johnson, G. J., Kasserman, Little, Lohmann, Luckey,Martens, McAdams, McCaskrin, Mester, Miller, Minsky, Moore, O'Hair, O'Neil, Peffers, Phillips, Porter, Reeves, Rennick, Rew, Rice, Robbins, Robinson, Rush, Searle, Snell, Soderstrom, Sparks, Tice, Turner, C. M., Vaughn, Waller, Warren, Whiteley, and Wylie.

NAYS—Beckman, Bippus, Castle, Church, Clark, Coia, Curran, Devine, Durso, Elrod, Fekete, Finneran, Franz Matt.; Garriott, Gill, Gormley, Green, Griffin, C. A., Holmgren, Holten, Igoe, Jacobson, Johnson, E. A. W., Juul, Kersey, Krump, Lee, Lyon, Marinier, McCarthy, McSweeney, Mugler, Murray, Noonan, O'Brien, O'Grady, Overland, Pacelli, Perina, Powers, Propper, Rategan, Ryan Frank.; Schnackenberg, Shanahan, Sinnett, Stanfield, Steven, Stewart, Sullivan, Swanson, Trandell, Weber, Weeks, Weiss, Wilson, and Wright.

RECORDED AS NOT VOTING—Boyle, Bray, Breen, Browne, Chynoweth, Dougles, Eckley, Goode, Griffin John; Hanley, Hoff, Hrdlicka, Jackson, Jenco, Lipka, Martin, McClugage, Petri, Placek, Roe, Teel, Turner E. W.; Turner S. B., Van Norman, Wood and Scholes.

The failure of a majority of the House to support the motion by which it was attempted to take the Bill up for consideration on final passage, as it came in the closing hours of the session, must be regarded and interpreted as meaning that a majority of the House were disposed to disregard the tremendous public interests in grain trading, as it is conducted on the grain exchages; for no other similar measure was offered by any member of the General Assembly, and the State exercises no supervision over grain exchanges, conduct of traders, or trading thereon. To those members of the House who failed to act, and did so in the face of a disclosure of conditions demanding attention, to protect the public interest in grain trading, attaches full responsibility for the failure.

GRAIN STORAGE ACT—S. B. 433

IDENTICAL bills, prepared and sponsored by the Illinois Agricultural Association, were introduced in the Senate by Senator Andrew Cuthbertson, and in the House by Representative Homer Tice. Both Houses of the Legislature passed the bill by substantial majorities and it later received the Governor's signature.

This Act follows the Iowa law, which is desirable because of our common marketing problems. We believe the Act will be found useful and possibly essential in a cooperative grain marketing program, particularly in the orderly marketing of corn. Its provisions are broad enough to offer opportunity in financing voluntary, organized withholding from the market of quantities of grain in excess of immediate market requirements. It should assist the administration of federal surplus control legislation, to the extent of its use.

For the immediate present, the Act offers possibilities to growers, who elect to make use of it, in groups, or individually.

PUBLIC WAREHOUSE ACT—H. B. 553

THIS bill was introduced in the House as a special committee bill, without further reference to a standing committee. The bill was sponsored by the so-called "CURRAN INVESTIGATING COMMITTEE." The bill may be regarded as the proposal of the "grain trade" to provide certain remedies to correct undesirable practices in the warehousing of "contract grain" eligible for delivery on "futures contracts." The bill, as introduced in the House, included a section not germane to warehousing, and designed to render lawful and immune from prosecution under the "anti-gambling laws," any and all transactions including "puts and calls" conducted on the Board of Trade of the City of Chicago.

The Association expressed its disapproval of and opposition to this section, in a communication addressed to the chairman of the Special Investigating Committee, previous to the introduction of the bill. It also submitted to the Committee, through the Committee's attorney, draft of a bill prepared by the Illinois Agricultural Association, amending the warehouse Act in accordance with the Association's views on the subject.

The committee's bill passed the House unamended, in its original form, and was referred to the Senate. The Senate in turn referred the bill to its Committee on Agriculture. Representatives of the Association appeared before the Senate Committee in opposition to the objectionable "legalizing" section referred to and secured an amendment striking it from the bill. The Senate then passed the bill so amended. The bill was re-referred to the House as amended. The House refused to concur and the Senate subsequently refused to recede from its position. A joint conference committee finally reported the bill, as amended with the "legalizing" section stricken, to the House and Senate and the report was adopted. Much credit is due to those Senator members of the conference committee who vigorously insisted on the Senate's position.

The responsibility for setting their house in order under the provision of this Act now rests with the "grain trade." The Illinois Commerce Commission is charged with responsibility for administering the Act.

OTHER LEGISLATION

IN ADDITION to the bills heretofore mentioned, the Illinois Agricultural Association was interested in other measures; several to the extent of aiding in their passage, and others, which were just as important, that we aid in defeating or amending them.

The relations existing between our Association and the State Department of Agriculture were most cordial. Your Legislative committee was in conference many times with Director Stanard and other members of the Department in framing or amending legislation affecting that Department and our membership.

The bills to which we now refer can quite properly be listed in four classes.

First, those bills which were in the main drafted by members of the Illinois Agricultural Association staff. Among this class of bills, was Senate Bill 336 introduced by Senator Lantz. This bill passed in the Senate and was substituted in the House by Represen-

AID OTHER GOOD BILLS AND HELP KILL BAD ONES

tative McCarthy for House Bill 509 introduced by him. The contents of the two bills were the same. This bill was on the order of third reading in the House on that last memorable night of the session, and although Representative McCarthy tried many times to get recognition during those last hours of the session to bring this bill up for final passage, he failed to do so and this bill died, with many other good pieces of legislation. This bill sought to amend Section 15 of the Cooperative Act of June, 1923, and would have clarified and strengthened the Act.

Corn Borer Bills

S. B. 553 also introduced by Senator Lantz was another good measure. This bill sought to make a special appropriation to the University of Illinois in the amount of $30,000 for special research work in corn borer control and eradication. This bill easily passed the Senate and was referred to the Appropriation Committee in the House, where it hit a formidable snag in the person of Tom Curran, Chairman of that Committee, who refused week after week to allow the measure to be brought up for consideration. After several efforts on the part of association representatives, it was finally voted out of the Committee with recommendations that it do pass and was advanced on the calendar to the order of third reading. Due to this delay it remained there at the close of the session although Representative Gus Johnson made strenuous efforts to have the bill considered.

House Bill 208 introduced by Representative C. M. Turner, is known as the corn borer bill. This bill provides the regulations for the Department of Agriculture to cooperate with the Federal Department in the control and eradication of the corn borer. With the consent of the Director of the State Department of Agriculture, we succeeded in amending this bill so that the farmer can in no instance be held responsible for costs exceeding $1 per acre for measures put into effect for such control. This bill as originally drawn provided that the farmer could be responsible up to $1.50 per acre.

Secondly, we list those bills to which we have referred in connection with the State Department of Agriculture. Association representatives aided in the passage of these measures, all of which were signed by the Governor and became law.

T. B. Measure Passes

Under this division is S. B. 186 introduced by Senator Lantz. This bill is an amendment to the Tuberculosis Eradication measure clarifying the present act and extending the power of the Department of Agriculture enabling it to clean up the herds in the counties under State and Federal Supervision more promptly, and to place such counties in the accredited area list.

House Bill 471 introduced by Representative O'Hair, seeks to regulate the sale of commercial fertilizer. Your Legislative Committee together with Mr. Bent of the I. A. A. and Dr. Bauer, University of Illinois, sat in with representatives of the State Department of Agriculture and succeeded in having amendments adopted to the bill which excludes from the provisions of the law, raw rock phosphate, agricultural limestone, marl, gypsum, animal manure and burnt and hydrated lime.

Aided Other Good Bills

Thirdly, are listed those bills introduced by others and which subsequently passed both Houses and became law which the association Legislative Committee felt were good bills and so aided as best it could in their passage.

Senate Bill 181 introduced by Senator Flagg was one of these. This bill provided for an appropriation to reimburse farmers in the wheat section of Southwestern Illinois for straw destroyed in the control of flag smut.

Senate Bill 89 introduced in the Senate by Senator Abt and House Bill 106 introduced in the House by Representative Petri both sought to amend Section 24 of Article 3 of the fish and game law. The law as it stood, permitted hunting on any land unless the owner posts or publishes notices. These amendments provided that the hunter must procure permission of the owner before hunting. The provisions of these bills were placed in S. B. 572 known as the fish and game act and thus became law.

House Bill 276 introduced by Representative Foster included swine among the animals for which reimbursement is made from the dog tax fund with a maximum allowance of $25.

House Bill 314 introduced by Representative Foster was a bill to aid in the control of rabies. Both of these bills passed and became law.

Aid Anti-Chicken Thief Bill

House Bill 325 introduced by Representative Whitely and known as the anti-chicken thief bill. This bill was mainly sponsored by the Prairie Farmer and Anti-Horse Thief and Detective Associations. The Illinois Agricultural Association's Legislative Committee was called upon to sit in with representatives of the Prairie Farmer and Anti-Horse Thief Associations in framing this bill. After its introduction, the Illinois Agricultural Association lent every effort to aid in its passage. This bill was signed by the Governor and became law.

House Bill 511 introduced by Representative Arnold creates a commission of five members composed of the Director of the Department of Agriculture, Superintendent of Waterways, one Senator, one Representative and one citizen residing in the Illinois River Valley to be appointed by the Governor. The duties of the commission are to study the cause of floods and control of same in the Illinois River Valley and report the status of its work to the 56th General Assembly.

Senate Bill 414 introduced by Senator Forrester and Senate Bill 257 introduced by Senator Hicks, passed both Houses with the understanding that whichever one of these the Governor decided upon to be the best should be signed by him and the other one vetoed. Both of these bills create a commission to study the revenue situation in the State. Your Committee feels that S. B. 257 is the better of the two, and accordingly President Smith has written Governor Small our interest in his signing Senate Bill 257 in preference to Senate Bill 412.

Another piece of legislation in which your representatives took a part was embodied first in S. B. 254 introduced by Senator Flagg and afterwards in S. B. 419 by Senate Motor Vehicle Committee. Early in the session the attention of your Committee was called to the extra license fee collected from farmers on small trucks used in carrying their own produce to market with the produce of a few of their neighbors. Having in mind the correction of the law to cover such instances, Senator Flagg introduced S. B. 354. This bill, however, was tabled in Committee and its provisions included in S. B. 419 as stated above. This bill passed in the Senate and was upon the order of second reading in the House where it remained until the close.

Kill Bad Legislation

Fourthly, one of the tasks of the Legislative Committee of the Illinois Agricultural Association is to watch for legislation detrimental to farmers. In addition to Senate Bill 446 as described among our major projects were the following:

House Bill 394 introduced by Representative Rush was placed in this group. This bill sought to amend the Bovine Tuberculosis Act permitting Farm Advisers to administer the tuberculin test to cattle. Because of the fact that Representative Rush is the

*Senator Burgess voted **no** on 1st roll call and **yes** on reconsideration.

ALL OUT FOR FARM BUREAU DAY, STATE FAIR, AUG. 26

(Continued from page 9.)

President of the Massac County Farm Bureau it was quite generally understood by veterinarians and others to mean that the Illinois Agricultural Association was backing this measure. It was necessary for the Association to write a good many letters explaining that we had nothing to do with the introduction of it. After our position was known the sponsor of the bill allowed the same to be tabled in Committee. It is understood that Representative Rush introduced this bill on request.

House Bill 533 was introduced by Representative Breen by request. This bill if enacted into law would have prohibited farmer vaccination of hogs with the double treatment. Your Committee aided in killing this bill in the House. The Agricultural Committee in the House is composed largely of farmers, many of which are Farm Bureau Members and they soon put the bill asleep in a sub-committee.

House Bill 60 sought to amend the Public Utilities Act providing for the creation of Municipal Public Utility Commissions. This measure was known as the Home Rule Bill. By this bill many large utilities would have been taken out of the jurisdiction of the Illinois Commerce Commission and your Committee felt that such action would have been detrimental to agricultural interests. This bill was severely attacked in Committee in the House and was supposed to have been dead. However, later in the session, it was revived and passed in the House but later died in the Senate Public Utilities Committee.

House Bill 148 introduced by Representative Cork sought to increase the maximum amount to be levied in non-high school territory from the present rate of 2-3 of 1 per cent to 1⅓ per cent. This bill passed the House in its original form. The Illinois Agricultural Association representatives felt that there was no justification for such a large increase. Accordingly the influence of the Organization was used to amend the bill in the Education Committee of the Senate, thus reducing the maximum to 1¼ per cent and by further amendment submitted by Senator Cuthbertson upon second reading in the Senate to one per cent. This means that the maximum school tax rate for non-high school territory is now $1.

A presidential poll taken by Kessinger's Mid-West Review at the I. A. A. picnic on Aug. 11 revealed that, of the first 135 cards turned in, 124 were for Lowden, 5 for Dawes, 3 for Al Smith, and one each for Coolidge, McAdoo, and Capper.

MARSHALL-PUTNAM WINS THIRD TITLE

Defeats Logan County In One-Sided Game 12 to 3

MARSHALL-PUTNAM won its third state Farm Bureau baseball title on August 11 when it defeated Logan County in a one-sided game 12 to 3 at Mooseheart.

Logan started the contest by a collection of hits that netted them one run, but Marshall-Putnam came back in the following inning and with the help of D. Zollars, Logan pitcher who lacked control in the early part of the game, and a few well-placed hits, brought in six runs before the inning was over.

This sudden onslaught took the fight out of the Logan boys and from that time on the Marshall-Putnam players had things pretty much their own way. Spangler, the Marshall-Putnam pitcher, received good support from his team mates while the opposing team made frequent errors. Logan lost many opportunities to score through careless base running. Frank Wallace, catcher for the winning team, was especially effective in catching runners going around the bases.

The only home run of the entire game was made in the eighth inning by Logan county just after one of their men had been caught off third base. The Marshall-Putnam team tighened up when the opposing batters threatened and through good field work retired the side before the Logan team could bring in the needed runs.

Cusack and Statz, professional umpires from Chicago, officiated. Burdette Griffith, captain of the winning team, received the beautiful gold I. A. A. trophy from Secretary George A. Fox following the speaking on the afternoon program.

Auto Driving Contest Arouses Much Interest

The auto driving and parking contests in charge of V. Vaniman, J. P. Gibson, and A. E. Richardson of the Illinois Agricultural Mutual Insurance Company aroused much interest among picnickers at Mooseheart.

Prizes offered in both classes were $10 for first, $5 second, and $3 third. The winners were as follows:

Men.

First—R. Hoover, Piper City, Ill.

Second—C. A. Stookey, Maywood, Ill.

Third—W. H. Dowell, Henry, Ill.

Women.

First—Margaret Short, Melvin, Ill.

Second—Phyllis Dougan, Iowa Falls, Iowa.

Third—Mrs. F. W. Baxter, Hazelhurst, Ill.

BIG STATE RALLY FRIDAY, FAIR WEEK

Car of Limestone to be Awarded Free to Lucky Registrant

A State Farm Bureau Rally Day will be held on Friday, August 26, at the Illinois State Fair, Springfield.

Plans have been completed for establishing headquarters in a large new 50x80 foot tent to be erected in a centrally located spot just east and north of the new grandstand. The tent will be surmounted by a large sign labeled "FARM BUREAU HEADQUARTERS."

The rest tent with parcel-checking facilities, seats, cots, and other accommodations will be open throughout the week in charge of George E. Metzger, director of organization, who knows personally more Illinois Farm Bureau members than any other man in the state.

Farm Bureau and Illinois Agricultural Association officials will be on hand to meet visitors, and get them acquainted. Tent facilities will be available to all comers.

Every visitor will be asked to register. A popular drawing of names of registrants will be made at a stated hour when the two lucky names will be announced for special prizes.

Prizes Offered.

First prize will be a car of limestone delivered free of charge to the Farm Bureau member drawing the lucky number. Second prize will be a full coverage auto insurance policy in the Illinois Agricultural Mutual Insurance Company.

In a special letter addressed to all the County Farm Bureaus of Illinois, President Earl C. Smith is inviting the membership to come out and have a part in the celebration. No parade is contemplated but moving slides and pictures depicting the activities of the Farm Bureaus of Illinois will be shown in the tent.

The invitation from State Fair officials to name Friday FARM BUREAU DAY is in recognition of the agricultural interests of the Fair and the leadership of the organization in this field. E. C. Coulter, president of the Sangamon County Farm Bureau was instrumental in bringing about the necessary arrangements made possible through the cooperation and good will of S. J. Stanard, State Director of Agriculture.

Director Stanard voiced the opinion that more than 90 per cent of the livestock, grain, and farm crop exhibitors at Springfield are Farm Bureau members. Practically all of the boys and girls club activities likewise are carried on by the County Farm Bureaus and their members.

McKELLAR ANSWERS COOLIDGE VETO AT PICNIC

GUY BENDER AND MRS. ROY SMALTZ CHAMPS

GUY BENDER of Alexander, Morgan county, and Mrs. Roy Smaltz, Morrison, Whiteside county, are the 1927 hog-calling and chicken-calling champions.

Bender's long, musical, high-pitched w-o-o-o-o-e-e-e-e was heard 30 miles away. A telephone call from a farmer near Oswego was received during the contest complaining that his hogs were running around excitedly. It was revealed that the man had tuned in on the picnic and his loud speaker was close to the window where the hogs could hear the calls given over station WJJD.

Bender won against a dozen candidates, many of whom were county champions. It was his second signal victory since he carried off first prize at the Illinois State fair in 1926.

The judges, Arthur C. Page, David L. Swanson, and Dr. E. A. White were unanimous in the decision.

Mrs. Smaltz was an easy victor in the chicken calling contest against a small field of six entries. Judges were Mrs. Earl C. Smith, Mrs. E. G. Thiem, and D. L. Swanson. Malcolm Watson, farm adviser in Kendall county, managed the hog calling contest perfectly, announcing each contestant as he stepped up to the microphone to deliver his call. Raymond Nelson, De Kalb county, was unable to be present because of illness. Harry C. Gilkerson of Lake county managed the chicken calling contest.

FATHER AND SON WIN HORSESHOE MATCH

ED. TORBERT and his son Walter, of DeWitt county, kept the state horseshoe pitching title in the family when they defeated Rube Bright and his son, of McLean county, in the Eighth Annual State Horseshoe Pitching Tournament at Mooseheart.

It was a father and son contest, and a battle between former champions.

Rube Bright and Sam Smith won the state title in 1924, Ed. Torbert and Joe Heskitt were the champs in 1920, '21 and '22, and Harry and Walter Torbert, sons of Ed., carried off the honors in 1923, '25 and '26.

This year there was rearrangement of the former champions, but the beautiful loving cup awarded by the I. A. A. was added to the Torbert collection gathered in past years.

The tournament went off smoothly under the able management of Harrison Fahrnkopf of McLean county. The championship was decided early in the afternoon.

EXPRESSES HOPE FOR ENACTING McNARY-HAUGEN BILL INTO LAW IN NEXT CONGRESS

Lauds Lowden and Dawes As Friends of American Agriculture, Criticises Money-Lending Plan of Administration as Unsound

SENATOR KENNETH McKELLAR of Tennessee received a great ovation when he attacked the Coolidge veto and upheld the McNary-Haugen bill before thousands of Illinois farmers gathered at Mooseheart Aug. 11 for the Eighth Annual Picnic of the Illinois Agricultural Association.

He expressed the hope that the next Congress would not only pass the relief measure but would give it a two-thirds majority if necessary to pass it over the President's veto. Before delving into his discussion of the merits of the measure, Senator McKellar praised Frank O. Lowden and Vice-President Charles G. Dawes as friends of American agriculture and worthy of the highest honor the nation could bestow upon them.

"Agriculture is the only great American industry which is not benefited and protected by federal legislation," he said. "All our laws unite in bringing about an adequate return on capital. Immigration and tariff laws help labor and industry. The Esch Cummins bill provides for the railroads. But the farmer must buy in a protected and stabilized market and sell in an open market with the law of supply and demand in full force."

Money-Lending Fails.

Senator McKellar criticized "the money-lending plan" of the administration and cited the illustration of the recent attempt at Memphis to raise cotton prices through lending money to growers. "Eugene Meyer, that great dirt farmer from Wall Street, New York, was sent down by President Coolidge to try out the money-lending plan," said the speaker. "The venture failed. I don't know of a single loan made in my state, although I have heard there were several made in Texas. Farmers don't want more money to get deeper in debt. They want a better price for what they grow."

The money-lending plan of the administration he characterized as "economically unsound" because it provided for extending loans to farmers "with a reasonable expectancy of their being paid back." "People don't pay back money borrowed on such terms," he said. "The administration opposed the McNary-Haugen bill not because the measure was considered unworkable, but because they feared it would operate successfully."

Senator McKellar's speech delivered before the microphone and broadcast from Station WJJD with other events of the day, held his audience in spite of threatened rain which sent a portion of the crowd scurrying for shelter in the middle of the afternoon.

HAVE FAITH AND KEEP ON FIGHTING—GREGORY

Let's Tighten Our Belts and Help Ourselves, Says Prairie Farmer Editor

LET us have faith in ourselves, in our farms and in the future of agriculture. Instead of marking time while we are waiting for legislation let us tighten our belts and put forth our best efforts to help ourselves. American farmers have never been licked. Surplus control legislation will come sooner or later. We must keep on fighting until we get what we want. Let us not be discouraged.

This is the pithy advice handed out by Clifford V. Gregory, Editor of Prairie Farmer who preceded Senator McKellar on the afternoon program at Mooseheart on Aug. 11.

Mr. Gregory called atention to the fact that legislation is not everything. "Even after we have the legislation we need, the battle of efficient and profitable farming must still be fought out on our farms," he said. "Many farmers have become discouraged and have lost faith in themselves and their jobs. This is a bad state of mind to be in. The best of legislation will not greatly help the man who is discouraged."

President Earl C. Smith presided during the afternoon program. Glenn Warren, president of the Kane County Farm Bureau and Rodney Brandon, Executive Secretary of the Loyal Order of Moose, welcomed the picnickers to the Fox River Valley.

George A. Fox, General Secretary of the I. A. A., awarded the trophies following the speaking program. The Warren County Farm Bureau quartet was applauded enthusiastically.

Congressmen Henry T. Rainey of Carrollton and Chas. Adkins of Decatur; George N. Peek, leader of the McNary-Haugen fight at Washington, officials of the Loyal Order of Moose, and the Illinois Agricultural Association, the I. A. A. Executive Committee, 30 County Farm Bureau presidents, and several members of the Illinois legislature were among those on the speakers' platform.

Executive Committee Points Way to Equal Opportunity for Agriculture

Refers to Lowden and Dawes as the Only Men Thus Far Prominently Mentioned for President, Whose Position Is Known and Approved by the Farmers of the Nation

The Executive Committee of the Illinois Agricultural Association, meeting in regular session September 9, formulated and authorized the following statement and recommendations to its members

"THE years since the war have been costly to agriculture. The Illinois Agricultural Association on many occasions has summed up the evidence of the loss which the unfair working out of national policies has caused farmers of Illinois, and of the rest of the country. The present moment is a critical one, for as a nation the United States is now forming the policies toward agriculture which will determine for better or worse the immediate and future trend of that industry.

"We are entering the season when the position of political parties on public issues is to be determined, and national leaders chosen. The farmers have the largest stake of all in national affairs. Their concern over national policies is broader than interest in any one bill or measure. They cannot be indifferent to government financial and banking policies, to the tariff, to transportation laws, rates and adjustments, to land and immigration policies and to the countless other fields in which government action affects the economic interest of the farm.

Know Your Delegates

"The purpose of this statement is to urge farmers and their friends in every Illinois district to see to it that only those delegates who are pledged to candidates whose position is known to be fair and favorable to agriculture are sent to the national party conventions. Farmers and all friends of agriculture in Illinois can rightfully feel proud of the fact that thus far the only two men prominently mentioned for president whose position on agricultural matters is known and approved by the farmers of the nation, former Governor Frank O. Lowden and Vice-President Charles G. Dawes, come from Illinois.

"There never was a time in the economic history of the United States when it was so important for farmers to concern themselves over policies of government. Nor has there been a time since the Civil War when farmers had a better opportunity to impress their influence on political history than the present. They neither seek nor desire class government, or special favors to agriculture; but they ask for, and by right are entitled to a national administration which in its executive as well as its legislative branch, has a vision national not sectional in scope, and has at least a sympathetic understanding of the present critical problems of the farm. The practical way to secure not only satisfactory platforms but fair execution of them, is to rise above party lines and work and vote for men and principles rather than for party labels."

E. C. COULTER

E. C. Coulter, president of the Sangamon County Farm Bureau, had much to do with inaugurating the first FARM BUREAU DAY at the Illinois State Fair. He was a familiar figure at the headquarters tent throughout the week welcoming visitors to Sangamon county

Duties of Secretary's Office to be Discharged Temporarily by the President and Treasurer

The Executive Committee, meeting September 9, expressed the desire and directed that the duties of the Secretary's office, pending the selection of a Secretary by the Executive Committee, be discharged by the President and Treasurer of the Association.

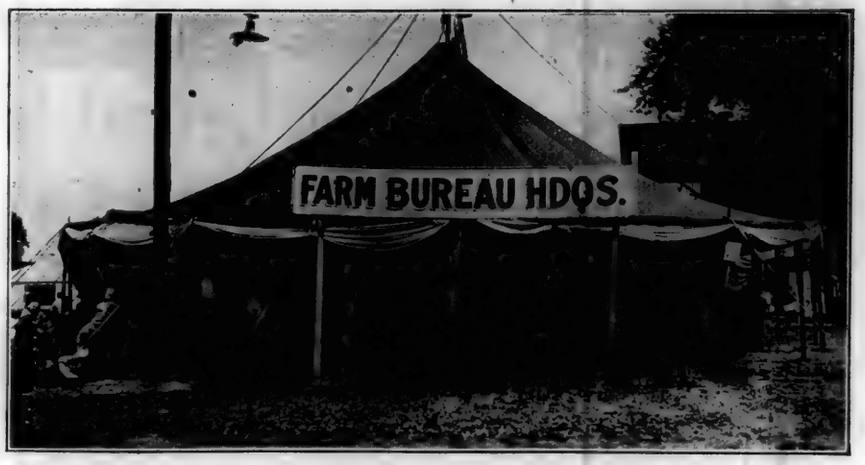
Report On Decatur Meeting

President Earl C. Smith reported on the farm relief meeting of representatives of the various group organizations held at Decatur on Thursday, Sept. 8. No plan for legislative action was formally adopted, he said, but a resolution was adopted as follows:

"Resolved that it be the sense of this meeting that we carry back to the various organizations represented, the recommendation that they aggressively interest themselves in the farm problem and put forth every effort to secure coordinated support for such a sound agricultural policy as seems possible of passage in the next session of Congress.

Representing the I. A. A. were President Smith, Secretary Geo. A. Fox, and Treasurer Robt. A. Cowles. Other organizations represented were the Illinois Bankers' Association, the Illinois Chamber of Commerce, Illinois State Grange, Illinois Grain Dealers' Association, Farmers' Grain Dealers' Association, the American Land League, and local organizations of Decatur.

What the Counties Are Doing



Henderson county beat Warren at the Warren County Farm Bureau picnic at Monmouth on Aug. 26. The score was 2 to 0 although it was anybody's game until the last man was out, says Farm Adviser E. D. Walker. Pence, who pitched for the winners, struck out nine men and gave three hits, while Turner, the opposing pitcher, struck out 12 men but was touched for six hits, four of which came in pairs.

"Crawford county boys and girls won two state championships at the Illinois State Fair, and the Crawford County Jersey breeders who exhibited won one-tenth of the prizes in the Jersey classes given there," writes J. Z. Frazier, farm adviser. This is the first time the county was represented in club work at Springfield. One championship was won by a club team demonstrating poultry culling, and the other was awarded Margaret Barber of Hutsonville for the state champion showman in all dairy classes. Members of the winning team are Leafel Norton, Glen Wilson, and Ernest Correll. Mary Trimble won first and Louise Trimble second over all Jersey calves exhibited.

The Henry County Farm Bureau is cooperating with Prairie Farmer in the formation of a Henry County Protective Association to stop farm stealing. R. S. Saunders of the Illinois Bankers' Association who outlined his ideas for a county protective system in a recent radio talk on the Illinois Agricultural Association program from station WJJD, presented his plan again at a meeting held at Cambridge on Aug. 19. "Aroused public sentiment and cooperation of farmers will stop chicken stealing and farm thievery," said Mr. Saunders.

Farm Advisers Allison and Hopkins of Livingston county are concentrating on farm visits, making soil tests, outlining crop rotations, and making definite recommendations toward reestablishing fields of alfalfa that were killed by wet weather. "We expect to continue our activity in recommending proper care and feeding of live stock to adults as well as to the junior club members," says Allison.

"On August 22, we unloaded our seventh trainload of limestone between Effingham and Dieterich on the I. C. R. R.," says Farm Adviser Wascher. "The stone is loaded in side dump cars and our farmers meet the train at designated points to help dump. The stone is hauled away at the convenience of the men who buy it. This system saved our men an average of three miles each of hauling. The seven loads were delivered during the past five years and represent 183 cars or about 8,500 tons of stone bought by 40 farmers."

The FARM BUREAU HEADQUARTERS tent was a popular meeting place for members from nearly every county in Illinois during State Fair Week. This picture shows the tent crowded during mid-day by visitors who are resting and cooling off in the shade.

Ford county started on its third cooperative cream station on July 29. So far the station has handled more than half the town's business, and there are four old line stations in town. J. T. Arens, an experienced cream and butter man, is the manager. "The I. A. C. A. audit of our Seed Corn Ass'n. shows 385,657 ears of seed corn stored and tested at a cost of $6,086.27 or $.0158 per ear," writes Farm Adviser Swaim.

Madison county recently completed plans for bringing in a trainload of 29 cars of limestone. Sixteen of the cars will be set out at stations, and 13 will be dumped along the right-of-way, 30 inches from the rails. "The cost of dumping will be about 10 or 12 cents a ton," says Adviser Raut. "We feel that after we have succeeded in getting this train, more will follow."

"We have sold 1,390,785 c. c. of serum and virus already this year, 335,785 c.c. of which was delivered in August," says Adviser A. A. Olsen of Warren county. "Fifteen thousand attended the Warren-Henderson Farm Bureau picnic held in Monmouth Park on Friday, Aug. 26 when Congressman Dickinson spoke."

Congressman Brand made a very favorable impression at the Lawrence County Farm Bureau picnic according to H. C. Wheeler, farm adviser. Lawrence county's speedy Farm Bureau baseball team licked the champs from Knox county, Ind., 8 to 7.

"We may increase our acreage of alfalfa this year more than in previous year," says Farm Adviser Issacs of Mason county. "Limestone orders are not up to previous years although we are shipping a lot of it into the county."

C. W. Simpson of White county advises that work has already started on a cooperative cream pool at Norris City. This is the outgrowth of a dairy association which has been meeting more than a year. Two red top growers, the first from this county, recently signed up with the Egyptian Seed Growers Exchange.

All business houses closed at noon when Rushville merchants joined Schuyler county farmers in the annual Farm Bureau picnic on Sept. 1. The Farm Bureau baseball team beat the business men 12 to 10. President Earl C. Smith was the speaker.

Marshall-Putnam county will supply free tattoo outfits for marking poultry to members of the new county-wide protective association now being organized. A reward of $100 is to be posted on each Farm Bureau member's farm for the capture and conviction of any thief. Seven thousand people attended the annual Farm Bureau picnic at the John Swaney school grounds on Aug. 30 when Congressman Dickinson addressed the gathering.

Ralph Allen Dies

Ralph Allen, former president of the Illinois Farmers' Institute and leader in the Illinois Farmers' Grain Dealers' Association passed away suddenly at his home near Delavan on Sept. 3. He was stricken with a heart attack and died three hours later.

Mr. Allen was born at Seekonk, Mass., in 1854 and moved to Delavan in Tazewell county at the age of 15. He organized the Tazewell County Farmers' Institute and acted as president of the Illinois Farmers' Institute from 1922 to 1926. He was a graduate of the University of Illinois, class of 1876, and for many years was a member of the soils investigation committee of that institution.

Each of the seven surviving sons and daughters of Mr. Allen are university graduates.

Farm Bureau Disclaims Support of "Bogus" Bill

Washington Representative Says Eastern Papers Credited Farm Bureau with Ownership

ON Sunday, August 7, there was published in the New York Times a definite text of a proposed farm relief bill according to Chester H. Gray, Washington representative of the American Farm Bureau Federation. The authority, at the time of printing this bill, seems to have come from Rapid City, S. D., but whether it was released for publication by an administration leader or by other persons, no one has been able to ascertain. The New York Journal of commerce and other papers designate the bill as a Farm Bureau measure. Other press comments express doubt about its being an administration bill and describe it as being a "bogus" bill.

This measure could not reasonably be called a Farm Bureau project for several reasons, some of the most important being:

1—It contains provisions for amortized loans to cooperative organizations which are so sketchy and inadequate as to be hardly comparable to the so-called Neely amendment on the same subject which was incorporated in the McNary bill as it passed the Senate last session.

2—It provides for the payment of losses in disposition of surpluses directly from the revolving fund which violates the well known and long established Farm Bureau principle against subsidizing any group in our government, even agriculture itself.

3—It places the whole burden of solving the surplus question upon cooperative enterprises so that the load on the membership in such co-operative enterprises would be destructive rather than helpful according to our past proof in testifying upon farm relief subjects.

4—It fails to recognize the fundamental principle established in the Farm Bureau heretofore, that the commodity being served should pay its price for the benefits of such service, and should not fall back upon the Treasury of the United States in case of losses.

5—It comes more dangerously near the point of putting Uncle Sam into the business of merchandising farm crops than has ever been advocated by the American Farm Bureau Federation, because of the fact that if the Treasury must pay the loss, manifestly the activity of the federal government in the business of disposing of surpluses will be much more intimate than otherwise would be the case.

"The Washington offices of the American Farm Bureau Federation will continue on farm relief as on all other legislative projects, exactly in keeping with the policies of our membership, expressed in annual resolutions and in recommendations of the Board of Directors," declared Gray in commenting on the proposed measure.

FARM BUREAU DAY VISITOR

Herman W. Danforth, first president of the Illinois Agricultural Association and one of its founders, was a visitor at FARM BUREAU HEADQUARTERS during the State Fair. Mr. Danforth served as president of the Tazewell County Farm Bureau for seven years. He has extensive landholdings in Iroquois county, and for five years was president of the Federal Land Bank of St. Louis. Mr. Danforth is in business in St. Louis but he still calls Washington, Ill., in Tazewell county, his home.

Knox Pioneers in Trucking Service

WHEN the Gilson Livestock Shipping Association of Knox county faced possible extinction because of the growth of direct-by-truck-to-market business in that vicinity, the Association purchased its own truck and started a similar service for its members. The Association truck picks up livestock at the farm for carload shipment, or trucks direct to the Peoria Producers if the owner of the livestock so wishes.

The Association charges five cents per hundred weight for the first three miles, and one cent per hundred for each additional mile. Two trucks are maintained by the Association. One is driven by the manager, Leo Richardson, and the other by his assistant, Curtis McCoy.

Livestock men find it very convenient to have their stock picked up at the farm and because of this new service the Gilson Association not only has maintained its business but has actually increased it.

Farm Values Drop During 1926-1927

Plenty of Farms for Sale with Buyers Few and Cautious

FARM real estate values declined sharply during the crop year just ended, being placed at 119 per cent of the pre-war level, against 124 in 1926, in the Department of Agriculture's new index of farm real estate values. The decline is part of a continued depreciation during the past seven years from the peak of 169 per cent of prewar in 1920. Present values are at about the 1917 level.

The decline during the past year was not to be wholly unexpected, says the department, on account of the marked decrease during the year in the price of certain of our major farm products, the sharp drop in farmers' incomes, and a generally inactive farm real estate market. There are plenty of farms for sale, with buyers few and cautious. In a number of areas there are still many foreclosed and other distress farms hanging over the market to keep values down.

Largest Drop in South

The largest decline last year was in the South Atlantic States for which the department's index is 137 compared with 148 in 1926. The index for the East North Central States is placed at 103 against 110 in 1926; West North Central States 115 against 121; East South Central States 133 against 139; West South Central 139 against 144; Middle Atlantic States 111 against 113; Mountain States 101 against 103; New England 127 against 128, and Pacific States 143 against 144.

The greatest depreciation in values since the 1920 peak has occurred in the West North Central States where the index is now 115 per cent of prewar against 184 per cent in 1920. The East South Central group runs a close second with a decline from 199 in 1920 to 133 at present; followed by the South Atlantic States, the index for which was 198 in 1920 against 137 now; East North Central 159 in 1920 against 103 for 1927; Mountain States 151 against 101; West South Central 177 against 139; Middle Atlantic 136 against 111; New England 140 against 127, and Pacific 156 against 143. Values for the United States as a whole have gone down 50 points, from 169 in 1920 to 119 for 1927.

Gus Gillard, a well-known clown, was the principal attraction at the Stark County Farm Bureau picnic. "We can recommend a good clown like Gus for any picnic," said Farm Advisor E. E. Brown. "He was the best attraction we've ever had."

The Gilson Association is Producer perfect. Everything it handles goes to the Chicago or Peoria Producer Commission Associations.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the farm bureau was organized, namely to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Edited by Department of Information, E. G. Thiem, Director, 608 South Dearborn Street, Chicago, Illinois. Entered as second-class matter October 20, 1925, at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Acceptance for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the ILLINOIS AGRICULTURAL ASSOCIATION RECORD. Postmaster: In returning an uncalled for or missent copy, please indicate key number on address as is required by law.

Hope From Geneva

> "The farmer needs the assistance of his government. This was one of the conclusions of the Economic Conference. Although it was found that the most progress toward an improvement of this condition could be made by the farmer himself, particularly through co-operation, this fact did not lessen the recognition of the need of legislation and other governmental aids."

This quotation is taken from a recent news letter regarding the deliberations of the international Economic Conference held at Geneva, Switzerland. Representatives of all the larger nations participated. It was freely admitted at the conference that trade barriers such as high protective tariffs hamper agriculture. We have presented this view repeatedly. It was suggested that an equitable balance be maintained between industry and agriculture that one may not be stifled at the expense of the other. This is what organized agriculture is fighting for—a national policy that will prevent the submergence of its industry. It is to be hoped that these expressions signify a change of heart on the part of certain industrial groups represented at the conference from this country; that these who have admitted and deplored the condition of agriculture will now go a step farther and support farmers in their efforts to establish an equitable balance with industry.

Another Friend in the Senate

"THE McNARY-Haugen measure, or one similar to it, will get at least one vote from my state in the next Congress that it didn't get in the last session," said Senator Alben W. Barkley of Kentucky in addressing a recent luncheon of agricultural, labor, and business interests given by the Illinois Agricultural Association complimentary to the Senator.

Both senators from Kentucky voted against the measure in the 69th Congress.

Against Switching Support

EXPRESSIONS from members received by speakers at County Farm Bureau picnics held during the past few months throughout the state indicate that Illinois farmers are opposed to any switching or dividing of support that might weaken the standing of the surplus control measure known as the McNary-Haugen bill.

This stand has been taken consistently by our Executive Committee. It was reaffirmed at a conference of officials from various state organizations held recently at Decatur, when advances were made to secure support for the so-called "export debenture" proposal.

The argument was made that the McNary-Haugen bill hasn't enough support to become law. On the other hand, the plan has gained consistently. It passed the last Congress and would now be law except for the veto of the President. The lack of popularity of that veto was subsequently disclosed. Whether or not the disclosure influenced Mr. Coolidge's recent decision is food for speculation. Farmers will stand firm in the next Congress for something more substantial than loans to cooperatives. They will resist attempts to divide support that will lose a cause almost won.

Cooperate 30 Years

FARMERS at Luck, Wis., have been operating a co-operative creamery for more than thirty years. Who said farmers couldn't stick together?

Senator Barkley Talks To I. A. A. Radio Audience

Advocates Federal Legislation Involving Active Power of Government in Controlling Surplus Farm Crops.

THE active authority and power of the United States government should be given to agriculture in helping this basic national industry control and orderly market surplus farm crops.

This is what Senator Alben W. Barkley said in a radio talk broadcast on the I. A. A.'s program over station WJJD on Wednesday, Sept. 7. Senator Barkley asserted that no one who has given agricultural conditions any thought or study can deny that there is a serious problem confronting the people of our country. "And no man will confidently deny that this problem of the farmer cannot be solved by the farmer alone."

Calling attention to the extent of organization in other professions and industries and the ease with which they have been enabled to fix prices for goods or services, in some cases with government aid, he said:

An Absurd Situation

"This is not true as to the service rendered the public by the man engaged in agriculture. He is compelled to take what is offered for his product, and large numbers of those who buy from him are indifferent to the question of what it has cost to produce it. Not only is the farmer helpless in fixing the price of what he sells to others but he is utterly ignored when it comes to fixing the price of what he pays to others for what they sell him. This is an absurd situation."

Senator Barkley, who is a leading Democrat, steered clear of partisan politics but addressed himself to the economics of the surplus control measures passed by the 69th Congress and subsequently vetoed by President Coolidge. He told why he worked for the measure and why it was needed by the farmer. He predicted that the major issue before Congress in its next session would be the farm surplus problem.

Government Help Needed

"By whatever name any measure may be known it will be a failure unless it brings the power of the government to bear in aiding agriculture to control its surplus," he said. "The surplus control bill passed during the recent Congress and vetoed by the President was designed to assist the farmer in coping with some of these difficulties to which I have alluded. None of its advocates or supporters contended that it was a perfect measure, or that it would not have to be amended, in the light of experience. Some of these who voted for it with hesitation felt that it was the best proposal offered dealing with the agricultural situation, and that it was worth

I. A. A. RADIO SPEAKER

SEN. ALBEN W. BARKLEY

Senator Barkley is the junior Senator from Kentucky. He became interested in the surplus control plan as a Congressman, soon after its introduction, and after studying it thoroughly gave it his active support.

Senator Barkley was born in Graves County, Kentucky, in 1877, was educated in the county schools and at Marvin College, Clinton, Ky., and later at the University of Virginia Law School. Prior to being elected to the senate, he was prosecuting attorney for McCracken county, Kentucky, and for five sessions was Congressman from the first district of his home state. He was the speaker of the day at the recent Piatt County Farm Bureau picnic and the following day, Sept. 7, addressed Illinois farmers during the noon hour on the I. A. A. radio program from Station WJJD, Chicago.

Swisher Gets $50 Check For Claim

LAST winter, S. P. Swisher accompanied by his neighbor, E. C. Betz, both of LaSalle county, went to Southern Wisconsin to buy several purebred Milking Shorthorn cows. They rode back on the same freight train with the cattle and were delayed an extra day at Rockford where in switching to another line, the cattle received very rough handling.

When they were unloaded, one cow was down in the car and the others in a very weakened condition with a subsequent heavy loss in flow of milk.

Swisher laid the case before the LaSalle County Farm Bureau, who in turn referred it to the I. A. A. Transportation Department. Evidence was gathered and submitted, but the railroad rejected the claim twice on the ground that there was no evidence of specific damage. The I. A. A. persisted, however, in establishing the justice of the claim and last week a check for $50 from the railroad was forwarded to Mr. Swisher in settlement.

"To say that I was highly elated is putting it mildly," said Swisher in expressing his thanks. "I note that you have not spoken of your commission

Fruit Growers' Exchange Sells 4,000 Cars Produce

Leeper Tells of Obstacles and Experiences in Fruit Marketing in Radio Address.

PROBLEMS and pitfalls experienced in seven years of cooperative fruit marketing were revealed recently by A. B. Leeper, manager of the Illinois Fruit Growers' Exchange in a radio talk broadcast on the I. A. A. program over station WJJD.

A. B. Leeper

Marketing fruits and vegetables is different from any other according to Leeper, first because such crops are perishable, hence the importance of the time which elapses between harvest and consumption; secondly, because they must be graded, standardized and packed in containers at the shipping point ready for the consumer; and thirdly, because they must be shipped by the most direct route to the consuming markets.

"The real essentials in the proper marketing of fruits and vegetables," said Leeper "are—standardization, communication, transportation, and distribution. A cooperative marketing association must have a properly graded product to sell, must know the demands of all the different markets on the day of shipment, must have adequate facilities to send to the markets, and then so distribute the product as not to overload the markets. If all these were possible, conditions would be ideal. But, unfortunately, cooperatives meet ever changing conditions and must be prepared to meet them as they arise day by day. It is in this uncertainty that we find most of the pitfalls of fruit marketing, the most hazardous business of all the lines of merchandising.

"During the seven years the Illinois Fruit Growers Exchange has been operating we have had to meet a different condition in the marketing of each commodity each year. During this time we have sold over 4,000 cars of fruits and vegetables. These have been shipped direct to 150 or more different markets in the United States and Canada. We have avoided a great many pitfalls, but not all of them. In the first years of operation the greatest pitfall encountered by the Exchange was the lack of reliable information. It was hard to get reliable information from competing sections, from the markets, and from our own growers themselves. We have almost entirely overcome these difficulties and today we feel reasonably sure that we can get the right information on all the markets where we expect to ship. Competing sections are now more willing to exchange

Agricultural Investment Company.

THERE has been recently organized in connection with the Transportation Bank of Chicago, the "Agricultural Investment Company, 608 So. Dearborn Street, Chicago, Illinois." The similarity of names and address of our Association with its affiliated and associated organizations, and this Company, seems to require a statement from the Association setting forth the relations of the two organizations; in order to prevent and remove confusion in the minds of some of our members and others. Neither the Illinois Agricultural Association or its officers or members of its Executive Committee, have any connection with or financial interest in either the Transportation Bank of Chicago or the Agricultural Investment Company.

Mr. George C. Jewett, President of the Transportation Bank of Chicago and of the Agricultural Investment Company, appeared before the Executive Committee in its meeting of Aug. 12, at the suggestion and invitation of the officers of the Association. He outlined the purposes of the Agricultural Investment Company and discussed the subject of relations. His statement follows and clearly sets forth relations existing and should remove any possible misunderstanding in the matter. The Executive Committee of the Illinois Agricultural Association, has directed, for reasons above set forth, that the statement offered by Mr. Jewett in regard to the Agricultural Investment Company, be published in an official publication of the Association, and is as follows:

"As a courtesy to your executive officers I submitted to them a few days ago a prospectus setting forth plans for an Agricultural Investment Company which has just been organized to operate in connection with the bank which I am interested, and with which you are familiar. I did this that they might be apprised fully of what we are attempting to do in behalf of the agricultural industry. Your officers have very graciously asked me to come here and present to you, the members of the Executive Committee, in the same way the salient points in our further program of agricultural finance as provided in the Agricultural Investment Company.

"The Investment Company is an Illinois corporation capitalized for $500,000. The stock is being sold throughout the state to farmers and others at one hundred dollars per share. Any investments you may care to make personally or any assistance you may care to render in the distribution of this stock will be greatly appreciated. The Agricultural Investment Company will do three things. It will own the control of a Joint Stock Land Bank which will provide long term credit on the amortization plan. The Joint Stock Land Bank, of course, will be under

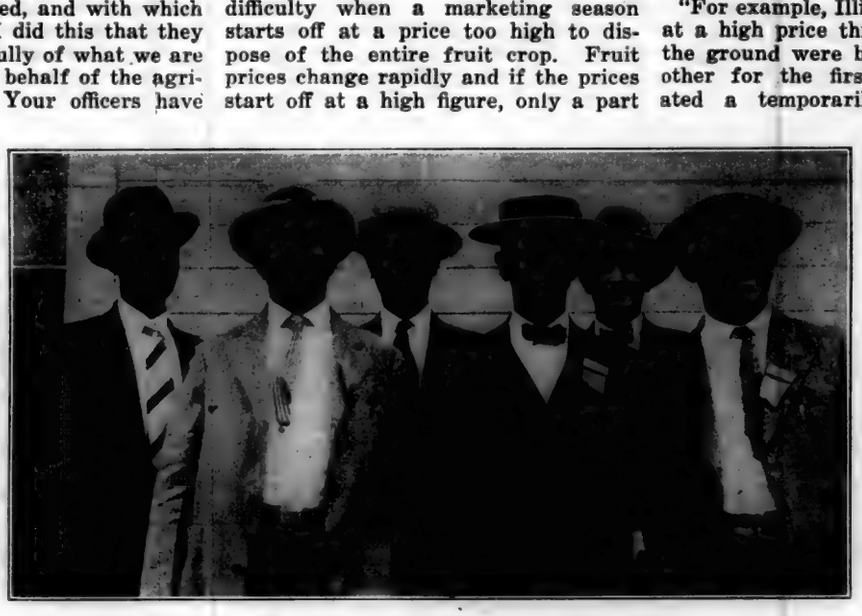
GEORGE E. METZGER

Mr. Metzger, Director of Organization, will have charge of the staff of district men who will assist the counties throughout the state in their organization problems. Membership in the Illinois Agricultural Association is on the upward grade as shown by results of renewal campaigns held during recent months.

Fruit Growers



(Continued from page 5)

crop information and conditions, and our growers have learned that keeping their own organization reliably informed works for their own good.

"A cooperative encounters another difficulty when a marketing season starts off at a price too high to dispose of the entire fruit crop. Fruit prices change rapidly and if the prices start off at a high figure, only a part of the crop can be sold. If the price is too high, consumers buy only a limited quantity or refuse to buy at all. This causes an over-supply to accumulate and the producer has to sell a large part of his crop at a low price and often loses part of it entirely. This condition is more often brought about by the buyers themselves than by the producers.

"For example, Illinois peaches started at a high price this year. Buyers on the ground were bidding against each other for the first cars. They created a temporarily inflated market which meant heavy loss to themselves, and later resulted in a weak market for the larger percentage of the crop.

"This condition occurs in the marketing of some commodity every season. However, producers and buyers are beginning to understand each other better. Each group is beginning to realize that it has a common problem and that the ultimate consumer must also be considered in any successful system of marketing."

NEW DISTRICT ORGANIZATION LEADERS

Left to right: Harvey D. Fink, L. F. Brissenden, R. J. Hamilton, Harry L. Hough, F. M. Higgins and A. B. Culp. These men will be stationed in various districts around the state to aid in maintaining the Illinois Agricultural Association as the strongest state farm organization in America.

STEPHENSON PROTESTS TO STATE TAX COMMISSION

Board of Review Refuses to Take Action on Equalizing Assessed Valuations in County

A FORMAL protest was made by the Stephenson County Farm Bureau to the Illinois Tax Commission recently calling attention to inequality in farm and city valuations existing in that county. The study made by the Farm Bureau tax committee and John C. Watson of the I. A. A. shows that to place farm lands on the same average assessment as the city of Freeport, would require an average cut of 24.7 per cent in farm valuations. Or to place town and city lots on the same average assessment as farm lands, it would be necessary to have an average increase of 32.94 per cent in valuations.

The local Board of Review admitted that the inequality exists, but refuses to take any action for three reasons as follows: They haven't the time, they don't know how, and they have been advised not to do anything.

"We request that you take immediate action to bring about equalization, either by sending a representative from the Tax Commission to this county to investigate the situation, or by hearing our complaint and requiring the presence of the Board of Review at the hearing before they adjourn," said the message to the State Tax Commission.

Hits Politics As Cause of Tax Inequalities

Tax Director Reveals Three Reasons for Bad Conditions In Some Counties In Illinois.

An Editorial By John C. Watson

THE State Constitution and the revenue statutes of Illinois clearly prescribe uniform valuations of all taxable property for purposes of taxation. The courts always so interpret the statutes.

The revenue laws provide that county treasurers shall be supervisors of assessments in their several counties, and shall give the assessors such instructions as will tend to produce uniformity in valuations. The Supervisor of Assessments himself is given the power of original assessment whenever he thinks that any property has been improperly assessed.

In June or July, sometimes later, each supervisor of assessment turns all assessment books over to the county board of review, consisting of the chairman of the county board, and usually of two additional members appointed, one each year, by the county judge. In counties not under township organization, the board of three county commissioners are the county board of review. The principal duty of any board of review is the equalization of valuations.

John C. Watson

Swear To Accuracy

In September or October, though sometimes later, each board of review closes its work for the year, and the members take oath that "the books—in number to which this affidavit is attached, contain a full and complete list of all the real and personal property in said county subject to taxation for the year—so far as we have been able to ascertain the same, and that the assessed value set down in the proper column opposite the several kinds and descriptions of property, is, in our opinion, a just and equal assessment of such property for purposes of taxation according to law."

Following adjournment of the county board of review, the county clerk certifies to the Illinois Tax Commission the total assessment of each of the three kinds of property locally assessed. It is the duty of the Tax Commission to equalize valuations of each class of property among the counties of the state.

DeKalb County Case

In spite of laws providing for uniform valuations and for an elaborate system of review of assessments by different public officials, assessments in almost every county of the state have gross and indefensible inequalities in valuations which could easily be removed. Due to its greater uniformity in value and to the acre unit standard, farm lands within each county are more uniformly assessed than any other property. Yet there is probably not a county in the state in which some farm land, always the poorest land and the least able to stand the burden is not assessed relative to its fair sale value, several times as high as other farm land. In city and village lots, for which there is no standard unit of measurement, the situation is much worse. It is at its worst in personal property, especially unenumerated personal property. An example of such inequality was found two years ago in DeKalb County. The manufacturing plants in the little city of Sandwich had valuations for manufacturers' tools and implements ten times as high as the much more extensive and much larger number of manufacturing plants in the City of DeKalb.

The foregoing remarks apply to valuations within the same counties. Between counties inequalities are far worse than within counties. It is not too much to say that in the state as a whole there is no class of property in which there are not some assessments, relative to fair sale value, at least ten or twenty times as high as other assessments. If the comparison is made between different classes of property, the inequality is many times worse.

Three Reasons

The principal reason for the virtual failure of equalization of valuations are three in number. First, is ignorance of the facts. Second, is timidity of public officials. Third, is politics. Sometimes two or even all of these reasons operate at the same time.

County treasurers usually do not know the facts about the assessments or what should be done to correct inequalities. They can give no proper instructions to assessors. The standards of assessors vary widely, since each one knows little or nothing about how other assessors value property. Boards of Review likewise do not know what is required for uniform assessments of different classes of property. Their equalization, so far as they do anything, is too often equalization of a comparatively small number of properties, or equalization of classes by guess work only. Even the Illinois Tax Commission can only guess at the facts about assessments of different classes of property.

In many counties the Supervisors of Assessments and Boards of Review have some knowledge of the inequalities in assessments of different classes of property, but are too timid to correct them. It is easier for such boards to permit inequalities to continue than it is to perform their proper duties.

Politics Interferes

The experience of the Illinois Agricultural Association in the last few years proves conclusively that politics often interferes or attempts to interfere with proper equalization of valuations. Appointments of members of Board of Review by county judges are often made for political reasons. The refusal of boards of review to remove admitted inequalities in many cases is clearly due to the political ambition of one or more members of the boards. It will be recalled that last year, after the Tax Commission had ordered reassessment of real estate in four counties, powerful political interests in every one of the four counties, did their utmost to prevent the orders of reassessment from being carried into effect. The Tax Commission itself was bombarded on political grounds to such an extent that it was slow and hesitant in carrying out its own order.

Ignorance of the facts about assessments, timidity in correcting inequalities, and refusal for political reasons, do not mix well with proper tax equalization.

VISITS I. A. A. OFFICE

SENATOR GEO. W. NORRIS

Senator George W. Norris Speaks Before Committee

Relates Experiences as Chairman of Agricultural and Judiciary Committees in United States Senate.

SENATOR GEORGE W. NORRIS of Nebraska visited the I. A. A. offices on Friday, Sept. 9, long enough to deliver a short address before the Executive Committee in session that day, and to get acquainted with the Association officials, staff members, and their activities.

Commenting upon his experiences as a Congressman and Senator over a period of more than 20 years, Senator Norris said, "I have been impressed with the seeming injustice shown by so many legislators and others toward agriculture. In all my experience I have never known any group to be more fair in their demands than rep-

Agricultural Investment Company.

SENATOR GEO. W. NORRIS

Senator George W. Norris Speaks Before Committee

Relates Experiences as Chairman of Agricultural and Judiciary Committees in United States Senate.

SENATOR GEORGE W. NORRIS of Nebraska visited the I. A. A. offices on Friday, Sept. 9, long enough to deliver a short address before the Executive Committee in session that day, and to get acquainted with the Association officials, staff members, and their activities.

Commenting upon his experiences as a Congressman and Senator over a period of more than 20 years, Senator Norris said, "I have been impressed with the seeming injustice shown by so many legislators and others toward agriculture. In all my experience I have never known any group to be more fair in their demands than rep-

resentatives of agriculture and agricultural organizations.

"If it becomes necessary to put the government in business to save the agricultural industry of this country I would favor such action, he said. In fact it is the government's duty to do this for its own good for all history shows us that a nation goes up or down as its rural population prospers or fails."

Senator Norris is a native of Ohio, having been born in that state in 1861. He worked on a farm, taught school, earned his way through law school, became prosecuting attorney when he moved to Nebraska, and later served as district judge in the Fifth District, for three terms. He was then elected to Congress where he served until he became a United States Senator in 1913. Senator Norris was chairman of the Agricultural Committee in the Senate during the war.

250 Club Calves Sold

THE largest sale of boys' and girls' club calves of the season was held under the auspices of the International Live Stock Exposition at the Union Stock Yards when 250 calves weighing 892 pounds (average) sold for an average price of $13.70 per cwt. Seven head reached the top price of $15.50 per cwt.

Details follow:

County	No. Head	Av. Weight	Av. Price	Top
Cedar, Iowa	9	908	$14.97	$15.50
Joe Daviess, Illinois	7	977	14.55	15.25
Douglas, Illinois	10	996	14.53	15.25

(Continued from page 5)

for your services. This is surely worth something. I am well pleased and many thanks until you are better paid."

Note: This service is free to every member of the Farm Bureau in Illinois. Satisfied members can express their appreciation by urging their neighbors to join the Farm Bureau and the Illinois Agricultural Association.

The recent Scott County Farm Bureau picnic brought out the largest crowd ever recorded in the county. "One reason it was such a great success is that everyone was invited," said Farmer Adviser Tait, "non-members as well as members came. This stimulated a better feeling for the Farm Bureau. The Kiwanis Club of Winchester attended the picnic in a body and led in community singing." Scott county is launching a drive to drive out stinking smut by treating seed with carbon carbonate.

Clippings of a story published in a recent issue of the I. A. A. RECORD were received from Honolulu, Hawaii, Long Beach and Los Angeles, California, and Jonesboro, Ark.

Senator Barkley Talks to I. A. A. Radio Audience

(Continued from page 5)

while to try it realizing that even at its worst, being a complete failure, the losses would be borne by the farmers who asked for it and not by the government. It had the virtue of being conceived and proposed by the organized farmers of the nation who ought to have some knowledge of their conditions and are entitled to be consulted about remedies."

Answers Criticism

Alluding to the criticism of the McNary Haugen bill by President Coolidge on the ground that it was class legislation, Senator Barkley said, "If this virtuous attitude toward all legislation enacted for the benefit of portions of our population were followed, Congress would find itself idle a large portion of the time. If this attitude prevailed in the levying of taxes by federal and state governments the farmers of the nation would have less cause now to complain of their condition.

"If this attitude had been strictly adhered to we would have had very little wise, or progressive legislation in behalf of the industrial, financial, educational, transportation, or other vital activities of the people. Governments exist in order that society may use them for their common advancement, in order that they may accomplish as a whole people, what could not be accomplished by the individual and unorganized effort. Legislative bodies frequently find it necessary to legislate for a particular situation that affects one portion of the people more directly than others. Such laws are intended to benefit the whole country by preventing disaster or unprofitable effort on the part of any one group.

"The government has not hesitated in the past, and does not hesitate now to use its powers to stimulate the welfare and increase the profit of certain classes of manufacturing interests in the nation," said the Senator. "They are enjoying the fruits of this governmental policy, and the farmer is contributing his share in increased costs to this prosperity, which others are enjoying."

Senator Barkley spoke before a large crowd at the Piatt County Farm Bureau picnic, Monticello, the day before on Sept. 6, where he received a great ovation. Robt. A. Cowle., ..asurer, was instrumental in persuading the Senator to come to Illinois.

Approximately 1500 stories about activities of the Illinois Agricultural Association appeared in Illinois newspapers during the month of August. During the past six months, news of The Association appeared in newspapers in practically every state in the Union.

Drugs are ineffective in treating contagious abortion of cattle, says the U. S. Department of Agriculture in a recent bulletin on this subject.

Stoll Is Champ Manager Ships All to Producers

By Ray E. Miller

FRED M. Stoll will have been manager of the Beason Cooperative Live Stock Shipping Association at Beason, Logan County, Illinois, four years on January 1st, 1928. During the entire time Mr. Stoll has never sent a car to any firm other than the Producers at Chicago or Indianapolis. Mr. Stoll and his directors claim the long distance record for consistent support of the Producer movement. Furthermore, he says the service has been entirely satisfactory. Stoll could not recall having ever had a kick. Of course, there have been occasions when his patrons were not fully satisfied with the market but so far as the shipping association and the Producer service are concerned, the members of the Beason Shipping Association seem pretty well satisfied.

A record of this kind certainly is an enviable one, both for the association and for the manager. It speaks volumes for efficient service at both the local and terminal points. More than that it indicates excellent Farm Bureau support in Mr. Stoll's territory. Farm Advisor Checkley says "Hurrah for Logan County!" He wants to know how many Farm Advisers of the State can produce 100 per cent Producer Association managers who will compare with Mr. Stoll.

Agricultural Investment Company

(Continued from page 6)

the supervision of the Federal Farm Loan Board. The Investment Company will also own the control of a credit corporation which will make intermediate loans on crops and live stock. These loans will be rediscounted in the Federal Intermediate Credit Bank and elsewhere and will therefore be subject to the regulation of the Federal Farm Loan Board. The third thing, the Investment Company will do is to conduct a high class investment business for farmers and others. If farmers can be induced to diversify their investments by putting some of their capital in high grade, listed securities along with their land holdings it will be a very helpful thing.

"On the Board of Directors of the Transportation Bank of Chicago and of the Agricultural Investment Company will be found men affiliated with the Illinois Agricultural Association and other farm organizations. It is understood by you and by us, and should be clearly understood by your membership that they are acting only in their individual capacities."

A perfumed fertilizer made of pressed cocoa meal and containing four per cent of nitrogen is now available for the meticulous farmer, says the U. S. Department of Agriculture.

The Illinois Agricultural A RECORL

Government Crop Forecasts Upheld

Dr. Taylor Tells I. A. A. Radio Audience How Government Forecasts May Help Farmer

By HENRY C. TAYLOR

Institute for Research in Land Economics, and Public Utilities, Northwestern University, Chicago.

GOVERNMENT crop reports give essential information to the farmer. The farmer sees from day to day the activities on his own farm and in the immediate neighborhood. He sees something of what is going on at the local market from time to time when he goes to deliver his produce. Once a year when he visits a county or state fair or the International Livestock Exposition he may get a still broader view of what is going on in the world of agriculture. Beyond this, by the very nature of his calling, his eye does not reach; he must see through the eyes of others or work in the dark.

Price Important

In the olden days when the farmer produced primarily for his own home, crop reports were of little importance to him. But in these modern days of commercial agriculture when the farmer produces primarily for the market and buys upon the market a large portion of the food, clothing and other supplies essential to his well-being, the price for which he can sell his products becomes a dominant factor in determining his prosperity. The supply of farm products may be abundant but if the price is too low the farmer may be in distress.

Needs Information

The local environment which falls under the eye of the farmer does not produce the facts on which the farmer can judge the trend of farm production and prices. Without information from the outside the farmer must proceed in ignorance of the competing forces which determine his prosperity. In manufacturing and transportation, the management is in the hands of the few, in agriculture the management is in the hands of the many. Good management in industry and transportation requires that the few in authority have a comprehensive knowledge of the whole economic setting of their activity. They are able to employ agents and experts to keep them fully informed. In agriculture millions of farmers are of necessity in authority and each of them can not employ agents to secure information.

It was to fulfill the purpose of providing information which would give these millions of farm managers a mental vision of the economic life of which they are a part that the United States Department of Agriculture has attempted to serve as "the eye of the farmer" in this and other lands.

The Department's major function is that of gathering facts, focusing them acurately and giving them to farmers and others interested in agricultural production and marketing.

DEFENDS GOVERNMENT FORECASTS

Dr. Henry C. Taylor

Dr. Taylor organized the Division of Agricultural Economics at Washington in 1921 and was its first head under Secretary of Agriculture Henry C. Wallace. The radio talk presented herewith was delivered on the I. A. A. radio program, Friday Oct. 7, station WJJD, Chicago.

Tax Committees Score Victory In Hearing

Illinois Tax Commission Upholds I. A. A. System of Checking Valuations on Farm and City Property

THE Illinois Tax Commission gave complete recognition to the I. A. A. and Farm Bureau system of checking farm and city property valuations for assessment purposes in a hearing held in Chicago on Thursday, Oct. 6.

Donald Kirkpatrick

The hearing involved the counties of Champaign and Stephenson where the Boards of Review had neglected to take action in equalizing farm and city valuations when wide discrepancies had been revealed. Both Farm Bureaus and Boards of Review were represented, the Stephenson county board also by its state's attorney.

When the latter objected to the Farm Bureau's method of checking valuations, Mr. Francis of the Tax Commission asked if he knew a better system of obtaining the necessary data. State's Attorney Jaynes confessed that he did not, whereupon the Commission advised that the use of representative sales of both farm and city property was the only way assessed valuations could be checked.

Then the Stephenson county board tried to establish the fact that there was insufficient time to equalize valuations in the county. But here again it was revealed that the Farm Bureau made the presentation of its case in ample time for necessary adjustment.

The Tax Commission then recommended that the Farm Bureau representatives and the Board of Review get together within the next week and plan to equalize with the stipulation that there be either a 30 per cent increase in valuations for tax purposes in the city of Freeport or a reduction of 24 per cent on farm lands. It was implied that if the necessary adjustment was not made, the Commission

(Continued on page 2, col. 3)

What the Members Say

Thank You

Editor, RECORD:

YOUR paper is doing very constructive and helpful work for American agriculture. The editorial "Against Switching Support" in the September issue is exactly right. The farmers of this county, and of Illinois and the country at large, have nothing to gain by the so-called "Export Debenture" proposal. It is merely another form of subsidy. The University men make a mistake which is against the interests of agriculture to insist on advancing the proposal at the wrong psychological time. No plan has yet been suggested which promises assistance on a more sound basis than the surplus control through the equalization fee proposed in the McNary-Haugen Bill. Do not let a division come among the forces back of agriculture on this proposition.

You will find the farmers of Illinois lined up solidly behind your efforts as long as you stick to this policy. Furthermore, the fight by down-state against increase of legislative voting power in Cook County will not abate until legislators from Cook County, both at Springfield and Washington, develop statesmanship to sympathize with and support the demands of agriculture for fair play.

PETER P. SCHAEFER,
Champaign County, Ill.

A Good Record

Editor, RECORD:

IN YOUR September issue I see where Mr. Stoll, Manager of the Beason Live Stock Shipping Association has been a true man to the Producers Commission Association of Chicago and Indianapolis for four years. This is very good indeed. But, as I am manager of the A. R. Shipping Association I have Mr. Stoll beaten by one year, for by Jan. 18, 1928, I will have been on the job for five years, and every load has gone to one of the two Producers' Associations, either Chicago or Indianapolis.

I do not want to boast, but thought you might be interested to know that there is one association and manager in Champaign that has been 100 per cent for the Producers Association.

HENRY KILIAN, Jr., Mgr.,
A. & R. Shipping Ass'n., Broadlands, Illinois.

All to Producers

Editor, RECORD:

I NOTICED in your last article in the RECORD about managers for livestock shipping associations. In September, 1923, we organized a live stock shipping association in this county. We have had the same County Manager, the same president, and the same secretary-treasurer ever since. And there have been only three changes in the Board of Directors since the organization.

Every carload of stock that has been shipped out has been sent to the Producers. In fact, our constitution and by-laws require that all stock be shipped to the Producers unless a majority of the shippers request that we ship to some other commission firm.

I believe our record is equal to that or a little ahead of the Logan county shipping association. G. C. Clifton of Iuka, Illinois, is our manager; C. H. Stanford, president, and Roy Charlton, secretary-treasurer. Mr. Charlton is also president of the Farm Bureau in our county.

FRED J. BLACKBURN,
County Agent, Marion County, Ill.

Another Good One

Editor, RECORD:

IN THE last issue of the I. A. A. RECORD I note the record of Fred M. Stoll, manager of the Beason Cooperative live Stock Shipping Association in Logan County. I just want to send you the record of our man who has this record beat.

Harold Bradshaw has been manager of the Live Stock Shipping Association at Albion five years, February 1st, 1928. He has shipped everything to the Live Stock Producers at St. Louis. He also helped organize the Producers at Evansville, and the Wabash County Shipping Association. He attended the American Institute of Cooperation at St. Paul, Minn., last year and at Chicago this year. He has given such good satisfaction that the local buyers ship a large amount of stock with him.

In addition he handles feed and fertilizer at five cents above the actual cost.

Tell Checkley that he is not the only adviser that has a one hundred per cent Producers' Association manager.

H. N. MYERS,
Farm Adviser, Edwards County, Ill.

Editor, RECORD:

Who won the $50 attendance prize at the I. A. A. state picnic?

E. H. Hess of Washington in Tazewell county won this prize.

Illinois Agricultural Association,
608 South Dearborn St.,
Chicago, Ill.

"We are everyday listeners on your noonday program and think it's very good work you are putting on. We have just heard Senator Barkley talk from your station this noon, and commend him very highly for it. We are for more Senators like Mr. Barkley, and hope to hear him again."

EDWIN F. KANEY,
Shannon, Ogle County, Ill.

George Curtis, formerly of Stockton, Jo Davies county, is the new manager of the McLean County Service Company.

Smith and Barton Named On Farm Guard Committee

I. A. A. Votes To Lend Aid Toward Forming State Protective Body

PRESIDENT EARL C. SMITH, and Vice-President Frank D. Barton were named by the Executive Committee to serve on the Illinois Farm Guard Committee the purpose of which is to unite all efforts toward driving farm thievery out of the state.

The State Committee formed at Springfield on September 28 is made up of the Illinois Agricultural Association, Prairie Farmer, the Illinois Anti-Horse Thief Association, the State Detective Association, the Illinois Poultry Dealers Association, the Illinois Bankers Association, the Illinois Association of Farm Advisers, and the State Department of Agriculture. C. V. Gregory of Prairie Farmer is general chairman, and Alden Snyder of Montgomery county is secretary.

R. C. Saunders, of the Bankers Association who organized the Town Guard system to drive bank robbers out of the state has pledged his aid to perfect a similar Farm Guard system for the rural districts. The proposed plan involves the selection of three or more Farm Guards in every school district who will be trained in the use of firearms, and in apprehending criminals. The organization will be open to all farmers. Henry and Marshall-Putnam counties already have taken steps in this direction.

Tax Committees Score Victory In Hearing

(Continued from page 1)

would be forced to act to fulfill the law.

The Champaign County Board of Review made no contest, admitting that certain inequalities existed. They left the matter to the discretion of the Tax Commission.

Donald Kirkpatrick, legal counsel, and John C. Watson, director of taxation, represented the Illinois Agricultural Association. Farm Adviser C. C. Burns, W. Z. Black, and R. W. Hinton, chairman of the county Tax Committee, represented Champaign county. Farm Adviser W. A. Herrington, L. M. Swanzey, Theo. Ellis, Tom Niblo,, Jim Daws, Harry Snyder, Ray Folgate, G. A. Mitchell, Frank Fleucheling and M. F. Kotman represented Stephenson county.

THE Knox County Board of Review voluntarily reduced farm valuations 25 per cent in that county when a discrepancy between city and farm valuations was revealed. The Knox County Farm Bureau presented the matter of equalization to the Board of Review on Aug. 19. The Board called in the assessors who agreed to reduce all townships on 25 per cent basis.

"Our Board of Review deserve a lot of credit and thanks for their promptness in making this reduction," says Farm Adviser Marchant.

The annual meeting of the Illinois Farm Supply Co. will be held on Friday, Oct. 14, in the I. A. A. offices, Chicago.

Government Crop Forecasts Upheld

(Continued from page 1)

Eye of Farmer

The issuing of crop outlook reports or crop forecasts as they are commonly called was the first effort of the Department of Agriculture to serve as the eye of the farmer. Without these reports farmers would have to market their crops without any knowledge of whether or not the crops in other places are large or small. The buyers of farm products have their own private agencies securing information for them. Hence the government crop reporting service is essential if the farmer is not to plod along in the dark while the middlemen to whom farmers sell their products know what is happening in the world.

Trying To Kill Service

Many organized groups like the great cotton exchanges and grain exchanges have done what they could from time to time to discourage government crop reports. The speculative market is truly disturbed by full information. Future trading is reduced by reliable crop reports issued at frequent intervals. This is because future trading is in part for hedging, that is insuring against loss due to changes in prices. Anything that reduces uncertainty reduces the need for this insurance. This, of course, is a loss to the speculative market operators but it is a gain for all others. The producers and the users of farm products benefit by full information and are usually found backing the crop reporting service of the Department. When the issuing of crop reports come at the same time as falling prices, farmers have been known to protest against the reports. Organized groups of merchants are believed to have subsidized "stool pigeon" farm leaders to protest against crop reports at times when big crops are leading to falling prices. Wise farmers are not fooled by this type of propaganda. They know the dealers have the information and that prices will fall when supplies are large whether the farmers have the facts or not.

Farmers Use Facts

Intelligent farmers use the facts and plan to hold their products. Furthermore, thoughtful farmers know that the government can not issue a part of the facts and hold back other facts. It must tell all of the truth. If short crops leading to high prices are to be reported then long crops must be reported also. The full truth puts the farmer on an even basis with the man to whom he sells. A dealer in farm products once said to me, "I don't like this information service of the Department of Agriculture. The trouble is everybody has the information. It is the information I have which the other fellow does not have that is worth money to me." The agitation against crop reports originates in the great exchanges where farm products are bought and sold. Its purpose is to destroy the clear vision of the "eye of the farmer" in order that the products of the farm may more successfully be used as material for the speculative game.

May E. Youngberg and Inez Nelson, office secretaries of the Winnebago and DeKalb County Farm Bureau, respectively, tied for first place for securing the greatest number of applications during Automobile Insurance Week.

Has Gone Further

In recent years the Department of Agriculture has gone much further than simply to report on crop conditions in this country. It has collected and published facts about crop conditions in all parts of the world where foreign farmers are competing with American farmers. All this is an essential part of the picture the farmer must hold in mind if he is to produce and market crops intelligently.

Another important improvement in the information service provided by the Department of Agriculture was initiated by Secretary Henry C. Wallace soon after he went to Washington. I refer to the Livestock Outlook Reports, and particularly to the Pig Survey made each spring which gives accurate information to farmers about the first of July regarding the number of spring pigs which are available for feeding and which will be in the market during the following fall and winter. At the same time information is secured regarding intentions to breed for fall litters. This information is given early enough so that farmers may change their plans either to increase or decrease the number of litters, according to whether there is an under-supply or an over-supply of spring pigs. Again in December a similar report is isued to guide farmers in planning their spring pig crop. These reports give the farmers a chance to act intelligently in producing an orderly supply of hogs for the market.

February Report

The next great step forward in improving the "eye of the farmer" was the February report on intentions to plant and the general outlook with respect to the probable demand for agricultural products. This spring outlook report gives farmers information needed in deciding what and how much to plant. This has done much to keep farmers from planting too much in one year and then too little the next. In the past, increased prices led to increased planting and low prices to reduced planting. This was often wrong because variation in yield due to weather conditions has more to do than acreage in controlling the supply of farm products. The outlook reports give the fact so the farmers may act more intelligently.

I cannot in the brief time available give any more details regarding this economic service, this "eye of the farmer" operated by the Department of Agriculture; but I want to emphasize the fact that the Department of Agriculture has gone far towards developing methods of collecting and distributing information which will enable the farmer to have a much clearer mental vision of the economic facts and forces which determine his profits than has ever been true before. Unfortunately, there are those who would destroy this information service because they would then be in a position to profit by keeping the farmers ignorant.

Out To Make Money

Do not misunderstand me about these speculators in farm products. They have no desire to hurt farmers, they would rather see them prosperous than depressed, but the interest of these dealers centers in their own profits. They see and discuss crop and market reports from their own point of view. Their point of view is not the general welfare nor the profits of the farmer. What is needed is that farmers seek their own interest with the same intelligence as do these business men. The purpose of the government information service is to help farmers understand the production and marketing situations so that they can pursue their own interest in the light of equally good information.

Should Help Service

Unfortunately farmers sometimes join with the speculators in complaining about this service. If farmers and farm organizations can do anything to help improve the information service of the Department of Agriculture they should not hesitate to give their suggestions and helpful criticisms directly to the officials of the Department. The United States government crop and livestock estimates are the best in the world. They could be improved if more funds were available but they are now superior to any like reports in this or other lands. The crop estimates are not always understood by their critics. The crop reports give the conditions as of a given date and indicate that on the basis of average results in the past following such conditions a given crop is indicated. Every report states specifically that the outcome of the crop for the season will be more or less than the figure indicated depending on the weather and other conditions during the time yet to intervene before the crop is harvested. The closer to the harvest the reports are the less the chance for change in the crop outlook and the more dependable the estimates. Much of the wheat and much of the cotton is marketed long before the last of the crop is harvested. Without estimates many a farmer would be

The Chicago Tax Situation

THE good people of Chicago are uncovering some of the rottenness in the tax situation in that city. In a recent memorandum to the Cook County Board of Review, George O. Fairweather, and John O. Rees, members of the Joint Commission on Real Estate Valuation point out some of the gross inequalities still existing even after the Board is supposed to have made needed adjustments.

Thus it has been found that many properties are assessed at more than their sales value, while countless others are assessed as low as one to 20 per cent of their fair sales value.

The Commission found that of 58 properties originally assessed at 91 per cent or more of their sales value, five were changed to over 101 per cent, nine to 91-95 per cent of their sales value, three to 86-90 per cent, five to 81-85 per cent, six to 76-80 per cent, nine to 71-75 per cent, four to 51-55 per cent, one to 26-30 per cent, one to 31-35 per cent, and so on.

Thirty-seven properties were assessed at one to 10 per cent of their fair sales value and after being reviewed by the Board of Review only one of these changed and it was raised to 46-50 per cent. The other 36 were left "as is."

This is all very illuminating, in view of the provision in the constitution of Illinois which says that all property must be assessed equally.

Margaret Haley, leader of the Chicago Teachers' Federation is on the war path and has been granted a hearing before the State Tax Commission to present some of these interesting comparisons. She is out after the tax dodgers.

To get ready for the fight, she attended the hearing befor the Commission last week when the I. A. A. and the Farm Bureaus of Stephenson and Champaign presented their case.

Tax revision in Chicago is of interest to downstate because the state tax rate is applied to valuations made by the local boards. For some time, John C. Watson has contended that equalization between counties would result in raising the general level of assessed valuation in Chicago. The outcome of these hearings before the Tax Commission will decide the part the Association must play in bringing about needed changes.

Farm Bureau Contract Legal

THE Farm Bureau membership contract is legal and binding. Farm Bureau dues must be paid. This is the decision of the Appellate Court of Illinois at Ottawa in reversing the decision of the circuit and justice courts in LaSalle county.

Jos. E. Thompson dropped out of the LaSalle County Farm Bureau after paying one year's dues. He still owed two years' dues but refused to pay. The Farm Bureau sued and the local justice of the peace held that the Bureau could not collect.

Judge Eldredge in the Circuit Court sustained the decision of the J. P. Attorneys for the Farm Bureau again appealed the case and the higher court established the legality of the contract.

This decision will be of interest to members in every county. The Farm Bureau is a responsible organization. Its contracts and agreements are as binding and inviolable as those of any organization. It is well to have this fact firmly established in law.

Not The Solution

THE National Drainage Association wants tax relief. It suggests the establishment of a revolving fund by Congress from which drainage boards can borrow to meet their annual payments on drainage bonds and interest. It would borrow government money free of charge with plenty of time allowed to pay it back.

Perhaps this is no more a subsidy than the government is now allowing to steel, aluminum, and other highly protected commodities. But will this solve the problem of the farmer on drained lands who can not meet his taxes and other fixed charges? Our answer is no. We would call this light treatment. It would help a little. But we believe in the doctrine of putting first things first. Go after the big thing and the little ones will take care of themselves.

A surplus control plan that will enable farmers to get a fair price for his product is needed. This is the big idea. Give the drainage farmer a substantial income and he'll not complain about nominal interest charges.

Whom Do You Want?

WHOM do you want for a speaker at the next annual meeting of the I. A. A? This is the question the Committee is debating. Choose someone of national prominence. Select the man or woman you would rather meet and hear than any other, in the United States or beyond. Then send a letter or card to the Editor of the RECORD expressing your choice. Your communication will be turned over to the Program Committee and the leading candidate will be announced in the next issue. The next annual convention is scheduled for Jan. 18, 19, and 20 at Rock Island. Plan now to attend.

Working Together in Richland County

County Wide Shipping Association Works Hand in Hand With Farm Bureau and Producers

A. E. MILLER

RICHLAND County, Illinois, has a county-wide live stock shipping association which is an excellent type of cooperative that is gradually developing throughout the corn belt. The Richland Association was originally formed by the Richland County Farm Bureau in 1922. W. B. Bunn, the present Adviser, came to the county in the spring of 1923 and lent a helping hand to the Association which at that time needed just this spirit and encouragement.

Since 1923 the Association has continued to grow and thrive until at present it handles the major portion of the live stock going from this county. Richland County is not one of the large live stock producing counties, but last year this Association sold 117 cars. Kindly get the next statement. *One hundred per cent of the Richland County Live Stock Shipping Association business went to Producer Agencies.* Of this amount one-half went to the Indianapolis Producers and the other half was divided between St. Louis and Cincinnati.

The Richland County Farm Bureau and the Richland County Shipping Association are very closely allied. In fact, membership in the Farm Bureau entitles one to membership in the Shipping Association. A charge of 10 cents per hundred weight is made on shipments from non-members of the Association. Mr. Bunn states that this differential between members and non-members of the Shipping Association has been of great value to him in building the Farm Bureau organization in that county.

Four Local Managers

The Association is managed by a board of nine directors, one from each township. Officers of the Association are elected from among the directors. Regular meetings of the directors are held and the annual meeting of the Association is always made an occasion for a systematic study of the past year's business.

The business of the Association is handled by four local managers—Chris Seiler at Olney; C. W. Hawkins at Noble; Ed. Lathrop at Claremont; J. E. Franklin at Dundas. These managers assemble the loads and ship them out. The managers' commission is 10 cents per hundred weight on cattle and 12 cents on other stock. An insurance charge of one-half of one per cent of the gross receipts is made on all shipments. This has been found ample to cover losses.

Centrally Located

The returns are brought to the Farm Bureau office where the Association's books are kept. All returns

Loading Livestock—Richland County Shipping Association.

Well Pleased

C. H. Vinson of Vermilion County, Ill., shipped a carload of cattle from Kansas City more than a year ago. He accompanied the shipment home. The train was delayed so that the cattle arrived in a weakened condition, with one dead. Two more died as a result of the long trip, whereupon Vinson tried to collect from the railroad. Unable to secure a settlement, he referred the case to the Vermilion County Farm Bureau who relayed it to the Illinois Agricultural Association. After some delay occasioned by dilatory tactics on the part of the railroad, a settlement was made, whereupon Mr. Vinson wrote the following letter:

Transportation Dept.,
Illinois Agricultural
Association.

Received your letter of September 10 stating that you had obtained an offer from the Railroad Company in the amount of $135. A note that you think this the best settlement that you can secure.

I will say that I surely appreciate your efforts in this case. Had it not been for you I would not have realized anything from them. Therefore, I am well pleased to settle for this amount—$135.

C. H. Vinson.

Twenty-five hundred attended the plowing match and tractor demonstration held recently in Morgan county. Limestone spreaders and threshing machines as well as plows and tractors were demonstrated. After dinner 13 tractors entered the plowing contest. Congressman Rainey spoke on the agricultural situation. The joint town and country picnic held at Jacksonville on Labor Day brought out more than 5,000 people.

Seven Counties Start Membership Campaigns

Tazewell Nearly Complete With Heavy Signup, Iroquois Ready to Start Drive

SEVEN Illinois County Farm Bureaus have launched or will soon begin their triennial campaigns to renew members.

Tazewell county is the farthest along with its membership campaign where the signup has been heavy. With five townships still incompletely solicited, the total membership signed on September 29 was 913. G. E. Metzger, director of organization estimates that this county will have well over 1000 members in the organization within the next week or two.

Gallatin, Pope, Wayne, Cumberland, and Clay counties, all in Southern Illinois, have already begun their renewal campaigns with their district organizer F. M. Higgins lending active support to advance the strength of the organization in this quarter.

The new organization plan with district men located in various sections is starting off well, says Mr. Metzger. In his judgment it will be the means of bringing the state organization up to a strength of 75,000 probably as early as next year. To show how the plan is working out, Metzger points to a current illustration.

Down in Champaign county district leader, A. B. Culp recently held an organization school with five men picked from each of three communities. The new Farm Bureau motion picture film was shown and the various activities and projects of the county and state organizations explained.

Then each of the three groups selected 30 prospective members from each community making 90 prospects in all. Each of the 15 local members then went out and in one day signed 57 of the 90 men seen. Before the cleanup drive, none of these communities had a heavy membership, and one had only eight. By reaching each farmer in the state in this way it is hoped to increase the membership to new high levels.

Fruit Exchange Buys Spuds for County F. B. Members

To Handle Northern Illinois and Red River Valley Potatoes Without Charge

NORTHERN grown potatoes for seed and table use will be handled free for all Illinois Farm Bureau members by the Illinois Fruit Growers' Exchange. This is the announcement of A. B. Leeper, manager of the Exchange, made in a recent letter to all County Farm Bureaus.

A. B. Leeper

"The season is at hand," states Mt. Leeper, "when farmers who do not grow enough potatoes for their own use will want to purchase their supplies for this year. The Illinois Fruit Growers' Exchange is handling a nice lot of Northern Illinois grown potatoes. These are just as good as potatoes from the far north or better. These Illinois potatoes are Green Mountains, a fine variety for table use.

To Assist Bureaus

"Mr. Harry Day expects to spend his entire time during the next month assisting Farm Bureaus in placing orders for their respective counties. If you are interested, drop us a line immediately and Mr. Day will get to your county as soon as possible. He will have samples of these potatoes with him. Here is a chance for some real cooperation, as we are selling the products of Farm Bureau members direct to other Farm Bureau members without any middlemen's profits.

"We are also in position to furnish early Ohios from the best cooperative and dealers in the Red River Valley, and Round Whites from farther north. If your Farm Bureau does not want to buy potatoes, the Exchange will appreciate it if you will take this matter up with the cooperative associations, elevators, or dealers in your county.

No Buying Charge

"There will be no buying charge for this service. The prices we quote you will be net delivered, and the potatoes will be shipped to you subject to inspection. You will no doubt receive quotations from a great many concerns and some of them may be lower than ours, but a difference of five to ten cents per hundred can be absorbed very quickly in quality. The potatoes we handle will be high quality products. Prices on potatoes change very rapidly, but at present they are selling around $1.75 per hundred delivered to most of the counties in the State. You understand the market may change at any time. If you want to purchase potatoes before Day gets to see you, get in touch with the Exchange office at Centralia and we will quote you the lowest price for quality stock on the day we receive your inquiry."

What the Counties Are Doing

PROFITABLE returns from the swine sanitation plan and from feeding a balanced ration were forcefully demonstrated to 125 farmers who attended the livestock tour in Hancock county in September.

Eighty Farm Bureau members guessed the total weight of the 83 spring pigs on the W. S. Felgar farm. The guess of the winner of the $10 prize, Harry L. Burling, was within 30 lbs. of the actual weight of the entire drove. The pigs averaged 234.6 lbs. per head at six months and 12 days.

These shoats were farrowed by 10 sows and were self-fed on corn and the two to one tankage and oil meal mixture on clover pasture. They were sold by the Chicago Producers' Commission Association on September 8 at $11.40 per cwt., which was the top for that day. Accurate feed records kept in cooperation with the University of Illinois show that the cost of producing these hogs was around $7 per cwt., which is far below the average figure and which left Mr. Felgar a nice margin of profit.

An interesting proof of the fact that the composite opinion of a group of livestock men will be about correct is the fact that the average of the 80 guesses on the weight of this drove of hogs was only a little more than a pound per head from the actual weight.

MACOUPIN County won the grand champion county herd prize at the State Fair on five Hereford calves from the Jones Ranch in Texas. (Circle Brand). They were bought through the Producers' calf pool. These calves were all in the Virden Calf Club, with Bruce Ogg, local leader. "There are 59 head of these splendid calves in the Virden Club," says Farm Adviser Rusk, "and 29 more of the same brand in the Modesto Club. We have about 100 club calves in the county. The Virden Club show will constitute the principal part of the morning program of our Seventh Annual Farm Bureau Rally Day to be held at Virden, Saturday, Oct. 22."

Macoupin recently celebrated its Seventh Annual Soy Bean Day on C. C. Coots' farm two miles southeast of Modesto.

J. W. WHISENAND, farm adviser in Henry County announces that the local Board of Review reduced land valuations for tax purposes 12½ per cent in that county. The Henry County Farm Bureau presented facts and figures showing wide discrepancies between assessed valuations of farm and city property.

(Continued on page 7)

Watson Warns Against Higher Highway Taxes

Counties Now Have Power To Levy Four Times As Much For County Road Purposes As Formerly

BY REASON of the passage of the so-called Chicago bonding measures in the 55th General Assembly, county boards of supervisors and commissioners now have power to levy four times as much taxes for county highway purposes as before the changing of the statutes. This is the information recently forwarded to Illinois County Farm Bureaus by John C. Watson, director of taxation, in asking for information relative to changes in such levies.

John C. Watson

On the old basis of assessment, at the maximum rates then fixed no county board without a favorable vote of the people could levy any amount requiring a tax rate in excess of 25 cents on the $100 assessed valuation.

Due to changes in the law made by the House Committee on Revenue in the last legislature, county boards are now limited only by the constitution and may levy any amount not requiring more than a 50 cent tax rate. This rate if applied to full valuations, which are double the former assessed valuations, would quadruple the county road tax.

Several Increases

Preliminary returns received from counties in answer to a questionnaire, indicate that there have been several increases in road tax levies. Mr. Watson will make a study of the situation when all reports are in to determine what use is being made by county boards of the increased taxing power granted, to raise taxes.

The purpose of the study is to give farmers latest information relative to trends in taxation that they may use their judgment in protesting or acquiescing to such changes. Indications are that most county boards will merely cut the previous tax rate in half thereby maintaining the levy at the same level as in 1926, and former years.

In the view of the prospective return of gasoline tax funds to counties after January 1, it is doubtful, if any increases in road levies are necessary. There is good reason why many such levies should be reduced.

President Earl C. Smith, Geo. F. Tullock, and C. E. Bamborough are serving as a committee of three to make recommendations regarding the selection of a secretary for the Association.

STATE CHAMPION LIVESTOCK JUDGES

Macon county's fat stock judging team above won first in the recent state contest held at the University of Illinois for club members. Left to right are Farm Adviser E. H. Walworth, Dan Shutter, Carroll Cassity, Lawrence Hockaday, and L. W. Shutter, coach.

The lad in the circle is Albert Dozier of the Sangamon county team who won high individual honors.

The group below is DeKalb county's crack dairy judging team showing Raymond C. Nelson, assistant adviser and coach, Charles Lett, Ralph Nelson, and Thos. Robinson.

Donald Dean of the Bureau county team is the boy in the oval. He is the state champion dairy judge. These boys will represent Illinois at coming national contests.

Government Crop Forecasts Upheld

(Continued from page 3)

in the dark until the product has passed out of his hands. The estimates give a valuable basis of judgment. Those who operate on the basis of this information will on the average come out far ahead of those who go it in the dark.

Protect Govt. Forecasting

It is the duty of every farmer and of every organized group of farmers to do everything they can to protect and not to destroy this invaluable service without which the farmers must work in the dark so far as their own economic outlook is concerned. The farmer's own eye will not reach. It is necessary for the nation to provide an organization which will transmit information to the farmer if he is not to be left in ignorance while those to whom he sells his products operate in the light of privately collected information. Uncle Sam, through the Bureau of Agricultural Economics of the United States Department of Agriculture is striving to perform this function.

How completely Uncle Sam can provide this service depends largely on the extent to which he has the aid of statesmen who wish to serve the nation as a whole. The organized farmers of America must be alert to protect this "eye of the farmer" and keep its economic vision clear and strong in order that the image it transmits may be a true reflection of the facts that concern them. While struggling to develop this service Secretary Wallace said, "Farmers must organize and fight for their rights," and he prophesied that unless they do so the Department of Agriculture will not be able to continue freely to collect and give out economic information essential to the independence of the farmers: in other words, without the support of organized agriculture the "eye of the farmer" will not be able to function.

The Jersey County Farm Bureau introduced a novel feature at its recent picnic when communities rather than individuals competed in the various contests. Each community was asked to furnish entries, and points made were credited to the community from which the contestant was entered. Ten different neighbors were represented. Contests included horseshoe pitching, a slow Ford race, rolling pin throwing, hog calling, chicken calling, and others. The Voorhees community won the 17 points and received a loving cup 2½ feet high made of tin.

Working Together in Richland County

(Continued from page 5)

to individual shippers are figured here and returns made to shippers. Richland County geography lends itself to this arrangement. This is a fairly small county and Olney, the county seat, at which point the Farm Bureau office is located, is almost the exact center of the county.

The outstanding features of the Richland County Shipping Association are: A 100 per cent Producer spirit and the complete satisfaction of such a policy, the intimate relationship between the Farm Bureau and the Shipping Association, and the differential between members and non-members of the Association. Ailing Associations in some sections might do well to remodel their Associations after the Richland plan.

What the Counties Are Doing

(Continued from page 6)

O. G. BARRETT, farm adviser in Cook county, returned recently from a trip through the cornborer infested area of the east. Cook county raises in the neighborhood of $1,000,000 worth of sweet corn annually and because the oncoming borer threatens sweet corn Cook county farmers feel that they are faced with a serious problem. The Cook County Board of Commissioners recently made a very liberal appropriation to the Farm Bureau, largely because of the menace of this threatening pest.

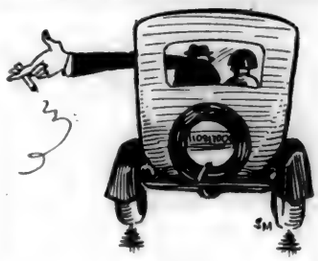
Barrett traveled through Michigan and badly infected area of Canada, going over the sweet corn area in the vicinity of Boston, and back through New York and Ohio. "We can be mighty thankful that the borer started its work in an area of light corn acreage," said Barrett. He is urging Cook county farmers to use raw rock phosphate and limestone preparatory to seeding more alfalfa and sweet clover.

Kewanee-Pekin High Line Investigated

Farm Bureau and Commerce Commission Officials Tour Over Proposed Route

Farm Bureau officials from Stark and Peoria counties accompanied by Engineer White of the Illinois Commerce Commission recently drove by auto over the proposed route of the Super-Power Co.'s high line between Kewanee and Pekin. L. J. Quasey, transportation director represented the Illinois Agricultural Association.

The object of the tour held Oct. 7, 8 was to eliminate objectionable features along the route so as to damage a minimum of farm lands.



A meeting of Farm Bureau and public utility representatives was held in Peoria on Saturday to discuss controversial matters connected with the proposed line.

Accident Prevention Key To Lower Insurance Rates

Illustrations to Show How Auto Smash-ups May Be Avoided

BELOW is presented the first of a series of pictures illustrating the cause of the more common accidents and the way in which they can be prevented. Most accidents are preventable. Many are due to the lack of knowledge of the rules of the road and the provisions of State Laws governing the use of motor vehicles on the highways.

These pictures illustrate the rule that one should never attempt to pass a car on a hill. In fact, do not try to pass a car under any circumstances unless you have a clear and unobstructed view of the road ahead for a sufficient distance to allow you to regain your proper position on the right hand side of the highway. Statistics of insurance companies operating in the United States indicate that more than 61 per cent of accidents reported to the insurance companies are collisions with another vehicle.

Rules for Drivers

AN ARM protruding from the car ahead means that the driver is:

1. Knocking ashes off his cigarette.
2. Going to turn to the left.
3. Telling a small boy to shut up; he won't buy any red pop.
4. Going to turn to the right.
5. Pointing out a scenic spot.
6. Going to back up.
7. Feeling for rain.
8. Telling his wife, "Hell, yes, he's sure the kitchen door is locked."
9. Saluting a passing motorist.
10. Going to stop.

The average cost per claim is $64. This represents the damage to property only, and does not take into consideration the injury to the occupants of either or both cars involved.

It is a great temptation when following another car up a hill to pass the car ahead if it is traveling at a slower speed than your own. This temptation should be overcome under all conditions. The illustrations shown below indicate the right way and the wrong way to drive up a hill.

Accident prevention can only be accomplished by the serious co-operation of every automobile driver.

Seventy-five per cent of them are avoidable. Carelessness in one of its many forms is responsible for nearly every smashup. Give the man crossing your path from the right the right of way. Always signal when stopping or turning off the road. Don't go to sleep while driving. If you are sleepy pull off the road and rest a few minutes. Keep your mind on your driving.

Watch this space for further information on accident prevention.

THE WRONG WAY

Pledge Renewed At St. Louis Conference

Plans Made To Carry On Equality Fight In 70th Congress

"THERE will be an equalization fee in the next Congress or an equalization fight in the next presidential campaign."

Farmers and farm leaders from 20 states of the Corn Belt and South renewed their allegiance to this pledge at St. Louis on Nov. 1-2.

There were no signs of faltering, no move to retreat from the goal almost reached in the 69th Congress. But there was a determination written on the faces of those who came to this assembly comparable to that of the Continental Congress that framed the Declaration of Independence. With almost religious fervor, this united group decided to keep the faith and carry on the fight for the principles embodied in the McNary-Haugen bill.

Gov. McMullen Keynotes

Governor Adam McMullen of Nebraska, the keynote speaker, presented forcefully the cause for which the cotton and tobacco farmers of the South and corn and wheat farmers of the West have united. There was nothing especially new in his address. He called attention to the agricultural problem and the need for aid. He showed what had been done to help other groups. He voiced the belief that the equalization fee plan was the best solution yet offered. He challenged the right of the administration to proceed further in the industrialization of the nation at the expense of agriculture. He rebuked leaders of both parties for failing to fulfill the party platform pledges. He reviewed the history of the fight for surplus control legislation. He scored Senator Borah for his seeming duplicity. And he advanced the idea that a determined effort should be made to pass a suitable bill over the President's veto in the next Congress if necessary.

(Continued on page 2, col. 2)

I. A. A. OFFICE CALLER

Sen. Chas. L. McNary

SENATOR CHARLES L. MCNARY, chairman of the Agricultural Committee in the United States Senate, called at the office of the Illinois Agricultural Association while on his way to Washington recently.

Senator McNary says he will stand pat on the vetoed McNary-Haugen bill in the next Congress. He sees no reason for abandoning the principles of the measure which the administration and powerful interests are trying to discredit.

"There may be some slight changes in the text or wording of the bill," he said, "but I contemplate no alteration that will change the essential principles of the measure."

119 Attend St. Louis Meeting From Illinois

41 Counties Represented, Including 16 Farm Bureau Presidents

One hundred and nineteen Illinois Farm Bureau members and leaders from forty-one counties registered at the St. Louis Farm Conference on Nov. 1 and 2.

J. E. Harris, farm adviser in Mercer county, led a delegation of eight. This was the largest from any central or northern Illinois county.

Every section of the state was represented but the proximity of the meeting to southern Illinois counties resulted in larger delegations from that part of the state.

Among the 119 delegates were 16 Farm Bureau presidents, 16 farm advisers, all the officers and all members of the I. A. A. executive committee except three.

The counties represented as shown by registrations were as follows: Tazewell, Christian, Mercer, Sangamon, Madison, Marshall, Macoupin, Wabash, Cook, Henry, Monroe, Montgomery, Rock Island, Randolph, Washington, Adams, Williamson, McLean, Knox, Pike, Morgan, Mercer, Henderson, Clay, LaSalle, Woodford, Kendall, Jackson, Livingston, Pulaski, Clinton, Scott, Vermilion, Greene, DuPage, Ogle, Mason, St. Clair, Logan, Effingham, and Brown.

Bankers Find 22 Per Cent Make Money

AN analysis of 700 replies received on a questionnaire sent out to its members by the Illinois Bankers Association reveals that 35 per cent of their farmer customers are losing money, 43 per cent are breaking even, and only 22 per cent are making money.

The bankers said that 53 per cent, or more than half, of the farms in their communities are operated by tenants. Fewer than four out of 10 children born on the farm are remaining to carry on the work of their parents. Farmers were criticised by bankers for owning high-priced autos, trucks, tractors, especially when purchased on deferred payment plans.

Erase Party Lines And Work Together

West and South Resolve to Back Candidates With Chance to Win Who Are Friendly to Agriculture

THE common economic and political interests of the Mid-West, South, and West were recognized in seven ironclad resolutions adopted at the St. Louis Farm Conference on Nov. 1-2.

After endorsing the Declaration of Principles adopted at the conference last year, the resolutions set forth the surplus-control policy embodied in the McNary-Haugen bill demanding legislation in the 70th Congress incorporating these principles. "The farm organizations here represented," stated the second resolution, "serve notice that they will accept no compromise in principle that fails to provide the measure of relief sought by the McNary-Haugen bill."

Opposition Cited

Sources of opposition were cited including farm crop dealers, speculators, and industrial groups "that want cheap foodstuffs regardless of what happens to producers." The United States Chamber of Commerce policy against adequate farm legislation established when Julius Barnes, foremost grain exporter, was president was mentioned as a typical example of a certain type of organized opposition. The letter of Andrew Mellon which frankly stated that "equality for agriculture would weaken the competitive position of American manufacturers in the field of foreign commerce," was named. The attention of labor was called to the steady drift of farm workers to the city.

Fair Administration

The need for a fair national administration received special attention in the last resolution. This pledged the organizations represented to work for candidates friendly to agriculture who have a chance to win for "it is very necessary to realize that the preservation of the farming industry is infinitely more important than the success of any political party."

Borah Named

The motive of Borah of Idaho who was ranked with Senators Reed, Fess, and Bruce on agricultural policy, was viewed with suspicion. His apparent assumption to speak for a group of Republican senators on presidential politics and farm legislation was resented.

The broken platform pledges of both Democratic and Republican parties were cited.

It was urged that the two vacancies on the Committee on Agriculture be filled by farm-minded men from agricultural states, or else left without representation.

St. Louis Conference

(Continued from page 1, col. 1)

Gov. McMullen's address set forth clearly and completely the cause for which its supporters had met. Most of the other addresses were more or less supplementary to his.

Banks Full of Money

An elderly, gray-haired man with a wrinkled but kindly face named George W. Donaghey, ex-governor of Arkansas, called the meeting and presided throughout.

Mr. Donaghey is a banker at Little Rock. He said that all the large banks are full of money and looking for investment security, and the farmers are clamoring for aid, but haven't any security or collateral to offer. "We're here to make easier the return of the farmer to normal prosperity," he said. "This is a business man's as well as a farmer's problem. We ought to have their cooperation. Protection must be withdrawn from all or protection must be extended to all alike." He was applauded for that statement.

Dr. Taylor Speaks

Dr. Henry C. Taylor of Northwestern University, formerly chief of the Division of Agricultural Economics at Washington, discussed the relation of the tariff to agriculture and showed how the tariff has become inoperative on farm products of which there was a surplus.

He quoted a man named Sparks who was the first to write on the national distribution of wealth. "Thirty years ago," said Dr. Taylor, "Sparks wrote that the next great struggle would be between the country and the city."

Col. Clarence Ousley of Dallas, Texas, former assistant secretary of agriculture under President Wilson, scored the Jardine subsidy proposal. He accused the administration of economic "color-blindness." "The President and his advisers can't see the difference between the lush-green color of industry and the sickly blue of agricultural loss and despair," he said.

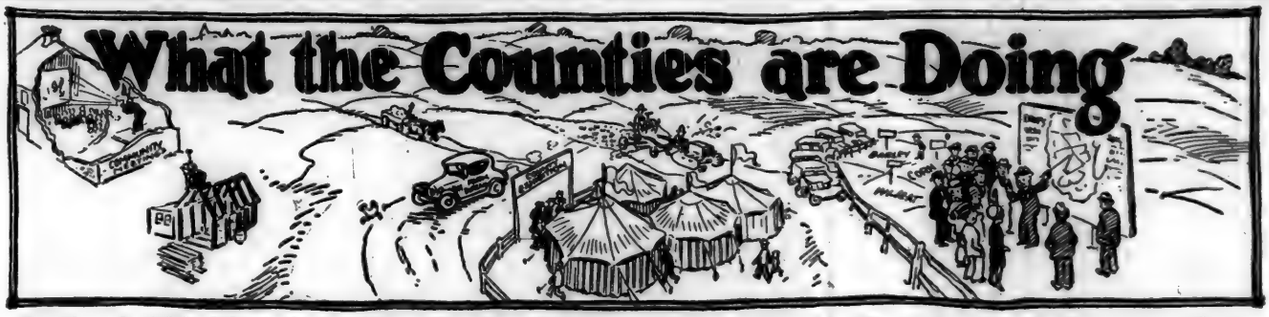
South Needs Aid

Col. Ousley was vehement. He was fervent. He spoke with sincerity. He told of the washed hillsides and the decaying cabins of the South. He referred to Wm. Jardine as Secretary of the "Departure" of Agriculture. He took a side-swipe at Henry Ford as a glaring example of successful business men and leaders in other fields who seek to legislate for farmers and impose their own impractical schemes upon agriculture.

"We are not powerful enough to overcome our opponents in numbers," he said. "Our job is to exercise our balance of power for the good of the industry we represent."

Endorse Equalization Fee

Senators Arthur Capper of Kansas and Arthur Robinson of Indiana pledged their support to the McNary-Haugen bill or one similar to it, in the next Congress.



Senator Robinson declared that he believed an equalization fee absolutely necessary that 100 per cent of the beneficiaries of the surplus control movement share the expenses involved.

"I have been practicing law for 18 years," he said, "and in my judgment such legislation will be declared constitutional."

Other speakers were Col. Stengle, editor of the National Farm News, Dr. Tait Butler, Cong. H. P. Fulmer, C. O. Moser, C. V. Truax, and Judge Caverno. Short messages were delivered by others.

—Darling in the Lincoln (Nebr.) State Journal

Boys' and girls' club work is taking well in Greene county. "Girls' club work seems to be easier to put over," says Farm Adviser Laible, "because it is not so difficult to secure leaders among the women as it is among the men."

The Farm and Home Bureaus of Champaign county started operating a Farmers' Market on Nov. 5, according to Farm Adviser C. C. Burns. Space for about twenty booths 6x10 ft. has been provided. These booths may be rented by individuals, by two people in partnership, or by Farm Bureau units. "We think a great deal of the unit idea because it allows every Farm and Home Bureau member to sell whatever he may have, no matter how small an amount it may be," says Mr. Burns. "It spreads the service to a wider number of members. The market will be held on Saturdays and days before holidays only for the start. Later it may be held more days of the week."

The Stark County Farm Bureau fed 473 members and their wives at a dinner served in connection with their annual meeting. Fifty-three per cent of the membership of Essex Township was present at the meeting.

"The 800 Farm Bureau members who participated in the refund are elated over the earnings of their new oil cooperative," says F. E. Fuller, farm adviser of Marshall-Putnam. "Wm. Koch of Varna had the largest dividend, which was $69.56. Herman Webber of La Prairie comes second with $47.34; John Johnson leads in Evans Township with $46.47; Griffith Bros., McNabb, follow closely with $46.18."

The McLean County Marketing Association, the newly formed produce association of the Farm Bureau, opened its first Co-op cream station, Fri., Oct. 21. The station is located at Bloomington, and will handle cream for members in that territory.

"The first solid train-load of limestone operated in this county was handled over the Illinois Central Railroad, Wed., Oct. 19," according to a report from Harrison Fahrnkopf, farm adviser. The McLean County Farm Bureau was instrumental in working up the orders for this train, which contained 30 carloads. A number of the cars were dumped near owners' farms on the right-of-way between stations.

The Henderson County Farm Bureau recently held one of its most successful annual meetings. President Earl C. Smith outlined the policies of the Association regarding state legislative matters, particularly with reference to the gas tax, and income tax. The farm relief situation was also discussed.

"A 2850 pound ton litter produced by Fred Houlette of Greenfield, Ill., is a record which will probably not be excelled in Greene county this year by any officially entered in the Farm Bureau Ton Litter Club," states R. J. Laible, farm adviser. The crossbred litter of thirteen pigs tipped the scale at 2850 pounds when the pigs were 180 days old.

The litter was farrowed by a Duroc-Jersey sow belonging to Fred Houlette. Jim Phillippo bred the Poland China boar that sired the heavyweights.

"We are busily engaged in organizing a produce marketing unit at Macomb," writes R. C. Doneghue of McDonough county. "Our falks are strong for this project when it is explained to them. We held a corn shucking contest on Nov. 3 that brought out 800 people."

Since July 1 the State Division of Animal Industry reports a total expenditure of $115,814.05 in T. B. cattle indemnity claims paid and pending, leaving a free balance of appropriation of $1,884,186.95.

Between July 1 and Oct. 1 indemnity claims aggregating $32,826.55 were paid, total expenses incurred amounted to $50,811.50, and claims pending on 2145 reactors at $15 per head (state's share) were held at $32,175.

C. F. Dueringer of North Dix is the newly elected president of the Ford County Farm Bureau, F. W. Tieken of Brenton was elected vice president, and Charles E. Harper of South Dix, secretary-treasurer. Mr. Dueringer is a charter member, was on the first board of directors of the organization, and has served continually since its inception.

Every owner of a quarter section of land in Piatt county will pay $11.20 less taxes next spring than he would have paid, as a result of reductions in assessed valuations brought about by the Piatt County Farm Bureau.

The Farm Bureau secured a reduction of $10.06 per acre in valuations for tax purposes. This reduction for the whole county amounts to approximately $27,750 in direct taxes. Since Piatt county has 253,686 acres of farm lands, the saving on each 160 A. amounts to more than $11.

Nearly all the landowners of Piatt county are members of Farm Bureau.

The "Dewitt County Fire Prevention Plan" promises to become as famous as the McLean County Swine Sanitation System.

Dewitt county is blazing the trail toward reducing the number of farm fires by stopping them before they start. A man has been appointed as fire inspector in each township whose duty it is to inspect the buildings of every Farm Bureau member, point out fire hazards, and make suggestions toward fireproofing buildings, roofs, and places where there is likelihood of danger.

A card record system is kept on each farm. This card contains information regarding lightning rods, roofs, chimneys and flues, use of matches and smoking, gas engines, stoves and furnaces, storage of gasoline, and recommendations of the inspector.

Statistics tell us that 18 per cent of farm fires are caused by lightning, 12 per cent by defective flues, seven per cent by sparks on roofs, six per cent by matches and smoking, and 4.69 per cent by spontaneous combustion.

22nd District Meets At Edwardsville Dec. 2

PRESIDENT Earl C. Smith of the I. A. A. will address the 22nd district conference to be held at Edwardsville on Dec. 2. Representatives from Madison, St. Clair, Monroe, Bond and Washington counties will participate in the conference where members of this district will have an opportunity to hear about the activities of the Association, and voice their own opinions and recommendations on past and future policy.

Earl C. Smith

Frank Oexner of Waterloo, representative from the district on the I. A. A. executive committee, will preside.

"We want every member to feel that the Illinois Agricultural Association is his organization," said Mr. Oexner, "and that its policies are subject to his control. The voice of the members is our guide in determining what course to take on all activities."

Part of the program will be devoted to a round table discussion when members will have the privilege of airing their opinions on legislative and other policies of the Association.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the farm bureau was organized, namely to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Edited by Department of Information, E. G. Thiem, Director, 608 South Dearborn Street, Chicago, Illinois. Entered as second-class matter October 20, 1925, at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Acceptance for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the ILLINOIS AGRICULTURAL ASSOCIATION RECORD. Postmaster: In returning an uncalled for or missent copy, please indicate key number on address as is required by law.

A Parallel In Scotland

AN ARTICLE in The Scottish Farmer for October 8 says:

"Nobody cares a straw for the farmer. Those who are in a position to help will not. The government tells him to work harder. The public advises him to spend less. Well-wishers tell him to have patience and everything will come all right sooner or later. But this is all talk and nothing else. The time has come, however, when more than words are necessary. Whether the farmer has been wise or foolish makes no difference. The point is—agriculture needs assistance. No one cares a snuff about individual farmers who fail, but the Nation must and does care a good deal whether agriculture as an industry fails. The Nation and the Government will not believe the farmer when he says he is down and out. The fact is—the Government does not understand, and the public does not care. They do not know the facts and conditions, and they have no desire to learn the truth. We suggest, therefore, that the only way to make such people learn the truth is for farmers to go bankrupt en bloc. If this is the only way, they should take it. It is an extreme step, but it takes a drastic step to meet a drastic situation. Someone must move, because if we do nothing the powers that be will follow suit, and if we do something drastic so will they."

Strangely enough, the words of the canny Scot who wrote this analysis of conditions in Scotland, might well be applied to American agriculture. We differ, however, in the proposed remedy. Wholesale bankruptcies merely destroy. They ruin the morale and faith of those engaged in the industry. They promote land tenancy and the concentration of land ownership in the hands of the few. The inevitable result of such a policy would be peasantry. The American farmer will help himself if given equal opportunity and protection.

The Hired Man

"SINCE 1920, this country has been going through a period of deflation, and farmers have been working for the cities at very small pay," says Dr. G. F. Warren, agricultural economist at Cornell University.

He points to the fact that in 1926 values of farm lands in the United States averaged 24 per cent above pre-war values or at 124 per cent, whereas industrial stocks were 149 per cent above pre-war, or at 249 per cent.

The farmer has been working in the role of the hired man. But a most unusual hired man he is. He supplies the capital for his business. He assumes the business risks ordinarily borne by the employer. He plans, initiates, and executes all his work without direction. He doesn't put in eight hours a day. He labors 12 to 15 hours daily through a large portion of the year. He provides his own shop or office for which he must pay rent, or interest and taxes. He supplies all his own tools and equipment. He calls on his family daily for help, or hires a helper, or both.

And in return what does he receive? His yearly pay check may be large enough to pay the rent or taxes and buy groceries. If he is fortunate it may do slightly more than this. If otherwise he may go in the hole. A most unusual hired man.

Our Great Job

"I HAVE great faith in the American body politic when it is informed. But the public is not informed on this question. Business men particularly do not understand the farmers' problem nor the solution they offer to remedy it."

Col. Clarence Ousley of Texas, former assistant secretary of agriculture, made this significant statement before the recent St. Louis conference. By doing so, he revealed the greatest stumbling block to the American farmers' demands for a raise.

Where there is ignorance and lack of information there is likely to be prejudice. When a man isn't up on a thing, he is usually down on it.

Agriculture has had difficulty in getting across its story in a big way. Business and industry is wedded to the psychology of optimism. The influence of the counting-house is used to suppress truth through the press when the truth seems unfavorable to business. The metropolitan papers devoted page upon page to the President's veto message on the McNary-Haugen bill. The reply to the veto message, a much more ably written document, was obscured in the Congressional Record.

An organized publicity campaign, ostensibly backed by eastern industrialists and unlimited capital, has been waged to discredit the surplus-control movement. Agriculture has not the capital nor the organization to counteract this propaganda. Telling our story and getting it across to the public in our towns and cities is our biggest job. It will be so for years to come.

Tune in on the I. A. A. 15 minutes program broadcast daily at 12:30 P. M. from station WJJD, Chicago (365 meters). The facilities of station WJJD are loaned the Association through the courtesy of the Loyal Order of Moose, Mooseheart, Ill. No program on Saturdays and Sundays.

"Electrifying The Farm" will be the subject of a radio address by Paul Kuhn, member of the Illinois Commerce Commission, in the near future. Announcement will be made by radio so members may tune in on this address.

A brief report of the Chicago daily livestock market furnished by the Chicago Producers Commission Association has been initiated for the benefit of those who fail to hear earlier reports. This report is given promptly at 12:30, Monday to Friday inclusive.

During the week beginning Nov. 21, the farmer's interest in fire and accident prevention will be given prominence. O. M. Allyn, farm adviser in Dewitt county will tell about the Dewitt County Plan of Farm Fire Prevention. On Tuesday, Nov. 22, W. A. Rutledge of Des Moines, Ia. will discuss farm crop hail insurance and the growth of this form of protection, on Nov. 23. J. P. Gibson will talk on auto accident prevention on Friday, Nov. 25.

The program for the week will be in charge of V. Vaniman who will deliver the opening address, Nov. 21 on "The Farmer's Interest in Insurance."

A special program will be broadcast on Thanksgiving Day.

International Live Stock Show Coming

Reduced Rates Offered on All Illinois Roads, 11,000 Horses, Cattle, Hogs, and Sheep Booked

AN OPEN rate of fare and one-third for the round trip will be in effect on railroads from Illinois points to Chicago during the International Live Stock Exposition, on Nov. 26 to Dec. 3.

Manager B. H. Heide reports that 11,000 beef cattle, horses, swine, and sheep, and 5,000 choice samples of 22 different kinds and varieties of grains, seeds and hay will compete for international honors.

Walter Biggar of Dalbeattie, Scotland, will judge the bullocks and select the grand-champion of the fat cattle show. Lieut. Arnold Caddy of Australia will make the official awards in the Red Polled breeding classes.

Reduced railroad fares will be in effect on every road entering Chicago. More than 40 national organizations will hold their meetings in Chicago during International week.

STUDY HIGH POWER LINE ROUTE

Farm Bureau officials from Stark and Peoria counties go over the proposed high line route between Kewanee and Pekin for the purpose of aiding the utility company in eliminating unnecessary damage to farm lands and in representing the interests of the landowners involved.

At the left are O. L. Hatch, president, and E. E. Brown, farm adviser, for the Stark County Farm Bureau, inspecting a blue print with Engineer White of the Illinois Commerce Commission and L. J. Quasey I. A. A. transportation man.

Indiana After 70,000 Members In 1928

THE Indiana Farm Bureau Federation has issued a call for 10,000 volunteers to go out during the week of Dec. 12 to 17 and sign their neighbors in the organization.

The week will be known as "Volunteer Victory Week" the object of which is to extend the Farm Bureau into every district and swell the membership roll to 70,000 by the end of 1928.

An effort is being made to interest the rural churches on the Sunday preceding the drive to take cognizance of the Farm Bureau. Information is being forwarded to all ministers in country meeting-houses.

Henry County Man Is Champion Husker

HENRY county carried off the honors in the State Corn Husking Contest, sponsored by Prairie Farmer, which was held near Altona in Knox county on Nov. 11.

Harold Holmes, member of the Henry County Farm Bureau and winner of the Henry county contest for two years in succession, is the new champion. He won with a record of 1989 lbs. of corn net which figured 28.41 bushels gathered in one hour and 20 minutes.

Houston Franks, 20 years old, of Whiteside county, placed second with a record of 1825.5 lbs. net or 26.08 bushels. Tom Murphy of Rock Island county was third with 25.95 bushels, Hartwig Olson of Knox county fourth with 1807.3 bushels, and Ernest Kling of Lasalle county placed fifth.

Elmer Williams, former state and Mid-West champion, finished in sixth place. His arm which has given him much trouble this season, became numb during the contest, and almost forced him out of the running.

The contest was ably managed by the Knox County Farm Bureau. A crowd estimated at 12,000, said to be the largest that ever witnessed a corn husking contest in the Middle West, was out for the day. Rain held off until the husking was completed. It

(Continued on page 8)

PRODUCER HONOR ROLL

FOLLOWING are the names of shipping association managers in the order of their length of service who have shipped every carload of livestock to a PRODUCER agency:

James R. Abbey, Golden Gate Assn., Wayne county, 5 years.

C. C. Johnson, Fairfield Assn., Wayne county, 5 years.

Henry Kilian, Jr., A. & R. Assn., Champaign county, 5 years.

Harold Bradshaw, Albion Assn., Edwards county, 5 years.

Fred. M. Stoll, Beason Ass'n., Logan county, 4 years.

G. C. Clifton, Marion County Ass'n., 4 years.

L. G. Orr, Cisne Ass'n., Wayne county, 3 years.

Farm advisers, managers and members are invited to send in names of others who should be on this honor roll. Write Ray E. Miller, director of livestock marketing, Illinois Agricultural Association, 608 So. Dearborn, Chicago. Give the length of service, total number of cars shipped, name of association, etc.

Farm Philosopher Talks About Egypt

DeWitt C. Wing, Associate Editor, Breeder's Gazette, Discusses Farming In Southern Illinois

(Following is Mr. Wing's interesting address delivered recently, on the I. A. A. program over radio station WJJD. Mr. Wing is one of America's foremost agricultural writers and philosophers. He is owner of Skillet Fork Farm in Wayne county.—Editor.)

FOR the first time in seven years Dan the foreman was conservatively optimistic when I went over Skillet Fork Farm with him a week ago. He was almost cheerful. This uncommon condition filled me with uneasiness and suspicion. I asked his wife if she was sure that he was well and in his right mind. She guessed that he was about the same as he'd always been. The only thing that she could think of at the time which might have unduly brightened his attitude toward the farm's business standing and prospects was that lightning struck the house on a July night, and jarred him and her out of bed. "Of course," she added, "that electrical treatment might have helped him some, but I doubt it."

De Witt C. Wing

Be that as it may, Dan has a new vision or else he is "seeing things." He has changed the tone of his comments on farming in the past year. "Is the farm going to pay its way and the taxes this year?" I asked him. "It will do considerably more than that," he answered. I then changed the subject, fearing that if it were further pursued Dan would disclose some "buts" that would take all the shine off his first encouraging announcement. As we grow in experience of life, we are likely to learn that it is not always profitable to spend most of our time looking for niggers in woodpiles. If we keep on sawing wood, maybe they will slip out without our seeing them.

That lightning stroke aroused Dan's interest in rodding the house. The building has been standing for more than 30 years. It was never struck until this year. But for the fact that a heavy downpour accompanied the electrical storm, the house would have been destroyed by fire on that wild July night. One of the chimneys received the charge. It cracked some of the bricks, branched off and ran down water pipes at each corner of the house, and tore off plaster and wallpaper in several rooms. Some of us sometimes are aided by lightning. A friend of mine says that anything is good for us if it doesn't quite kill us.

Since 1920 some marked changes and developments have occurred in southern Illinois farming. Changes equally noticeable probably have taken place in most other agricultural communities. Young people do not observe changes, unless they be sudden, because their experience and memory are short in pedigree. It is well for us that endless change should be a law of nature. So far as I am concerned, the world is a better place to live in than it was when I was a boy; although it still needs a lot of changing and improvement. I wonder just how much of a hand each of us is taking in bettering it, according to the ideas of the best minds of the past and present.

Limestone literally sweetens humanity where it has soured on acid soils. It seems to me that gooseberries grown in our garden are gifted with a little more and a little sharper acid than any that I have eaten green elsewhere. Maybe that's imagination. Well, it takes a pile of Cuban sugar to sweeten a gallon of this fruit for a hunting-case pie. Also a green persimmon in southern Illinois will produce a mouth pucker that is unique in the history of facial contortions. Ground limestone has been applied to many fields in our neighborhood. Farmers are not down and out who, despite the waning depression, have the will to buy limestone with which to rebuild their soils.

We economize and practice thrift and go on because we must. Necessity governs us, but the politicians take credit for the job. We are constantly urged to reduce production costs and maintenance expenses. Having heard a talk on this subject, a 250-pound young woman in our county fasted for 35 days, in order to reduce her weight, lessen her maintenance expense, and discipline herself to be a southern Illinois farmer's wife. Her sacrificial, beautifying experiment got into the newspapers, and ten Scotchmen, always interested in economics, proposed to her. I have never seen a fat Scotchman in Scotland or in southern Illinois.

Cows of dairy breeding are more numerous in our area than they have ever been in the past. That's a new development that we welcome. It means our soils are going to be improved and little children better fed. Ten years ago sheep were scarce in our county; now there are many farm flocks in it. They are being improved by the use of purebred mutton rams, and their owners are learning how to feed and manage sheep. Men who begin in a small way, and learn to do things by doing them, are on the right road toward better stock and increased net returns. . . . . Sheep husbandry, in competent hands, looks like a sound farm business for years to come in the United States. But no one is qualified to make a success of sheep-raising if he acts like a sheep, for a sheep is so trustful, unselfish, and narrow in its experience of a many-sided world that it will follow false leaders down to its own destruction. An old Billy Goat is used at the Kansas City stockyards to lead sheep to the slaughtering house.

There are more large flocks of poultry of fair to standard breeding on more farms in southern Illinois than have ever been seen there before. Small, mongrel flocks, receiving little or no care, have practically disappeared from our landscape. Poultry production has come to be a considerable and well-established farm enterprise, to which farmers themselves are giving special attention. Chicken thieves also are keenly interested in it. If most local officials were not both lazy and cowardly, they would run down, arrest and jail these nocturnal crooks, who are chiefly young loafers and wastrels in our villages and small towns. If we have got to police our own poultry yards and hoglots, we shall be compelled to quit raising poultry. In fact, it seems to me highly probably that poultry production is going onto a volume basis in the hands of large, well-equipped specialists, who are better prepared than most farmers to apply the principles of sanitation and scientific nutrition to the business, and to market eggs, baby chicks, broilers, and capons to better advantage.

We are selling purebred but unregistered Hereford bull calves at weaning time for $50 a head at the farm. Neighbors come for them in their own or hired trucks. Heretofore we have sold the same grade of calves for $35 each. Buyers now are paying cash, and some of them desire to buy heifers that we won't sell. A new and lively interest in beef cattle has manifested itself in our region during the past six months. Evidently our farmers have been inspired by the reports of big prices at the terminal markets. Southern Illinois is mostly as well adapted to the production of feeder cattle as any zone in the United States.

The demand for work horses and mules in our county is listless. A shortage of both impends on many a farm. The brayings of a neighbor's jack have advertised him far and wide, but only a few mares were bred to the jack this year, and there isn't a draft stallion in our township. I saw a new small tractor at work in a neighbor's wheat field the other day. We have plenty of good horses and mules on our farm, and plenty of cheap feed with which to fuel them at work. If a man likes to handle and work horses, he can always prove to his own satisfaction that they are more economical than tractors; if he likes to monkey with machinery and drive a tractor, he can always prove to his satisfaction that it pays him to do so. . . .

Two years ago our taxes were considerably higher than they were last year. For the reduction we have to thank the Illinois Agricultural Association, whose tax expert, John C. Watson, has earned the gratitude of every farmer in this state. It costs us $15 a year to enjoy the benefits of membership in our Wayne County Farm Bureau, which makes a small annual contribution to the Illinois Agricultural Association. It is the best investment that we have made in any year. But a few of us are paying for services which benefit others who don't pay a cent for them. There are 3,000 farmers in our county; about 10 per cent of them belong to our Farm Bureau, through which all of the others are getting something valuable for nothing. How long should the 90 per cent ride a free horse? Probably so long as it declines to buck.

Borgelt Tells Flood Needs of Ill. Valley

Appears Before Commission At Washington in Behalf of Illinois Farmers

A plea for the inclusion of the Illinois Valley in any national flood relief plan was presented to the Flood Control Commission by Chas. Borgelt of Mason county, representative for the 20th district on the I. A. A. executive committee.

Chas. Borgelt

Mr. Borgelt is probably the best informed landowner in the Illinois valley regarding flood conditions. He has been prominently identified with his local drainage district since its organization in 1900. Beginning with 1902, he has kept records pertaining to floods in the Illinois bottoms. He was one of the first to recognize the tremendous influence of water diversions from Lake Michigan on Illinois floods.

When asked by Chairman Frank Reid why the Illinois Valley should be included in the flood control program, Borgelt replied: "Because we are taking care of large quantities of water resulting from reversing the flow of the Chicago and Calumet Rivers."

Mr. Borgelt presented figures showing that the Illinois River water level was raised at least three feet following the change in the course of the Chicago River. He was the official representative of the Illinois Agricultural Association at the hearing.

Noted Speakers At Coming A. F. B. F. Meet

MEMBERS of the I. A. A. who attend the annual convention of the American Farm Bureau Federation, Dec. 5-6-7, at the Sherman Hotel, Chicago will hear such well known men as General John J. Pershing, commander of the A. E. F. in the World War, Prof. Wm. E. Dodd, foremost American historian of the University of Chicago, Senator Royal S. Copeland of New York, Congressman Lister Hill of Alabama, former governor Nellie T. Ross of Wyoming, Robt. T. Bass, former governor of New Hampshire and others.

The Federation is looking forward to its greatest meeting. An agricultural exposition will be held in connection with the convention similar to last year.

The meeting will open on Monday morning with general reports of officers. Ex-Gov. Ross will speak Tuesday morning. Senator Copeland will be the banquet speaker on Tuesday night, and General Pershing is scheduled to address the convention on Wednesday morning, December 7.

Election of officers, and the report of the Resolutions Committee will take place Wednesday afternoon.

Presidents of nine state Farm Bureau federations will talk 10 minutes each on the outstanding accomplishments of their organizations during the past year. President Earl C. Smith will be one of this group.

Telephone Co.'s Ask For Raise In Rates

THE Cabery Telephone Co., recently petitioned the Illinois Commerce Commission for authority to increase rural telephone rates. At the request of the Ford County Farm Bureau, L. J. Quasey attended the hearing when it was discovered that the Telephone Co. had failed to give legal notice through the public press of its intention.

The commission, therefore, postponed the hearing until Nov. 10.

A similar petition was also brought before the Commission the same day by the Peoples Telephone Co. of Mercer county.

A total of 20,991,333 motor vehicles were registered in the United States in the first six months of 1927.

NOVEMBER

By MAHLON LEONARD FISHER

HARK you such sound as quivers? Kings will hear,
As kings have heard, and tremble on their thrones;
The old will feel the weight of mossy stones;
The young alone will laugh and scoff at fear.
It is the tread of armies marching near,
From scarlet lands to lands forever pale;
It is a bugle dying down the gale;
It is the sudden gushing of a tear.
And it is hands that grope at ghostly doors;
And romp of spirit children on the pave;
It is the tender sighing of the brave
Who fell, ah! long ago, in futile wars;
It is such sound as death; and, after all,
'Tis but the forest letting dead leaves fall.

Freeport Officials Hope To Evade Law

Tax Commission Order For Increase In Assessed Valuations Causes Upheaval

Freeport officials recently filed a petition asking for a rehearing following the order of the Illinois Tax Commission directing a reassessment of property in the Stephenson county metropolis.

John C. Watson

The order which grew out of facts and figures presented by the Stephenson County Farm Bureau and the Illinois Agricultural Association was made for the purpose of bringing about equality in taxation between farm lands and city property in that county.

The records of sales revealed that valuations in Freeport were 20 per cent lower than farm lands, although assessed valuations of lands were no higher than those in other counties.

The order resulted in an upheaval of interest and sentiment pro and con on tax matters.

Comment reported in the Freeport Journal Standard which devoted column after column to the tax situation, was varied. One bank president characterized the order as "a fraud and a conspiracy," but other business men took a more rational view.

"No doubt the tax commission was correct in finding gross inequalities in the taxation of real estate in Freeport," said F. E. Furst, president of a local manufacturing concern.

"Reassessments have been ordered in other counties," said H. A. Hillmer, local grain and coal merchant, "and I believe if the valuations and assessments have not been fair they should be corrected. I think the farmer has proven that his taxes should be lowered."

John C. Watson, tax director for the I. A. A., presented figures showing that to place farm lands on the same level as city property would require an average cut of 24.78 per cent in farm valuations or an average increase of 32.94 per cent on town and city lots.

These figures were given to the Board of Review, but no action was taken to alleviate the condition. The Farm Bureau was forced to appeal to the State Tax Commission.

L. M. Swanzey, Theo. Ellis, Thomas Niblo, James Daws, Harry Snyder, Ray Folgate, G. A. Mitchell, Frank Fleuchtling, and M. F. Koltman represented the Farm Bureau, and Donald Kirkpatrick and John Watson the I. A. A. before the Commission.

Southern Illinois fruit and vegetable growers will hold a meeting at Harrisburg Nov. 21-23. The annual meeting of the Illinois Horticultural Society is scheduled for Dec. 14, 15, 16 at Urbana.

OTHER OPINIONS

The Illinois Farmer

THE members of the Illinois Bankers' association do not conduct their business by guesswork and hearsay, and when the association investigates the condition of agriculture in this state its findings may be accepted as reliable. Seven hundred out of 1,700 member banks have replied to the association's questionnaire. These banks provide the money which keeps the farmers going. They know when farming thrives and when it languishes. An analysis of their reports on conditions shows that 35 per cent of their farmer customers are losing money, 43 per cent are just making ends meet, and only 22 per cent, or about one in five, are making money. And this in Illinois, one of the finest agricultural areas in America!

And Illinois is not alone. Every week brings tales of the desperate plight of the farmer everywhere. The farm conference in St. Louis yesterday echoed the familiar and wholly reasonable complaint, and reiterated its demand for relief on the McNary-Haugen plan which President Coolidge, presumably with the advice and assistance of Secretary Hoover, bludgeoned unmercifully in his veto.

The man who is next elected president of this nation will be one with a convincing plan for farm relief. None other can be elected, or should be.—Chicago Evening Journal.

Makes $40 Head Thru Shipping Association

Crawford County Woman Profits By Selling Cattle the Cooperative Way

FORTY DOLLARS a head on four steers is the net gain realized recently by a Crawford county woman who turned down the offer of a local buyer and shipped through the Oblong local of the Crawford-Jasper Livestock Shipping Association.

When an offer of 8c a pound was made on the three choice beefy bullocks and one well finished Holstein, the owner decided to try the shipping association.

They were shipped to the Indianapolis Producers where three of them sold for $11.85 and the Holstein for $10.25 a hundred. A heifer in the consignment netted $8 more than the offer of the local buyer.

"This is the first time I shipped through the Association," said the owner, "but hereafter all my livestock will be marketed the cooperative way."

The Washington County Farm Bureau announces the following officers for the coming year: President, J. R. Hood, vice-president, Geo. J. Hake, secretary-treasurer, F. J. Schleifer. Officers and directors were chosen at the annual meeting on Nov. 9. Mr. Hood and Mr. Hake are serving their third terms.

Addresses Students Cornell University

"THE Farmers' Elevator," and "Accounting and Auditing for Cooperatives" were the subjects of two addresses made by George R. Wicker, director of business service for the Illinois Agricultural Association to students in the marketing course at Cornell University, Ithaca, N. Y., recently.

Geo. R. Wicker

In addition to his experience in auditing elevator accounts, Mr. Wicker was a member of three such organizations and a director for more than 20 years.

After reviewing the history of the farmers' elevator movement, Mr. Wicker discussed elevator problems, successful practices, and pitfalls which the better managed organizations avoid.

In his address on accounting, he told about the development of the Illinois Agricultural Cooperatives Association and how its work is strengthening the cooperative movement in Illinois.

Grow More Beans

"The large imports and increasing utilization of the soybean crop call for an expansion of soybean production in our own country," declared W. J. Morse of the U. S. Dept. of Agriculture recently. "This crop is a branch of agriculture in which the national supply does not meet the demand," he said.

According to Morse, the industry in the U. S. is in its infancy and although soybeans are used primarily for forage, our oil mills offer an opportunity for a greater production of seed.

Two thousand varieties of Chinese soybean seed are being tried out by the Government with promising results.

Small quantities of catnip oil are used as a lure for trapping mountain lions and bobcats by the U. S. Biological Survey. To obtain this oil catnip plant has been grown on a small plot of land on the fur animal experiment station maintained by the Survey at Saratoga Springs, N. Y. Catnip oil is valued at $100 an ounce. Forty-eight ounces of crude oil were obtained from three-fourths of an acre.

Henry County Man Is Champion Husker

(Continued from page 5)

was necessary to deduct five per cent from the weight of the husks on several of the last loads however to allow for the extra moisture.

Fifteen contestants competed. Prizes of $100, $50 and $25 were awarded the winners by Prairie Farmer. Holmes will represent Illinois in the Mid-West contest at Winnebago, Minnesota, on Nov. 15.

LOW COST

Because Farm Bureau members are *preferred risks*, the Illinois Agricultural Mutual Insurance Co. can offer the lowest cost insurance for the coverage given in the state.

OPTIONAL COVERAGES
include
Protection Against Fire, Theft, Collision, Public Liability, and Property Damage.

Pays actual value of car in case of loss by Fire or Theft.

Operated By and Exclusively For FARM BUREAU members. Call at your local County Farm Bureau office or write—

The Illinois Agricultural Association RECORD

Volume 5 DECEMBER, 1927 Number 12

Resolutions Adopted at Ninth Annual Meeting, American Farm Bureau Federation, Chicago, December 7, 1927

Reaffirmation

WE HEREBY approve, without reiteration, the principles and policies which have been set forth at length in the resolutions of our former annual meetings. Therefore, for sake of brevity reference is hereby made to all such resolutions and unless repealed or inconsistent herewith, the same are declared to be in full force and effect.

A National Agricultural policy

We appreciate the actions of the Sixty-Ninth Congress, which, in a non-partisan manner, passed the Surplus Control Bill. If put into operation this measure would have marked the beginning of a sound economic agricultural policy in our nation.

Commodity marketing and surplus control are inseparable. Co-operative organizations, however, cannot bear the load unaided. Under certain conditions in order that operations may be successful, the entire commodity marketed and not the member producers alone, must by the applications of the equalization fee principle meet the requirement that each marketed unit shall pay its share in the cost of its own stabilization and protection.

We insist that legislation which contains the principles embodied in the McNary-Haugen bill with such improvements as experience and good judgment may suggest shall again be passed by Congress.

Muscle Shoals

We reaffirm our support of the principles now contained in the Madden Bill, H. R. 16614, of the Sixty-Ninth Congress.

Equalizing Domestic and Foreign Costs of Production.

We urge such increases in import duties as are possible to be secured under the flexible provisions of the Tariff Act upon various agricultural products whose costs of production can be shown to exceed foreign costs. We recommend that the flexible provision be changed so that the United States Tariff Commission can be in position more efficiently to serve agriculture in the cases before it. We insist there should be no import duty on plant food constituents. We commend the Tariff Commission for its studious attention to and fair consideration of the agricultural cases recently decided and now pending. The duty on hairy Vetch seed should be removed.

Foreign products which can be used, either in the raw state or as processed material in place of, or as substitutes for, home-grown agricultural products should carry the highest possible rates of import duty.

RE-ELECTED

Sam H. Thompson.

"Our Sam" was re-elected to the presidency without opposition at the Ninth Annual Meeting of the American Farm Bureau Federation, Chicago, Dec. 5-6-7. It was a harmonious meeting and drew a larger attendance than any previous annual convention. Ed. A. O'Neil of Alabama was re-elected vice-president. Three new directors, one each from Maryland, Washington and New York, were chosen.

Taxation

Debt reduction should precede tax reduction. Exemptions and repeated modifications of the national tax structure are undesirable. The basis of federal taxation should be ability to pay. We recommend reciprocity between the states in matters of estate and inheritance taxation. Estate taxes should be retained permanently. It is unnecessary to reduce corporation taxes in this period of national industrial prosperity. Federal taxes on automobiles should be eliminated.

We recommend the outline of state taxation, Resolution No. 28, adopted last year at our annual meeting.

Service To Organized Agriculture

It is gratifying to observe that a number of national cooperative marketing organizations are negotiating with the American Farm Bureau Federation regarding the subject of expert and professional service for cooperative associations on a basis of reasonable compensation to be provided through a contractual relation. We heartily commend this proposal and direct our executive offices to proceed as rapidly in the development of such a service as will be consistent with safety.

An effective flood control program, to be national in effect, should contain the following features:

(a) Levees as the first line of defense;

(b) Diversion channels to give more flowage capacity in the lower regions of the Mississippi River;

(c) Parallel channels to give more flowage capacity above the diversion channels;

(d) Surveys of tributary streams to ascertain how to secure navigation, power development and flood control in one effort;

(e) Reservoirs, to be located on tributary streams, following the completion of surveys;

(f) Reforestation.

We rely upon the corps of army engineers to carry into effect the technical details of the above program, and all expenses of the above plan to be borne by the Federal Government.

Transportation

Transportation to argiculture assumes national, and even international, aspects. We advocate among others the following plans to prevent losses to agriculture by the payment of excessive transportation costs:

(a) An American Merchants Marine of permanent character, under the authority of the United States Shipping Board;

(b) Readjustment of freight rates on the basis of the Hoch-Smith Resolution;

(c) The development of the Great Lakes-St. Lawrence tidewater channel and an early completion of treaty negotiations between the United States and Canada;

(d) The rapid completion of the Mississippi-Missouri-Ohio-Illinois river system;

(e) Surveys and transportation developments on other main streams;

(f) Legislation to provide that toll bridges on our national highways shall revert to the government when tolls have amortized cost and interest.

Agricultural appropriations

We request sufficient federal funds for agriculture. We especially urge adequate appropriations for the following projects:

(a) Extensions work in agriculture, home economics, and boys' and girls' club work;

(b) Continuation of T. B. eradication;

(c) Quarantine and control of corn

Published monthly at 404 N. Wesley Ave., Mt. Morris, Ill., for the Ill. Ag. Assn. Entered as second class matter at postoffice at Mt. Morris, Ill., Feb. 17, 1920, under Act of March 3, 1879. Acceptance for mailing at special rate of postage provided in Sec. 1103, Act of Oct. 1917, authorized Feb. 17, 1920.

PASSES BEYOND

Charles R. Finley

ALL Illinois mourned the sudden passing of Charles R. Finley, who died from an unexpected heart attack on Saturday morning, Nov. 26, at his home in Hoopeston.

Mr. Finley rose to prominence in Illinois agriculture shortly after the re-organization of the Illinois Agricultural Association at Peoria in 1919. He was one of the group that pledged $300 each to see the Association through the strenuous days of reformation when it became established as the greatest state agricultural organization in the country.

Previous to that time, Mr. Finley led in organizing the Vermilion County Farm Bureau which he served as president for six years. In 1921 he was elected to represent the eighteenth congressional district on the Executive Committee of the Illinois Agricultural Association. He was re-elected in 1922 and 1923, and in 1926 was elected vice-president of the Association in the annual meeting at Champaign.

He assumed an important role in the activities of the Association and served on the Finance Committee during his incumbency.

Mr. Finley was born at Rossville on September 6, 1857 and spent his entire life in Vermilion county. After graduating from the Hoopeston High School in 1886, he entered the National Normal School at Lebanon, Ohio. After graduating from that institution, he returned to Vermilion county and taught school for several years before he married and started farming. His good judgment and ability was early recognized in his home community where he became a director and later president of the Grant Township Mutual Fire Insurance Co., which position he held until his death.

Mr. Finley gave his life toward developing and improving the 400 acre Meadowbrook Farm south of Hoopeston where he lived until last spring, when he moved to town. He was a leading proponent of Dr. Hopkins' system of permanent soil fertility. Nominated as a Master Farmer last spring, Mr. Finley placed third high in the state but was declared ineligible because he moved off the farm shortly before being scored.

Locally, he was active in the Methodist Church, in the Masonic order at Hoopeston, at Danville, and in other social and fraternal groups.

Mr. Finley was well known throughout the state because of his long association as a director and officer in the I. A. A. News of his passing came as a shock to his associates at headquarters of the Association where he had visited only a week before his untimely death. His quiet, good-natured conservatism and unfailing good humor made him popular and highly respected. He was recognized as an aggressive farm leader of the finest type. His interest in the affairs of organized agriculture and the Association continued until the last.

The Association sent flowers in token of its sorrow and respect. Frank D. Barton, vice-president, represented the organization at his funeral held on Nov. 30 at Hoopeston.

At the regular meeting of the Executive Committee Dec. 9 the following resolution was adopted and forwarded to Mrs. Finley, Margaret A. Finley, his daughter, and Marion R. and Watts Finley, his two sons:

WHEREAS: It has been the will of Almighty God, who in his providence does all things well, to remove from earthly activities Chas. R. Finley of Hoopeston, Illinois, former Executive Committeeman of the Illinois Agricultural Association from the Eighteenth District during the years 1921, 1922 and 1923, and Vice-President of the Illinois Agricultural Association during the year 1926, a trusted leader, a friend of those in need, an exemplary citizen, a staunch friend of the farmer and of every effort put forth for the raising of the standard of living on the farm.

BE IT RESOLVED: That we, the Executive Committee and officers of the Illinois Agricultural Association, in regular session assembled on this 9th day of December, 1927, do hereby testify our sincere respect for him and that we express our deep sympathy to the family of the deceased in their affliction and mourn with them the loss of one whose friendship we prize and whose life was replete with many good, kind deeds.

BE IT FURTHER RESOLVED: That these resolutions be made a part of the records of the Illinois Agricultural Association and that a copy of the same be mailed to the family of the deceased.

Pulaski Officials In Tax Hearing Dec. 13

I. A. A. and Farm Bureau Figures Show Discrepancy in Tax Valuations

R. B. Endicott, A. J. Shoenborn, John C. Watson, and Donald Kirkpatrick represented the Pulaski County Farm Bureau and the Illinois Agricultural Association respectively in a hearing before the Illinois Tax Commission on Tuesday, Dec. 13, regarding tax inequalities in Pulaski county.

John C. Watson

Representing the taxing districts of the county were the county clerk, the county judge, and a local attorney. The hearing was called in behalf of equalizing tax valuations between various classes of property and taxing districts.

Tests of valuations made by Mr. Watson over a period of 15 months beginning Jan. 1, 1926, revealed that there was a marked lack of uniformity in assessed valuations. Farm lands it was shown were assessed on the average about 18 per cent higher than the average of city lots and other real estate in the municipalities of the county. In Mound City, however, the records revealed that valuations were higher even than farm lands.

County Officials Willing

The county officials on the basis of a study of more recent sales, refused to admit the inequalities charged. They expressed their willingness to comply with the law and make any adjustments which seemed necessary according to the facts. They were fearful of making any changes because of the expense involved, and the extremely low total valuations in the county.

The Commission requested that the I. A. A. and Farm Bureau representatives meet with the county officials without delay and go over the records of sales and assessments in an effort to agree on the needed adjustments.

Watson's figures which were compiled from all usable records of sales from Jan. 1, 1926, to April 1, 1927. showed that farm lands were assessed at 52.12 per cent of their fair cash value whereas in the municipalities as a whole the assessed valuations averaged only about 42.50 per cent of their fair selling values.

The U. S. Bureau of Mines recently let a contract for drilling its fifth potash test well. The location of the well is on Harris Bros. ranch in Crockett county, Texas.

Drilling will be done with cable tools to the top of the potash-bearing salts, a depth of approximately 1,190 feet. After the salts are encountered, the diamond drill will be employed. The well will be sunk to a total depth of about 2,000 feet.

13th ANNUAL MEETING, ROC

Notice of Annual Meeting and Election of Directors

The annual meeting of the members of Illinois Agricultural Mutual Insurance Company will be held in the Ballroom of the Fort Armstrong Hotel in the City of Rock Island, Illinois, on the 18th day of January, 1928, at one o'clock P. M., to hear the report of the Board of Directors for the fiscal year of the company ending December 31, 1927; and to elect nineteen (19) directors to serve for one year and to attend to such other business as may properly come before the meeting.

Earl C. Smith
President.

Business Session of Delegates

HOTEL FT. ARMSTRONG, RO HEADQUARTERS FOR I ANNUAL MEETIN

President Smith To Report To Members

THE annual address of the president to the membership on the state of the organization will be made on Thursday morning, Jan. 19, in the general session to be held in the Ft. Armstrong Theatre.

Earl C. Smith

President Earl Smith will disclose and review at that time the problems of the Association and its accomplishments during 1927.

During the year, the Association added approximately 4,000 members although only a comparatively small number of counties held organization campaigns. Details will be given with reference to the new projects launched during the year, and a thorough explanation will be given of policies on such public matters as tax equalization and legislation.

Auto Insurance Company Holds First Annual Meet

Board of Directors To Report To Policy Holders

THE first annual meeting of the Illinois Agricultural Mutual Insurance Co. is scheduled for 1:00 p. m. Wednesday, January 18, 1928 in the ballroom of the Ft. Armstrong Hotel, Rock Island.

Each member of the Company is entitled to one vote to be cast at the annual meeting, and 500 members present in person or by proxy shall constitute a quorum. The by-laws of the Company provide for a board of directors of 19 members elected annually who must receive a majority of the votes cast. The directors hold office for one year and until their successors are chosen. The directors select their own officers and choose an executive committee composed of the president, secretary, treasurer, and two other members of the Board.

The Illinois Agricultural Mutual Insurance Co. started operations on April 1, 1927. In the first eight months closing Nov. 30, the Company had 6270 policy holders, and total applications for policies aggregating 6326.

The first assessments to policy holders revealed that protection was given at a lower cost for like insurance, than is offered by any company operating in the state.

Marketing To Be Fully Discussed

BETTER marketing of farm products through cooperative marketing associations and cooperation with present agencies when advisable will be the subject of a full afternoon's discussion during the I. A. A. annual meeting on Thursday, Jan. 19, at Rock Island.

Every phase of the cooperative marketing question will be taken up in order according to commodities. The first order of business when the conference convenes at 1:00 p. m. will be dairy marketing. Next in order will come produce marketing, fruit and vegetable, grain, and livestock marketing, and finally a general discussion in which any and every phase of the I. A. A. marketing program will come up for consideration.

Sam Sorrells, chairman of the ad-

The I. A. A. Annual Meeting will be broadcast from Station WOC, Davenport. Attend the meeting if you possibly can but if you can't TUNE IN. The dates are: Jan. 19-20, 1928.

visory committee on marketing, will preside and lead the discussion on grain marketing. He will introduce the various marketing specialists from the University of Illinois at the proper time during the program. Every county should be represented in each of the sectional conferences.

Serum Men To Hear Well Known Speaker

Farm Bureau Serum Association Annual Meeting Wednesday Morning, Jan. 18

CONTROLLING hog cholera will be the central theme of discussion when the counties holding membership in the Illinois Farm Bureau Serum Association meet for their annual gathering at Rock Island on Jan. 18.

The meeting is scheduled for Wednesday morning in the Elks Club at 10:00 a. m. Following the usual preiminary talks and reports, Dr. Robert Graham of the University of Illinois, will tell what his recent studies in baby pig vaccination have revealed. Later Dr. Jas. McDonald of the U. S. Department of Agriculture will lead a discussion on hog cholera control.

During the current year, the Serum Association composed of 61 member counties contracted for 35,875,000 c.c. of anti-hog cholera serum at a saving estimated at a quarter of a million dollars over former costs.

Committees Chosen For Annual Meeting

THE personnel of the resolutions, constitutional amendment, and credentials committees were chosen at the monthly meeting of the I. A. A. Executive Committee on Friday, Dec. 9.

The resolutions committee is as follows: A. R. Wright, A. N. Skinner, Chas. W. Borgelt, Chas. Marshall, Frank Oexner.

Amendments to the Constitution and By-Laws Committee: J. L. Whisnand, R. F. Karr, Fred Dietz.

Credentials Committee:—Wm. H. Moody, W. L. Cope, George J. Stoll, Harold, C. Vial.

Western Illinois City Mecca For Yearly Trek

Proximity To Iowa To Draw Many Visitors From Hawkeye State

FOR the first time in history the annual meeting of the Illinois Agricultural Association which is recognized as the most representative yearly gathering of Illinois farmers will be held in extreme Western Illinois on the Mississippi River, where the west begins and the tall corn is alleged to grow.

It will be the thirteenth annual assembly of the organization which had its birth back in 1916 when a small group of Farm Bureau representatives met in the Old Agricultural Building at the University of Illinois and discussed the possibilities of federating the small group of county organizations then in existence. Many of the county units in those days were known as soil improvement associations and as their name implied devoted all their activities to the field of production.

Needed Strong Organization

The development of the Farm Bureau with its subsequent evolution into the field of business and marketing is well known. The I. A. A. grew out of a long recognized need for a strong, representative organization that would represent farmers in all their interests including production, economic, social, business, and political interests.

The program this year will adhere closely to the general policy of the organization to give every member the utmost opportunity to be heard in public meeting. Thursday afternoon, January 19, will be devoted entirely to four group conferences, to be held simultaneously. Each member will have his choice of attending any one of the four.

The sections will be divided as follows: Organization and Information, Business Service, Public Relations, and Marketing. The places for holding these conferences will be announced in due time.

The general assembly of all delegates and visitors will be held in the Ft. Armstrong Theatre but the lesser meetings will take place elsewhere, as designated in the tentative program presented in this issue.

A surprise will await the delegates and visitors at the annual luncheon on Friday when prominent representa-

(Continued on page 8)

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the farm bureau was organized, namely to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Edited by Department of Information, E. G. Thiem, Director, 608 South Dearborn Street, Chicago, Illinois. Entered as second-class matter October 20, 1925, at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Acceptance for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the ILLINOIS AGRICULTURAL ASSOCIATION RECORD. Postmaster: In returning an uncalled for or missent copy, please indicate key number on address as is required by law.

The Man With The Hammer

THE I. A. A. is no one man organization. Nor is it run by a clique or a group. It is a great democratic institution in which every member has a chance to be heard. He can voice his objection or his approval. He can criticize and kick where kicking counts. The place to do it is in one or all of the four group conferences to be held on Thursday afternoon, Jan. 19, 1928, at Rock Island.

These conferences have become as important a part of the I. A. A. annual meeting as the banquet and the giant luncheon on Friday.

If you know a good, vigorous, two-fisted kicker, one who carries his hammer around with him regularly, and uses it conscientiously, urge him to come to the annual meeting and put on a first class demonstration. That's what these meetings are for.

The I. A. A. Executive Committee and officers are anxious to meet these people. They are at least stimulating, and often they do a great deal of good. We're for the man with the hammer, if he's honest and sincere. He can be taught to help build something.

In the Society Columns

THE farmer has arrived. He has made the society columns of a great metropolitan daily. The gold coast has learned that there is such a person. Here is the proof just as it was lifted out of the newspaper:

"Mrs. William E. Clow of Lake Forest will open her home in Sunset Lane next Monday afternoon at 3 o'clock for a talk on "The Problems of the Farmer," by Miss Julie R. Adams. Miss Adams will give the same talk Monday morning at 10:45 o'clock at the home of Mrs. Edward T. Jeffery, 915 North Dearborn Street."

Who shall say we are not making progress?

Appreciation

THE last meeting of the 1927 Executive Committee of the I. A. A. will be held Friday, Jan. 6, 1928. It is fitting that a word of appreciation be expressed for the faithful service these men have given during the past year. In all the history of the Association there is no record, to the writer's knowledge, of an executive meeting that lacked a quorum. During 1927 an absence of a single member was very unusual. It was a hundred per cent committee at nearly every session.

It's this kind of faithfulness that makes the I. A. A. a great organization. It has been blest with able leadership. Personal sacrifice is necessary to carry on the work of this democratic institution. There is no fee worthy of the name for those who assume its responsibilities. Most of the committeemen are active farm operators. Oftentimes they can ill afford to be away. The membership owes its representatives a vote of thanks. All in favor say aye.

Ousley to Illinois

A DISTINGUISHED southerner from the sunny cotton fields of Texas will address four farm audiences in Illinois between the Christmas and New Year holidays.

Clarence Ousley

The Hon. Clarence Ousley, assistant secretary of agriculture during the Wilson administration, a prominent newspaper man, and now director of the Texas Safe Farming Association of Dallas will present a southerner's viewpoint on the national agricultural problem at the annual Farm Bureau meetings, in Woodford, McLean, and Iroquois counties, and before a farmer-business men's gathering in DeKalb county. The dates are Dec. 28, 29, 30, 31 respectively.

Mr. Ousley is not only a student of economics, he is a student of government. He represents an organization made up of Texas business men. Therefore, his advocacy of a surplus control plan for agricultural products is doubly significant.

Col. Ousley has a way of saying things that cut deep. He is a master linguist. He doesn't mince words. He impresses you with the idea that he knows what he's talking about. He is a believer in the possibilities of an economic and political alliance between the South and West. The four counties in which he will speak are to be congratulated in securing such an outstanding man.

Tune in on the I. A. A. 15 minute program broadcast daily at 12:30 p. m. from station WJJD, Chicago (365 meters). The facilities of station WJJD are loaned the Association through the courtesy of the Loyal Order of Moose, Mooseheart, Ill. No program on Saturdays and Sundays.

Appeal for More Power

A PETITION for a higher power allotment was presented to the Federal Radio Commission by representatives of the Loyal Order of Moose, owners of Station WJJD, and the Illinois Agricultural Association in a hearing at Washington on Nov. 27.

Station WJJD, the official station of the I. A. A., which operates on a wave length of 365 meters, has a power allotment of only 1000 watts which is insufficient to reach out over the country under average weather conditions. This is particularly true in the daytime when static and interference is at its worst. Members of the I. A. A. in the southern half of the state report difficulty in picking up our daily noon farm program.

Harry C. Butcher, former Director of Information, appeared as a witness in behalf of the I. A. A. and presented important facts regarding the need for more radio service to farmers. The I. A. A. program is being developed to give farmers throughout Illinois, the corn belt and beyond, the latest news and valuable information regarding conditions of crops, warnings against crop diseases, insects and pests, advice with reference to harvesting and marketing, and educational matter pertaining to economics, legislation, insurance, fire and accident prevention and other questions of general interest.

Ole Looks for a Wife

OLE OLSON, star broadcaster of the Northwest's native tongue, who recently joined the Cook County Farm Bureau, is going to get married. That is, if he can find a wife. So he announced last week on the I. A. A. farm program. Ole has been working on a dairy farm but, as he stated to his radio audience, "I ban 36 yahr old and tank I go out for myself pretty soon. I got couple tousand dollar put away and maybe dot's enuf for a man to start farmin' wid if he gets a liddle help."

Ole Olson

Ole will tell his story on the I. A. A. farm radio program Tuesday, Jan. 3, 1928, 12:30 to 12:45 p. m.

FOUR I. A. A. HEAVY WEIGHTS

Left to right: Frank D. Barton, 210 lbs., Harold C. Vial, 240 lbs., Frank Oexner, 220 lbs., and A. R. Wright, 205 lbs., members of the Executive Committee.

Their combined weight is 875 lbs. When they called at the Photographer's to have this snapshot taken, the freight elevator was used to hoist them to the studio.

Program For Group Conferences Complete

Every Phase of I. A. A.'s Activities To Come Up For Discussion By Members

EVERY activity of the Illinois Agricultural Association will be discussed in the four great sectional meetings to be held Thursday afternoon, Jan. 19, during the I. A. A. meeting at Rock Island.

In charge of each group will be a member of the Executive Committee who will preside and give every member a chance to speak his mind. The group conferences will start promptly at one o'clock in separate rooms, and will hold over until 4 o'clock or later if necessary.

The Organization and Information discussion group will meet in the Ballroom of the New Harper Hotel and will be in charge of C. E. Bamborough who represents the 13th congressional on the Executive Committee.

The topics for discussion as outlined by the advisory committee are as follows:

ORGANIZATION

1. County Farm Bureau Program of Work and Its Effect on Organization Maintenance.
2. Who Should Be Farm Bureau Members?
3. Discussion by the Organization Director on the District Plan.

INFORMATION

1. Legitimate newspaper publicity (a) Reaching the non-member.
2. Some Outstanding Publicity Projects.
3. Discussion by Director of Information.

COLLECTIONS

The Public Relations conference will be held at the same time at the Elks Club, with Frank D. Barton, chairman of the Legislative Committee presiding.

The following topics will come up for discussion:

1. LEGISLATION.
   - A. Latest developments on National Farm Relief Legislation.
   - B. National and State Food Relief.
   - C. State Tax Legislation.

   Ten minute summary by A. C. Everingham.
2. TAXATION.
   - A. Administration of the Gasoline Tax Fund.
   - B. Service Problems.

   Ten minute summary by John C. Watson.
3. TRANSPORTATION AND UTILITY PROBLEMS.
   - A. Telephone Rates.
   - B. Transportation Rates and Claims.
   - C. Power Lines.

   Ten Minute Summary by Lee J. Quasey.

MARKETING

The marketing program to be held at the Odd Fellows Hall will be presided over by Samuel Sorrells chairman of the Marketing Committee. The discussion will revolve around the following subjects in the order as given:

1. Dairy marketing 1:00 to 1:30 p. m.
2. Produce Marketing 1:30 to 2:00 p. m.
3. Fruit and Vegetable Marketing 2:00 to 2:30 p. m.
4. Grain Marketing 2:30 to 3:00 p. m.
5. Live Stock Marketing 3:00 to 3:30 p. m.
6. General Discussion 3:30 p. m.

The Financial Business Service meeting to be held in the Ft. Armstrong Hotel will be in charge of Geo. F. Tullock, chairman of the Financial Business Service Committee of the I. A. A.

The program as outlined is as follows:

1. ACCOUNTING.
   - A. Farm Bureau Accounting.
   - B. Auditing.
   - C. Budget Control Expense.

(Continued on page 8)

Resolutions Adopted

(Continued from page 2)

borer, and other insect and plant pests and diseases;

(d) Fundamental research by the United States Department of Agriculture, to include research to extend industrial as distinguished from food uses of farm products;

(e) Continuation of the usual aid for construction of federal highways and bridges; and special aid for highway and bridge reconstruction in the recently flooded areas;

(f) United States Tariff Commission in carrying out the flexible provision of the Tariff Act;

(g) Enforcement of the Milk Inspection bill passed by the 69th Congress.

European Corn Borer

Commendable progress in corn borer control has been made. We favor an appropriation by this Congress sufficient to carry on the work effectively. We commend the cooperation given by the farmers in the past and realize that wholehearted support by them is essential.

Packer and Stockyard Act

We favor the strengthening of the Packer & Stockyard Act, both as to the definite authority vested in the Department of Agriculture and its administration, for the purpose of further safeguarding the interests of the livestock producer and his cooperative associations.

We further authorize the Legislative Committee of the A. F. B. F. to work in connection with a like committee from the National Live Stock Producers Association to ascertain and support the manner or method which will result in the accomplishment of the above purpose.

Immigration

We request our officers to exert every effort in securing a congressional investigation before any additional immigration restrictions to nationals on the western hemisphere are applied.

Farm Loan Committee

We thank the Special Farm Loan Committee for the long, diligent and intelligent study which it has conducted upon the farm loan question, and for the excellent report which has been formulated. We reccommend that the report of said Special Committee be accepted and the officers and Board of Directors be authorized to act in accordance therewith.

Omnibus

We announce our position in support of—

(a) Securing electricity on the farm, under rates and conditions which are economically possible for agriculture;

(b) Cooperating with other agencies in farm fire prevention;

(c) Opposing legislation which would establish retail price fixing;

(d) Securing legislation for the early development of the Colorado River;

(e) Securing legislation which will classify live poultry as live stock;

(f) Favoring a governmental inquiry into the growth and methods of capitalization of public utility corporations supplying electrical energy in the form of power and light;

(g) Developing a more intensive national reforestation program, said program to be in cooperation with and a correlation of state program, to prevent erosion of soils, and to bring present marginal lands eventually back into profitable production, with more adequate fire protection for our great forested areas.

(h) We favor a federal law requiring truth in market reports, and reports affecting marketing levels.

(i) The action taken at the last meeting creating the Home and Community Department has been fully justified as demonstrated by the interest manifested during the convention.

We heartily endorse and commend the fine accomplishments of this department and recommend its continued and generous support.

(j) We, the women of the A. F. B. F., herein assembled representing seventeen states of our Union, wish to voice our sincere appreciation of the entire convention program. We are mindful of the hard work and cooperation of all departments that has made this the outstanding convention.

We are impressed with the fine spirit and purpose manifested throughout the week. We especially wish to endorse the Home and Community Training School and feel deeply indebted to Mrs. Chas. W. Sewell for her able and inspirational leadership.

(k) We endorse the effort now being made in Congress to effect a stabilized price level and stable purchasing power of money through additional instructions to the Federal Reserve Board.

And resolutions of similar nature, all expressing approval of the voting delegates for the efficient way in which the annual meeting had been conducted by the various service agencies supplying talent therefor.

Respectfully submitted,

EDW. A. O'NEIL, CHAIRMAN,
CHAS. E. HEARST,
GEO. M. PUTNAM,
M. L. NOON,
H. G. KING.

HONORED AT DINNER

Geo. A. Fox.

A DINNER was given by the Association to members of the Executive Committee, officers, and staff at the Hotel Eitel, Chicago, on Nov. 10, where former secretary Geo. A. Fox was presented with a beautiful gold watch and chain by his former associates. Mr. Fox recently retired to his home at the edge of Sycamore where he now resides.

Group Conferences

(Continued from page 7)

2. FARM SUPPLIES.
   - A. Phosphate and Limestone.
   - B. Commercial Fertilizer and Supplies.
   - C. Farm Bureau Supply Companies.
3. INSURANCE.
   - A. Automobile.
   - B. Fire, Lightning, and Hail.
   - C. Life.

While the men are attending the group conferences, the women will have a program of their own which will be in charge of the Illinois Home Bureau Federation.

Opportunity will be given each member to bring up any question or criticism during the sectional conferences. These meetings belong solely to the membership. The officers, directors, and staff members will make it a point to keep as much in the background as possible.

Western Illinois City Mecca for Yearly Trek

(Continued from page 5)

tives of other state-wide organizations will be introduced. The list of guests will include several distinguished people well known to Illinois farmers.

Governor Adam McMullen of Nebraska whose keynote speech at the St. Louis Farm Conference in November attracted nation-wide attention is scheduled to deliver the principal message. Governor McMullen is a typical aggressive westerner who has given much thought and study to the problems of agriculture.

WOC Will Broadcast

The proceedings of the convention will receive wide publicity through the courtesy of radio station WOC of Davenport which has offered to broadcast the more important features.

The Illinois Agricultural RECORD

Published monthly by the Illinois Agricultural Association at 404 North Wesley Ave., Mount Morris, Ill. Entered as second class matter at the post-office at Mount Morris, Illinois, October 20, 1925, under the Act of March 3, 1879. Acceptance for mailing at special rate of postage provided in Section 412, Act of February 28, 1925, authorized October 27, 1925.

Volume 6 | JANUARY, 1928 | Number 1

Revenue Legislation Up In Special Session

Seek To Safeguard Constitutional Tax Limits For Downstate Counties

REVENUE legislation designed to safeguard the present constitutional limits of taxation in downstate Illinois will be considered at the special session of the legislature called by Governor Small for Jan. 10.

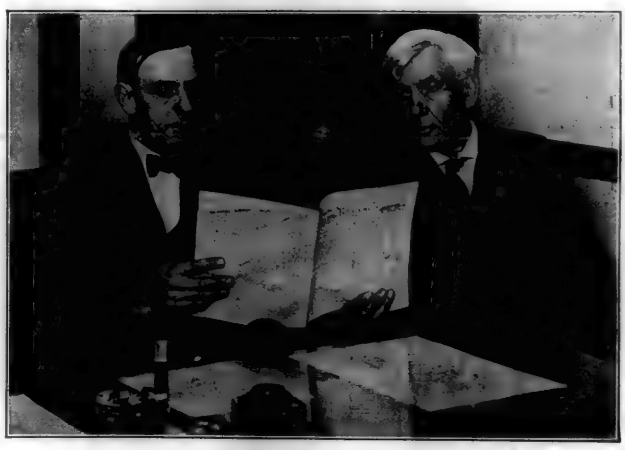
The Juul amendment to the notorious bonding or revenue bills passed by the 55th General Assembly would have made the measure which doubled tax valuations apply to Cook county only. This amendment, however, was declared unconstitutional, and so all of downstate Illinois is now subject to debt increases amounting to double the limitations existing prior to the passage of the new bills.

I. A. A. Interested

The Illinois Agricultural Association will lend its support to legislation which has for its purpose the reinstatement of former limitations on debts of taxing districts.

The constitution of Illinois provides that no county, city, township, school district or other municipal corporation shall be allowed to become indebted in any manner or for any purpose to an amount, including existing indebtedness, in the aggregate exceeding five per centum of the value of the taxable property therein, to be ascertained by the last assessment for State and county taxes previous to incurring of such indebtedness. County authorities may not levy taxes exceeding 75c per $100 valuation without the vote of the people.

Executive Committee Decides



The revenue bills passed by the last legislature doubled the basis of tax valuations and so doubled the debt limitation.

The decision to follow up the legislative program prosecuted by the Association in the 55th General Assembly was made at the last meeting of the 1927-28 Executive Committee held on Jan. 6.

A budget for 1928 likewise was adopted for recommendation to the new committee which meets after the annual meeting. Few, if any, changes are expected in the new board.

Insurance problems particularly that relating to the adoption of life insurance for members will be submitted for approval at the annual meeting, Rock Island.

THE final announcements of the 13th Annual Meeting of the I. A. A., Rock Island, Jan. 19-20 are made on pages four and five. Every member is invited to attend and have a part in the convention. Informative speeches, good entertainment, and accommodations at reasonable prices are assured.

President Earl C. Smith shows Congressman Haugen of Iowa,—a recent visitor at the I. A. A. office,—the Special Legislative Issue of the RECORD published following adjournment of the 55th General Assembly. The Congressman was much impressed with the magnitude of the Association's program and activities.

Haugen Pleads Cause At Chicago City Club

Our Only Interest, To Bring Agriculture Within Protective System, He Says

CONGRESSMAN Gilbert N. Haugen, white-haired solon from Northwood, Iowa, chairman of the Agricultural Committee in the House, and member of the nationally famous "McNary-Haugen team" told more than 200 Chicago business and professional men why agriculture should be included in the protective system, in a recent address before the weekly forum of the City Club, Chicago.

Thirty-five members and guests of the Chicago Agricultural Club including I. A. A. officers, executive committeemen and staff members attended the luncheon.

Don't Want To Hurt Tariff

"We do not want to harm nor tear down any other industry," said the congressman. "Opening the tariff wall is not the solution we offer. We would solve the problem of agricultural depression by establishing an American price for American farm products. This can be accomplished by bringing farm products within the protection of the protective tariff."

Letting down the bars of immigration and the protective tariff would hurt the farmer as well as others, declared Mr. Haugen. The result would be a lower level of prices which would bankrupt farmers with debts contracted during the period of high prices.

$1,442,000,000 More Annually

"If our plan for making the tariff effective on farm products had been in operation during the past seven years, producers would have received an estimated average of $1,442,000,000 more for their crops annually," he said.

Illinois Farm Guard Plan Interests Ohio

Seeks to Drive Farm Thieves Out of Illinois Through Co-operation of All Organizations

THE plan for organizing the State of Illinois against farm thieves which was adopted by the Illinois Farm Guard Committee on Dec. 20 in a meeting at the I. A. A. offices, Chicago, has drawn an inquiry from the Ohio Farm Bureau Federation asking for further information. The Ohio Farm Bureau is seeking to organize that state against farm thieves through a state-wide protective association.

The Illinois plan provides for extending protective organizations already in operation to embrace every community in the state.

Thus where the county Farm Bureaus, the Illinois State Detective, and the Illinois Anti-Thief Associations already have local or county protective organizations in operation an effort will be made to strengthen the programs of such associations—not to displace or compete with them.

But in unorganized territory, or in counties only partially organized the following procedure is recommended:

Program of Procedure

1. Call a committee meeting representing all parts of the county and all existing anti-thievery organizations, inviting the sheriff, state's attorney, bankers and others, who may be helpful.

2. Decide on plan of county organization. The following three alternatives are suggested:

a. Expand and strengthen existing local association, either an independent local protective association or a local of the Illinois State Protection Association, or the Illinois Anti-Thief Association, into a county wide organization.

b. Organize a county farm guard association with direct membership. This plan is particularly applicable to counties where no start has been made with any form of anti-thievery organization.

c. Organize a county farm guard federation using all existing locals of whatever type and organize into locals where none exist. This form of organization is particularly applicable to counties having several local anti-thief associations of various types. It makes possible the formation of a county farm guard federation without tearing down or changing anything that has already been built.

3. Call a county-wide mass meeting with good speaker to explain plan adopted and launch organization. Follow with agressive membership campaign.

The Illinois Farm Guard Committee recommends that the following fundamental principles be observed:

1. Cooperation of all interested parties;

2. Association should be county wide, with as large a membership as possible.

3. Membership should be open to all qualified farmers and other citizens interested in the purposes of the organization;

4. A limited number of the most responsible men in the organization should be selected as deputy sheriffs. These men should be strategically located thruout the county;

5. Limit activity to the prevention and punishment of stealing, hunting and trespassing.

The objectives of the movement are to:

1. Make the entire county dangerous and unprofitable for thieves;

2. Cooperate with sheriffs and to use deputies most effectively in order to secure arrests;

3. Cooperate with state's attorney to secure convictions;

4. Cooperate with poultry dealers to secure enforcement of poultry dealers' license and record law and to make it difficult for thieves to market stolen poultry;

5. Cooperate with bankers' town guards;

6. Educate farmers to protect themselves by using locks and burglar alarms and by marking poultry;

7. Conduct shooting matches;

8. Watch strangers and suspicious characters in the community.

HIS OWN DOCTOR

—Carlisle in the Des Moines Register

Knox County Oil Co. Earns 10% Net in '27

Balance Sheet Shows Total Assets of $52,430.90 at Close of First Fiscal Year

If to launch and firmly establish a thriving farmer company within a year's time is to be considered a notable achievement, then such a company showing a balance sheet with total assets of $52,430.90 on a paid in capital stock of $31,425 should be considered a still greater feat. This was accomplished by the Knox County Oil Company within its first fiscal year, ending November 30, 1927.

Two and one-half trains of gasoline and kerosene were distributed within the year with only two bulk stations operating full time. Seven carloads of lubricating oils and close to five tons of grease also appear on the sales records. The gross trading income was better than 30 per cent and the net income 10.2 per cent of sales.

After computing depreciations at 10 and 20 per cent and setting aside funds to the reserve, the remainder of the net earnings were returned to the farmers' pockets. Approximately $10,000 was paid out in dividends. Seven per cent preferred stock dividends were paid out Christmas week and recently a 7 per cent patronage dividend on common stock to all Farm Bureau members who had patronized the company during the past fiscal year. All paid up Farm Bureau members are common stockholders. The common stock dividends were based on the total purchases of each member customer.

Checks were distributed at the close of the Farm Bureau annual meeting, January 3. E. A. Daily of Yates City, who operates 300 acres in Salem Township, bought four shares of preferred stock a year ago when the company was organized. His preferred stock dividends were $8.08 and his patronage dividend $64.75, making a total of $72.83 returned on a $100 investment.

The Farm Bureau has 1349 members and the Oil Company has an even greater number of customers; many non-members patronize this farmer company on account of the quality of the petroleum products sold. The company now owns and operates five bulk stations located at Rio, Victoria, Williamsfield, Hermon and Galesburg. The Galesburg plant which only recently opened for business, promises to lead all other stations in volume of business for 1928.

14th Dist. Meeting O. K.'s Surplus Bill

Largest District Meeting of the Year Is Held at Monmouth Nov. 23

ONE of the best I. A. A. district meetings of the year was held at Monmouth in the 14th district on Nov. 23. W. H. Moody, who represents the district on the I. A. A. executive committee, called the meeting to order. M. L. Hunt of McDonough county was elected chairman and J. H. Lloyd of Hancock county secretary.

W. H. Moody

"From the standpoint of accomplishment, this has been the greatest year of my experience on the executive committee," said Mr. Moody. He commended the good work of special I. A. A. committees and President Earl C. Smith.

Represented at the meeting were delegations from Mercer, Warren, Henderson, McDonough, Hancock, and Rock Island.

The 14th district has its own public relations committee composed of C. W. Cooper, A. G. Bridgford, and John Schwartz who reported on the political candidates in the district and their stand on various legislation of interest to farmers.

Resolutions Passed

Resolutions were passed supporting the principles of the McNary-Haugen bill, approving the recommendations of the recent St. Louis Farm Conference, advocating coverage in the Ill. Agr. Mutual Insurance policy of collisions with immovable objects, recommending a plan of life insurance to be worked into the mutual insurance program, praising the work of the I. A. A. executive committee, staff, and President Smith during the past year, pledging support to presidential and local candidates who are friendly to the principles involved in the McNary-Haugen bill, and pledging large delegations from each county to attend the annual meeting of the I. A. A. at Rock Island, Jan. 19-20, 1928.

Dave L. Swanson, manager of the Chicago Producers, who spoke on the subject of livestock marketing showed how it would be possible for the Producers' organizations to stabilize the market and save farmers millions of dollars if they can secure a large enough percentage of the receipts.

The question of the direct purchase of hogs by packers was considered. It was pointed out that if farmers market direct to packers they should see to it that they get at least a part of the savings thus effected.

J. H. Lloyd moved that the program committee be held intact and be instructed to arrange for the first district meeting following the annual meeting of the I. A. A. Carried.

The I. A. A. In 1927

Response by President Earl C. Smith, to the Roll Call of States, in Reporting Accomplishments of the I. A. A. at the Annual Meeting of the American Farm Bureau Federation, Chicago, Dec. 6, 1927.

I AM pleased to report among the many accomplishments of the I. A. A. during 1927 the following:

Our full support and cooperation with the A. F. B. F. and other affiliated farm and cooperative organizations in securing the passage of the McNary-Haugen Bill by the Second Session of the 69th Congress. We authored, sponsored, and secured the passage of a constructive gasoline tax law in our State which properly recognizes a secondary system of roads giving direct recognition and service to rural Illinois.

We authored and sponsored an income tax bill during the same session of our Legislature and although did not secure its passage, succeeded during its consideration in imprinting upon the minds of our legislators, the inequities that exist under the present laws, as to cause the passage of a resolution providing for a committee with proper appropriations charged with the responsibility of reporting and recommending a fair practical tax revision program to the next General Assembly.

Several other bills we supported became laws and many we opposed were defeated.

Operating through ten service departments and four subsidiary organizations and in full cooperation with 94 County Farm Bureaus in our State, the following may be reported as outstanding achievements:

1. Secured reduction in full valuation of farm lands for state and county taxing purposes since 1920 amounting to six hundred million dollars. Since 1922, a reduction of four hundred million dollars for county and local taxing purposes. The net result accruing a saving of from two to two and one-half million dollars per year in farmers taxes since 1923. Further readjustment since 1927 will make possible a net saving to the farmers of our State at the next taxable period approximating four million dollars.

2. Represented our people before State and Interstate Commerce Commissions wherever their interests might be affected. In one instance, prevented a proposed increase in freight rates on fruits and vegetables which would have amounted to $115,000 annually. Collected $25,500 in railroad claims for our members.

3. Very active in promoting the cooperative selling of live stock. Forty-eight and seven tenths per cent of the total receipts of the Producer Agencies on the Chicago, East St. Louis, Peoria and Indianapolis markets emanated from Illinois farms. Handled 35,565,000 cc of anti-hog cholera serum, and virus, saving users practically $250,000.

4. Encouraged and promoted the cooperative handling and selling of dairy products. Managed and sold for 10,235 members their milk and cream showing increased earnings of $1,428,200.

5. Executed contraetual relations with four rock phosphate and 25 limestone companies whereby the interests of our members as to the quality and price are carefully safeguarded. More than one-fourth of all limestone and two-thirds of all ground rock phosphate used in the United States has been used by Illinois farmers.

6. Furnished a highly specialized audit and business advisory service to 224 cooperative organizations with a total membership of approximately 120,000.

7. Farmers Mutual Reinsurance Company has written during the year, $2,058,655 fire insurance, $3,980,000 farm crop hail insurance and $656,337 fruit and garden truck hail insurance.

8. During the year organized the Illinois Farm Supply Company which is controlled by and operated for our members. Although only seven months old, have purchased 2,000,000 gallons of gasoline, 1,250,000 gallons of kerosene and 150,000 gallons of lubricating oils, comprising about 440 cars of petroleum products, representing a sales value of over $600,000 and a saving in the form of patronage refunds to consumers of about $48,000.

9. During the year, organized the Illinois Agricultural Mutual Insurance Company, which provides ample automobile insurance protection at a cost considerably lower than is obtainable on the open insurance market. This Company which is exclusively owned by and operated for Farm Bureau mem-

(Continued on page 8)

THOUSANDS GET READY TO

I. A. C. A. Now Has 222 Member Co-ops

WHEN the Illinois Agricultural Co-operatives Association, the state audit service formed by the I. A. A. more than three years ago, gathers for its Fourth Annual Convention at Rock Island on Wednesday, Jan. 18, it will report a membership of 222 different cooperative associations and farm organizations, about half of which are farmers' elevators.

The I. A. A. audit service has been carried to practically every county of the state and in three years has grown steadily until today it requires a staff of expert accountants in the field the year 'round.

The opening address of the annual meeting will be made by President George L. Potter, and after the reports are made, open discussion will follow on questions of vital interest to the membership.

Natural Fiscal Year

An attempt is being made by business organizations throughout the country to substitute natural fiscal years for the present system whereby the fiscal year is made to correspond to the calendar year. The calendar year closing, it is said, works a hardship on the accountant and is not suited to certain kinds of business, the operations of which are seasonal, such as farmers' elevators. It is suggested that the fiscal years of such companies should correspond to the crop year.

Uniform accounting systems for all companies of a like nature also will be discussed. The accountant finds that a standard method of keeping accounts simplifies bookkeeping and auditing and makes easier comparative analysis of similar businesses which are of extreme value in revealing profitable and unprofitable business practices.

Baseball Officials Get Ready For 1928

Annual Meeting Farm Bureau Baseball League Set For Wednesday Morning, Jan. 18

WHILE there will be no spectacular trades and deals for stars and heavy-hitters announced at the annual convention of Farm Bureau Baseball League officials in January, there may be some interesting discussions of eligibility rules, scheduling of games, and deciding championships when President Cline of Cass County orders the assembly to play ball. The meeting is called for 9:00 a. m. in the Ft. Armstrong Hotel. Farm baseball in 1927 was marked by poor playing conditions caused by unfavorable weather early in the season, but the large number of post-season games more than made up for the loss of time in May and June.

Many new counties brought out teams to play at annual picnics for the first time and some of these hurriedly-assembled nines looked promising enough to give the old-timers a rub for honors in the coming season.

The entry of Southern Illinois counties into the League last season promises to bring about a realignment of schedules and the possibility of two large divisions in the State League. In this event, the Northern Illinois champs would play the Southern Illinois winners for the annual state championship.

The question of eligibility, the most popular one which makes its appearance each year, is scheduled to come up again. Sharp division of opinion over the eligibility of players other than those living on and operating or working on farms was expressed.

Federal Farm Loan System To Be Aired

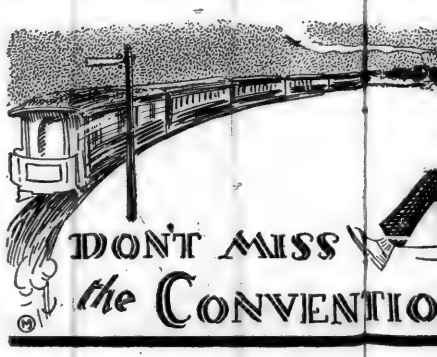
President of St. Louis Federal Land Bank To Address Meeting Friday A. M.

"TEN Years of the Federal Farm Loan System" will be the subject of an address by H. Paul Bestor, president of the St. Louis Federal Land Bank when he talks before delegates and visitors in the Ft. Armstrong Theatre, Rock Island, on Friday morning, Jan. 20.

Mr. Bestor is one of the best informed men in the entire federal farm loan system. His comments will be unusually interesting in view of the criticism from certain quarters which followed the appointment of Eugene Meyer as chairman of the Federal Farm Loan Board.

The System is alleged to have been dominated by the Secretary of the Treasury to the disadvantage of farmers for whom it was created. Secretaries of the many local farm loan associations, and farmers who hold federal loans will be particularly interested in hearing the address of Mr. Bestor.

Plowboy Quartet And College Band Booked

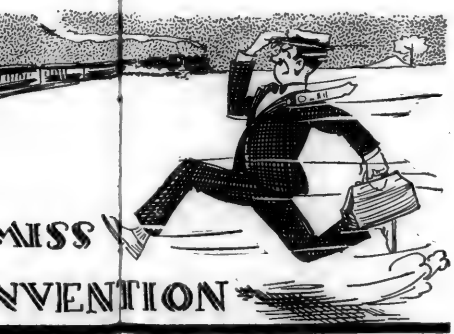


THE famous Plowboy Quartet from the farm implement factories of the Tri-Cities, and the Augustana College band are special musical features that will help entertain at the Rock Island convention. Music will be sprinkled amongst the speeches and discussion, and Farm Adviser J. H. Checkley from Logan County will be on hand to open up with a "Hello, etc." or a "Hail, Hail, the gang's all here," on the slightest provocation.

Activities of the Illinois Agricultural Association in 1927 will be presented in a 72-page report which will be off the press in time for the Annual Meeting. Copies will be available to delegates and visitors on Thursday morning, Jan. 19.

KEYNOTE SPEAKER AT

HON. ADAM McMULLEN, GOVERN



Y TO ATTEND I.A.A. MEETING

EAKER AT ROCK ISLAND

MULLEN, GOVERNOR OF NEBRASKA

Sam H. Thompson To Tell About Europe

WHAT he learned about European agriculture after a tour through seven countries including England, France, Germany, Holland, Belgium, Denmark, Scotland, also the Isle of Jersey, will be told by Sam. H. Thompson former president of the I. A. A. and now head of the Farm Bureau movement in America, when he talks to his old-time friends and neighbors at the annual banquet, Thursday night, Jan. 19.

"Our Sam" and the party of American farmers who accompanied him drew the admiration of many European people for the modest, gentlemanly manner in which they conducted themselves in contrast to the swagger and arrogance of so many plutocratic American tourists in Europe.

Mr. Thompson discussed his European tour briefly on the I. A. A. radio program more than a month ago. He is expected to go into some detail in his banquet address by way of contrasting European and American agriculture, and to cite lessons he learned from experiences of farmers in these foreign lands.

Geo. O. Fairweather, Tax Expert, To Talk

THE much-discussed tax situation will receive further treatment but this time from a new and different angle when Geo. O. Fairweather of Chicago, vice-chairman of the Joint Commission on Real Estate Valuations for Cook County addresses the convention in the Ft. Armstrong Theatre on Friday morning.

The revelations of this Commission have furnished plenty of ammunition for civic organizations in Chicago who are making an effort to institute a fair, honest, and lawful tax system in Cook County.

Mr. Fairweather's address will have a direct bearing on the downstate situation. Don't miss his talk. Fairweather is a high official in the business office at the University of Chicago.

Delegates and visitors who attend the convention will be well provided for at the Ft. Armstrong, the New Harper, and other hotels if necessary. The proximity of Rock Island to Iowa is expected to attract large numbers from the Hawkeye state.

For those who wish to drive, Rock Island is fortunately situated on paved routes 3 and 7 which connect up with other hard roads leading to all parts of the state. Railroad accommodations may be had in four directions over the Rock Island, Burlington, and Chicago, Milwaukee, and St. Paul Railways.

Late Reports Show Large Crowd Coming

Hon. Frank O. Lowden Invited Among Many Distinguished Guests on Friday

WITH time for the 13th Annual Meeting of the Illinois Agricultural Association, scheduled for Rock Island on Jan. 19-20, drawing near, thousands of delegates, members, and visitors are preparing to leave for the western city and the yearly mid-winter convention of organized Illinois agriculture.

S. H. Thompson

Final arrangements for a great annual meeting are complete and nothing has been left undone to prepare for the large crowd expected from every nook and corner of the State.

Many Will Drive

Reservations are in from most of the counties and larger delegations from the nearby sections are in prospect. The western Illinois counties are nearly all well-organized and heavily populated with Farm Bureau and I. A. A. members. These counties are expected to swell the attendance because they are all within easy driving distance and Rock Island is handily situated with hard roads coming in from all directions.

Though unannounced heretofore, former Governor Frank O. Lowden of Oregon, most prominent member of the Illinois Agricultural Association, has received an invitation extended by President Earl C. Smith to attend the giant luncheon on Friday. Mr. Lowden will be one of many prominent citizens and leaders of the state expected at that time. He is not scheduled as a speaker.

An Able Speaker

Gov. Adam McMullen of Nebraska will deliver the principal address at the luncheon. Gov. McMullen is a very able speaker and one well-qualified to discuss the national agricultural situation which he has given considerable study and thought. Following his masterly presentation of the agricultural problem before the farm congress of the Middle West and South at St. Louis in November, Gov. McMullen received many invitations to speak in the East. He recently returned west from a tour along the Atlantic seaboard. Following the luncheon will come final adoption of the report of the resolutions committee, and adjournment.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the farm bureau was organized, namely to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Edited by Department of Information, E. G. Thiem, Director, 608 South Dearborn Street, Chicago, Illinois. Entered as second-class matter October 20, 1925, at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Acceptance for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agriculture Association is five dollars a year. The fee includes payment of fifty cents for subscription to the ILLINOIS AGRICULTURAL ASSOCIATION RECORD. Postmaster: In returning an unsalled for or misent copy please indicate key number on address as is required by law.

Why Powerful?

SOME prominent writer points out that there are only two kinds of power that a human being can possess on this earth. They are personal and financial power. Financial power is limited to a comparatively few people. It has built churches, comforted the needy and elevated men in the sight of God. On the other hand, it has caused divorces, evaded justice, and brought contempt and ruin to its possessor. The rich man is literally helpless when he first recognizes his money fails to command respect.

The other power is personal power. It is that development of the intellect, character and personality of the individual which demands respect and brings to him vision and decision. It can never escape the individual possessing it. The more he uses it, within reason, and the more freely he gives of it the stronger individual he becomes.

The greatest job of the Farm Bureau is the development of men and women. Its aim embraces economic, social and educational progress. Its program is built with the development of personal power as a basis.

How well it is succeeding may be set forth in a part of its record of accomplishment.

It has for its membership the best and leading farmers of our State. Its members are the community leaders, the church leaders, and in fact that progressive and substantial element to be found in all communities.

It commands the respect of other economic and social groups of people second to no farm organization on earth. Its representatives and members are respected even by individuals semi-antagonistic to its program. It is looked upon as the voice of Agriculture. Its spirit of fairness in matters of Public Policy is above reproach or question.

The result is the development of a farm leadership with clear vision, with an intelligent understanding of agriculture, its needs and relationships, and most of all a leadership possessed with that personal unselfish desire to do something constructive for the benefit of all mankind. Why shouldn't such an organization be powerful?

GEORGE E. METZGER.

Administrative Responsibility

WHEN a man accepts election to a board of directors of a co-operative company or any other corporation, he assumes a definite responsibility. He becomes, in fact, the joint trustee with other directors to represent the interests of the individual members of the company. It must be presumed that a director is selected because of his ability to meet those responsibilities and as a result of the confidence of the members.

The board of directors as an administrative body has certain duties which are closely related to the business operations of the company. Those duties are not discharged by the appointment of a manager nor by the election of certain officers. Each member of the board during the term for which he is elected is responsible to the membership for the proper conduct of the business. It is the duty of the board of directors to determine policies which shall govern the affairs of the company and to see that such policies are carried into effect by the manager and other employes. They are primarily responsible for the funds and properties of the company to see that they are properly used.

It is recognized that these responsibilities and duties require more time than the average director can contribute. Proper administration requires him to be currently informed regarding the affairs of the company. It is important that a complete and accurate report shall be made to the members at the close of the year's business. Success in the administration of co-operative organizations requires the same application of business principles and methods as apply to other forms of business. Members are entitled to facts free from prejudice, favor, or the consideration of any personal interest. Efficient disinterested audit service is necessary and should be employed by directors of co-operative associations.

GEO. R. WICKER.

English Farmers Demand a Raise

THE farm problem in England apparently has something in common with that in our own country. Low prices for agricultural products are causing farm bankruptcies and the abandonment of large acreages. This in spite of the fact that the British Isles import much of their food. The British farm organization corresponding to the American Farm Bureau wants a protective tariff, a tax on imported foods. The labor and business groups which comprise 80 per cent or more of the population are not disposed to grant the farmer a raise. They want to maintain cheap food prices.

One school of English farm thought, as expressed by Mr. Baillie Scott in the *Countryman* says:—"Between the two extremes of dearness and cheapness there is always a right price, and in respect of a vital industry that price must be maintained in agriculture by giving up the ideal of cheap food and by taxing all the cheap foreign rubbish on which our people now mainly contrive to subsist."

Tune in on the I. A. A. 15 minutes program broadcast daily at 12:30 P. M. from station WJJD, Chicago (385 meters). The facilities of station WJJD are loaned the Association through the courtesy of the Loyal Order of Moose, Mooseheart, Ill. No program on Saturdays and Sundays.

TO BROADCAST ANNUAL MEETING.

NEGOTIATIONS are under way as this is written to broadcast certain features of the 13th Annual I. A. A. Meeting at Rock Island on Jan. 18-19-20 over a hookup of 15 stations through the courtesy of the National Broadcasting Co., Chicago.

If the move to secure nation-wide distribution is successful, powerful stations such as KDKA Pittsburgh, WLW Cincinnati, KYW Chicago, WOC Davenport and others as far south as Atlanta and as far west as Omaha will pick up the I. A. A. program from Rock Island. Radio fans from the Atlantic seaboard to the Rockies, and from Canada to the Gulf thus will have an opportunity to hear the prominent features of the convention.

In any event, the facilities of the Davenport station, WOC, will be available and much of the program will be broadcast by this station whether or not the national hook-up is secured.

While definite hours for broadcasting have not been arranged, I. A. A. members who do not attend will be certain to hear the luncheon program on Friday, Jan. 20 by radio. The broadcast should begin by 1:15 or 1:30 P. M. and will continue to the end of Gov. McMullen's address. The banquet program Thursday night and the speeches Friday morning likewise will undoubtedly be broadcast.

Former Governor Frank O. Lowden of Oregon, most prominent member of the I. A. A. has accepted an invitation to be our guest. He is not scheduled as a speaker. Many other distinguished leaders in other groups are expected at the luncheon in the U. S. Government Arsenal dining-room on Friday.

OLE GETS LETTERS.

Following is one of the many letters received by Ole Olson, I. A. A. broadcaster who recently announced his "intentions" over the radio. Ole says this one is the best prospect, but to play safe, he is writing for pictures.

Dear Ole:

Aye heerd you on the radio five or sax times now; and the first time Aye heerd your voice Aye know that Aye would love every hair on your head; it was so sweet.

Mae Fadder he was a farmer and Aye milk most all the cows; my but wouldn't it be such a pleasant yob if they was our cows. Aye would milk twice as many.

Aye don't dare to come down to Chicago, it was such a big place, Aye was afraid Aye might have to go through Cicero; but Aye would be willing to come down half way. Meybe we could meet at Benton Harbor and we could get married then and Aye could go with you back to Cook Coonty or we could come home and stay a while on Pa. He heerd you over the radio too one day and he say, "Aye bet you that bane one damb good swede."

Don't disappoint me, let me hear from you quick. Aye bane sure we was yust meant for each other. Pa he say the same as Aye do. Aye bet you get thousands of letters from other girls all round the country; but Aye hope to die if Aye don't love you more as all the rest of them put together.

Yours with love

(Signed) Ola Anderson,
SWAK.

Cass County Has 100% Shipping Ass'n.

A LETTER has just been received from Mr. Geo. A. Aldridge, manager of the Cass County Live Stock Shipping Association, Virginia, Ill., stating that his association has been a hundred per-center from September, 1922, to date, having shipped every carload of stock to a Producer Agency.

Ray E. Miller

"When a manager can ship all of his livestock to one agency for more than five years and still maintain the satisfaction of his members it is certainly indisputable evidence that the farmer-controlled sales agencies are doing a good job of selling," said Ray E. Miller, director of livestock marketing. "The example of these managers serves a mighty valuable purpose in stimulating the confidence of other managers and individual shippers in the Producer Agencies. If Mr. Aldridge can ship all of his stock to a Producer Agency and retain the satisfaction and support of his members other livestock shipping association managers can do the same thing. Every time a local shipping association or an individual sends a carload of stock to a Producer Agency that shipment increases the ability of the Producer Agency to render still greater service to the livestock growers of the county. Volume is the most effective instrument at the disposal of Producer Agencies in rendering service."

MORE ON HONOR LIST

"In a recent issue of the I. A. A. RECORD was a list of honor shipping associations," writes J. V. Stevenson, manager of the Kernan Shipping Association, Streator, Lasalle county. "Our association was not included, but we have shipped 100 per cent to the Producers since the second week the Producers did business in Chicago. Will you please add our name to the honor roll."

"I can testify to the truth of this statement," says P. G. Evans of the Chicago Producers. "You might also add the Farmers' Shipping Association at Rockford, Dwight, and Baileyville."

Lowden Is Endorsed At 13th District Meet

Strong Delegations Turn Out From All Counties At Lanark on Dec. 15

RESOLUTIONS were passed endorsing Frank O. Lowden for president, commending the legislators from the district who supported the I. A. A.'s legislative program in the last General Assembly, and endorsing the principles of the McNary Haugen bill when more than 100 Farm Bureau and I. A. A. leaders and members met for the 13th District meeting on Dec. 15 at Lanark in Carroll county.

C. E. Bamborough, who represents the district on the I. A. A. Executive Committee discussed agricultural legislation in the 55th General Assembly and presented the records of the three representatives and senator from that section. Senator Joseph Meyers, it was revealed, had a 100 per cent voting record on the four major proposals in which the Association was most interested.

100 Per Centers Named

Representative A. S. Babb was also given a 100 per cent record, Rep. John Acker a 75 per cent record, and Rep. C. D. Franz a 50 per cent.

C. E. Bamborough

"The I. A. A. is committed to the policy of watching the interests of agriculture in the General Assembly and in Congress," said Mr. Bamborough. "Taxes will always be an important issue so long as the great bulk of government revenue is levied against farm lands and real estate. Farmers as a class pay direct taxes on all their wealth, whereas those owning intangible property often escape with paying little or no direct taxes.

A. N. Abbott Speaks

Farm Bureau presidents and leaders from Whiteside, Jo Daviess, Carroll, Ogle and other counties in the district contributed to the discussion regarding the effectiveness of various types of Farm Bureau work.

A. N. Abbott of Whiteside county, told of his observations in the corn borer infested regions about Lake Erie and related how the government is working to stamp out the pest and prevent its spread westward.

H. D. Fink, district organization manager for the district with headquarters at Dixon presented the program of the I. A. A. with a series of slides illustrating the Association's activities.

Henry A. Wallace, editor of Wallace's Farmer, and President Earl C. Smith addressed the annual meeting of the Lasalle County Farm Bureau at Ottawa on Dec. 15.

Champaign County Wins Tax Victory

State Commission Orders Reassessment of Real Property In Champaign, Urbana and Rantoul

AN ORDER to reassess real property in the cities of Champaign, Rantoul, and Urbana in Champaign county, was issued recently by the Illinois Tax Commission.

The order sets forth that the local assessment officers shall proceed at once to reassess all real property within the township of the city of Champaign, the township of Champaign, the township of Rantoul, and the township of Urbana for the year 1927. Such reassessments are to be substituted for the original assessment of real property for 1927 within these districts.

This order by the Commission comes following a presentation of inequalities between farm lands and real estate valuations by the Champaign County Farm Bureau and the Illinois Agricultural Association some time ago. The Commission's statement reveals that real property in the city of Rantoul was assessed at 35 per cent of its fair cash value, in the city of Champaign at 26 per cent of its fair cash value, in the city of Rantoul at 27 per cent, and in the city of Urbana at 30 per cent of its fair cash value.

Denies Claims

The Commission's order denies the claims made by a group of seven Champaign county attorneys who appeared in behalf of the taxing districts to defeat tax equalization. According to John C. Watson, tax expert for the Illinois Agricultural Association, the average percentage of increase in valuations should be about 34.6 per cent in the city of Champaign, about 25 per cent in suburban property in Champaign township, about 30 per cent in the city of Rantoul, and about 16⅔ per cent in the city of Urbana. When these changes are made Mr. Watson estimates that both land and city property will be assessed on approximately the same percentage of their fair cash values.

Inequality Shown

The Champaign County Farm Bureau, with the help of Mr. Watson, uncovered facts revealed in the tax books of the county showing that gross inequalities existed. The figures so obtained were never successfully attacked, and in two hearings the State Tax Commission upheld this method of arriving at the truth regarding assessed valuations.

In its order to the Treasurer of Champaign county the Tax Commission statement said: "Therefore the real property in said townships in said Champaign county has not been assessed in substantial compliance with the law for the year 1927, and has been unequally and improperly assessed.

Must Reassess

"It is therefore ordered by this Commission that the assessments of real property as returned by the assessor or assessors within said townships, and as equalized by the Champaign County Board of Review for the year 1927, be set aside and held for naught, and that the local assessment officers of said Champaign county and of said taxing district do proceed forthwith to reassess all the real property within said districts and cause such reassessment to be substituted for the original assessment of real property for 1927."

The effect of the order will be to reduce farm taxes and cause a more equal distribution of the tax burden between farm and city property in Champaign county to the advantage of farm lands.

I. A. A. in 1927

(Continued from page 3)

bers, started operations on April 1. By November 1 more than 6,000 policies in force and our Financial Statement listed assets of $120,000 and after setting up reserves for all liability including losses and claims unpaid, the net worth of the company exceeded $70,000.

10. During 1927 the news of the I. A. A. activities appeared in the press of practically every State in the Union as shown by more than 15,000 newspaper clippings returned by a Clipping Bureau. Inquiries asking for information came from as far East as Jerusalem, in Palestine, and as far West as New Zealand. In addition, our organization is kept before the public through our official papers, the ILLINOIS AGRICULTURAL ASSOCIATION RECORD, and the Bureau Farmer, and through a daily 15 minute radio program broadcast direct from our own office studio through the courtesy of Station WJJD.

11. We are especially proud to report that the per cent of membership dues paid up to December 1 was the highest in the history of our Association and last but by no means the least, we are closing the year with an increased membership of approximately 4,000.

THE PLOWBOY QUARTET

22nd District Holds Meeting at Edwardsville

"THE object of these district meetings is to give the members an opportunity to voice their wishes and opinions regarding past and future policies of the Illinois Agricultural Association," declared Frank G. Oexner, I. A. A. Committeeman from the 22nd district who opened the recent district meeting on Dec. 2 at Edwardsville. Wm. Veith, president, and E. H. Isenberg, secretary of the Madison County Farm Bureau, acted as chairman and secretary respectively of the conference.

Frank G. Oexner

About 75 turned out for the meeting from the counties of Bond, St. Clair, Monroe, Washington, and Madison. Following a discussion regarding the advisability of organizing a milk producers' association in the St. Louis territory, Farm Adviser Foard of Bond county described the limestone project which won him third place in the county adviser's contest fostered by the American Farm Bureau Federation. The campaign resulted in bringing 400 carloads of limestone into the county.

President Earl C. Smith discussed national legislation and held an open forum on the surplus control bill in the afternoon. To perpetuate the district meeting plan, Stanley Castle, former I. A. A. committeeman, moved that the meetings be continued. The motion was seconded and carried.

Freeport Officials Seek To Halt Order

Tax Commission Says Inconvenience and Lack of Time No Argument

THE city attorney of Freeport appeared before the Illinois Tax Commission, Tuesday, Dec. 13, to appeal for a deferred hearing regarding the order of reassessment recently issued by the Commission in the city of Freeport in Stephenson county.

The Commission granted the request and the hearing was set for Wednesday afternoon, Dec. 21.

"Make it plain to your officials," said Chairman Wm. H. Malone, "that the plea of inexpediency, inconvenience or lack of time in making the necessary adjustment to comply with the law will not be accepted. The law sets forth clearly that all real property shall be assessed on the same basis, and if this law means anything it is our duty to enforce it."

The recent order of the Commission called for a reassessment of property in Freeport where valuations for tax purposes were much lower than in other taxing districts of the county.

Public Questions Up Before I. A. A. Conference

Legislation, Taxation, Transportation Problems Reviewed in Rock Island Meeting

(Note: Following is a summary of the Public Relations Conference held during the I. A. A. meeting at Rock Island.)

THE Chairman of the Public Relations Advisory Committee submits the following report and recommendations of the conference on Public Relations held January 19, 1928:

F. D. Barton

The conference was held in Eagles Hall and was attended by about 180 persons.

Legislation

Matters of interest to members on national and state legislation were discussed at this conference, and recommendations made thereon. President Smith of the Association reported on the situation in Washington regarding farm relief legislation. It appeared from his statement that strong pressure was being brought to bear at this time to eliminate the equalization fee as a part of the McNary bill. Mr. Smith stated that the farm leaders who were sponsoring this legislation had refused, and would continue to refuse to eliminate the equalization fee as a part of the proposed legislation. This matter was considered by the conference, and the following recommendation made:

"That the Illinois Agricultural Association, through its leaders, continue to insist that the equalization fee be maintained as a part of the National Farm Relief program as outlined in the McNary bill, and that members of the Congress in both houses be urged to stand by the McNary bill as it is now pending with its inclusion of the equalization fee provision."

Senate Bil' No. 1 Discussed

Senator Simon E. Lantz appeared before the conference and stated the situation at Springfield before the state legislature in its present special session on the matter of debt limitation legislation as now outlined in Senate Bill No. 1 and House Bill No. 13. The senator reported that Senate Bill No. 1, limiting the debt incurring power for downstate taxing district to 2½ per cent had passed the senate on second reading and would, during the early part of the coming week, be before the senate for final passage. Attention was called to the conference that it would require the constitutional majority of votes to pass the senate, namely 26 votes, and that all senators representing agricultural constituencies be urged over the week-end to be present and vote for Senate Bill No. 1 without amendment.

Recommendation is made that members of the Illinois Agricultural Association, through their respective county Farm Bureaus and county executive officers, be urged to get in touch with their senators and representatives over the week-end, urging the support and passage of Senate Bill No. 1 and House Bill No. 13 limiting the debt incurring power of downstate taxing district to 2½ per cent on the full assessed value.

Flood Relief Urged

The matter of national and state flood relief was given full consideration by the conference. After careful consideration it appeared to be the unanimous opinion of those attending the conference that relief against floods was a matter for the attention of the national congress, and that the congress be urged to pass such legislation as would give relief against losses by floods in the Mississippi valley.

Recommendation is made to the voting delegates of the Association

(Continued on page 8)

REPORTS of the four group conferences held at Rock Island on Jan. 19, 1928, together with accounts of other meetings, are presented in this issue. They are a part of the corporate records of the I. A. A. Read them carefully.

New I. A. A. Committee Holds First Meeting In Chicago On Feb. 3

Organize and Plan for 1928, New Committees Appointed

NEW advisory and finance committees were appointed, and plans for the future were considered at the first meeting of the 1928 Executive Committee of the I. A. A. held at Chicago on Feb. 3. L. R. Marchant of Knox County was present, representing the State Association of Farm Advisers. A. R. Wright of Varna, R. F. Karr, Iroquois, and A. N. Skinner, Yates City, were appointed to the Finance Committee for the ensuring year.

A. R. Wright

The personnel of the advisory committees as recommended by President Smith and approved by the Executive Committee is little different from the previous year, the same chairmen in each case being re-appointed. The committees for 1928 are as follows:

Organization and Information, C. E. Bamborough, Polo, chairman; Frank Oexner, Waterloo; Charles S. Black, Jacksonville; W. B. Bunn, Olney.

Financial Business Service, Geo. F. Tullock, Rockford, chairman; Fred Dietz, DeSoto; M. G. Lambert, Ferris; W. W. McLaughlin, Ottawa.

Public Relations, Frank D. Barton, Cornell, chairman; J. L. Whisnand, Charleston; Charles Marshall, Belknap; R. J. Laible, Carrollton.

Marketing, Samuel Sorrells, Raymond, chairman; W. L. Cope, Salem; H. C. Vial, Downers Grove; Geo. J. Stoll, Chestnut; R. C. Doneghue, Macomb.

Barton Reports

Frank D. Barton, chairman of the Legislative Committee, reported that Senate Bill No. 1, limiting the bond-

Serum Ass'n Plans For 1928 Campaign

O. B. Goble and Sam Sorrells are Re-elected President and Vice-President

(Note: Following are the minutes of the third annual meeting of the Illinois Farm Bureau Serum Association, held Jan. 18 at Rock Island.)

THE meeting was called to order by President O. B. Goble. Remarks relative to the growth of the Association and the success of last years operations were made by President Goble.

The minutes of the Third Annual Meeting were read and approved.

Secretary's report was presented.

Moved and seconded that the report be approved. Carried.

Treasurer's report was presented.

Moved and seconded that the Treasurer's report be approved. Carried.

The following men were appointed on the Credentials Committee:—J. H. Lloyd, Alden Snyder, P. B. Scott.

The following were appointed on the Resolutions Committee:—R. A. Norrish, Enos Waters, O. L. Welch.

Dr. Graham Speaks

Dr. Graham was introduced by President Goble. Dr. Graham gave a highly instructive talk on "Studies in Baby Pig Vaccination," followed by a discussion led by Dr. Jas. McDonald, U. S. Dep't. of Agriculture, in charge of Hog Cholera Control Work in Illinois.

Following the general discussion, slides were shown by Dr. Graham pertaining to the subject under discussion.

Adjournment for lunch.

Meeting reconvened at 1:30 p. m. Called to order by President Goble.

Report of Credentials Committee by Chairman J. H. Lloyd. Motion made, seconded and carried that report be approved.

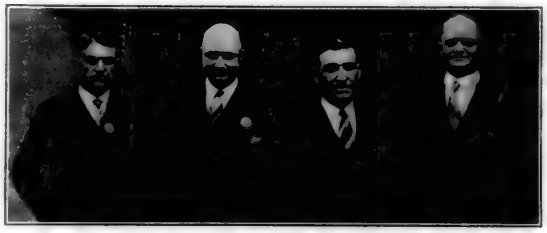
District caucuses were next held to enable such districts to select their nominees for directors. Nominees were as follows:—

District No. 1—R. A. Norrish.
District No. 2—J. H. Lloyd.
District No. 3—Adam McWilliam.
District No. 4—Sam Sorrells.
District No. 5—O. B. Goble.
District No. 6—James Gillespie.

Directors Elected

Motion made and seconded that the Secretary be instructed to cast unanimous ballot of the Association for delegates above. Carried.

Discussion relative to possibility or advisability of having a Farm Bureau label on serum and virus put out by the serum companies. John Spencer, Lawrence County, suggested that virus bottles bear a red label or label of some other striking color. No action taken.



General discussion followed, from which developed the following suggestions for the consideration of the Directors.

Suggestions offered

1. That bonds for delivery of serum and virus covered in contracts be required from contracting companies.
2. That something be incorporated in the contracts obligating companies to furnish serum and virus for revaccination when serum or virus is at fault.
3. That bids be obtained on avian bacterins, especially in small bottles.
4. That all shipments of serum and virus sent to one county be of same serial number as nearly as possible.

Report of Resolutions Committee given by R. A. Norrish, Chairman. Motion made and seconded that the report be approved and resolutions be adopted.

Motion made and seconded that unanimous ballot of organization be cast for Ray E. Miller for Director at Large. Carried.

ILLINOIS FARM BUREAU SERUM ASSOCIATION DIRECTORS
Left to right: R. A. Norrish, Whiteside County; Adam McWilliam, Stark County; Samuel Sorrells, Montgomery County; O. B. Goble, Coles County.

Resolutions To All Counties

Motion made that copy of resolutions be sent to all member counties of the Association. Seconded and carried.

Motion that booklet or pamphlet of directions for vaccination be prepared and distributed to member counties of association. Seconded and carried.

Expression called for from counties as to number selling only to Farm Bureau members. Only five counties responded as selling to non-members—all others represented restrict sale to Farm Bureau members.

Motion by Scott of Mercer County that buying of 1928 serum and supplies be turned over to the board of directors with full purchasing powers. Seconded by C. J. Elliott of LaSalle County. Extended discussion followed.

Motion by L. O. Wise, seconded by Heath of Platt County that motion be tabled. Motion carried.

Meeting adjourned at 4:30 p. m.

RAY E. MILLER,
Secretary-Treasurer.

Directors Meet

(Note: Following are minutes of directors meeting following Association Meeting.)

Motion by Adam McWilliam, seconded by R. A. Norrish, that O. B. Goble act as president. Amended by J. H.

Lambert Active in Home Community

Is First Man on Executive Board from Hancock County

M. G. LAMBERT, the new representative of the 14th Congressional District on the Illinois Agricultural Association Executive Committee, was born in Rock Creek township, Hancock county, in 1881. He has lived his entire life on a farm within five miles from where his grandfather settled in 1858.

M. G. Lambert

He attended the district school a few months each winter until he was 21. Then he entered the Howes Academy, Mt. Pleasant, Iowa, where he was a student from 1903 to 1906 inclusive. Later he attended the Iowa State College at Ames where he studied agriculture and livestock production from 1906 to 1907.

Feeds Livestock

Returning to his home in 1907 he started operating the home farm. He owns the 280 acre live stock farm which he now operates. All of the crops are fed to livestock and marketed on the hoof. Lambert raises three or four carloads of hogs a year and feeds from four to eight loads of cattle.

In 1912 he married Sadie Luckenbill. He has a son and two daughters ranging in age from nine to 14 years.

He aided in organizing the Hancock County Farm Bureau in 1914, and since that time has been active as township director, executive committeeman, and now as president. He has always taken a prominent part in community activities: namely, as school director, church officer, president of the Adrian Shipping Ass'n, bank director, president of the Western Illinois National Farm Loan Ass'n, president of the Adrian Agricultural Credit Corporation, president of the Adrian Agricultural Short Course, president of the Adrian Community Club, director in the Hancock County Farm Bureau Supply Company, and director in the Illinois Farm supply Co.

5th Member From District

Mr. Lambert is the 5th member of the Illinois Agricultural Association Executive Committee from the 14th District. The committeemen who preceded him were: I. F. Gilmor of Mercer county, Robert N. Clarke of Henderson county, M. L. Hunt of McDonough county, and Wm. H. Moody of Rock Island county. Mr. Lambert is the first man from Hancock county to be represented on the I. A. A. Executive Board.

Welk and Snyder New Heads Baseball League

Five New Counties Propose to Enter Teams in 1928 Race

Minutes of annual meeting of the Illinois Farm Bureau Baseball League, Room K, Fort Armstrong Hotel, Wednesday, Jan. 18, 1928, Rock Island.

THE meeting was called to order at 9:30 a. m. by Secretary E. G. Thiem in the absence of President George R. Cline and Vice-President W. G. Griffith.

Between 75 and 100 delegates, members, and visitors were present.

The first order of business was the election of a temporary chairman. C. R. Ford, president of the Peoria County Farm Bureau, was duly nominated and in the absence of other nominations, was elected without opposition.

The secretary-treasurer's report was next presented. It was moved and seconded that the report be accepted as read. Carried.

The financial statement of the league, as read by the secretary-treasurer, showed a balance on hand as of December 31, 1927, of $102.98. Subsequently, $25 for 1927 dues was received bringing the total to $127.98.

Committees Announced

Following the reports it was moved and seconded that a committee be appointed for the purpose of appointing committees on credentials, resolutions and eligibility, and nominations.

Harrison Fahrnkopf of McLean County, chairman of this committee, reported as follows: for the committee on credentials, E. G. Thiem, E. D. Walker, of Henderson County, and H. O. Tedford, of Lawrence County; for the committee on resolutions and eligibility, W. A. Stevenson, Henderson County, Harrison Fahrnkopf, McLean County, and L. R. Welk, Tazewell County; for the committee on nominations, Guy Husted, Cass County, Theodore Stimpert, Woodford County, and F. E. Fuller, Marshall-Putnam County.

It was moved and seconded that the report of the committee on committees be accepted as read. Carried.

Eligibility A Problem

A discussion of rules and plans for 1928 was next taken up. The question of eligibility was first considered. After much discussion pro and con on the question as to whether or not the league should be opened to all Farm Bureau members and their families regardless of residence or occupation, the report of the committee on resolutions and eligibility was called for. Mr. Fahrnkopf of McLean County reported for the committee and advised that it favored the following amendment to the eligibility clause in the constitution, Article IV, Section 1:

The New Amendment

"Any Farm Bureau member or member of his family whose business is farming and whose principal income is derived from farming, provided said Farm Bureau membership shall be contracted for in the customary way, shall be eligible to play in this League. Said eligibility must be certified to by the directors or farm adviser from each county."

The committee, likewise, submitted a more liberal amendment declaring any Farm Bureau member or member of his family eligible to play in the League. The first proposed amendment was favored by the committee.

To determine which delegates were entitled to vote, Secretary Thiem next reported for the credentials committee. The following were credited as voting delegates having fulfilled all the requirements necessary to that office: Guy Husted, Cass County; Theodore Stimpert, Woodford County; George Clark, McLean County; W. P. Miller, Brown County; F. M. Hastings, Marshall-Putnam County; Sam McClugage, Peoria County; L. R. Welk, Tazewell County; W. E. Foard, Bond County; J. D. Burns, DeWitt County; H. O. Tedford, Lawrence County; and W. A. Stevenson, Henderson County. Adams and Effingham counties, both of which were eligible to one delegate each, were not represented.

Counties Pay Up

This made a total of 11 accredited voting delegates representing 11 counties.

Following the reading of this list the following counties paid their dues and be came eligible to vote: Logan, Warren, Jefferson, and Morgan. Delegates accredited from these counties were as follows: J. H. Checkley, Logan County; Curtis Bates, Warren County; L. R. Caldwell of Jefferson County, and F. A. Fisher of Morgan County.

Amendment Adopted

After considerable sparring around it was moved and seconded that the recommendations of the committee on eligibility be accepted and that the first amendment proposed be incorporated into the constitution and by-laws. Roll call on this motion was asked for. the Counties voting in favor of the motion were as follows: Cass, McLean, Brown, Marshall-Putnam, Peoria, Tazewell, DeWitt, Henderson, Logan, and Warren; against the motion, Woodford, Bond, Lawrence, and Jefferson. The count showed 10 in favor, and four against. Inasmuch as only a two-thirds vote is required to amend the constitution, the amendment, therefore, was declared adopted.

A discussion now followed regarding the interpretation of the amendment. Several delegates voiced their opinions regarding the interpretation. After much deliberation it was moved by Tedford of Lawrence County that the word "dependent" be inserted before the word "member." The motion was seconded. A roll call vote on this question was obtained, resulting in seven votes in favor and only two against. The motion was declared carried.

How It Reads Now

The amendment as amended now reads as follows: "Any Farm Bureau member or dependent member of his family whose business is farming, provided said Farm Bureau membership shall be contracted for in the customary way, shall be eligible to play in this League. Said eligibility must be certified to by the directors or farm adviser from each county."

After a discussion regarding the time of opening the season, it was de-

(Continued on page 9)

Black Is New Director Dist. 20

Was Eight Years President of Morgan County Farm Bureau

CHARLES S. BLACK, recently elected to the I. A. A. Executive Committee from the 20th district, was born in 1869 on a farm in Morgan county near Jacksonville, Illinois. After finishing the elementary schools, he entered Brown's Business College at Jacksonville where he later graduated.

Chas. S. Black

Mr. Black and his two sons are farming 500 acres of land. He also superintends the farming of 600 additional acres. He has always taken an active part in all community enterprises. He served as school director for 26 consecutive years, and has held various offices in the Methodist Episcopal Church.

Eight Years President

Mr. Black helped organize the Morgan County Farm Bureau and served eight years as president. He was untiring in his efforts to make it a success. He was a charter director of The Farmers State Bank and Trust Company and is a vice-president of that institution at the present time. He is also affiliated with a number of fraternal orders, being a thirty-second degree Mason, a Shriner, and now Commander of Hospitaller Commandery, No. 31, Knights Templar. He also belongs to the Odd Fellows, Knights of Pythias, Anti-Horse Thief Association, and is a farmer member of the Rotary Club, Jacksonville.

Mr. Black is the first Morgan county man to be elected to the I. A. A. Executive Committee. He is the fifth representative on the I. A. A. Board from the 20th District. His predecessors were: Jos. R. Fulkerson, Jersey county; W. A. McNeill, Cass county; Earl C. Smith, Pike county, and Charles Borgelt, Mason county.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the farm bureau was organized, namely to promote, protect and represent the business, economic, social and educational interests of the farmers of Illinois and the nation, and to develop agriculture

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Edited by Department of Information, E. G. Thiem, Director, 608 South Dearborn Street, Chicago, Illinois. Entered as second-class matter October 20, 1925, at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Accepted for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the ILLINOIS AGRICULTURAL ASSOCIATION RECORD. A Good Bill

ILLINOIS farmers will be glad to learn that Senate Bill No. 1 now before the legislature is in line for passage at an early date. The welcome news that the measure was moved up to third reading in the House came just before going to press. The bill should become law within the next ten days.

This important piece of legislation, which the I. A. A. has supported vigorously, limits the bonding power of down-state taxing districts to 2½ per cent of the total full valuations of property therein. It spares downstate from a possible orgy of local indebtedness which no sane citizen or taxpayer wants to see.

The notorious revenue measure of the 55th General Assembly, which doubled valuations for tax extension purposes throughout Illinois, thereby doubled the debt-incurring powers of all taxing districts. Senate Bill No. 1 is intended to restore the old limitations placed in the Constitution of 1870 by its far-sighted farmers.

Tax relief is farm relief. Until farm prices are up to the American standard, farmers will insist on economy in government commensurate with that which they must practice at home.

Uses of Chain Broadcasting

AGRICULTURE is to have its place in national chain broadcasting. So says the National Broadcasting Company announcing our friend Frank Mullen as farm radio director, and the broadcast of the I. A. A. meeting at Rock Island as the inaugural feature of the new service. The chain expects to broadcast all important farm meetings and expositions. The announcement states that plans for daily agricultural service over the Middle West network are rapidly nearing completion.

The National Broadcasting Company can render a great service to agriculture by telling the truth about the industry. We hope there will be many dirt farmers scheduled on its programs. The farmer is not in so great need of advice and suggestions as he is of an opportunity to tell others what's wrong with his business and how it can be remedied. Sympathy alone will not help. A friendly helpful attitude toward his efforts at surplus crop control and price stabilization is needed from the farmers' town and city neighbors. The American people will respond when they are properly informed.

OTHER OPINIONS

AN ARGUMENT FOR STABILIZATION

WE remind the critics of farm relief legislation that the railroad industry of the United States was financially unstable and undependable as well as unfair in service from its beginning, and its master minds were unable to solve its difficulties, until powers of government were employed to exercise control, to establish financial stability and efficient service.

In like manner the banking business of the United States was subject to disastrous disturbances and panics to the hurt of all business, and its master minds were unable to solve its difficulties, until the powers of government were employed to exercise control of credit and currency.

Agriculture asks no more and will accept no less than the exercise of like powers of government to establish an agency of control of farm surpluses for the stabilization of values in common justice to producers and in promotion of a balanced and enduring national prosperity.

HON. CLARENCE OUSLEY.

FARMERS AND BONDING BILLS

It may seem that there can be little or no connection between the interests of the farmers of Illinois and the bonding power of the city of Chicago. But events of the past year have shown a near and vital connection between these two, as was pointed out by Earl C. Smith, president of the Illinois Agricultural association in his speech at Rock Island this week.

The last legislature passed a bill enabling Chicago to double its bonding limits. The same law was seen to affect the powers of every taxing unit in the state, and therefore might be used to greatly increase taxation against farm lands. In spite of a fight against legalizing this possible injustice to the farmers, proponents of the law sought to throw farmers a sop in the amendment to the Juul law. The latter, however, has just been invalidated by the supreme court, this leaving the way open for increased farm taxes unless some remedial legislation is taken. Therefore the state farm organization secured consent of the governor to include this subject in those for consideration at the present special session. The state farm organization is supporting a bill in this session which would confine bonding powers in all sections outside of Cook county to their former limits. Farmers are finding that eternal vigilance is the price of escaping death-dealing taxation.—Pantagraph (Bloomington).

Tune in on the I. A. A. 15 minutes program broadcast daily at 12:30 P. M. from station WJJD, Chicago (365 meters). The facilities of station WJJD are loaned the Association through the courtesy of the Loyal Order of Moose, Mooseheart, Ill. No program on Saturdays and Sundays.

Hears From Many

In a letter to a friend in Rock Island, Governor Adam McMullen of Nebraska, who made the keynote speech at the convention of the Illinois Agricultural Association at the Rock Island arsenal dining room last Friday afternoon, said: "I have received many letters relative to the broadcasting. They came from a number of states."

Dewitt C. Wing, Editor of the American Swineherd, Chicago, writes:

"From a personal friend of mine in Kansas, Miss Carol L. Martin at Lawrence, I received this on Jan. 22: 'We have been hearing some wonderfully good radio programs. One of the most interesting was the program of the Illinois Agricultural Association, following its luncheon on Friday. Governor McMullen's and Mr. Peek's brief talks were hard to answer, if they were not unanswerable. I'm still for the McNary-Haugen bill'."

Prominent Speakers Scheduled

Well known and interesting speakers from public life have spoken, or will speak on the I. A. A. daily radio program during the next few months.

Questions of unusual interest by men well qualified to speak on them will be covered in such talks.

The interest of farmers in matters of public policy and representation has never been greater than at the present time. The following schedule, part of which already has been fulfilled, is representative of what is to come hereafter. Write and tell us how the programs are coming in. Criticism and suggestions are always welcome.

TUNE IN SUNDAY NOON

Estimated receipts of livestock on the Monday market at the U. S. Yards, Chicago, will be broadcast each Sunday between 1:00 and 1:30 p. m., from Station WJJD, Mooseheart. The Chicago Producers furnish the information.

Monday, Feb. 13, 12:30 P. M.
"Ole" Olson from North Dakota, the humorous Swede.

Tuesday, Feb. 14
"What Farmers Ought to Know About Rural Electrification," by Paul Kuhn, Chicago, member Illinois Commerce Commission.

Wednesday, Feb. 15
"The I. A. A.'s interest in Rural Electrification," by L. J. Gussey, director of transportation.

Thursday, Feb. 16
"The Work of the Grain Futures Administration," by L. A. Fitz, director, Chicago.

Friday, Feb. 17
"Out of the Smokehouse," by DeWitt C. Wing, editor, American Swineherd.

Monday, Feb. 20
"Crime and Law Enforcement," by Hinton G. Clabaugh, chairman, Illinois Parole Board.

Tuesday, Feb. 21
"Why Farmers Must Be Organized," by Geo. E. Metzger, director of organization.

Thursday, Feb. 23
"What Farmers Ought to Know About Wild Game," by Seth E. Gordon, Izaak Walton League of America.

The purchase of a system of amplifiers or loud speakers to be used at future I. A. A. and Farm Bureau picnics was considered at the recent meeting of the I. A. A. Executive Committee.

Business Services of I. A. A. Are Discussed

Accounting, Insurance and Farm Supplies Considered in Rock Island Conference

(Note: Following is the report of the Conference on Financial Business Service held on Jan. 19 at Rock Island.)

THE meeting was called to order by Mr. Tullock, chairman of the Advisory Committee on Financial Business Service. He stated that the purpose of the meeting was to afford an opportunity for the Association to get the best thought and opinion of the members present.

Geo. F. Tullock

Accounting Up First

The presentation of the topics announced in the program was made in the form of a paper, in which was suggested the necessity for better Farm Bureau accounting and the desirability of having the accounts periodically audited by disinterested parties. The presentation of the topics led to an outline of the preparation of Farm Bureau budgets estimating income and expense for the ensuing year. Multigraph statements of income and expense of three unidentified county Farm Bureaus, covering periods of three years, were presented as examples of the methods employed in preparing a budget.

There was no discussion. No expression or recommendation was made by the conference.

Phosphate and Limestone

During the eight years of the activities of the Phosphate and Limestone Department, the work has been in a state of continual evolution and improvement. During the last year a number of suggestions and criticisms aimed at ways and means of making this work more effective and valuable, have come from various sections of the state and it now seems desirable to give an opportunity for the fullest possible expression of views, suggestions and criticisms, by each and all of the counties concerned. Rather than attempt to cover this subject in an exhaustive way in the group conference, this afternoon, the conference seemed to approve of the department's own suggestions that a series of seven (7) district conferences be held in the near future to discuss more thoroughly this work. Each of these districts will select one representative to attend a final meeting at the Illinois Agricultural Association office at Chicago for conference with members of the administration and the Financial Business Advisory Committee and the Department Director in an effort to make such improvements and additions to the work as may seem feasible and prudent and will harmonize the needs of the various districts in a uniform state-wide policy.

Farm Bureau Supply Companies

The organization of county supply and service companies, was explained in general terms and also the organization of the Illinois Farm Supply Company and its relation to the county units.

A number of questions were asked regarding the problems of organization. Considerable interest was shown by delegates representing counties in which companies of this character are under consideration or in some stage of organization.

Due to the fact that supply companies have been organized in 21 counties, the plan of organization and the experience of operating companies was apparently well known. The discussion was limited to questions of an informational character and no recommendations were made by the conference.

Insurance Explained

Automobile Insurance. An explanation was given of the new schedule adopted by the board of directors of the Illinois Agricultural Mutual Insurance Company.

Class 1—Fire, Theft, Collision, Public Liability and Property Damage $25.

Class 2—Fire, Theft, Public Liability, and Property Damage $25.

Class 3—Public Liability and Property Damage $15.

Class 4—Fire, Theft $15.

In Class 3 and 4, contribution to surplus is $5, or one-half of surplus share and also premium deposit is reduced to $5.

Windstorm, tornado and hail coverage will be made effective on all policies Feb. 1, unless indication is made that such coverage is not desired. There will be no additional initial cost for this coverage. Coverage was added on spare tires that are locked, for those electing same, with no additional initial cost. Collision coverage with any immovable object including accidental up-set was added with an additional premium deposit of $10. The above schedule applies to pleasure cars and farm trucks.

Fire, Lightning, and Hail Insurance

It was explained that the Farmers Mutual Reinsurance Company, which was organized by the State Association of Mutual Insurance Companies in cooperation with the Illinois Agricultural Association, was furnishing the following forms of insurance service on a mutual basis: Direct insurance, specific reinsurance, recession reinsurance, blanket reinsurance, farm crop hail insurance, and fruit and garden truck hail insurance. The farm crop hail insurance was furnished at a cost of $22 per $1,000, both in 1926 and 1927, which was a saving of at least $8 per $1,000 over what the same

(Continued on page 9)

Bargaining Power Object of Cooperation

Marketing Conference Report Shows Great Interest in Mass Selling

(Note: Following is a summary of the Marketing Conference held Jan. 19 during the recent convention of the Illinois Agricultural Association at Rock Island.)

DAIRY farmers in Illinois can add $8,000,000 annually to their income by merchandising their milk in a more correlated manner. Markets that are already organized have a problem of extending cooperation to their neighbors so that they will not compete against one another but co-operate with one another.

Samuel Sorrells

The Dairy Department reported that a move was already underway to work out a state plan on a fundamentally sound basis to bring about better co-operation in selling, a better knowledge of markets on the part of associations already established, and the further organization of markets not yet organized—all yielding increased prices to the producers of milk.

Produce Marketing

Illinois has a produce marketing problem valued at $75,000,000. The commodities include cream, poultry and eggs. In solving the marketing problem of these commodities it is being done by organizing units made up of approximately 125 members around a trading point. At present twelve counties have associations now marketing and that many more counties are organizing.

The advantage to be gained through such associations is through the bargaining power gained in selling volume, the farmers weighing and testing their own products as they are sold, production of quality and the knowledge gained through the co-operative effort of these units, which will lead to a more comprehensive plan of marketing produce. We are finding out that this method of marketing not only is proving beneficial to the farmer, but is also meeting with favor on the part of our present commercial marketing institutions, with which we make contact.

Fruit and Vegetable Marketing

The extent of the fruit and vegetable industry is not generally known throughout the state. Seventy-one counties shipped fruits and vegetables in carlots. The total shipments in 1926, according to figures supplied by the Illinois Department of Agriculture, aggregated approximately 13,000 cars. The 1927 figures are not yet available.

The big problem in marketing fruits and vegetables is to reduce the high cost between the producer and the consumer. The principal item of these is freight, which through the assistance of the Transportation Department of the Illinois Agricultural Association has shown a saving to the fruit growers of Illinois of practically $130,000 a year.

The increased buying power of large distributing organizations for perishable products is becoming greater very rapidly and it is becoming more and more necessary each year that the fruit growers cooperate in a mass selling campaign to meet this restricted buying of these products.

Grain Marketing

The treasurer of the association at the request of the president, during the year, has made a study of the grain marketing situation with particular reference to opportunity that seems to be offered the association to develop or assist in the development of a marketing plan for grain. This conference is advised that the treasurer has filed with the executive committee of the Association his report on the subpect. The report with certain proposals embodied in it has been offered to the executive committee, for study, and is under consideration at this time by that body, and therefore is not offered here.

The association has made a particular study of certain limitations and impediments that seem particularly to hamper the development of cooperative marketing of grain, with a view to suggesting to other organizations ways and means to foster and supplement it through its formative stages, and until its merit shall have been demonstrated and proven to growers.

In this connection it may be pointed out that the co-operative marketing movement in Denmark has developed and succeeded largely through the efforts of government in its intensive educational work. The same may be said of co-operative marketing of wheat in Canada, in which instance the government, in effect, conducted a demonstration, during the war years, through its compulsory grain pool. Previously, certain provinces in Canada had substantially aided financially and otherwise in the building of numbers of farmers' elevators for growers. These cases are merely cited as examples and in general support of the thought of the association—to be left with the conference.

It was the sense of the meeting that the Illinois Agricultural Association should employ a director of grain marketing to devote his full time to this important marketing project.

Live Stock Marketing

There are approximately 500 livestock shipping associations in Illinois, 95 Farm Bureaus, four great terminal cooperative selling agencies and approximately 60,000 Farm Bureau members.

The principal aim of the livestock marketing program of the Illinois Agricultural Association is the coördinate the efforts of all of these agencies and individuals on one program with one object. In carrying out this program we have presented to each Farm Bureau the advisability of making livestock marketing a major project. In cooperation with the co-operative agencies on the terminal markets, arrangements have been made for pushing aggressively the livestock marketing program in 77 counties of the 95 organized Farm Bureau counties of the state.

The principal problems which we have to overcome in furthering this program are, first, the indifference of the individual farmer as to the importance of studying his livestock marketing problem in the same way that he has studied his production problem. Our second difficulty lies in the lack of information which the great mass of individual farmers have as to what has already been accomplished in the co-operative marketing of livestock. Our third problem is to bring about the united effort of all the agencies mentioned. Our fourth problem is to bring about a proper conception of the true place of our co-operative shipping associations in a broad livestock marketing program. A shipping association is only a shipping association and these associations can never achieve mass selling unless they consolidate their efforts on the terminal markets.

Summary

Summarizing the activities of the entire marketing department of the Illinois Agricultural Association and its different departments special attention should be paid to a central theme which is fundamental in every report. Mr. Lynch calls attention to the necessity of mass selling of milk in the different milk sheds of the state to avoid competition between these same milk sheds. Mr. Gougler in his report illustrates the progress which has been made in consolidating the selling of cream, eggs and poultry through organizations instead of by individual producers. Mr. Leeper has illustrated the effect of the mass selling of fruits and vegetables to meet the mass buying of these same products. In grain marketing the same problem is apparent. In the last analysis the whole marketing problem revolves around the necessity for giving to the producer a bargaining power in order that he may meet with mass selling the mass buying with which he is confronted on the other side.

The meeting further was of the opinion that, if possible, more time should be allotted to the marketing conference so each commodity might have fuller consideration.

Respectfully submitted,

SAMUEL SORRELLS,
Chairman Marketing Committee.

Do Business Projects Aid Large Membership?

Yes, Say Records. Advisers Tell How They Keep Members Informed

(Note: Following is the report of the Organization and Information Conference held on Jan. 19, at Rock Island.)

IN THE Organization Section of the Conference conducted in the ball room of the New Harper Hotel on Jan. 18 at Rock Island the discussion took an instructional turn rather than one of definite recommendations.

C. E. Bamborough

Discussions were limited to three topics:

1. Discussion of the Program of Work and Its Effect on Membership Maintenance.
2. Who Should be Members.
3. The General Discussion of the Continuous Membership Agreement.

Early in the conference, it developed that there are three general types of county Farm Bureau programs prevailing among the Bureaus of the state. They are as follows:

1. Those county programs heavily loaded with projects of a commercial nature.

The Bureaus following this type of program have rather generally shown increases in their membership. In all cases, however, they strongly emphasize the establishment of differentials in some way or another, so that Farm Bureau members may be favored over the non-member.

Educational Projects Good

2. The second class of county programs with a large majority of educational projects and little or no commercial work.

The thought was advanced that this type of program tends to increase and maintain membership, if the administration is such as to keep a great number of members busy and carrying responsibility. It calls for a highly organized system of committees and leaders widely scattered over the county.

3. The third type of program seems to be a more evenly balanced type containing both educational and commercial projects. The thought developed was that this type of program appeals to a larger percentage of farmers than the highly educational, or the highly commercialized type of program. It was recognized, however, that conditions vary in different counties, and in different communities, and that a careful study of local conditions should govern the type of program which Farm Bureaus should carry.

Who Should Be Members

The second general topic under discussion was "Who Should be Members."

Discussion showed that in some counties anybody who is interested in agriculture is permitted to join. Others follow the policy of making a more or less careful selection of the prospects, thus tending toward a selected membership. There seemed to be quite a division of thought on this matter. Several things, however, of importance were brought out in the discussion.

Joint Memberships

The joint membership agreement as it now prevails in most counties between father and son, landlord and tenant or partners in the farming business was given the most consideration. It was pointed out that this joint membership agreement will be a greater obstacle in the future than it has been in the past with commercial activities developing, through which Farm Bureau members are favored by dividends of one kind or another. It is difficult to determine just who should get dividends from some sort of commercial venture, or who should be entitled to serve in case a project is confined to members only.

Several representatives of county Farm Bureaus who spoke on this particular subject urged that the tendency should be toward limiting membership to the individual rather than accepting partnership of father and son, or landlord and tenant on a joint agreement.

Continuous Membership

From this subject the discussion drifted to the continuous membership contract now in use in several counties. Several men representing Bureaus using this contract reported very favorably on it. There seemed to be no difficulty expressed from counties using this type of contract in the matter of collection. They all reported that it seemed to them that this agreement would tend to cut the cost of membership maintenance. The present policy of the Illinois Agricultural Association is to encourage the use of the continuous membership agreement, but allow the counties to decide between this type of agreement and the straight three-year form commonly in use over the state.

No definite recommendations were made in the organization branch of this section of the meeting.

Collection Section

The treasurer of the Association introduced to the meeting Mr. Welk of Tazewell county, Mr. Quisenberry of the Mid-West Claims and Adjustment Service. The two services were stated by the treasurer to cover the field of Farm Bureau membership collections. The character of the service rendered by Mr. Welk had fully demonstrated its beneficial application to cases in arrears where personal service seemed to be indicated. The service offered by Mid-West Claims and Adjustment Service had demonstrated its effectiveness, particularly in its application to cases where payment was deliberately evaded and refused. In McLean county, where the Farm Bureau cooperated fully, out of an accumulation of old items, some $6,800 had been recovered, in a complete clean-up of all past due items remaining unpaid; after so-called "collection services" and "commercial lawyers" had failed.

Mr. Welk and Mr. Quisenberry addressed the conference briefly, relating their experiences and describing the respective services.

Advisers Talk Publicity

The discussion of publicity was confined to two topics, namely:

1. Outstanding publicity projects.
2. Legitimate newspaper publicity, and reaching the non-member.

Farm Advisers Kercher of Vermilion county and Foard of Bond county discussed the value of outstanding projects in placing the name of the county Farm Bureau before the farmers and general public of the county in a favorable light.

A 30,000 acre alfalfa campaign in Vermilion county, and how it succeeded in gaining the attention of farmers and the public through newspaper publicity, was outlined as an example of this type of project. Mr. Foard presented information regarding the publicity value of his limestone-legume project.

How To Succeed

It was generally agreed that the successful county Farm Bureau must give considerable attention to the selection of at least one or more projects that serve to add prestige to the county organization and place its name favorably before both farmers and city people, through the publicity it or they gain for the county organization.

Getting acquainted with the editors, cooperating with reporters and press representatives, and keeping the members informed through interesting articles in the official organ about the activities of the Farm Bureau were recommended as essential to an adequate publicity program.

Other Advisers Speak

The subject of reaching the non-member through newspaper and other publicity was discussed by Farm Advisers Whisenand of Henry county, Lloyd of Hancock county, Shaw of Peoria county, and Checkley of Logan county.

The important points revealed by the discussion of this question were that:

1. Publicity should be made a major project in every Farm Bureau program.
2. Regular releases to the daily and weekly newspapers of the county concerning Farm Bureau activities are needed to acquaint the non-member with the program, and influence him to become a member.
3. Community meetings, particularly in the summer time, are valu-

(Continued on page 10)

Public Questions Before I. A. A. Conference

(Continued from page 1)

that the Illinois Agricultural Association call upon the representatives of Illinois in congress that they support legislation that would look to the full control of a flood relief program by the National Government and on a basis of cost that would be met by the National Government.

Taxation Discussed

Under Taxation two topics were discussed:

First: The gasoline tax law and the use of the funds derived therefrom.

Second: General taxation problems, and in particular, orders of reassessment in certain counties of the state.

Under the first heading, many questions were asked and the answers thereto were discussed relative to the use of gasoline tax funds in the improvement of the secondary roads. Apparently there is some difference of opinion about the powers of the State Division of Highway under the gasoline tax law. It seems to be held in some counties of the state that the State Division of Highways will approve only of the use of concrete in the improvement of the secondary roads. It was pointed out that this was not the intention of the sponsors of the gasoline tax law and that there is nothing in the law itself that seems to warrant such a view. The position of the Illinois Agricultural Association was stated to be that the county boards had the right to determine both the roads which would be improved with gasoline tax funds and the type of improvement which would be made. It was agreed that whatever the type of improvement it must be approved by the State Division of Highways if the improvement is of such type as to require the state to assume the entire cost of maintenance.

Consider Proposed Attacks

There was some discussion also about contemplated attacks on the gasoline tax law for the purpose of diverting a portion of the funds from the counties to the municipalities of the state. There seemed to be a unanimous agreement that any such attacks upon the distribution of the funds in the next general assembly should be resisted.

It was urged that the county Farm Bureaus should carefully consider a constructive program in each county for the most efficient utilization of the gasoline tax moneys. It was urged also that no project for the issue of bonds for the improvement of the secondary roads to be repaid from gasoline tax funds should be contemplated at least until the gasoline tax law has been successfully maintained in the next regular session of the general assembly.

Gas Tax Administration

There were numerous other questions relating to the administration of the gasoline tax law and to refunds of the tax on gasoline used for other than the operation of most vehicles on the public highways.

There was some sentiment expressed to the effect that the gasoline tax should serve to replace the county highway tax and thereby be made a lieu tax, and also to the effect that the gasoline tax moneys should be used not only for improvement but also for the maintenance of the State aid roads. However, neither of these views seemed to receive much approval.

Wm. H. Malone Present

General problems of taxation were discussed chiefly by the Honorable Wm. H. Malone, chairman of the Illinois Tax Commission. Mr. Malone referred to the orders of re-assessment which have been issued in certain counties of the state, and to the numerous efforts by political pressure to have such orders rescinded. He declared the policy of the Tax Commission to be the enforcement of the law on the basis of the facts in each case regardless of pressure for political or other reasons.

Mr. Malone also pointed out the necessity of organized effort by agriculture if the farmers of the state are to receive a fair deal in taxation.

Transportation Problems Up

The chairman briefly outlined the services of the Transportation Department and particularly mentioned its work before the Illinois Commerce Commission.

The questions asked by many demonstrated that there are numerous problems confronting our members on electrification and telephone matters.

Rural electrification particularly requires proper information and assistance to those interested in order that the best service can be secured for the least money.

Super-power Lines Coming

Organization of committees is also recommended in connection with super-power right of ways. The results obtained in a substantial number of cases involving the re-location of routes for super-power lines bear testimony to the benefits to be derived from concerted action by land owners.

The position taken by the Association has been that these huge steel tower lines shall be routed in such a way as will result in the least possible detriment to agricultural lands.

The conference was informed regarding the efforts of the Association in seeking reductions and prevention of increases in freight rates on farm products. Particular reference was made to the proceedings before the Interstate Commerce Commission in regard to the Hoch-Smith resolution.

The program of service as now carried on by the Department in the three general divisions; namely, telephone rates and service, rural light and power problems and transportation was enthusiastically approved by conference.

Respectfully submitted,
F. D. BARTON,
Chairman, Public Relations Committee.

Auto Insurance Co. Offers New Coverage

Protection Against Spare Tire Thieves, Windstorms, Etc., Added

NEW forms of auto insurance were added to the coverages already existent as result of action taken at the recent meeting of the Illinois Agricultural Mutual Insurance Company.

Theft of spare tires, tubes, rims and wheels, when locked to the car will now be covered at the request of the owner. There is no additional initial cost for the new coverage. The insured simply pays his share of losses and expenses. This new insurance is written with classes having theft coverage. Spare tires, etc., are covered under the regular policy when the car is stolen. The above coverage is optional and will be given on application.

Windstorm, tornado, cyclone, and hail coverage, after February 1, will be included on all policies issued, unless it is indicated by the insured that it is not desired. There is no additional initial payment. The insured simply pays for his share of carrying such coverage. The above coverage is included along with fire and theft coverage.

Stationary object collision (of which it is necessary to have 300 applications) provides collision coverage with any object including accidental upset. The premium deposit for this coverage is $10. The insured simply pays his share of losses and expenses for this coverage.

New Schedule of Rates

The following new schedule of rates was adopted by the Board of Directors at the annual meeting of the company:

Class I. Public Liability, Property Damage, Collision, Fire and Theft $25
Class II. Public Liability, Property Damage, Fire and Theft $25
Class III. Public Liability and Property Damage $15
Class IV. Fire and Theft $15

In all above classes, in case the insured cancels out, all but $5 is returned to him.

"Your own company and insurance at cost" is the slogan of the company.

Stationary Object Collision Coverage

Enroll me as a charter member for stationary object collision coverage. It is understood I will be notified when this will be made effective.

Chicago, Ill.

Welk and Snyder New Heads Baseball League

(Continued from page 3)

cided that this matter be left to the county directors and district chairmen. It was the general opinion that the time of opening the season be deferred to meet the convenience of the majority of the League members.

Defer Annual Clash

J. H. Checkley of Logan County suggested that the annual state championship game be deferred until the latter part of August. This suggestion seemed to meet with the approval of the delegates and members present.

Mr. Husted reported for the nominating committee as follows: For president of the League in 1928, L. R. Welk, Morton, Tazewell County, and for vice-president, Wayne Snyder, Versailles, Brown County.

It was moved and seconded that the report of the nominating committee be accepted as read. Carried.

Southern Illinois Speaks

Delegates from the Southern Illinois Division expressed their interest in dividing the Division in half to eliminate long drives and to make it more convenient for playing off inter-county schedules. This matter was left for the consideration of the Executive Committee with the understanding that something would be done toward meeting the objections to the present arrangement.

Arthur Kraushaar, Warsaw, Hancock county, reported that an effort would be made to enter a team from Hancock County in 1928. H. K. Danforth, assistant farm adviser, made a similar report for Henry County. E. W. Runkle of Macomb, stated that McDonough County planned to come into the League with a team. C. J. Thomas, farm adviser of Jackson County, and W. H. Lyon, Prophetstown, Whiteside County, both stated that they hoped to bring out teams from these counties in the coming season.

It was decided to leave the appointment of a league arbitrator or commissioner to the board of directors.

The meeting adjourned at 11:30 a. m.

Respectfully submitted,
E. G. THIEM, Sec'y-Treas.

Bids Asked For Serum And Virus

BIDS for 35,000,000 c. c. or more of anti-hog-cholera serum and virus for the 60 counties holding membership in the Illinois Farm Bureau Serum Association have been requested from more than 20 corn belt serum companies.

Last year, the Association purchased upwards of 35,000,000 c. c. of serum at an estimated saving of $225,000 over former prices which ruled before farmers used their collective buying power.

Business Services of I. A. A. Are Discussed

(Continued from page 5)

kind of insurance could have been secured elsewhere. The basis of settlement on fruit and garden truck insurance, has been changed to percentage or so-called acre basis. This will be on the same basis as farm crop hail insurance.

Farm Bureaus cooperated in observing Fire Prevention Week. Explanation was made that DeWitt county in cooperation with the DeWitt County Fire Insurance Company, formulated plans whereby every Farm Bureau member's property was inspected in order to prevent fire.

Life Insurance

A report with recommendations relative to a life insurance program for the Illinois Agricultural Association from the Executive Committee of the Association was presented to the conference. This report and recommendation suggested the advisability of the Illinois Agricultural Association organizing a legal reserve life insurance company that would furnish low net cost insurance to Farm Bureau members, providing the interest of the members in attendance at this annual meeting would justify the entry of the association in this field of activity.

An explanation of the report and the recommendation of the Executive Committee were presented to the conference by a member of the staff of the Association and an extended discussion was had in reference to this matter. The following recommendation was made by the confeernce for your consideration. The recommendation is as follows:

That the voting delegates in the annual meeting assembled suggest to the Executive Committee of the Association that a detailed argument and brief be prepared by the Executive Committee setting forth the advantages and disadvantages that the Association might have in organizing a legal reserve life insurance company, owned and controlled by it, wherein life insurance might be furnished to members of the Illinois Agricultural Association and others with differentials to the advantage of Farm Bureau members.

Argument and brief should be submitted to the Executive Committees of the county Farm Bureaus for their consideration and if there should be favorable consideration of the program by at least 75* per cent of the county Farm Bureaus in the state, endorsing such program, that the Executive Committee proceed to carry out the recommendations presented by it to this annual meeting.

Respectfully submitted,
GEO. F. TULLOCK, Chairman.

(Note: The necessary percentage vote to launch a life insurance program was changed from 75 to 60 per cent of the counties by vote at the adjourned insurance meeting on Friday morning.)

Committees to Meet Plan 1928 Program

MEETING dates for the four I. A. A. advisory committees that plan and counsel with the departmental staffs in carrying on the work of the Association were announced at the last meeting of the Executive Committee as follows:

Organization and Information, Feb. 21.

Marketing, Feb. 22.

Public Relations, Feb. 24.

Financial Business Service, March 7.

All of the meetings will be held in the offices of the I. A. A. at 608 So. Dearborn St., Chicago.

Serum Association Plans for 1928 Campaign

(Continued from page 2)

Lloyd that nominations close and that the secretary cast unanimous ballot for O. B. Goble. Carried.

Sam Sorrells nominated by R. A. Norrish as vice-president. Motion by J. H. Lloyd and seconded, that the secretary cast a unanimous ballot for Sam Sorrells as vice-president. Carried.

Ray E. Miller nominated for secretary-treasurer. Motion properly made and seconded that unanimous ballot be cast for Ray E. Miller as secretary-treasurer. Carried.

Motion made and seconded that officers act as executive committee for ensuing year. Carried.

Arrangements for meeting of the board of directors on February 11th or 13th at the offices of the Illinois Agricultural Association at 8:30 a. m., or some other satisfactory date.

Meeting adjourned.

RAY E. MILLER, Sec'y-Treas.

Resolutions were adopted at the Association meeting asking the Serum Committee and secretary to investigate the use of clear, concentrated serum, to send out publicity material on vaccination to the counties to promote greater efficiency, and to urge all counties to work in close harmony on the program of the organization.

Frank O. Lowden, for president, was endorsed by the legislative committee of the Farm Bureaus in the 19th congressional district. When a resolution to this effect was presented to the Republican Central Committee in meeting at Decatur the same day, the Republican organization likewise endorsed Mr. Lowden.

Three carloads of limestone will be given away to patrons of the Farmers' State Bank, Carlock, Ill., who show the most improvement in growing legumes in 1928. "The McLean County Farm Bureau will supervise the contest and the selection of judges," writes Senator Simon E. Lantz. "I believe the banks of Illinois should get behind such projects as this," he says.

Do Business Projects Aid Large Membership?

(Continued from page 7)

able in selling the Farm Bureau program and reaching both members and non-members.

4. Co-operating with the shipping associations and other local organizations by furnishing speakers for annual meetings and aiding them wherever possible advertises the Farm Bureau, and wins friends among the members of such organizations.

5. A live, newsy official organ that is read by the membership is an asset in holding members.

6. Short, snappy personals and news of a local nature playing up local people but all linked up with the Farm Bureau are most effective in getting the attention of the press.

In the general summary it was pointed out that the great opportunity and the big job of the Farm Bureau is to sell its story and its program to the people of our towns and cities as well as to farmers; that the public must be informed and its sympathy and help won if the farmer is to gain the rightful place he should occupy in the economic life of the nation.

New I. A. A. Committee Holds First Meeting

(Continued from page 1)

ing power of downstate taxing districts to 2½ per cent of the assessed valuations therein, had passed the Senate and was on second reading in the House. (Subsequently the bill passed to third reading in the House.) Mr. Barton stated that the measure was passed in the Senate as originally drafted except that the emergency clause had been removed to eliminate considerable opposition and secure its passage. President Smith supplemented the report with additional information, and then reviewed the legislative situation in Washington with reference to the new McNary and Haugen bills as heretofore presented.

The belief was expressed that the entire downstate delegation in Congress would vote for the surplus control measure when it came before the session again.

District Conferences

After considerable discussion on the question of I. A. A. District Conferences, Whisnand moved that Executive Committeemen be authorized and directed to hold at least two meetings, and a third if desired, in their respective districts, during the coming year, expenses of the Committeemen to be paid by the Association. Seconded by Black. Carried.

The President suggested that such district conferences should be open to members from adjoining districts. It was agreed that the Farm Bureaus composing the various districts should feel free to hold as many meetings as seemed necessary but that the I. A. A. should participate officially in not more than three a year.

Farm Bureau Picnics

Moved by Barton that the proposal to hold a giant Farm Bureau and I. A. A. picnic in each congressional district in 1928 be submitted to the members for approval in the various district conferences. Second by Marshall. Carried.

It was decided to defer selection of the 1929 convention city until the May meeting.

Treasurer R. A. Cowles offered the report of the Home and Community Conference at the request of Mrs. A. R. Wright of Varna. He also read a letter from Mrs. Homer Johnson, president of the Illinois Home Bureau Federation, expressing the desire of the Federation to work with the I. A. A. on matters of mutual interest.

The women's conference report showed that 22 counties were represented, Rock Island having the largest delegation with 45 present. One hundred and twenty registered.

Holmberg Speaks

N. J. Holmberg, commissioner of agriculture for the State of Minnesota, appeared before the Committee while enroute for home from Washington and reported on the latest developments on farm relief legislation.

The Committee decided unanimously to renew the membership of the I. A. A. in the Chicago Association of Commerce for the benefit and use of the Illinois Agricultural Association.

Mr. Tullock reported that after full conference with the President and director of the Phosphate-Limestone Department it seemed advisable to hold a series of district conferences throughout the state with Farm Bureau representatives "to fully air all suggestions and criticisms and to develop ways in which the work of the Department, particularly as regards limestone, may be strengthened and improved."

Mr. Cowles Appointed

Various plans of contract and procedure will be presented at the conferences and the one which meets with greatest approval will be followed.

R. A. Cowles was appointed treasurer of the Illinois Agricultural Co-operatives Association, and directed to discharge duties of secretary until further recommendation from the Committee.

Executive Committeemen were authorized to attend one board or annual meeting per year of each County Farm Bureau in their respective districts with per diem allowed, excluding therefrom meetings of committeeman's own county organization. Motion was carried unanimously.

The county is not liable for the death of livestock resulting from the application of the tuberculin test by the county veterinarian, according to a recent decision of Attorney General Oscar Carlstrom.

Mt. Carroll Co-op Creamery Ace High

Leads State In Price Paid For Butterfat

THE Mt. Carroll Co-operative Creamery Co., in Carroll county, smashed all records on price paid for butterfat in 1927 according to the Company's report as of Dec. 31, 1927.

Patrons were paid an average price of 50.92 cents per pound for butterfat which is 5½ cents higher than the 92 score Chicago butter price. Gross receipts for the year amounted to $231,351.32 and gross expenditures were $227,299.47. Of these expenditures $209,346.15 was paid for cream, poultry and eggs, leaving a balance of $17,953.32 for operating expenses. The cost of manufacturing the butter was slightly less than 3½ cents per pound.

A dividend of 10 per cent was paid on creamery stock and a patronage dividend of 1c per pound was paid for butterfat delivered during the year.

Ralph and Verne Kaufman led in the amount of butterfat delivered with a total of 5,722 pounds.

The Elizabeth Co-operative Creamery in Jo Daviess county was second high among the four co-operatives with an average price paid patrons for butterfat of 49.7 cents. The Galena Co-operative paid 47.2 cents, and the Freeport creamery 45.2 cents.

A. D. Lynch, dairy marketing director, points to the fact that before the co-operatives were organized, dairymen in this section of the state were selling their cream at prices ranging from three to five cents under the 90 score butter market at Chicago whereas now, through co-operation, they are receiving from one to six cents more.

During 1927, old line cream station buyers bought butterfat at prices ranging from one to four cents under the 90 score Chicago market. Members of co-operative cream shipping associations, on the other hand, received 90 score price to one cent higher plus a patronage refund varying from one to 2½ cents per lb.

I. A. C. A. Has Busy Month In January

FIFTY-SIX reports were received and 55 were completed during the month of January by the Illinois Agricultural Co-operatives Association.

During the month of December, 1927, there were 34 reports received at the Chicago office and 27 completed. This makes a total of 83 audit reports completed during the past two months.

These are the yearly audit reports of the 227 member co-operatives in the State Co-operatives Association. During January, it required 2.4 days per audit job. Average typing time was 1.3 days per report. An average of 2 2 reports were completed per day.

The next meeting of the I. A. A. Executive Committee will be held at Chicago on March 9.

Limestone-Phosphate Meetings Under Way

A SERIES of district conferences to discuss contracts and policies regarding the collective buying of phosphate and limestone opened recently with the first in Chicago on Tuesday, Feb. 7. Similar conferences have been or will be held as follows:

Dixon, Friday, Feb. 10, 1:00 p. m.

Peoria, Monday, Feb. 13, 1:30 p. m.

Champaign, Tuesday, Feb. 14, 1:00 p. m.

Jacksonville, Thursday, Feb. 16, 1:00 p. m.

Centralia, Tuesday, Feb. 21, 10:00 a. m.

Carbondale, Wednesday, Feb. 22, 1:00 p. m.

Farm advisers and Farm Bureau presidents or representatives of the various county organizations in each section will meet with Illinois Agricultural Association representatives at these meetings to iron out any misunderstandings regarding the program of the I. A. A. phosphate-limestone department.

It is hoped that these conferences may lead to a uniform state-wide plan, which will be most helpful and serviceable in buying limestone and rock phosphate for Farm Bureau members.

The final state-wide delegate meeting will be held in Chicago on Friday, Feb. 24, at 10:00 a. m.

Cut Tax Values In Southern Illinois

REDUCTIONS ranging from 10 to 20 per cent were made recently in land valuations for state tax purposes in the counties of Bond, Clay, Cumberland, Edwards, Gallatin, Pulaski, Randolph, Richland, Johnson, and Wabash. The latter two counties each received a reduction in land values of 20 per cent; the three preceding, of 15 per cent, and the rest 10 per cent.

The order of the Commission followed information brought to light by the Illinois Agricultural Association showing a wide discrepancy in valuations in the Southern Illinois area compared with other sections of the state.

Explaining the action of the Commission Mr. Malone said: "An investigation of the Commission disclosed the fact that farm lands in these counties were carrying much more than their share of the tax burden and the reduction was ordered for the purpose of equalization. The farmers in general throughout the state are facing a condition demanding the attention of the Government. The purchasing power of the farmers' dollar was probably never lower than today, and the price of his products certainly does not compensate for the labor and cost of production."

Wm. H. Malone Says Farm Taxes Too High

Compliments I. A. A. Officials On Farm Radio Program

"FARMERS are carrying more than their just share of taxes," said William H. Malone, chairman of the Illinois Tax Commission, in a radio address on the Illinois Agricultural Association program, Friday, Feb. 3.

Wm. H. Malone

"In equalizing taxes in the State of Illinois we are endeavoring to do the right thing, not the expedient thing," he said. "Equalization is always a large problem. It has been so in the past. It is doubtful if we ever can please everyone. There is more room and justification for a general clean-up of the tax situation in Cook county than in any other." He stated that in this county the Board of Review had failed to comply with the law in publishing the tax lists of assessments, and was ordered to do so by the Commission. "Publicity will do more than any other thing," he said, "to correct the evils of tax assessments."

Mr. Malone paid a high tribute to President Earl C. Smith, John C. Watson, and Donald Kirkpatrick for their conscientious work in bringing to light tax inequalities in behalf of the farmers of Illinois.

LaSalle County Seeks Fair Tax Assessment

THE LaSalle County Farm Bureau and the Illinois Agricultural Association are cooperating to secure an equalization of tax valuation in that county.

The LaSalle County Board of Review's own figures show that farm lands are assessed at 36.57 per cent of their fair sales value, whereas valuations in the cities of LaSalle, Oglesby, Ottawa, Peru, and Streator range from only 21.96 per cent to 28.14 per cent of their fair sales value.

To equalize valuations will require an average increase of 50 per cent in LaSalle, 30 per cent in Oglesby, 54.83 per cent in Ottawa, 66.53 per cent in Peru, and 46.39 per cent in Streator.

Valuations in Mendota, Marseilles, and the villages of the county, on the other hand, were even higher than the average for farm lands. To equalize in these cities will require a reduction of 7.93 per cent in Marseilles, 4.79 per cent in Mendota, and 15.87 per cent in the villages of the county.

It is hoped that the Board of Review will take the necessary action so it will be unnecessary to appeal to the Illinois Tax Commission.

I. A. A. Represented At Freight Rate Hearing

A LIVESTOCK freight rate hearing before the Interstate Commerce Commission provided under the Hoch-Smith Resolution has been in progress in Chicago for the past two weeks.

The Hoch-Smith Resolution provides that there shall be no increase in rates during the agricultural depression. The hearing is being held by the Commission in compliance with the law to determine what changes if any are justified according to the present economic status of agriculture.

The carriers have been putting in evidence to show that livestock farmers are now making money, hence that rates on livestock should be increased. Successful cattle growers from the west have been testifying to the effect that they made money in 1927. A prominent cattle man, A. J. Abbott, from the Sand Hills of Nebraska testified that he had made money in 1927, although he admitted most of his neighbors had not done so well as he.

The American Farm Bureau Federation representatives and L. J. Quasey, director of transportation, for the I. A. A. are attending the hearing in the interest of members in this section. Evidence will be introduced later, if necessary, to show the true condition of the industry. The proposed rate increases would affect livestock growers in Northwestern Illinois.

79 Delegates Attend Annual I.A.C.A. Meet

SEVENTY-NINE officially accredited delegates and representatives estimated at 125 attended the annual convention of the Illinois Agricultural Co-operatives Association held on Jan. 18 at Rock Island.

The program consisted of an open discussion on three topics, as follows: Natural fiscal years, uniform accounting systems, and control of credits.

The majority of elevator representatives present favored closing their operating year at the close of the natural crop or marketing year.

A number of delegates familiar with accounting problems of their companies stated that their boards of directors were being furnished with information currently and that they were able to keep in much closer touch with the operating problems of their companies than previously.

Manager Geo. R. Wicker explained the practices of the Association in making a detailed classified list of accounts receivable which would enable the directors to maintain a proper control over the extension of credits both as to time and amount; also the manner in which the managers could supplement this practice by furnishing similar information at the close of each month.

Some took the position that co-operative associations should adopt a cash basis while others held for a short time approved credit plan.

Parke Re-elected Head Of Chicago Producers

Geo. F. Tullock Elected To Board. Reports Show 17.37 Per Cent Increase In Business

H. H. PARKE of Genoa was re-elected president; J. N. Horlacher of Storm Lake, Iowa, was elected vice-president; and H. Weiland, of Beloit, Wis., was elected secretary, following the recent annual meeting of the Chicago Producers Commission Association.

Wm. H. Moody of Port Byron, Ill., and A. Sykes of Ida Grove, Iowa, were elected to the executive committee. As a result of a recent redistricting, several changes were made in the board of directors. Geo. F. Tullock of Rockford, Ill., was elected to succeed G. C. Johnstone of Bloomington, and J. P. Kelley of Stewartsville, Minn., was elected to succeed W. H. Wischow, Weaver, Minn. R. F. O'Donnell, Colo, Iowa, and H. Weiland, Jr., Beloit, Wis., were re-elected.

Hearst and Curtis Talk

Charles E. Hearst, president of the Iowa Farm Bureau Federation, and Dean C. F. Curtis of the Iowa State College, were the principal speakers. Charles A. Stewart, secretary of the National Live Stock Producers Association, told of the progress in the operation of the Producers' lamb and cattle pool for 1927. The National Association handled 19,000 carloads during the first year of its operation, whereas in 1927, 78,000 carloads, valued at $129,000,000 were sold for its members.

Ray E. Miller, director of live stock marketing for the I. A. A., presented the Illinois plan of field service.

17.37 Per Cent Increase

During 1927, the Chicago Producers handled a total of 15,435 cars of live stock valued at more than $30,000,000. This represents an increase of 17.37 per cent in the receipts over the 1926 business.

Delegates from Illinois, Iowa, Michigan, Wisconsin, and Indiana were present.

Fruit Growers Meet At Centralia Feb. 4

THE entire board of directors, officers, and executive committee were re-elected at the annual meeting of the Illinois Fruit Growers Exchange held on Feb. 4 at Centralia.

Each of the 16 locals active in selling co-operatively last year was represented. The members who attended from all sections of the fruit belt reported that peach prospects are better in the southern part of the peach belt but about the same as 1927 in the northern section. The January 1 freeze was responsible for the great damage.

Resolutions were adopted favoring a tariff on bananas and instructing the manager to continue his efforts in behalf of equalizing freight rates in the fruit belt.

Samuel Sorrells, of Raymond, chairman of the I. A. A. marketing committee, Fred Dietz, De Soto, and W. L. Cope, Salem, all members of the I. A. A. Executive Committee, addressed the meeting.

Officers and directors re-elected are as follows: R. B. Endicott, Villa Ridge, president; I. D. Snedeker, Jerseyville, vice-president; Walter Parks, Patoka, secretary-treasurer; Logan N. Colp, Carterville; W. L. Cope, Salem; L. O. Day, Olney; S. T. Rice, Centralia; Norman Casper, New Burnside; and J. W. Lloyd, Urbana.

Excellent prospects for a heavy apple bloom throughout the state were reported.

FARM ADVISERS COMPETE FOR CUP

F. E. FULLER OF MARSHALL-PUTNAM WINS FIRST YEAR'S CONTEST AND GETS CUP FROM SAM THOMPSON

ILLINOIS farm advisers will compete in the second-year contest for the Sam Thompson Trophy awarded the county Farm Bureau having the most effective publicity service. The contest closes on Feb. 20.

Effectiveness in reaching members, nonmembers, and the general public is to be the measuring stick in selecting the winner. The score card to be used is as follows:

Farm Bureau official organ	40
News in papers of county	40
State news	10
Special features (exhibits, radio speeches, special literature, stickers, etc.)	10
	100

Each county entering the contest must present an exhibit of clippings, copies of releases, and general information about other publicity work done in the county, since Feb. 15, 1927. Originality, variety, and interest are all considered in judging the exhibits.

Last year was the first year of the contest. The exhibit of F. E. Fuller, farm adviser from the Marshall-Putnam Farm Bureau, won the prize. A county must win the cup three times before it retains permanent possession,

Judges are as follows: S. H. Thompson, C. V. Gregory, F. J. Keilholz, a representative of the Illinois State Farm Advisers' Association, Fred L. Petty, a representative of the Illinois Press Association, and E. G. Thiem.

The resignation of L. P. McMillen, director in the Illinois Agricultural Co-operatives Association, was accepted at a special meeting of the board at Rock Island on Jan. 18. A letter of appreciation for his valuable services, and regret of his inability through press of other work to continue was forwarded at the direction of the members present.

A load of choice hogs shipped by C. E. Haase, manager of the Brenton and Pella Livestock Shipping Association of Ford county, topped the Pittsburgh market on Feb. 9, at $9.10 per cwt. The hogs were sold by the Pittsburgh Livestock Producers' Association. They averaged 248 pounds each.

The Illinois Agricultural Association RECORD

Published monthly by the Illinois Agricultural Association at 404 North Wesley Ave., Mount Morris, Ill. Entered as second class matter at the post-office at Mount Morris, Illinois, October 30, 1925, under the Act of March 3, 1879. Acceptance for mailing at special rate of postage provided in Section 412, Act of February 28, 1925, authorized October 27, 1925.

Volume 6 **MARCH, 1928** **Number 3**

125 Attend 12th Dist. Meeting At Aurora On March 10, Break Record

Endorse District Picnic Plan, Next Meeting In June At DeKalb

THE largest I. A. A. district conference held in recent years in the 12th congressional district characterized the meeting called by Geo. F. Tullock, I. A. A. executive committeeman on Saturday, March 10, in Aurora.

A crowd estimated at 125 representing the Farm Bureau leadership from Winnebago, Boone, DeKalb, LaSalle, Grundy, and Kendall Counties had gathered when the afternoon program was opened following the luncheon in the lower dining-room of the Aurora Hotel.

Congressman John T. Buckbee, Rockford, who was first introduced by Mr. Tullock pledged his unwavering support to the McNary-Haugen bill with the equalization fee principle. The congressman was given a hearty reception. He had made a special trip from Washington to attend the I. A. A. conference and one or two other meetings in his district.

Geo. F. Tullock

Smith Gets Ovation

President Earl C. Smith received a great ovation when he was introduced following Mr. Buckbee. Before delving into the agricultural situation and the I. A. A. legislative program, he told about the first I. A. A. district conference held in his own, the 20th district, which he called to get certain facts

(Continued on page 8)

VOTE!

Every member of the I. A. A. owes it to himself and to agriculture to get out and vote in the April primaries. In this issue you will find information about your senators, representatives and candidates for office, to help you vote intelligently. Records are published without comment. Use your own judgment but vote the ticket straight for agriculture.

ILLINOIS Farm Bureau Serum Association Receives Bids For 1928 Supply of Serum and Virus. Officers and Directors of the Serum Association are Seated about President O. B. Goble in the center of the table to the rear. Representatives of the serum companies are in the foreground.

Illinois Farm Bureaus Contract For 1928 Serum

BIDS for the 1928 supply of anti-hog cholera serum and virus were received by directors of the Illinois Farm Bureau Serum Association at a recent meeting with serum company representatives in Chicago.

Quotations for the most part were considerably lower than last year because of the low price of hogs. Clear concentrated serum in some instances was quoted at a price little higher than prices paid the previous year for blood serum.

While no definite contracts were closed at this meeting, the bids of the various companies which included all the larger ones in the Middle West, were submitted to the 60 counties holding membership in the Association.

The discussion indicated that more clear concentrated serum will be used in 1928 than ever before. In view of the fact that the dosage for clear serum

(Continued on page 8)

Know Them By Their Records Before You Vote In Primaries On April 10

Senator Deneen and All Downstate Congressmen Support McNary-Haugen Bill in 69th Congress

THE voting records of downstate senators and representatives on five measures of major importance to Illinois farmers in the 55th General Assembly, and in the Special Session held early this year are presented on pages four and five by the Public Relations Committee.

This action is in accordance with the recent announcement that voting records on agricultural legislation would be published prior to the April primaries. The vote on the four issues, namely, the gas tax, income tax, grain exchange bill, and the increased bonding bills, which came up in the last regular legislative session, is largely a reprint of the table presented in the Special Legislative issue of THE RECORD last August, with a few minor adjustments.

They Tell The Story

In addition, the vote on the bond-limiting measure applicable to taxing districts in Illinois outside Cook County is presented. All the records here considered are of primary interest to farmers. They furnish an index to the manner in which each member of the legislature is representing his agricultural constituents. They are presented with the hope that members will vote the ticket straight for agriculture and place that interest above party.

August Issue For Details

Complete information on all the measures in which the I. A. A. was

Hearst and Curtis Talk

Charles E. Hearst, president of the Iowa Farm Bureau Federation, and Dean C. F. Curtis of the Iowa State College, were the principal speakers. Charles A. Stewart, secretary of the National Live Stock Producers Association, told of the progress in the operation of the Producers' lamb and cattle pool for 1927. The National Association handled 19,000 carloads during the first year of its operation, whereas in 1927, 78,000 carloads, valued at $129,000,000 were sold for its members.

Ray E. Miller, director of live stock marketing for the I. A. A., presented the Illinois plan of field service.

17.37 Per Cent Increase

During 1927, the Chicago Producers handled a total of 15,435 cars of live stock valued at more than $30,000,000. This represents an increase of 17.37 per cent in the receipts over the 1926 business.

Delegates from Illinois, Iowa, Michigan, Wisconsin, and Indiana were present.

Fruit Growers Meet At Centralia Feb. 4

THE entire board of directors, officers, and executive committee were re-elected at the annual meeting of the Illinois Fruit Growers Exchange held on Feb. 4 at Centralia.

Each of the 16 locals active in selling co-operatively last year was represented. The members who attended from all sections of the fruit belt reported that peach prospects are better in the southern part of the peach belt but about the same as 1927 in the northern section. The January 1 freeze was responsible for the great damage.

Resolutions were adopted favoring a tariff on bananas and instructing the manager to continue his efforts in behalf of equalizing freight rates in the fruit belt.

Samuel Sorrells, of Raymond, chairman of the I. A. A. marketing committee, Fred Dietz, De Soto, and W. L. Cope, Salem, all members of the I. A. A. Executive Committee, addressed the meeting.

Officers and directors re-elected are as follows: R. B. Endicott, Villa Ridge, president; I. D. Snedeker, Jerseyville, vice-president; Walter Parks, Patoka, secretary-treasurer; Logan N. Colp, Carterville; W. L. Cope, Salem; L. O. Day, Olney; S. T. Rice, Centralia; Norman Casper, New Burnside; and J. W. Lloyd, Urbana.

FARM ADVISERS COMPETE FOR CUP

F. E. FULLER OF MARSHALL-PUTNAM WINS FIRST YEAR'S CONTEST AND GETS CUP FROM SAM THOMPSON

ILLINOIS farm advisers will compete in the second-year contest for the Sam Thompson Trophy awarded the county Farm Bureau having the most effective publicity service. The contest closes on Feb. 20.

Effectiveness in reaching members, nonmembers, and the general public is to be the measuring stick in selecting the winner. The score card to be used is as follows:

Farm Bureau official organ	40
News in papers of county	40
State news	10
Special features (exhibits, radio speeches, special literature, stickers, etc.)	10
	100

Each county entering the contest must present an exhibit of clippings, copies of releases, and general information about other publicity work done in the county, since Feb. 15, 1927. Originality, variety, and interest are all considered in judging the exhibits.

Last year was the first year of the contest. The exhibit of F. E. Fuller, farm adviser from the Marshall-Putnam Farm Bureau, won the prize. A county must win the cup three times before it retains permanent possession.

Judges are as follows: S. H. Thompson, C. V. Gregory, F. J. Keilholz, a representative of the Illinois State Farm Advisers' Association, Fred L. Petty, a representative of the Illinois Press Association, and E. G. Thiem.

Excellent prospects for a heavy apple bloom throughout the state were reported.

The resignation of L. P. McMillen, director in the Illinois Agricultural Co-operatives Association, was accepted at a special meeting of the board at Rock Island on Jan. 18. A letter of appreciation for his valuable services, and regret of his inability through press of other work to continue was forwarded at the direction of the members present.

A load of choice hogs shipped by C. E. Haase, manager of the Brenton and Pella Livestock Shipping Association of Ford county, topped the Pittsburgh market on Feb. 9, at $9.10 per cwt.

The hogs were sold by the Pittsburgh Livestock Producers' Association. They averaged 238 pounds each.

In this issue you will find information about your senators, representatives and candidates for office, to help you vote intelligently. Records are published without comment. Use your own judgment but vote the ticket straight for agriculture.

ILLINOIS Farm Bureau Serum Association Receives Bids For 1928 Supply of Serum and Virus. Officers and Directors of the Serum Association are Seated about President O. B. Goble in the center of the table to the rear. Representatives of the serum companies are in the foreground.

Illinois Farm Bureaus Contract For 1928 Serum

BIDS for the 1928 supply of anti-hog cholera serum and virus were received by directors of the Illinois Farm Bureau Serum Association at a recent meeting with serum company representatives in Chicago.

Quotations for the most part were considerably lower than last year because of the low price of hogs. Clear concentrated serum in some instances was quoted at a price little higher than prices paid the previous year for blood serum.

While no definite contracts were closed at this meeting, the bids of the various companies which included all the larger ones in the Middle West, were submitted to the 60 counties holding membership in the Association.

The discussion indicated that more clear concentrated serum will be used in 1928 than ever before. In view of the fact that the dosage for clear serum

Know Them By Their Records Before You Vote In Primaries On April 10

Senator Deneen and All Downstate Congressmen Support McNary-Haugen Bill in 69th Congress

THE voting records of downstate senators and representatives on five measures of major importance to Illinois farmers in the 55th General Assembly, and in the Special Session held early this year are presented on pages four and five by the Public Relations Committee.

This action is in accordance with the recent announcement that voting records on agricultural legislation would be published prior to the April primaries. The vote on the four issues, namely, the gas tax, income tax, grain exchange bill, and the increased bonding bills, which came up in the last regular legislative session, is largely a reprint of the table presented in the Special Legislative issue of THE RECORD last August, with a few minor adjustments.

They Tell The Story

In addition, the vote on the bond-limiting measure applicable to taxing districts in Illinois outside Cook County is presented. All the records here considered are of primary interest to farmers. They furnish an index to the manner in which each member of the legislature is representing his agricultural constituents. They are presented with the hope that members will vote the ticket straight for agriculture and place that interest above party.

August Issue For Details

Complete information on all the measures in which the I. A. A. was

(Continued on page 4)

Knox County Wins Farm Bureau Publicity Match And Sam Thompson Cup

Judges Award Trophy to County Having Most Effective Publicity Service

KNOX COUNTY'S publicity exhibit won the second year's Farm Bureau contest for the Sam Thompson trophy by a unanimous decision of the judges at a meeting in Chicago on Tuesday, March 6.

L. R. Marchant

The Knox county exhibit was given first place by reason of the large volume of publicity secured in the local and state news and farm papers, and for the originality, effectiveness, and attractiveness of the exhibit. The neatness of the exhibit was especially commendable.

Honorable mention was given the following counties: Vermilion, Sangamon, Champaign, and Madison. Monroe County was cited for the interest and effectiveness of its monthly mimeographed letter to the members.

Exhibits were judged according to the following score card:

Farm Bureau official organ	40
News in papers of the counties	40
State news	10
Special features (such as posters, radio speeches, special post cards, stickers, etc.)	10
Total	100

The exhibits were composed of representative newspaper clippings, copies of stories released to the press, files of the official Farm Bureau organs, and statements of other special publicity devices used in the various counties. They were judged on their effectiveness, originality, quantity, and attractiveness. The presentation of local news regarding the Farm Bureaus' own activities was emphasized in judging the official organs.

The committee of judges was composed of C. V. Gregory, Editor, Prairie Farmer: Charles H. Keltner, Farm Adviser, Rockford, who represented the Illinois State Farm Advisers Association; D. C. Waterman, Associate Editor, Illinois Farmer; F. J. Keilholz, Extension Editor, Illinois College of Agriculture; and E. G. Thiem, Director of Information, Illinois Agricultural Association.

Farm Adviser L. R. Marchant was ably assisted by Associate Adviser A. R. Kemp in getting out the Knox County Farm Bureau Bulletin, and giving news and publicity to the local newspapers. The Knox County exhibit was especially attractive.

Knox county is the second county to win in the contest, Marshall-Putnam having placed first last year.

Win Victory For Quincy Milk Producers' Ass'n On Income Tax Rebate

A THREE-YEAR fight to secure a refund for federal income taxes paid by the Quincy Milk Producers' Association was crowned with victory when George R. Wicker, director of business service for the I. A. A. who filed the application, received a telegram from Washington to the effect that the exemptions had been granted.

Between $3,000 and $4,000 are involved according to estimates. The sum applied for covers taxes paid back to 1923. When the application was filed three years ago, the Treasury Department denied exemptions on technical grounds.

Thereupon Wicker sought to secure a reconsideration and review of further evidence presented tending to show that exemptions were in order. This move was successful and resulted in the telegram received at I. A. A. headquarters just before going to press.

The I. A. A. has been successful in getting more than 200 exemptions for Illinois co-operatives including farmers' elevators, Farm Bureaus, and other cooperative organizations.

While in Washington recently, Mr. Wicker submitted a memorandum to the Senate Finance Committee amending the present statute to eliminate technicalities tending to defeat the purpose of the act.

Dealers Don't Like I. A. A. Co-operative Marketing Activities

THE following story clipped from the Peoria Star of Feb. 25 indicates that the poultry dealers don't like to see the progress farmers are making in helping themselves get better prices.

"Shippers Hit I. A. A. Market Agent Policy
Government Is Also Made Target

"Condemning the stand of the Illinois Agricultural Association and federal government as menacing to their business, members of the Illinois Poultry & Egg Shippers Association at the close of their fifteenth annual convention here yesterday went on record as opposed to co-operative marketing. Their resolution follows:

" 'Whereas the business of the members of the Illinois Poultry & Egg Shippers Association is being menaced by the activities of the Illinois Agricultural Association and federal government, by their encouragement of the establishment of other marketing agencies; and

" 'Whereas we believe we can serve the farmer better than he can serve himself.

" 'Be it resolved that we go on record as being in hearty accord with the program being fostered by the Federated Agricultural Trades of America, and endorse in principle the resolutions adopted by the Agricultural Trades Economic conference held in Chicago, Nov. 30, 1927.' "

Limestone Companies To Submit Bids For Year's Supply April 1

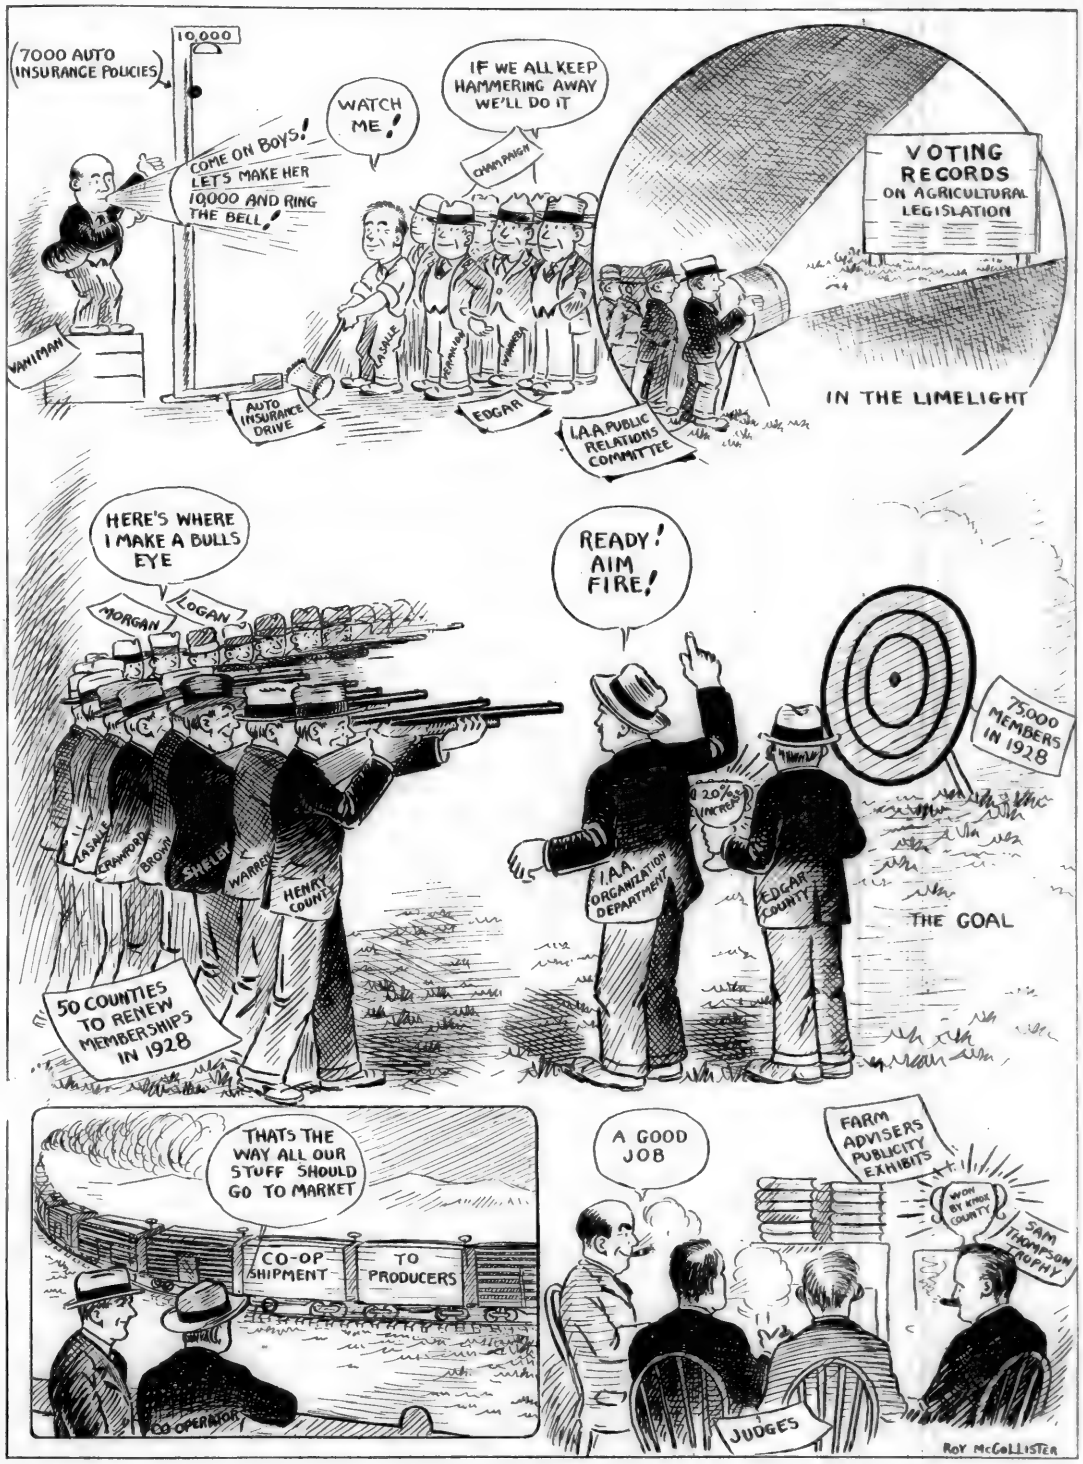
I. A. A. Completes Negotiations With 16 Companies—Farm Bureau Members Get 10 Cent Per Ton Refund

THE I. A. A. and representatives of sixteen leading limestone producing companies operating in Illinois reached an agreement last week which is considered quite a step forward in carrying out an equitable and effective plan to provide, at minimum cost, agricultural limestone to the Farm Bureau members in Illinois.

J. R. Bent

The plan carries with it the best thought of interested leaders throughout the state who met in some seven district conferences for the discussion of this question. The plan contemplates a uniform system of orders all going through the Farm Bureaus direct to Accredited Limestone Companies which have previously submitted bids to the Limestone Department of the I. A. A. The I. A. A. in turn will give full information as to price, quality, etc., to the various Farm Bureaus of the state.

The outstanding difference in the new program from that of previous years is: 1. The ten cent Farm Bureau member differential will not, under the new program, be reflected in the billing of the limestone on the certificate plan but will be cleared through the I. A. A. and Farm Bureaus at definite periods as a refund. 2. This refund will be made available only to those who have ordered their limestone through the Farm Bureau on uniform blanks and have paid their bill in full within fifteen days. 3. The plan further contemplates the pooling of orders by purchasers within a county or counties, who may desire to do so, and negotiating for the purchase of such orders from the lowest possible bidder, quality taken into consideration.



Detailed advice and instruction will be furnished each Farm Bureau.

Grain Marketing Meeting

PRESIDENT Earl C. Smith, Geo. J. Stoll, Sam Sorrells, Frank Barton, and Harrison Fahrnkopf representing the I. A. A., met Dave Allen, Joe Hennebry, Henry Green, V. A. Wertsch, and Lawrence Farlow, representing the Farmers Grain Dealers Ass'n at Bloomington on Mar. 13 to discuss co-operative grain marketing in Illinois.

Negotiations toward effecting closer co-operation between the two organizations have been underway for some time.

SNAPSHOTS OF THE NEWS

HERE IS HOW THEY VOTED. LOOK UP THE RECORDS

How Congressmen Voted on McNary-Haugen Bill

OUR United States Senator, both Congressmen at large, Congressmen from every downstate district, and two Congressmen from Chicago voted for the McNary-Haugen Bill in the 69th Congress. These men are: Senator Charles Deneen, Congressmen at large Richard Yates and Henry R. Rathbone, Congressmen Frank R. Reid, William R. Johnson, John C. Allen, Edward J. King, William E. Hull, Frank H. Funk, William Perry Holaday, Charles Adkins, Henry T. Rainey, Loren E. Wheeler, Ed M. Irwin, William W. Arnold, Thomas S. Williams, and Edward E. Denison from downstate districts, and Adolph J. Sabath, and Stanley H. Kunz (paired for) of Chicago.

There are three new Congressmen in the 70th Congress, namely: John T. Buckbee, Homer W. Hall, and J. Earl Major, all of whom have given assurance that they will support and vote for the McNary-Haugen Bill now pending, at their earliest opportunity.

This is a matter of sincere gratification to the farmers of Illinois and to all people who believe that the restoration of agriculture to a position of equality with industry is essential to permanent prosperity.

By Their Records

(Continued from page 1)

especially interested appeared in the August, 1927, issue of the RECORD. It would be well for every member to look up that issue and review it thoroughly before the primaries for the detailed story. A few copies of this number are available for distribution and may be had, as long as the supply lasts, by writing the I. A. A. Department of Information, 608 So. Dearborn St., Chicago.

The vote of our representatives in the United States Senate and House on the McNary-Haugen bill in the 69th Congress also is published on page four. Every downstate congressman and two from Chicago voted in favor of the measure. Illinois delivered more votes to the McNary-Haugen bill than any other state.

The question of increasing the upper limit of indemnity payments by the government on reactor cattle, which was raised by Farm Adviser Foley of Boone county at the I. A. A. District Conference, Aurora, March 10, was referred to the Public Relations Committee of the I. A. A. for investigation.

Fifty thousand rats were killed in Clinton County, Ohio, recently during a county-wide rat killing contest. A rat does $2 damage annually, says the U. S. government.

No. 1. Senator Brown was seriously ill and unable to attend the session until June 6. All major agricultural measures had already been voted upon in the Senate, except the gasoline tax bill.

No. 2. Senator Cuthbertson necessarily absent on this roll call but voted with proponents on the Denvir motion to reconsider.

No. 3. Representative Hennebry came to Springfield on the day on which Senate Bill No. 1 was voted in the special session, but was taken violently ill, was removed to a hospital, and thereby prevented from voting.

No. 4. Senator Burgess voted **no** on 1st roll call and **yes** on reconsideration.

I. A. A. Members Are Asked To Study Vote And Stand By Friends

Only Way Agriculture Will Get Fair Representation and Square Deal

THIS page contains a reprint of the voting record of the members of the 55th General Assembly. It gives the officially recorded vote of every member in all the downstate districts on the four measures considered in the regular session that were of major importance to the agricultural interests of the state, together with their voting percentage.

These bills were: the gasoline tax, the income tax, the bill providing proper regulation of grain exchanges, and opposition to the Chicago bonding bills.

We are including with this reprint, the roll call as affecting down-state districts, on Senate Bill No. 1 in the special sessions, which prevents the doubling of the bonding power of taxing bodies outside of the City of Chicago, due to the passage of the Chicago bonding bills during the regular session and made necessary by a Supreme Court decision declaring the amendment to the Juul Law, also passed during the regular session, unconstitutional.

Primary, April 10

This record is republished at this time because a state-wide primary occurs on April 10 at which candidates of all political parties will be selected for county, state, and national offices. Many of these representatives are candidates for renomination. In numerous instances, they are opposed. It is the duty of every American citizen to vote in primaries and elections.

This record is published for the information of our members and the friends of agriculture to enable them to cast an intelligent vote for members of the General Assembly. Study the vote. If they have been fair to agriculture and have served faithfully the people they represent, reward them with your vote and support. If agriculture is to receive a square deal and our institutions are to be preserved, in the interests of all our people we must elect to office people who will discharge their duties fairly and in the interests of their constituents.

A 10 per cent reduction in cotton acreage was recommended at the Southwide cotton conference held at Jackson, Miss., Feb. 20-21.

Senate Bill No. 1 passed in the Special Session was introduced and sponsored in the Senate by Senator Simon E. Lantz and handled in the House by Rep. Reed Cutler.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the farm bureau was organized, namely to promote, protect and represent the business economic, social and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Edited by Department of Information, E. G. Thiem, Director, 608 South Dearborn Street, Chicago, Illinois. Entered as second-class matter October 20, 1925, at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Accepted for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the ILLINOIS AGRICULTURAL ASSOCIATION RECORD. Postmaster: In returning an uncalled for or missent copy please indicate key number on address as is required by law.

Our Political Policy

"WE ARE not endorsing candidates for any office, nor criticising any of them. We are merely presenting the records to our people and requesting them to vote for those who are worthy of support."

This pronouncement made by President Earl C. Smith before the 17th I. A. A. District Conference at Bloomington last week expresses definitely the policy of the Association in political matters, and the information published in this issue of THE RECORD is in line with the expression.

The Association believes that every voter is entitled to exercise his own judgment in performing this solemn duty of citizenship. But it has consistently held that its members should have the facts so they may judge with deliberation and intelligence before casting the ballot.

Check Up On Delegates

THE Illinois Agricultural Association recently submitted a questionnaire to all prospective delegates to the Republican and Democratic national conventions.

The questionnaire asked for their attitude on certain matters which we consider of fundamental importance, namely, whether or not they will stand unequivocally and steadfastly for that presidential candidate or candidates who are friendly to agriculture, and are ready to accept the principles of farm surplus control legislation embodied in the McNary-Haugen bill.

Replies to these questionnaires already are coming in in large numbers. The information they impart will be forwarded to Farm Bureau leaders in every Illinois county.

Awake in the 19th

THE militant Farm Bureau members of the 19th Congressional District are aroused over the activities of designing politicians who are seeking to euchre them out of an acceptable delegate to the Republican National Convention.

The farmers want Fred. D. Lewis, a Tolono banker and supporter of Frank O. Lowden. One of the local politicians would like to put over another candidate not so minded. At which the Farm Bureau groups expressed themselves at the I. A. A. District Conference held Mar. 15 at Champaign essentially as follows:

"WHEREAS, Since it is necessary again to call attention to the fact that politics in the past has been played behind 'closed doors'; and

"WHEREAS, sincerity and frankness are the two essential qualities which mean much to the correction of the farm problem; and,

"WHEREAS, the farm situation demands that business men and farmers use every effort toward formulating a basic political program designed to correct the evils that now exist;

"THEREFORE be it resolved that we support Frederick D. Lewis of Tolono and George Jeffries of Coles county as delegates to the Republican National Convention;

"That we urge and request that no candidates for office be supported except those whose attitude on farm equality is known to be fair and genuinely true;

"And that we condemn the action of machine politicians who under the guise of friendliness to the farm problem are still doing everything possible by propaganda and otherwise to the disadvantage of the farmers' best interests."

Defying The Law

IT would be amusing were it not so serious to see to what ends tax administrators will go in some counties to defy the law and defeat justice.

After the Stephenson County Board of Review admitted in a hearing before the Illinois Tax Commission that assessed valuations in that county were in need of adjustment, they went home and did nothing. Perhaps the home boys at Freeport got to them on their arrival. At any rate, it became necessary for the Commission to exercise its authority and order a reassessment.

The local assessor in Freeport, it was reported, went out and returned with a net change in the total valuations of $8980. The facts, which were not disputed by the Board of Review when they appeared before the Tax Commission, revealed that Freeport property is assessed at only 34.50 per cent of its fair valuation whereas farm lands are assessed at 46.16 per cent.

Now the Stephenson County Farm Bureau has filed a second complaint with the Commission charging the Board with non-feasance and asking that the reassessment be declared null and void.

As we go to press, the report comes that a similar situation exists in Champaign county where a reassessment was ordered months ago. Similar action may be necessary there. Such open disregard of the law is deplorable. It should not be necessary to appeal to a state body like the Tax Commission to secure justice. It is very plain that it may become necessary for the Commission to seek other remedies to enforce its requests.

PLEASED WITH IT

THE ILLINOIS AGRICULTURAL ASSOCIATION RECORD approved of the action in the Legislature in limiting the bonding power of down state taxing districts to 2½ per cent of total full valuations of properties therein. It then says that tax relief is farm relief, and that farmers will insist on economy in government. This is the position taken by the Register-Mail with reference to the situation. Every one of the municipalities which clamored for the power to increase their bonding capacity ought to realize that their citizens are now being taxed in many directions, and that only absolute necessity would justify an increase in the burdens. (Galesburg Register-Mail)

Tune in on the I. A. A. half hour program broadcast daily at 12:30 P. M. from station WJJD, Chicago (365 meters). The facilities of station WJJD are loaned the Association through the courtesy of the Loyal Order of Moose, Mooseheart, Ill. No program on Saturdays and Sundays.

DEWITT C. Wing, agricultural writer, philosopher, and editor of the American Swineherd will be a regular broadcaster each Monday on the I. A. A. daily farm program. His views on farm life and other subjects are read with interest throughout the United States. Mr. Wing owns a 1100 acre farm in Wayne county, Illinois, where he holds a membership in the Farm Bureau and I. A. A.

Dewitt C. Wing

C. S. Rhode and J. C. Hackleman of the University of Illinois are the speakers scheduled for Friday, Mar. 25. Ole Olson will be on the air Mar. 26, and L. B. Palmer, president of Ohio Farm Bureau, on Mar. 29.

THE FARMERS' TALE

WHEN World War came 'twas often said,
we'll "raise more Wheat" and save the bread.
The price of land contrived to double and
those who bought are still in trouble.
While those who sold are still afraid the
mortgage never will be paid.

The young men mostly left the farms, to
factories, shipyards, some to arms.
Old men and women tilled the land; the tax
went up on every hand,
With spuds so high it seemed like fun, one
hundred dollars for a ton.

War caused a mushroom valuation, and gave
high tax unjust foundation.
We paid high tax without much care, while
prices all were in the air,
But now the price has dropped so low, to
pay our tax we have no show.

Sometimes our crops are only half; we milk
the cow and kill the calf,
And if we try to sell the skin, the price will
hardly make you grin,
But if you buy a piece of leather, the price
has gone up like a feather.

We used to love the noble steed, who pulled
the plow and gave us speed,
But now no matter where you go, the
factory man takes in the dough.
Price is fixed by some "combine," and tariff
helps to make it shine.

War is over, peace is sweet, but farmers
can't keep on their feet.
The price for produce does not pay, the cost
of growing grain or hay,
And if you turn to hogs and veal, all you
will clear will be the squeal.

Farmers produce now is sold, in open markets of the world.
When he buys he meets "protection," I hope
by votes, he'll make objection,
And ask for laws to make his pay as good
as in the factory.

Industry can never stand, when farmers die
and quit the land, for workmen need good food
to eat,
From where will come their bread and meat?
Farmers claim an equal share, "to live and
let live" through the year.

Auto Insurance Policy Applications In I. A. A. Company Now Total 7200

Anniversary Week Scheduled For March 26 to 31, Company Year Old April 1

APPLICATIONS for auto insurance policies in the Illinois Agricultural Mutual Insurance Company totaled 7,200 on Thursday, March 15, two weeks before the first anniversary of the new company.

"This is the greatest record ever made by a mutual insurance company of this kind, to our knowledge," states V. Vaniman, director of insurance acquisition for the I. A. A., in commenting on the growth of the company.

Steady Growth

"We started less than a year ago with some 2,000 applications for policies and since that time the company has had a steady natural growth. In most counties the members themselves signed up voluntarily or at the suggestions of their neighbors. The company has not found it necessary to use high pressure salesmanship in firmly establishing itself as a service institution for the Farm Bureau members of Illinois."

The company expects to celebrate by holding Anniversary Week from March 26 to April 1 with the idea of ushering in the second year with a substantial increase in policy holders.

New Coverage

Three forms of additional coverage recently added to the policy have proved popular. These include protection against stationary object collision, windstorm and tornado, and theft of spare tires, rims, etc., when locked.

The stationary object collision will be put into effect as of noon on March 26. All members desiring this coverage should send in their $10 check so their coverage for this insurance can be made effective as of that date.

Windstorm, Tornado

The windstorm, tornado, cyclone, hail, earthquake and explosion coverage was made effective February 1. This coverage goes along with the fire and theft coverage and will cost about the same as fire insurance. It is included in the policy the same as transportation insurance, and is given the insured unless they otherwise specify.

Theft coverage includes spare tires, tubes, and wheels when locked to the car. Theft coverage went into effect on Feb. 1. This coverage is optional and is not given unless desired. There is no additional initial cost.

Initial Payment

The initial payment for public liability and property damage has been reduced from $25 to $15. The same is true for fire and theft. In case of cancellation $10 is returned to the insured.

"Farm Bureau members like the special features of the policy, namely, paying the actual value of the car at the time of loss by fire or theft," says Vaniman. In case of collision accident where insured recovers for collision loss, he is also paid for damage to tires. The special feature of the policy giving protection to anyone the insured gives permission to drive the car is meeting with general approval. Not only is the reduction in cost of the insurance appealing to Farm Bureau members but also the coverage offered in the policy which meets their needs.

Many I. A. A. District Conferences In March

DISTRICT I. A. A. conferences already held or to be held during March were scheduled at the March meeting of the I. A. A. Executive Committee on the 9th.

District 15 started the spring schedule with a meeting at Canton on March 6 called by Committeeman A. N. Skinner of Yates City. A report of this conference appears elsewhere in this issue.

The 12th District followed with a conference at Aurora on March 10, the story of which appears on page 1. Other meetings scheduled thereafter are as follows:

District	*Date*	*Meeting Place*	*Chairman*
11th	Mar. 20	Wheaton	H. C. Vial
13th	Mar. 23	Dixon	C. E. Bamborough
14th	Mar. 22	Macomb	M. G. Lambert
17th	Mar. 16	Bloomington	Geo. J. Stoll
19th	Mar. 15	Champaign	J. L. Whisnand
20th	Mar. 23	Jacksonville	C. S. Black
21st	Mar. 29	Carlinville	Samuel Sorrells
22nd	Mar. 24	East St. Louis	Frank Oexner
23rd	Mar. 31	Salem	W. L. Cope
24th	Mar. 31	Albion	Chas. Marshall
25th	Mar. 30	Ullin	Fred Dietz

Meetings will be scheduled in the 16th and 18th districts and announced as soon as the necessary arrangements can be made. Life insurance will be discussed at all the district conferences by either Donald Kirkpatrick, legal counsel, or V. Vaniman, director of insurance acquisition. President Smith will attend most of the conferences to discuss policies of the Association particularly with reference to legislation. The district picnic plan which has already been favorably received in several districts will be presented for vote at all the conferences.

Ninety-five speakers including farmers, merchants, business, and professional men of Logan county will address a series of 80 community meetings scheduled by Farm adviser J. H. Checkley of the Logan County Farm Bureau.

The meetings will be held for the most part in the country churches, school houses, and town halls. Checkley has enrolled nearly all the eligible broadcasters of Logan county in his speaker's bureau, among whom are doctors, lawyers, preachers, merchants, and others. Experiences in and out of the profession or occupation provide a variety of interesting material.

Attend Meeting

(Continued from page 1)

about the Association before the members. Since that time, I. A. A. district conferences have been held regularly in all the congressional districts of the state.

Donald Kirkpatrick, legal counsel, opened the session in the morning after introduction by Chairman Tullock, with a clearcut presentation of the proposed life insurance plan.

His explanation aroused considerable interest indicating that the plan is being favorably received.

A motion to the effect that the meeting express itself on the bill now before congress seeking to prevent the government from dealing in stamped envelopes carrying the return address of the sender, was tabled following a suggestion by Pres. Smith that the proposal be referred to the I. A. A. and A. F. B. F. for further investigation.

District Picnic OK'd

The district I. A. A. picnic plan was warmly endorsed. A motion by Mr. Keltner of Winnebago that the chairman appoint a committee to make plans for a 12th district picnic was carried. Mr. Tullock appointed the presidents of all the County Farm Bureaus in the district on the committee except in Winnebago where Vice-president Frisbie was named.

The conference then voted to accept Tom Roberts' invitation to hold the June meeting at DeKalb.

Before adjournment, President Smith carefully explained the policy of the I. A. A. Executive Committee with reference to life insurance. "If we enter the life insurance field," he said, "We have decided how we will do it. But the decision as to whether or not we shall make this service available rests with you. If 60 per cent of the counties want it, life insurance will be added to our program. This insurance will be made available at cost. We hope every Farm Bureau will give careful consideration to the plan not later than the April meeting after which the I. A. A. would like to be informed of the action taken."

The meeting adjourned at 3 p. m.

Illinois Farm Bureaus

(Continued from page 1)

is around 20 per cent less than for the blood serum, Illinois Farm Bureau members will make a decided saving on their vaccinating bill. The volume of serum handled, however, may be smaller than last year because of the change.

Clear concentrated serum is more convenient to handle and administer, is more readily absorbed, and results in fewer abscesses.

Vermillion county has already announced that it will contract for 750,000 c. c. of clear concentrated serum. Last year, more than 36,000,000 c. c. of serum and virus were purchased by more than 60 counties engaged in this service.

Stop Coal Strip Mining Is Plea of Members at 15th Dist. Meet, Canton

Other Issues Receive Attention From Farm Bureau Leaders

LEGISLATIVE action to stop coal stripping in Illinois, the $20,000,000 game refuge bond issue, district I. A. A. picnics, the gas tax question, and county oil companies were discussed at the 15th District meeting of the Illinois Agricultural Association held at Canton, in Fulton county, on Mar. 6.

A. N. Skinner, Yates City, who represents the district on the Illinois Agricultural Association Executive Committee, presided. Delegates from Fulton, Schuyler, Knox, and Henry counties attended.

A. N. Skinner

Leeper of Fulton county stated that coal stripping operations in that county are laying waste hundreds of acres of fertile farm lands making them unfit for agricultural purposes. The meeting went on record in favor of referring the situation to the Illinois Agricultural Association Executive Committee for consideration. It was reported that most states already have legislation to prevent indiscriminate strip mining.

Direct Buying Considered

Direct buying of live stock by the packers received some discussion, and a motion that the I. A. A. and National Live Stock Producers' formulate a definite policy in regard to direct buying, was carried.

The meeting, likewise, approved a plan of holding a large I. A. A. picnic and county Farm Bureau picnic in that congressional district. A committee of five, composed of Watt, McKinzie, McKee, Whisenand, and Mummert was appointed by Chairman Skinner to select a time and place for the district picnic.

It was moved by Turpin and seconded by Sullivan of Fulton county, that the meeting go on record in favor of a new gas tax for Illinois similar to the recent tax declared unconstitutional.

Oppose Bond Issue

Mr. Skinner explained the $20,000,000 bond issue passed by the last legislature to buy a tract of land along the Illinois River and other sections of the state to reforest and be used as a game preserve, the inner portion of such tracts to be used for a game preserve, and the outer portion for hunting within definite limitations. The bond issue must be submitted to the people in the next general election, for approval.

After considerable discussion it was moved by Warner of Henry county and seconded by Schleich of Fulton county that the bond issue be opposed by the Farm Bureau.

Canton or Galesburg

The picnic committee reported later that the 1928 district picnic be held either at Canton or Galesburg, depending upon the location of picnics in other districts. The final decision was left to Chairman A. N. Skinner.

Whisenand of Henry county outlined the proposed limestone contract.

J. E. Mummert of Fulton county raised the question of organizing cooperative Farm Bureau oil companies. Considerable interest was shown by the delegates of the various counties, in this service.

A motion by McKinzie of Schuyler county, and seconded by Nelson of Knox county that the next meeting be held in Henry county, Apr. 24, was carried. The place of the meeting was left to the Henry County Farm Bureau.

Robinson Resigns In Shelby County

CHARLES J. ROBINSON, farm adviser, in Shelby county resigned recently to take a position with the National Bank of Decatur. This bank has recently taken over the management of a group of farms totaling 5,000 acres and expects to enlarge its activities in managing farm lands.

Robinson has a great many accomplishments to his credit as a result of his five years service as adviser for the Shelby County Farm Bureau. He succeeded in initiating area testing for tuberculosis in Shelby county. The county is now nearly ready to be accredited. In addition he organized three shipping associations, brought the first limestone train into the county, got 90 per cent of the members to use improved seed corn, more recently persuaded the Walgreen Company to locate a condensery at Shelbyville, and did much to improve the general farm practices with reference to soil treatment and culture in the county.

Harold Hixon is selected as one of two out of 12,000 club members in Illinois to attend the national 4-H club camp at Washington, D. C., in June. This is an outstanding honor for Harold as well as for 4-H club work in Iroquois county.

"If 65 per cent of the poultry owners in Crawford county will sign up for the work we can get a veterinarian to T. B. test our flocks," says Farm Adviser Frazier. The State is starting the plan in six Illinois counties and will pay all expenses.

The Illinois Agricultural Association RECORD

Published monthly by the Illinois Agricultural Association at 404 North Wesley Ave., Mount Morris, Ill. Entered as second class matter at post-office at Mount Morris, Ill., October 30, 1925, under the Act of March 3, 1879. Acceptance for mailing at special rate of postage provided in Section 412, Act of February 28, 1925, authorized October 27, 1925.

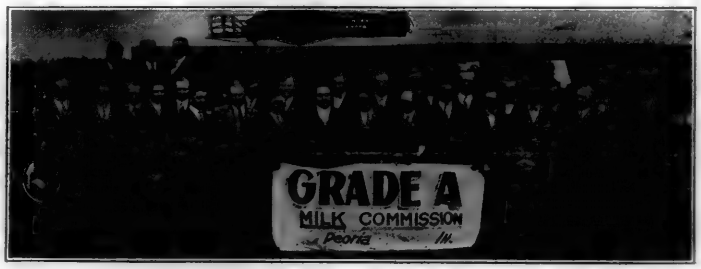
I. A. A. Executives Discuss Marketing At April Meeting

Place of Next Annual Meeting To Be Decided In May. Plan For District Picnics

GRAIN marketing, insurance and taxation figured prominently in the deliberations at the April meeting of the Illinois Agricultural Association Executive Committee held Friday, April 6.

A thorough discussion took place regarding the part the Association should take in cooperative grain marketing. While no definite plan was evolved it was generally agreed that grain marketing must be developed by strengthening and working with the farmers' elevators.

At the suggestion of Rufus C. Dawes, chairman of the World's Centennial Committee, Chicago, it was moved by Oexner and seconded by Skinner that the president appoint a suitable committee to cooperate with the world's centennial committee in representing the interests of Illinois farmers.



In view of the fact that all I. A. A. district conferences have endorsed the district picnic plan, President Smith was authorized to appoint a committee to make suggestions for picnics in all the congressional districts.

The Organization Advisory Committee composed of C. E. Bamborough, chairman, Frank Oexner, C. S. Black, W. B. Bunn, G. E. Metzger, and E. G. Thiem, was named to serve in this capacity.

Geo. F. Tullock, chairman of the Financial Business Service Committee reported that the proposed life insur-

(Continued on page 3)

THE I. A. A. District Conferences are held to give every member an opportunity to express himself regarding the policies and activities of his organization. Are you taking advantage of the privilege? Reports of several meetings are presented in this issue. Go to the next conference in your district with constructive suggestions for the Association's welfare. You will be welcome.

PEORIA'S GRADE A MILK COMMISSION

Enroute from Peoria to Bloomington and Champaign to study grading and quality improvement. Twenty-eight dealers, producers, and officials made the trip recently by bus.

Quality Improvement Is Goal of Dairymen

TWENTY-EIGHT producers, dealers, and marketing officials representing Peoria's Grade A Milk Commission went by bus recently to Bloomington and Champaign to study quality improvement and grading.

At Bloomington where grading has been in progress for several months, the Commission obtained first hand information about the plan and its operation. The basis for grading there is the bacteria count as revealed by the methylene blue test. Milk is placed into one of three classes depending upon its quality.

Dr. M. J. Prucha, dairy bacteriologist at the University of Illinois, assembled the tourists in one of the classrooms in the Old Ag Building and tc them about his latest investigation and what he had learned about quali control.

I. A. A. Sees Farmers Elevators As Foundation Of Grain Marketing Plan

Mutual Relations Committee Offers Definite Co-operation With Illinois Farmers Grain Dealers Association

ANY constructive cooperative grain marketing program in Illinois must include the farmers' elevator as the foundation for the structure.

This elemental policy is laid down in the proposal submitted by the I. A. A.'s special Mutual Relations Committee to a committee from the Illinois Farmers Grain Dealers Association in a recent meeting at Bloomington.

Briefly the proposal sets forth the following points:

1. The Farm Bureaus of Illinois recognize the farmers' elevators of Illinois as the medium through which any constructive grain marketing program should go forward.

2. The announced purpose of said farmers' elevators is to operate so as to return the largest possible ultimate price to the producers of grain.

3. Both the Farm Bureaus and the farmers' elevators recognize that to carry out most effectively paragraph 2, it is essential to control the marketing of the maximum volume of grain produced within a given area.

4. Therefore, the Illinois Agricultural Association is willing and desirous of rendering such constructive service as may be deemed advisable and feasible to increase the volume of business now being handled by farmers' elevators, and stimulating the moral support of the farmers behind said elevators. We, the representatives of said Associa-

(Continued on page 3)

U. S. Supreme Court Decision Safeguards Illinois Co-op Act

Court Finds For Plaintiff in Burley Tobacco Ass'n Suit Against Old Line Buyer

THE Co-operative Marketing Act of 1923 sponsored by the Illinois Agricultural Association and passed by the Illinois legislature of that year was strengthened in effect by the recent decision of the United States Supreme Court upholding the Burley Tobacco Growers' Co-operative Marketing Association contract.

The decision in effect declared that farmers' co-operative associations shall not be deemed monopolies, combinations, or conspiracies in restraint of trade, and that contracts made by such associations with their members are legal.

The Supreme Court decision grew out of a suit against the Liberty Warehouse Company brought by the Kentucky Burley Tobacco Association because the warehouse company received and sold 2,000 pounds of the 1923 tobacco from a member of the Burley Association although its attention had been called to the penalty provided in the Kentucky statutes for such action.

Penalty Provided

The penalty mentioned "from any person, firm, or corporation conducting a warehouse within the State of Kentucky who solicits or persuades or permits any member of any association organized hereunder to breach his marketing contract with the association by accepting or receiving such members' products for sale or for auction or for display for sale contrary to the terms of any marketing agreement with an association such person, firm, or corporation shall be liable and subject to fine, etc."

Recover $500

The Burley Association recovered a penalty of $500 prescribed by the act.

Referring to the general scheme of co-operative marketing, the Supreme Court said, "Although frequently challenged, we do not find any court has condemned an essential feature of the plan with the single exception of the Supreme Court of Minnesota. But in that case it should be noted the dealer who bought products from a member was passive and apparently did not actively seek to purchase them and, so far as the opinion in the case shows, had no knowledge that the member was under contract with the association."

Illinois Farm Bureau members pay 50c per ton less for rock phosphate than do farmers of other states. Organized buying power is the reason.

Honk! Honk!!

Taxpayers' League In St. Clair County

THE Taxpayers' League was recently organized in St. Clair county largely as a result of the tax work of the St. Clair County Farm Bureau and the I. A. A. in revealing inequalities in valuations. The League is made up largely of civic organizations.

"The organization of the League is an attempt in the right direction," said Farm Adviser Tillman, "and it may yet develop that St. Clair county citizens have learned how to govern themselves intelligently without recourse to the State Tax Commission.

"The Farm Bureau will co-operate with the Taxpayers' League wholeheartedly in bringing about a fair reassessment but farmers have a right to expect that revision will mean a lower full valuation on farm land rather than an exclusive revision upward to the value of farm lands."

GETS CHECK FOR $100

E. M. WOOD of Bloomington, a member of the McLean County Farm Bureau, recently received a check for $100 in full payment for a Guernsey heifer killed on the right-of-way near his farm early last fall. Settlement came as a result of the Illinois Agricultural Association Transportation Department's effort in Mr. Wood's behalf.

The heifer in question broke out of an enclosure and wandered down the road onto the right-of-way which was not protected with cattle guards or proper fencing. The animal was so badly injured that it had to be killed and buried.

After his own efforts had failed to get a settlement, Mr. Wood appealed to the McLean County Farm Bureau from whence it was referred to the I. A. A. Transportation Department.

50 Counties To Renew Membership In 1928

Eleven Counties Adopt Continuing Plan For Maintaining Farm Bureau

FIFTY Illinois counties will renew their Farm Bureau memberships in 1928, states Geo. E. Metzger, director of organization.

Clinton county in Southern Illinois has already finished its drive with a net total gain of 128 members. This is an increase of more than 30 per cent. Clinton county was one of the first to adopt the continuing membership agreement by which the membership continues automatically unless the member gives notice to the contrary 30 days prior to the end of the fiscal year. As a result, the greater portion of the members automatically renewed their memberships and the local solicitors centered their efforts on non-members.

The continuing membership plan has been adopted by 11 county Farm Bureaus. Edgar county adopted this plan several years ago and at the present time is testing its effectiveness. This county is expected to finish its renewal campaign with 150 members more than it had during the previous three-year period.

The counties which have adopted the continuing membership plan are: Edgar, Clinton, Marion, Cumberland, Clark, Crawford, Champaign, Iroquois, Johnson, Vermilion, and Henry.

Is Farmer Liable For Injury To Employee?

E. D. McQuire of Union county writes: "I would like to know whether an employer is subject to damages if an employee on the farm gets injured while working for him. I am wondering whether or not it is necessary to carry a Workman's Compensation policy. I employ a great deal of help during harvest time and want to protect myself against any possible lawsuits."

The employer is liable for injuries to employees resulting from the employer's negligence, although contributory negligence on the part of the employee is a bar to recovery. Nevertheless this does not prevent a man from bringing action against his employer, causing him considerable expense and embarrassment.

According to the Illinois Statutes, the Workmen's Compensation Act does not apply to "any work, employment or operations done, had or conducted by farmers and others engaged in farming, tillage of the soil, or stock raising, or to those who rent or lease land for any such purpose, or to anyone in their employ or to any work done on a farm or country place, no matter what kind of work or service is being done or rendered."

However, a farmer may elect to come under the Act. This is discretionary. By so doing he can relieve himself of the common law liability, which briefly means that recovery cannot be had, in case of injury to or the death of an employee, beyond certain specified amounts.

25th District Tables Movement Against Strip Coal Mining

Discuss Insurance, Candidates, and Other Questions at Mound City Meeting

FIFTY I. A. A. members from Pulaski, Union, Jackson, Randolph, Williamson, and Franklin Counties attended the 25th district conference held at Mound City on Friday, March 30, at the call of Fred Dietz, I. A. A. Executive Committeeman.

Fred Dietz

After an explanation of the proposed plan of abandoning the state picnic in favor of district picnics, the meeting endorsed the proposal and voted for a joint picnic for the 24th and 25th congressional districts. A committee, composed of the presidents of each county Farm Bureau, was appointed to arrange the time and place for the picnic.

Mr. Dietz presented voting records and led the discussion regarding candidates for the legislature from that section. He also read the replies of prospective delegates to the national Republican and Democratic conventions, in answer to a questionnaire submitted several weeks ago by the Association.

Strip Mining Discussed

The question of abolishing strip mining by legislation received consideration. It was pointed out that coal lands in some sections of Southern Illinois are more valuable for strip mining than for agricultural purposes, and that legislation prohibiting the sale of land for this purpose would work an injustice against owners of such property. On motion by Mr. Lingenfelter, proposed action on the question was tabled.

Vernon Vaniman, director of Insurance Service presented the proposed life insurance program and considerable interest was shown by all counties. The plan was favorably received. It was pointed out that further progress of the life insurance project rests with the executive committees of the county Farm Bureaus. Questions on storm, hail, and crop insurance received considerable attention.

Resolutions placing the conference on record against the endorsement of any candidates for office, advising that the counties refrain from any tendency toward partisan politics, and urging every farmer to vote in the coming primaries were carried without a dissenting vote.

The Pulaski County Farm Bureau extended an invitation to return to Mound City for the next conference.

Limestone Orders Must Be Placed Through Farm Bureaus For 10c Refund

FARM BUREAU members should see their county advisers for details regarding the new limestone plan," states J. R. Bent, director of the Limestone-Phosphate Department for the I. A. A.

"If members are to get the benefit of the 10 cent per ton discount their orders must be placed through their county Farm Bureaus in the method provided," states Bent. "If orders are forwarded direct to the limestone companies they will not receive the benefit of the concession."

Under the new plan members will not receive a discount at the time of payment, but they will receive a refund check in due time, covering the 10 cent per ton rebate.

Discuss Marketing

(Continued from page 1)

ance plan had been presented before 13 district conferences, where the interest was keen and discussion indicated a wide demand for the new service. He reported that few county Farm Bureau boards had met since the district conferences, and thus had had no opportunity to vote on the project.

It was reported that 10 limestone companies had signed the contract offered by the I. A. A. up to April 1. These inlcuded all the large companies with the exception of Dolese and Shepard. Full information regarding prices, sources of supply, and delivered cost of limestone was forwarded to each county last week.

Farmers' Elevator

(Continued from page 1)

tion, submit to the representative of the Farmers Grain Dealers Association of Illinois our willingness to employ and maintain a grain marketing director to carry out a program which may be agreed upon by both the Farmers Grain Dealers Association of Illinois and the Illinois Agricultural Association.

Business men, including salesmen, merchants and bankers are the heaviest drinkers of harmful liquors according to the Keeley Institute at Dwight, Ill. Farmers and mechanics drink very little, states the report.

At a meeting of the I. A. A. staff on April 7, the members unanimously recommended that the next annual meeting be held the last week in January, 1929.

100 Attend I. A. A. District Conference In Dixon On March 23

ONE hundred I. A. A. members from the counties of Jo Daviess, Stephenson, Carroll, Lee, Ogle, and Whiteside attended the 13th I. A. A. district conference in the court house at Dixon on Friday, Mar. 23.

C. E. Bamborough

C. E. Bamborough of Polo, I. A. A. Executive Committeeman, led the discussion during the afternoon regarding the voting records of legislators from that district in the 55th General Assembly. Mr. Bamborough expressed the policy of the Association of not endorsing any candidates for political office, and then analyzed the voting records as presented in a recent issue of THE I. A. A. RECORD.

Questionnaires Read

Replies of prospective delegates to the national Republican and Democratic conventions regarding their stand on farm issues and presidential candidates also were read. The meeting refused to endorse any candidates for delegate from that section in line with the I. A. A. policy.

Donald Kirkpatrick, legal counsel, opened the discussion in the morning, and spoke on the I. A. A.'s auto insurance program. In the afternoon he presented the proposed life insurance plan which was favorably received.

The meeting endorsed the plan of abandoning the state picnic in favor of district I. A. A. picnics. Chairman Bamborough appointed the presidents of all the Farm Bureaus in the district to act with him in deciding the time and place for a picnic for the 13th district.

Official From South Africa Studies Co-ops

J. M. TINLEY, Division of Co-operation of the Department of Agriculture, Union of South Africa, who has been studying in the United States for the past two and one-half years, visited the Illinois Agricultural Association offices recently to study co-operative associations in Illinois.

George R. Wicker, director of business service and manager of the Illinois Agricultural Co-operatives Association, gave him first-hand information on co-operatives in this state.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the farm bureau was organized, namely to promote, protect and represent the business economic, social and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Edited by Department of Information, E. G. Thiem, Director, 608 South Dearborn Street, Chicago, Illinois. Entered as second-class matter October 20, 1925, at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Accepted for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the ILLINOIS AGRICULTURAL ASSOCIATION RECORD. Champaign Still Floundering

THE Illinois Tax Commission recently issued its second order directing the Champaign county board of review to obey the law and equalize assessed valuations between farm lands and city real estate in that county.

The cry of distress, hardship, and what not raised by the local press and taxing officials following this act is comparable to a pre-election ballyhoo. Bad advice and political wire pulling are chiefly responsible for the tangle. The county board of review, which has been made the goat, has allowed others to influence the members against their better judgment.

Let us briefly review the history of the controversy. Last summer the Champaign County Farm Bureau through its Tax Committee brought to light certain inequalities showing that assessed valuations in four townships including the cities of Champaign, Urbana, and Rantoul were considerably below valuations in the rest of the county.

This was presented to the county board of review. The board admitted the substantial accuracy of the figures taken from the county records, but it refused to do anything about it on the ground of inexpediency.

That was last September.

The Farm Bureau appealed to the State Tax Commission and a hearing was held in Chicago on October 6. The board of review did not contest the Farm Bureau's figures, and admitted that inequalities existed. The matter was left to the discretion of the Tax Commission for any action it saw fit to take.

The Commission ordered the Farm Bureau and the board of review to get together, continuing the case until October 18. The board and opposing parties returned on October 18 with a group of attorneys who sought to vitiate the damaging testimony in the previous hearing in which the board of review admitted the inequalities.

The attorneys pleaded that the board of review had no authority to offer such testimony on the technical ground that the board was legally adjourned at the time.

"This Commission has no patience with mere technicalities when justice is at stake," said Chairman Malone. "The board of review of Champaign county did not remonstrate when the Farm Bureau presented its case showing that inequalities existed."

"The plea of inconvenience is no argument," said Commissioner Francis. "It is our duty by law to equalize valuations when a maladjustment is revealed."

Ten days were allowed the Champaign county attorneys to review the figures of the Farm Bureau in an effort to show why a reassessment should not be ordered. The figures were never reviewed.

Another hearing was held on November 1. The Farm Bureau's figures stood unchallenged. The Commission issued its order in December for a reassessment and equalization in line with the true values of property in the respective taxing districts. Now it is April, nearly four months later. Dilly-dallying and evasion have characterized the action of the board of review during this period.

All that the Farm Bureau asked for was an equitable assessment in compliance with the law. There was ample time in which to make a real assessment.

But the situation is no farther along than it was six months ago. Now who is to blame? Substantial equality would be brought about by lowering farm lands 20 per cent and villages 30 per cent. The villages may not have enough money to pay expenses, but the board of review, which has consistently refused to equalize by raising valuations in the four townships where such action is needed, must bear the responsibility.

The tax muddle is regrettable. In issuing its two orders the Tax Commission merely obeyed the law which states very clearly that all property shall be assessed equally according to its true value. Public policy and the interests of everyone concerned demand that the necessary adjustments be made without delay.

25 Per Cent Cut in Stephenson

A 25 PER CENT cut in Stephenson county farm valuations was brought about following a hearing of Farm Bureau, I. A. A., and board of review representatives before the Illinois Tax Commission on April 4.

The order for reassessment and the subsequent 25 per cent reduction culminates another extended controversy. But here the board of review, unlike that in Champaign county, had the courage to investigate, learn the facts, and act when its duty was made clear. The revision will bring farm valuations down to the level of assessments in the city of Freeport.

The persistence of the Stephenson County Farm Bureau in standing firm for tax equality should have the everlasting gratitude and support of every farmer in the county. The Farm Tax Committees in both Stephenson and Champaign counties made at least three special trips to Chicago to present their causes before the Commission. No self-respecting member or non-member in either county will ever say the Farm Bureau never did anything for him.

Tune in on the I. A. A. half hour program broadcast daily at 12:30 P. M. from station WJJD, Chicago (365 meters). The facilities of station WJJD are loaned the Association through the courtesy of the Loyal Order of Moose, Mooseheart, Ill. No program on Saturdays and Sundays.

Judge Dickinson Speaks

NATIONAL conservation of our natural resources including wild life, forests, and natural game preserves was championed in a recent address on the I. A. A. daily farm radio program by the Hon. Jacob M. Dickinson of Chicago. Judge Dickinson is a foremost American jurist but he is better known as President Taft's Secretary of War.

J. M. Dickinson

Judge Dickinson was one of the founders and now holds an honorary office in the Izaak Walton League of America, national sportsmen's organization. He represented the United States before the Alaskan Boundary Tribunal in 1903, served later as general solicitor for the I. C. R. R., and in 1915 was appointed receiver for the Rock Island Lines. He returned from a health trip in the South only a few days before addressing the I. A. A. radio audience. Judge Dickinson is 77 years old.

Dr. Van Norman Coming

New uses for dried milk and the work of the American Dry Milk Institute will be presented in a radio address by Dr. H. E. Van Norman, director of the organization interested in developing this outlet for the product of the dairy cow.

Dr. Van Norman for many years was chief of the dairy department at the University of California. His address will be broadcast on the I. A. A. daily farm program from Station WJJD at 12:30 p. m. on Apr. 30. Tune in and hear him.

National Producers' President

C. B. DENMAN, president of the National Livestock Producers Association, and other members of the board are scheduled to talk to the livestock growers of the Middle West from the I. A. A. office over Station WJJD on Wednesday, Apr. 25.

The occasion will be the quarterly meeting of the National Producers' board of directors in Chicago. J. D. Harper, director of Information, and editor of the National Livestock Producer, will have charge of the program.

Ole Oleson

Ole Oleson of Cook county and A. D. Lynch, dairy marketing director of the I. A. A., will discuss the dairy business on the I. A. A. farm radio program, Wednesday, April 18. Ole became so famous through his broadcasts from the I. A. A. offices over Station WJJD that his services were demanded at many annual Farm Bureau meetings in the dairy district during the past few months.

18th District Meets At Danville, March 30, Discuss Limestone

Life Insurance Program Presented By Kirkpatrick Arouses Interest

THE first I. A. A. conference of the year was held in the 18th district at Danville on March 30 at the call of R. F. Karr of Iroquois, member of the I. A. A. Executive Committee.

R. F. Karr

Representatives from Iroquois, Vermilion, Clark, and Kankakee counties attended.

Mr. Karr first presented the plan for holding a giant I. A. A. picnic in each district in place of the annual state picnic. On motion of Gillfillan of Iroquois, seconded by Leemon of Vermilion county, the plan was adopted.

Want Refund

An expression was made in favor of modification of the refund plan contained in the limestone agreement adopted following a series of Farm Bureau conferences held about the state. The plan provides that the 10 cent per ton refund will be made available only to those who have ordered their limestone through the Farm Bureau on uniform blanks and have paid their bill in full within 15 days.

Moved by Gillfillan and seconded by Morris that the conference recommend to the Limestone-Phosphate Department of the I. A. A. that it use its best judgment and every honorable means to keep the cost of limestone down to that of 1927 or lower and that the contracts with the company be consummated at the earliest opportunity.

Donald Kirkpatrick, legal counsel for the I. A. A., outlined in some detail the proposed life insurance program. A discussion indicated considerable interest.

Jacksonville Conference On Mar. 23 Discusses Issues of Importance to Members

President Smith and V. Vaniman Present Legislative and Life Insurance Program

LIFE insurance, legislation, voting records of candidates, and other issues received consideration at the I. A. A. district conference held at Jacksonville on Friday, March 23. Charles Black, Executive Committeeman from the 20th district, presided. R. J. Laible of Greene county acted as secretary.

Chas. S. Black

After discussing the progress of the I. A. A. auto insurance service, V. Vaniman outlined the proposed life insurance program. President Earl C. Smith followed Mr. Vaniman and expressed the position of the I. A. A. Executive Committee in making Farm Bureau life insurance available. "We investigated the possibilities of life insurance after a demand was apparent in various sections of the state," he said. "The service will not be initiated unless the county Farm Bureaus want it. When 60 per cent of the county Farm Bureaus vote in favor of the plan we will make it available."

Surplus Legislation

Mr. Smith then discussed surplus control legislation and told about the changes that had been made in the McNary-Haugen bill to meet the objections of the President. The policy of the I. A. A. in furnishing its members with the voting records of candidates was thoroughly explained.

"Farm organizations can take three positions in regard to political issues," he said. "First, they can ignore them because of fear of entanglement. Second, they can get definitely into party politics. Third, they can take the position of the I. A. A. which is to secure full information about candidates, and send it to their members."

District Picnic Endorsed

It was moved by Ogle of Cass county and seconded by Arnold of Greene county that the I. A. A. state picnic be abandoned and that picnics be held in each congressional district instead.

Chairman Black was authorized to appoint a picnic committee with a representative from each county.

Charles Borgelt of Mason county, former Executive Committeeman, spoke briefly in favor of the life insurance program, and indicated his pleasure and appreciation in serving on the Executive Committee of the I. A. A. last year.

I. A. A. Conference At Macomb Hear Insurance, Voting Records Discussed

To Hold District Picnic, Kirkpatrick Presents New Life Proposal

VOTING records of candidates, the status of the McNary-Haugen bill, proposed gas tax legislation, insurance, district picnics, and other subjects were discussed at the Illinois Agricultural Association conference in the 14th district, held on Thursday, Mar. 22, at Macomb. M. G. Lambert, I. A. A. Executive Committeeman, presided.

M. G. Lambert

Farm Adviser J. H. Lloyd of Hancock County discussed the hog cholera control project in Western Illinois. It was suggested that the counties in that district might come to an understanding regarding prices for serum and virus to avoid confusion at county border lines.

Donald Kirkpatrick of the I. A. A. discussed the new limestone contract and explained how it would operate.

District Picnic Planned

It was moved by P. B. Scott of Mercer County and seconded by W. A. Stevenson of Henderson County that the 14th congressional district hold a district picnic this year. Each county Farm Bureau was asked to appoint a representative to act on a joint picnic committee. Mr. Lambert was elected chairman of the committee, and was asked to call the first meeting.

Farm advisers in the district reported on livestock marketing progress in their various counties.

It was moved by Cooper of Henderson County and seconded by Scott of Mercer County that meetings be held quarterly in the district, and that the next conference be held on May 22. Carried. Aledo was suggested for the next meeting, but on motion it was decided to leave the choice to the district picnic committee.

R. J. Hamilton, district manager, spoke briefly on organization.

Butterfat Prices Higher

Farm Adviser Doneghue of McDonough County discussed co-operative produce marketing and told about activities in his county where 170 farmers are selling their produce co-operatively. He stated that butterfat prices have risen considerably in that section since the organization of the cream-buying station at Macomb.

Donald Kirkpatrick presented the I. A. A. insurance program and spoke at length on the proposed plan for initiating life insurance as a new service. When 60 per cent of the county Farm Bureaus endorse the project the service will be made available.

Mr. Lambert led the discussion on the voting records of local candidates for the legislature. The members were urged to support those who had voted for the interests of their farm constituents.

Farm Adviser A. A. Olsen of Warren County acted as secretary of the meeting.

22nd District Votes To Picnic At Highland Pk.

Life Insurance Plan Creates Much Interest

THE district picnic plan was unanimously endorsed at the 22nd I. A. A. district conference held in East St. Louis on March 24. Frank Oexner presided and B. W. Tillman of St. Clair county acted as secretary.

Frank Oexner

Donald Kirkpatrick, legal counsel for the I. A. A., outlined in detail the proposed life insurance project in which he stated that the plan had been developed after more than a year's investigation. Much interest was shown in the new service, although it was decided not to take any action. Each County Farm Bureau was asked to act upon the proposal as soon as possible. When 60 per cent of all the counties endorse the plan, the service will be made available.

Stanley Castle and Mr. Miller of Madison county suggested Highland Park as a suitable place for the 22nd district picnic. It was moved, seconded, and carried that the Madison county invitation be accepted. The chairman was authorized to appoint a committee of five to set the date and make all arrangements.

It was suggested that the I. A. A. prepare a standard poster for the district picnics.

Representatives from all the counties in the district attended.

Visits I. A. A. Offices

Charles W. Holman, secretary of the National Co-operative Milk Producers' Marketing Federation, and L. Smith, a director in the Dairymen's League of New York, visited the Illinois Agricultural Association offices recently.

21st District Meets At Carlinville, Endorse New Picnic Plan, Insurance

Bid "Farmer" Rusk Goodbye In Resolution

EVERY county in the 21st congressional district was represented at the Illinois Agricultural Association conference held on March 29 at Carlinville at the call of Samuel Sorrells of Raymond, I. A. A. Executive Committeeman.

Sam Sorrells

H. J. Schultz, president of the Macoupin County Farm Bureau, presided. Mr. Sorrells led the discussion on candidates for the legislature from that section, and presented the voting records of members of the 55th General Assembly.

V. Vaniman, director of insurance service, outlined the proposed life insurance plan which the Association will initiate when 60 per cent of the County Farm Bureaus of the state demand this service. The life insurance program apparently was favorably received.

Serum Association

Mr. Sorrells also explained the work of the Illinois Farm Bureau Serum Association in buying the needs for 63 county members engaged in active hog cholera control campaigns.

The district picnic plan was unanimously endorsed.

In view of the fact that Farm Adviser E. W. Rusk of Macoupin county resigned recently to become agricultural agent for the Chicago and Illinois Midland Railroad, the following resolution was offered by Dwight Hart of Christian county and unanimously adopted:

Bouquet to Rusk

"Be it hereby resolved that the representatives of the executive committees of the four Farm Bureaus of the 21st district, comprising the counties of Macoupin, Montgomery, Christian, and Sangamon do hereby extend to E. W. Rusk, the retiring adviser of Macoupin county, the sincere appreciation of this 21st district for his untiring and faithful services to the Farm Bureau, not only in his own county, but in the entire district as well. We feel his counsel and accomplishments have been an inspiration which has not been confined to Macoupin county and the 21st district alone, but has been felt all over the state.

"Be it further resolved that we extend to him in his new field of labor our best wishes for his success, and also our sincere good will."

Southern Clover And Alfalfa Seed To Sing Swan Song Is Report

New Government Seed Service To Tell Source Of Origin

THE death knell of southern clover and alfalfa shipments to corn belt farmers has been sounded.

The U. S. Department of Agriculture recently instituted a new service whereby the source of origin of alfalfa, clover, and seed corn will be given on every bag or package. All the large seed dealers who handle approximately 90 per cent of all the clover, alfalfa and seed corn used in the country have subscribed for the service.

The inspection service is a benefit to the seed companies as well as to Middle West farmers who have lost thousands of dollars in times past by sowing worthless southern grown alfalfa or clover seed only to see a nice stand kill out completely the following winter.

Each Bag Labeled

Each seed bag will carry a verified origin certificate tag. There will be no government guarantee of germination, purity, or variety, however.

Each grower or shipper of seed under the department's service submits to the dealer either a declaration of origin or an official State certificate of origin of each shipment. The shipper filling in a shipper's declaration states that the lots described therein have been obtained directly from growers with proper declaration or other sufficient evidence as to locality of production; that the facts stated are correct to the best of his knowledge and belief, and that the locality of production and identity of each lot are properly covered in his records, which will be made accessible for verification by a Federal seed inspector at any time upon request.

How It Is Done

With declarations at hand covering the various lots of seed for which verification is desired, the verified-origin dealer makes application to the nearest inspector for an inspection certificate, giving the kind of seed, name of shipper and shipping point, or declaration number covering the shipment, date of shipment, shipper's lot number or mark, the verified-origin dealer's receiving lot number, the quantity in pounds, place where the seed was grown, and kind of declaration covering the shipment. This certificate is in effect a copy of the dealer's own record which may be examined at any time by a seed inspector. It entitles the verified-origin dealer to issue verified-origin seed certificates for all lots covered by it.

The verified-origin seed certificate is the recognized commercial document verifying the origin and identity of the seed which it covers.

This tag certificate gives, in addition to the name and address of the verified-origin seed dealer, the kind of seed, lot number, and where the seed was grown. It is attached to every bag in shipments made to purchasers who are not verified-origin seed dealers.

The department's new service is conducted under authority of Congress to establish an inspection service for perishable farm products. The act provides, among other things, for fees that are reasonable and that cover as nearly as possible the cost of the service. Accordingly, for seed listed in an inspection certificate a fee of 3 to 5 cents per 100 pounds is charged.

T. B. In Hogs Drops 55 Per Cent at Yards

TUBERCULOSIS infection in hogs received at the Chicago livestock market decreased 55 per cent during the past four years according to a survey recently completed by the Chicago Livestock Exchange.

Last December only 10.2 per cent of the hogs at the Union Stock Yards were retained by the federal inspectors because they were infected with tuberculosis.

During 1927 packers paid at Chicago $97,652.46 alone in 10c premiums on 382,570 hogs from accredited T. B. free counties. A county becomes accredited when all the breeding cattle within its borders have been tuberculin tested and the infection reduced to less than half of one per cent.

439 Accredited Counties

There are now 38 accredited counties in Iowa, 7 in Illinois, 12 in Minnesota, 27 in Wisconsin, 29 in Indiana, and enough in the other states of the Union to make 439 in all.

In 1908, the survey shows, less than four per cent of Chicago hogs had tuberculosis. Then as T. B. spread in poultry and dairy herds, tuberculosis in hogs rose steadily until it had mounted to 20 per cent in 1922.

Premiums paid by all packers for hogs from accredited counties in the corn belt totalled $500,000 during 1927.

Eight Counties Get New Farm Advisers

EIGHT Illinois counties have announced or will announce new county farm advisers according to reports received at the I. A. A. offices.

R. J. "Rusty" Laible, farm adviser in Greene County for the past three years, recently started work for the Marshall-Putnam Farm Bureau where he succeeds F. E. Fuller who moved to Bloomington. The Greene County Farm Bureau membership grew 70 per cent during Laible's incumbency. Mr. Fuller is managing a large number of farms in McLean County.

W. F. Coolidge of Bloomington, who has been active in the McLean County Farm Bureau, was employed by the Macoupin County Farm Bureau as adviser to succeed Earl W. Rusk. Mr. Rusk resigned to become agricultural agent for the Chicago and Illinois Midland Railroad, an Insull holding. Claude C. Coots of Modesto, has been engaged by Rusk to manage the railroad's experimental farm at Havana in Mason County.

Geo. H. Iftner, former teacher of vocational agriculture at Robinson, was employed recently to succeed Farm Adviser Wascher in Effingham County.

R. H. Clanahan, agricultural teacher from Pittsfield, has been chosen to succeed Farm Advisor Laible in Greene County. G. O. Stanley is the new county adviser in Cumberland County, while H. M. Adams was recently employed to succeed Charlie Robinson, former county adviser in Shelby County. L. Kimmel, former county adviser in Pope County, resigned April 1. H. F. Crosby, farm adviser in Menard County, according to reports will leave his office there May 15.

L. W. Braham succeeded J. F. Hedgcock as farm adviser in Will County several months ago.

Marchant Heads Farm Advisers

L. R. MARCHANT of Knox county was elected president, C. H. Keltner of Winnebago county, vice-president, J. W. Whisenand of Henry county secretary, and W. B. Bunn, of Richland county, treasurer of the Illinois State Association of Farm Advisers for 1928.

Directors are: C. E. Yale, Lee county; R. C. Doneghue, McDonough county, and F. W. Garrett, Douglas county.

Charter members of the State Association were active in helping organize the Illinois Agricultural Association back in 1916. Representative farm advisers serve on each advisory committee of the I. A. A. and the president attends all meetings of the I. A. A. executive committee.

Vote To Hold Four I. A. A. Conferences Yearly In 24th

Go On Record In Favor Of Free Discussion Meetings

MEMBERS of the I. A. A. from the 24th district, who met at Albion on March 31, endorsed the life insurance program as outlined by V. Vaniman, director of insurance service. Chas. Marshall, I. A. A. Committeeman, presided.

Chas. Marshall

Representatives from White, Massac, Gallatin, Edwards, Wayne, Johnson, and Saline counties were present.

The district picnic plan was unanimously endorsed, and it was decided to join with the 25th district in holding a joint picnic. Mr. Marshall was authorized to appoint a picnic committee of three to act with a similar committee from the 25th district.

Change Meeting Places

L. S. Foote of Johnson county moved that four conferences be held each year in the 24th district. The motion was seconded by Simpson of Gallatin county and carried.

It was decided to hold the next three meetings in successive order in Clay, Gallatin, and Massac counties.

L. F. Brissenden, district manager for the I. A. A., gave a brief talk on organization.

A. J. Libkie of Edwards county, H. H. Glasscock of Gallatin county, and J. C. Small of Saline county were appointed to serve on the picnic committee.

The opinion was expressed that more time should have been provided at the Carbondale limestone conference for full discussion of the new contract.

Scott County Forms a Co-op Produce Association

THE Scott County Produce Association was organized at a meeting held at Winchester on Thursday night, March 29, where Frank A. Gougler, director of produce marketing for the Illinois Agricultural Association, outlined the plan now being followed by produce associations in 16 other counties.

Nearly everyone who attended the meeting signed the contract to market his cream, poultry and eggs co-operatively. The following day seven more agreements were signed at the Farm Bureau office. When 125 contracts have been signed the organization will elect a board of directors and start operations.

Business men and merchants aided in promoting the produce association plan because they recognize that co-operatives will bring more money into the community and that they will share in the farmer's prosperity. Local buyers, it has been reported, have been paying such low prices for butterfat and poultry that many farmers drove 25 miles to Jacksonville to sell their produce on a better market.

Official From Poland Visits I. A. A. Officers

LOUIS LADOS, a representative of the Central Co-operative Association of Warsaw, Poland, and the local consul for the Polish Government, spent considerable time in the Illinois Agricultural Association office recently securing information on farmers' elevators whose books are audited by the I. A. C. A. Mr. Lados already has visited the farmers' elevator at Morrison in Whiteside County and the Watseka Farmers' Grain Company in Iroquois County. Following his studies downstate, Mr. Lados will return to Chicago to study operations in the terminal market.

He comes as a representative of the Ministry of Agriculture in Poland. He is particularly interested in grain marketing organizations in the United States. The Polish officials were introduced through a letter from Chris L. Christensen, director of co-operative marketing for the U. S. Dept. of Agriculture, to Geo. R. Urcher, director of business service for the I. A. A.

Enters Baseball League

P. F. Burns was appointed chairman, W. H. Sappington, Earl Gilman, Hardin Young, and George H. Vannier were appointed members of a committee to organize a Farm Bureau baseball team in Scott county.

The committee already has applied for admission to the Illinois Farm Bureau Baseball League.

Full of Ambition!

All Counties Represented At 23rd District Conference, Salem, Called By W. L. Cope

Endorse Policy and Commend I. A. A. For Publishing Voting Records

NEARLY 50 representatives from Crawford, Lawrence, Richland, Clinton, Marion, Wabash, Jefferson, and Effingham counties attended the Illinois Agricultural Association district conference held in the 23rd district at Salem on March 22.

W. L. Cope

John Rogier of Marion county was elected chairman and John R. Spencer, secretary of the meeting.

W. L. Cope, executive committeeman representing the 23rd district, explained the district picnic plan which was adopted unanimously.

Baseball Interest

Lloyd Caldwell of Jefferson county opened a discussion on Farm Bureau baseball. Three of the counties represented signified their intention of bringing out organized Farm Bureau teams.

Mr. Cope discussed the legislative situation and presented the I. A. A.'s policy on publishing voting records. The conference endorsed the policy and commended the Association for giving the members of the district complete information on their candidates for office.

William Moorman, manager of the Shelby County Oil Company, led a discussion after lunch on the advisability of organizing Farm Bureau oil companies and the problems involved in their operation.

Vote For Insurance

V. Vaniman, director of insurance service for the I. A. A., reviewed briefly the program of the Illinois Agricultural Mutual Insurance Company and asked for expressions as to whether or not they regarded auto insurance as an asset to the Farm Bureau. An overwhelming vote was registered in favor of insurance. He next outlined the proposed life insurance program, describing in detail the three different kinds of policies to be provided under the plan. Briefs were distributed setting forth the life insurance plan and illustrating how it would operate.

The next monthly meeting of the I. A. A. Executive Committee will be held on Friday, May 11.

The Scott County Farm Bureau decided not to organize its own company in view of the fact that the Morgan Oil Company is serving, or will serve, all sections of Scott county.

Future of Motor Trucking Revealed in I. C. C. Report

Quasey and Kirkpatrick Represent I. A. A. in a Series of Hearings

REGULATION of motor trucks and bus lines, and a complete treatise on the development of freight service by motor trucks is the subject of a lengthy report of the Interstate Commerce Commission known as docket No. 18300.

L. J. Quasey

The report grew out of a series of hearings throughout the United States during 1927 and early 1928. The purpose of the hearings was to bring to light facts regarding motor truck and bus transportation with the view of recommending regulatory measures in the interest of the public.

L. J. Quasey, director of transportation, and Donald Kirkpatrick, legal counsel, represented the Illinois Agricultural Association at the various hearings.

Truck Service Popular

The Commission states that throughout the hearing few complaints were registered against the service rendered by either contract carrier or common-carrier trucks. Motor-truck service for short hauls was generally commended by shippers. Promptness of delivery was recognized as an important advantage. Little uniformity between rates and charges for transportation for both goods and passengers was apparent. The Commission found it impossible to make a fair comparison of truck rates with rail rates.

In Connecticut transportation by motor truck for 20 miles is three cents per 100 lbs. lower than the rail rate; for 30 miles it approximates the rail rate; for 50 miles it is two cents higher; for 75 miles it is ten cents higher and for 100 miles, 19 cents higher. In Louisiana and North Carolina truck rates approximate the corresponding rail rates. In other sections truck rates vary above and below rail rates. Few operators of individual trucks and even of fleets of trucks have kept adequate cost records.

Livestock Transportation

Reporting on the increase in transportation of livestock by motor truck the Commission says: "Through the use of the railroad and motor trucks, farmers are now enabled to save 18 to 36 hours in delivering their livestock to market. This, of course, applies to short hauls of 150 miles or less. Three and one-third million hogs were motor trucked to 15 principal markets in the United States in 1925. This approximated 11 per cent of the total receipts. Calves, cattle, and sheep, likewise, are being hauled to market in increasing numbers by motor truck.

The Way To Market

Truck-In Business Grows

In 1922, 28,103 head of cattle were motor-trucked to the Sioux City, Iowa, stockyards and in 1925 the number was 79,966, representing 4.07 per cent and 9.47 per cent, respectively, of the total receipts in those years. In 1922, 277,514 hogs were motor-trucked to Sioux City, and in 1925, the number was 665,394, representing 14.95 per cent and 19.59 per cent, respectively, of the total receipts of hogs at that market. In 1922, the number of calves hauled by motor truck to Sioux City represented 7.11 per cent of the total receipts and in 1925, 24.9 per cent. In 1922, 8.06 per cent of the total receipts of sheep were motor-trucked and in 1925, 11.73 per cent. The average length of haul to the Sioux City market is 35 to 40 miles, with a maximum haul of about 100 miles.

Large Increase Here

In 1925, the receipts of livestock by motor truck at South St. Paul, Minn., were about 7 per cent of the total receipts, representing an increase in 1925 as compared with 1924 of approximately 37 per cent. About 75 per cent of the motor-hauled livestock received at this market originates within a radius of 60 miles.

Donald Kirkpatrick

The livestock hauled by motor truck to the Kansas City, Mo.-Kans., stockyards shows a gradual increase from 1921 to 1925. The total number of livestock received by motor truck at this stockyard in 1921 was 228,762 and in 1925, 354,184, which was about five per cent of the total receipts of all meat animals.

Smaller Growth Chicago

There is a smaller percentage of total receipts of livestock coming into the Chicago stockyards by motor truck than at most of the other principal markets, largely due, it is stated, to the congestion encountered by the motor trucks going to and from the stockyards. The percentage of the total of all classes of livestock received at the Chicago market by motor truck varied from .32 per cent in 1920 to .91 per cent in 1925. The total number received by motor truck in 1925 was 128,215 head. The radius of operations for motor trucks handling livestock to the Chicago market ranges from about 30 to 60 miles and in some instances, 70 miles.

Indianapolis Figures

In the Indianapolis, Ind., market in 1913 only 4.5 per cent of the total receipts of hogs were transported by motor truck while in 1923, 32.5 per cent were hauled by motor truck. The length of haul of these shipments was approximately 50 miles. The rates for the transportation of hogs and cattle to packing plants at Indianapolis have been reduced because of a rapidly developing practice of hauling return loads of merchandise, agricultural machinery, fertilizers, cement, and building material from the industrial center to small towns along the route of the truck operator. Approximately 180 tons of return loading are being transported weekly from Indianapolis to surrounding territory on returning stock trucks.

Poultry Trucking Grows

Shipments of poultry by motor truck are increasing in number. A farmer in Minnesota stated that though there was a shrinkage of five or six pounds per crate on rail shipments, it was only about one pound when motor trucks were used. He can deliver his poultry in Minneapolis, a distance of about 50 miles, in a little over two hours by truck and is enabled to obtain the benefit of the Minneapolis market price which is usually five or six cents per pound over his local market.

The advantage of motor truck transportation for shipments of livestock for short distances are: A minimum of shrinkage, quick delivery, ability to take advantage of favorable market prices, less cost for food and watering stock, and ability to make shipments of a few animals at a time.

GATES TO LASALLE

C. E. GATES, assistant state club leader, has been employed as farm adviser in LaSalle county to succeed Walter W. McLaughlin. McLaughlin resigned recently and according to reports has been employed by one of the banks at Decatur to manage its agricultural interests.

CONGRESSMEN ASWELL OF Louisiana, Fort of New Jersey, Crisp of Georgia and Clarke of New York were principal speakers against the Haugen Bill in the early debate in the House. Ketcham of Michigan appeared in behalf of the export debenture plan.

The Illinois Agricultural Association RECORD

Published monthly by the Illinois Agricultural Association at 404 North Wesley Ave., Mount Morris, Ill. Entered as second class matter at post-office at Mount Morris, Ill., October 20, 1925, under the Act of Mar. 3, 1879. Acceptance for mailing at special rate of postage provided in Section 412, Act of February 28, 1925, authorized October 27, 1925.

Volume 6 **MAY, 1928** **Number 5**

Corn Borer Due In Illinois This Year Be On The Lookout

Moths Now Emerging From Chrysalis In Infested Areas

THE European corn borer will strike Illinois in numbers within the next few weeks if the previous progress of the insect westward continues. Prevailing easterly winds in late May and June two years ago brought the borer moths a long ways toward Illinois into southwestern Michigan and northwestern Indiana.

The moths come out of their wintering quarters in May and June just as the tiny corn plants are leaving out. With favorable winds they will take the air and come westward, striking first, in all probability, the corn fields of Cook, Will, Kankakee, Lake and Iroquois counties.

The borer has advanced its front line trenches to within 50 miles of Chicago already. The insects have been found in numbers a little farther east, about Plymouth, Indiana, and in Berrien county, the easternmost county in Michigan.

Bore Into Stalk

The moths lay their eggs in protected places on the young corn plants and within a few days the little larvae, or grubs, hatch out. They start feeding on the tender leaves at once. The larvae grow rapidly. Within a few days after birth, they bore their way through the stock well into the interior, where they lead a comfortable, protected existence feeding on the stalk juices and vegetable matter, and striking at the heart of the young plant.

The borer doesn't kill the plant. It merely weakens it, stunts the growth, and produces nubbins instead of healthy ears.

As a result of borer ravages, farmers in Kent and Essex townships, Ontario, Canada, have virtually stopped corn growing. Some acreage has been abandoned likewise in Michigan and Ohio, and states farther east.

If the borer hits Cook county it may play havoc with the county's million dollar sweet corn crop. The corn-borer is fond of sweet corn.

(Continued on page 5)

Another Record

Organized agriculture hung up another record in convincing an overwhelming majority in Congress of its earnestness in demanding adequate farm surplus control legislation. Read the story which begins to the right.

WAH HOO! WHOOP-E-E-E!! . . .

CHIEF OH-NEI-O-WAH-WEH-TWAS himself, otherwise known as Russell Hill, U. S. assistant county agent for corn borer work on the four Western New York reservations, is shown here broadcasting on the corn borer to the Indian farmers. This is said to be the first time in the history of radio that a talk in the Indian language has been sent through the air.

Did we say "broadcasting?" Broadcasting is right, as one glance at this picture will show. Here is the chief all loaded for bear, with war feathers and tomahawk clinched in his bronze fist. He began his talk with a few war whoops, spelling death to the borer on the Indian reserves. By the way, Russell's new name, "Oh-Nei-O-Wah-Weh-Twas," is of his own coinage and means Corn Borer. His Indian friends nicknamed him that because of the work he is doing.

Fres. Smith And Other Farm Leaders Ask Mr. Coolidge To Sign Bill

Haugen Measure Passes House With Nearly Two-Thirds Majority By Vote 204 To 121

PRESIDENT EARL C. SMITH, Sam H. Thompson, and 14 other farm representatives called at the White House on Saturday, May 12, and asked President Coolidge to sign the McNary-Haugen bill which passed both houses of Congress by overwhelming majorities.

The President gave the party a cordial reception. President Sam H. Thompson of the American Farm Bureau Federation acted as spokesman for the group. The following statement was submitted to Mr. Coolidge by the delegation:

"Mr. President: We have asked for this meeting in order to express to you our hope that you will approve the agricultural bill S. 3555, by Senator McNary and Mr. Haugen, when it reaches you.

An Honest Effort

"This measure represents an honest effort to meet every objection and suggestion expressed by you that can be met without departing completely from the fundamental principles for which the farm groups represented here, and many other farm organizations which unfortunately could not be represented here this morning, have been contending for years.

"We realize this is not the time to present a discussion of the details of the measure. They are comprehensively, and we feel, fairly presented in both the Senate and House Committee reports.

"It has been suggested that your

Future of Motor Trucking Revealed in I. C. C. Report

Quasey and Kirkpatrick Represent I. A. A. in a Series of Hearings

REGULATION of motor trucks and bus lines, and a complete treatise on the development of freight service by motor trucks is the subject of a lengthy report of the Interstate Commerce Commission known as docket No. 18300.

L. J. Quasey

The report grew out of a series of hearings throughout the United States during 1927 and early 1928. The purpose of the hearings was to bring to light facts regarding motor truck and bus transportation with the view of recommending regulatory measures in the interest of the public.

L. J. Quasey, director of transportation, and Donald Kirkpatrick, legal counsel, represented the Illinois Agricultural Association at the various hearings.

Truck Service Popular

The Commission states that throughout the hearing few complaints were registered against the service rendered by either contract carrier or common-carrier trucks. Motor-truck service for short hauls was generally commended by shippers. Promptness of delivery was recognized as an important advantage. Little uniformity between rates and charges for transportation for both goods and passengers was apparent. The Commission found it impossible to make a fair comparison of truck rates with rail rates.

In Connecticut transportation by motor truck for 20 miles is three cents per 100 lbs. lower than the rail rate; for 30 miles it approximates the rail rate; for 50 miles it is two cents higher; for 75 miles it is ten cents higher and for 100 miles, 19 cents higher. In Louisiana and North Carolina truck rates approximate the corresponding rail rates. In other sections truck rates vary above and below rail rates. Few operators of individual trucks and even of fleets of trucks have kept adequate cost records.

Livestock Transportation

Reporting on the increase in transportation of livestock by motor truck the Commission says: "Through the use of the railroad and motor trucks, farmers are now enabled to save 18 to 36 hours in delivering their livestock to market. This, of course, applies to short hauls of 150 miles or less. Three and one-third million hogs were motor trucked to 15 principal markets in the United States in 1925. This approximated 11 per cent of the total receipts. Calves, cattle, and sheep, likewise, are being hauled to market in increasing numbers by motor truck.

The Way To Market

Truck-In Business Grows

In 1922, 28,103 head of cattle were motor-trucked to the Sioux City, Iowa, stockyards and in 1925 the number was 79,966, representing 4.07 per cent and 9.47 per cent, respectively, of the total receipts in those years. In 1922, 277,514 hogs were motor-trucked to Sioux City, and in 1925, the number was 665,394, representing 14.95 per cent and 19.59 per cent, respectively, of the total receipts of hogs at that market. In 1922, the number of calves hauled by motor truck to Sioux City represented 7.11 per cent of the total receipts and in 1925, 24.9 per cent. In 1922, 8.06 per cent of the total receipts of sheep were motor-trucked and in 1925, 11.73 per cent. The average length of haul to the Sioux City market is 35 to 40 miles, with a maximum haul of about 100 miles.

Large Increase Here

In 1925, the receipts of livestock by motor truck at South St. Paul, Minn., were about 7 per cent of the total receipts, representing an increase in 1925 as compared with 1924 of approximately 37 per cent. About 75 per cent of the motor-hauled livestock received at this market originates within a radius of 60 miles.

Donald Kirkpatrick

The livestock hauled by motor truck to the Kansas City, Mo.-Kans., stockyards shows a gradual increase from 1921 to 1925. The total number of livestock received by motor truck at this stockyard in 1921 was 228,762 and in 1925, 354,184, which was about five per cent of the total receipts of all meat animals.

Smaller Growth Chicago

There is a smaller percentage of total receipts of livestock coming into the Chicago stockyards by motor truck than at most of the other principal markets, largely due, it is stated, to the congestion encountered by the motor trucks going to and from the stockyards. The percentage of the total of all classes of livestock received at the Chicago market by motor truck varied from .32 per cent in 1920 to .91 per cent in 1925. The total number received by motor truck in 1925 was 128,215 head. The radius of operations for motor trucks handling livestock to the Chicago market ranges from about 30 to 60 miles and in some instances, 70 miles.

Indianapolis Figures

In the Indianapolis, Ind., market in 1913 only 4.5 per cent of the total receipts of hogs were transported by motor truck while in 1923, 32.5 per cent were hauled by motor truck. The length of haul of these shipments was approximately 50 miles. The rates for the transportation of hogs and cattle to packing plants at Indianapolis have been reduced because of a rapidly developing practice of hauling return loads of merchandise, agricultural machinery, fertilizers, cement, and building material from the industrial center to small towns along the route of the truck operator. Approximately 180 tons of return loading are being transported weekly from Indianapolis to surrounding territory on returning stock trucks.

Poultry Trucking Grows

Shipments of poultry by motor truck are increasing in number. A farmer in Minnesota stated that though there was a shrinkage of five or six pounds per crate on rail shipments, it was only about one pound when motor trucks were used. He can deliver his poultry in Minneapolis, a distance of about 50 miles, in a little over two hours by truck and is enabled to obtain the benefit of the Minneapolis market price which is usually five or six cents per pound over his local market.

The advantage of motor truck transportation for shipments of livestock for short distances are: A minimum of shrinkage, quick delivery, ability to take advantage of favorable market prices, less cost for food and watering stock, and ability to make shipments of a few animals at a time.

Galesburg Gets I. A. A. Farm Bureau Picnic in Fifteenth District

Endorse Accredited Limestone Companies, Discuss Oil and Insurance at Cambridge Conference

GALESBURG will be the scene of the I. A. A. Farm Bureau Picnic in the 15th district. This was decided at the I. A. A. conference Cambridge, on April 24. The president of each Farm Bureau will serve with the advisers on the picnic committee. The local chamber of commerce will be asked to cooperate as it has done before with the Knox County picnics.

A. N. Skinner

Farm advisers and representatives from each county recommended that limestone be bought only from the I. A. A. accredited companies. A resolution to this effect, drawn by W. B. Elliott, W. H. Brown, Jr., and J. W. Whisenand, was carried unanimously.

Better Accommodations

The question of better accommodations to livestock shippers from the railroads was discussed. Several members expressed the belief that passes should be granted to livestock shippers. A. N. Skinner, who represents the district on the I. A. A. Executive Committee, agreed to refer the matter to the Transportation Department of the Association.

Marchant, Skinner, and Gehring of Knox County explained thoroughly the operation of the Knox County Oil Company for the benefit of those interested.

Vernon Vaniman, director of insurance stated that several thousand 4-H calendars already had been ordered. A motion to endorse the calendar plan and refer it back to the County Farm Bureau executive committees for further action, was carried unanimously.

Life Insurance Plan

Vaniman then briefly discussed automobile, hail, and windstorm mutual insurance before explaining the proposed life insurance program. Briefs of the plan were handed to all the representatives present, and the Farm Bureaus were urged to take action before May 11.

It was decided to hold the next district conference at Rushville in Schuyler county, on Tuesday, September 18.

A. N. Skinner of Yates City ably presided. L. E. McKinzie of Rushville acted as secretary.

WINS I. A. A. TROPHY

"Winning this beautiful cup has been the primary impulse for turning discouragement into hope," writes J. L. Long, University of Illinois student in thanking the I. A. A. for the silver loving cup he won in the student livestock judging contest held at Urbana. "It has given me the necessary encouragement to go on and work harder. Granting that any boy winning the trophy appreciated, and received as much help from it as I, then undoubtedly donating it has been a valuable service to the boys in the College of Agriculture."

Farm Delegates Go To Kansas City

IN view of the importance of selecting a presidential candidate acceptable to the farmers of the United States and of adopting an agricultural plank that promises to meet the needs of American agriculture, State Republican Conventions have selected prominent farm representatives as delegates at large to the Kansas City Convention in June.

Earl C. Smith, president of the I. A. A., was chosen from Illinois, Chas. E. Hearst, president of the Iowa Farm Bureau Federation from that state, and Frank Murphy, legislative representative of the Corn Belt Committee from Minnesota.

It is understood other states will do likewise and thus organized agriculture will be fittingly recognized and represented in this Convention.

Sixteenth District Holds Conference Princeton, Picnic to Pekin-Peoria

Want State Championship Baseball Game If Possible

FIVE counties were represented at the I. A. A. district conference held in the 16th district, Princeton, on April 23.

A. R. Wright

G. G. Weller, president of the Bureau County Farm Bureau, called the meeting to order and asked A. R. Wright, executive committeeman of the I. A. A., to preside. George B. Storey of Tazewell county was elected chairman of the meeting at the suggestion of Mr. Wright. Wayne A. Gilbert, assistant adviser in Tazewell county, acted as secretary.

Mr. Wright outlined the plan for holding district picnics. On motion by Shaw and seconded by Hatch, the district picnic plan was adopted making it optional for any county Farm Bureau to hold its own picnic if it so desires. Arnett of Tazewell county suggested that the picnic date be late enough to secure a semi-final or final game of the Illinois Farm Bureau Baseball League.

Committee Appointed

Mr. Wright appointed a district picnic committee as follows: Chairman, O. L. Hatch, Stark county, C. R. Ford, Peoria county, F. S. Clift, Marshall-Putnam county, Gilbert Weller, Bureau county, and Joseph Morris, Tazewell county.

Mineral Springs Park, Pekin, and two parks in Peoria were suggested as suitable locations. August 25 was suggested as a possible date but no action was taken.

Hail Insurance Plan

Vernon Vaniman, outlined the mutual insurance program and stated that by proper arrangement county Farm Bureaus might receive $1.50 per $1000 worth of hail insurance written in any county. After presenting the proposed life insurance plan, Vaniman asked that each executive committee act on the project and report to the I. A. A. on or before May 11.

Ray E. Miller reported on the activities of the Farm Bureau shipping associations and the producer terminals in increasing the volume of livestock sold co-operatively.

R. J. Hamilton reported on organization activities. He stated that Farm Bureau morale was on a high plane.

Ask Coolidge to Sign Bill

(Continued from page 3)

objections to the equalization fee provisions in the measure are fundamental. We trust this will not prove to be the case. You have repeatedly discussed the problem of agricultural surpluses, recognizing it as a barrier to the successful stabilization and protection of the widely grown cash crops of agriculture. We urge that you consider the equalization fee in the light of the following facts:

Distributes Cost Fairly

"It is the only device yet proposed by which the cost of organized handling of the surplus may be distributed fairly over all the producers who market the commodity. To deny the equalization fee is to deny the producer of some of the most important American crops his place in the American protective system.

"Without it we feel that experience has proven there is no possibility for the development of large-scale co-operative associations competent to deal with surpluses in an orderly manner. It is true others have insisted co-operative associations will be able to accomplish these ends if they are assisted through additional credit. It is in recognition of this latter view that Congress has provided for such loans in the measure just passed.

A Patriotic Board

"We respectfully urge that this measure be judged in the light of administration in the hands of an able and patriotic board such as it would be your concern and wish to select. It would deal fairly and conscientiously with the problems that arise.

"We believe, and we desire nothing so much as to have you share our conviction, that under the administration of such a board the provisions of this measure can be made effective for good in all branches of agriculture, laying the foundation for a new national farm policy, bringing renewed hope and encouragement to farmers in every part of the United States, thus restoring the purchasing power of the American farmers, which is essential for permanent national prosperity.

Many in Party

Included in the party who called on the President, in addition to Thompson and Smith, were Geo. N. Peek, chairman Executive Committee of 22; Wm. Hirth, chairman, Corn Belt Committee; Chas. E. Hearst, president, Iowa Farm Bureau; Wm. H. Settle, president, Indiana Farm Bureau; Dr. B. W. Kilgore, president American Cotton Growers' Exchange; W. W. Pitts, chairman, Legislative Committee, American Cotton Growers'; Frank W. Murphy, chairman, Legislative Committee, Corn Belt Committee; Ralph Snyder, president, Kansas Farm Bureau; Ed. O'Neil, vice-president, American Farm Bureau Federation; Chester Gray, legislative representative, American Farm Bureau; A. H. Stone, president, Long Staple Cotton Growers' Association; C. E. Huff, president, Kansas Farmers' Union; and Chester C. Davis, agricultural economist.

President Coolidge indicated that the statement and request would receive his careful consideration.

16 Hour Debate

The final vote on the Haugen bill in the House, which came on May 3, followed a long 16-hour debate marked by heated argument and discussion. The vote of 204 in favor to 121 against lacked only 12 votes of being a two-thirds majority of all those voting in favor of the bill.

Illinois Congressmen gave the measure 18 votes, the largest number from any state. Voting in favor of the measure were the following Illinois Congressmen: Adkins, Allen, Arnold, Denison, Hall, Holaday, Wm. E. Hull, Johnson, King, Major, Rainey, Rathbone, Reid, Williams, Yates, Buckbee, Irwin, and Sabath.

Against the measure were Chindblom, Morton D. Hull, Sproul, Michaelson, and Igoe—all from Chicago. Not voting were Doyle, Kunz, and Britten.

Smith Represents I. A. A.

The Illinois Agricultural Association was represented at Washington by its President throughout the period during which the bill was under preparation and consideration. The I. A. A. was largely responsible for simplifying and clarifying many provisions in the measure. After full explanation and clarification of the equalization fee principle, the Illinois Bankers' Association gave the measure its hearty endorsement. The equalization fee merely safeguards the loan feature and asks those who benefit to pay a proportionate share of the cost of handling the surplus of farm crops.

Sam H. Thompson

The measure passed the Senate previously without hearings.

The bill came up in the House on April 26, the day before the sudden death of Congressman Madden. On Apr. 28, it was announced that the bill would not be open to amendments until the following Thursday.

The measure was called up unexpectedly on Wednesday when many friends of the bill were absent, and by a fluke vote of 141-120 the House sitting as a committee of the whole eliminated the equalization fee.

Illinois Does Good Work

This vote was taken without roll call, and subsequently the forces favoring the bill were rallied with the results noted.

Congressman Charles Adkins of Decatur proved to be an outstanding leader in defense of the measure.

He was second to none in answering the arguments of opponents on the floor during debate. Other Illinois congressmen worked faithfully in behalf of the measure, and gave it their best support.

Newspaper reports implying that a trade had been made with advocates of flood control, and the boulder dam for support of the surplus control bill were entirely unfounded, declared President Smith.

Farm Relief In Vermilion Obtained Through Tax Cut

Landowners Save $150,000 Declares County Treasurer

"IN checking over the tax figures of Vermilion county, I find that the horizontal cut of 30 per cent in farm land values secured through the efforts and co-operation of the Vermilion County Farm Bureau in its hearing before the Board of Review last August 24, has saved the farmers of this county more than $150,000 in actual taxes," stated F. L. Endicott, county treasurer, in a recent letter to the directors of the Vermilion County Farm Bureau. "With a few specific exceptions in one or two townships and school district where local improvements required more money than usual, the reduction has averaged approximately 25 per cent lower than last year.

Urge Support F. B.

"The cut in valuations of farm lands in Vermilion county has been greater than that of any other county in the state and in my judgment the consistent and thorough manner in which the Vermilion County Farm Bureau carried out its program, together with the statistical data which is furnished at considerable expense of time and money, has been largely responsible for the satisfactory manner in which adjustments have been made. I feel it would have been impossible for me as your county treasurer, and it is very improbable that the Board of Review could have made such a horizontal cut of land taxes, without the efforts, statistics, and legal help which your organization of farmers furnished.

"I do not hesitate to say that I feel that every land owner in the county should loyally support your organization."

Corn Borer Due

(Continued from page 3)

Since the finding of a lone borer in Kankakee county in the fall of 1926, field workers have failed to find other traces of the insect.

The Purnell bill now before Congress which will probably be enacted appropriates $7,000,000 additional funds for the use of the government in continuing its warfare against the borer.

The Illinois Agricultural Association gave its support to this measure and will continue to aid any movement designed to curb the progress of the borer through Illinois cornfields.

Galesburg Gets I. A. A. Farm Bureau Picnic in Fifteenth District

Endorse Accredited Limestone Companies, Discuss Oil and Insurance at Cambridge Conference

GALESBURG will be the scene of the I. A. A. Farm Bureau Picnic in the 15th district. This was decided at the I. A. A. conference Cambridge, on April 24. The president of each Farm Bureau will serve with the advisers on the picnic committee. The local chamber of commerce will be asked to cooperate as it has done before with the Knox County picnics.

A. N. Skinner

Farm advisers and representatives from each county recommended that limestone be bought only from the I. A. A. accredited companies. A resolution to this effect, drawn by W. B. Elliott, W. H. Brown, Jr., and J. W. Whisenand, was carried unanimously.

Better Accommodations

The question of better accommodations to livestock shippers from the railroads was discussed. Several members expressed the belief that passes should be granted to livestock shippers. A. N. Skinner, who represents the district on the I. A. A. Executive Committee, agreed to refer the matter to the Transportation Department of the Association.

Marchant, Skinner, and Gehring of Knox County explained thoroughly the operation of the Knox County Oil Company for the benefit of those interested.

Vernon Vaniman, director of insurance stated that several thousand 4-H calendars already had been ordered. A motion to endorse the calendar plan and refer it back to the County Farm Bureau executive committees for further action, was carried unanimously.

Life Insurance Plan

Vaniman then briefly discussed automobile, hail, and windstorm mutual insurance before explaining the proposed life insurance program. Briefs of the plan were handed to all the representatives present, and the Farm Bureaus were urged to take action before May 11.

It was decided to hold the next district conference at Rushville in Schuyler county, on Tuesday, September 18.

A. N. Skinner of Yates City ably presided. L. E. McKinzie of Rushville acted as secretary.

WINS I. A. A. TROPHY

"Winning this beautiful cup has been the primary impulse for turning discouragement into hope," writes J. L. Long, University of Illinois student in thanking the I. A. A. for the silver loving cup he won in the student livestock judging contest held at Urbana. "It has given me the necessary encouragement to go on and work harder. Granting that any boy winning the trophy appreciated, and received as much help from it as I, then undoubtedly donating it has been a valuable service to the boys in the College of Agriculture."

Farm Delegates Go To Kansas City

IN view of the importance of selecting a presidential candidate acceptable to the farmers of the United States and of adopting an agricultural plank that promises to meet the needs of American agriculture, State Republican Conventions have selected prominent farm representatives as delegates at large to the Kansas City Convention in June.

Earl C. Smith, president of the I. A. A., was chosen from Illinois, Chas. E. Hearst, president of the Iowa Farm Bureau Federation from that state, and Frank Murphy, legislative representative of the Corn Belt Committee from Minnesota.

It is understood other states will do likewise and thus organized agriculture will be fittingly recognized and represented in this Convention.

Sixteenth District Holds Conference Princeton, Picnic to Pekin-Peoria

Want State Championship Baseball Game If Possible

FIVE counties were represented at the I. A. A. district conference held in the 16th district, Princeton, on April 23.

G. G. Weller, president of the Bureau County Farm Bureau, called the meeting to order and asked A. R. Wright, executive committeeman of the I. A. A., to preside. George B. Storey of Tazewell county was elected chairman of the meeting at the suggestion of Mr. Wright. Wayne A. Gilbert, assistant adviser in Tazewell county, acted as secretary.

A. R. Wright

Mr. Wright outlined the plan for holding district picnics. On motion by Shaw and seconded by Hatch, the district picnic plan was adopted making it optional for any county Farm Bureau to hold its own picnic if it so desires. Arnett of Tazewell county suggested that the picnic date be late enough to secure a semi-final or final game of the Illinois Farm Bureau Baseball League.

Committee Appointed

Mr. Wright appointed a district picnic committee as follows: Chairman, O. L. Hatch, Stark county, C. R. Ford, Peoria county, F. S. Clift, Marshall-Putnam county, Gilbert Weller, Bureau county, and Joseph Morris, Tazewell county.

Mineral Springs Park, Pekin, and two parks in Peoria were suggested as suitable locations. August 25 was suggested as a possible date but no action was taken.

Hail Insurance Plan

Vernon Vaniman, outlined the mutual insurance program and stated that by proper arrangement county Farm Bureaus might receive $1.50 per $1000 worth of hail insurance written in any county. After presenting the proposed life insurance plan, Vaniman asked that each executive committee act on the project and report to the I. A. A. on or before May 11.

Ray E. Miller reported on the activities of the Farm Bureau shipping associations and the producer terminals in increasing the volume of livestock sold co-operatively.

R. J. Hamilton reported on organization activities. He stated that Farm Bureau morale was on a high plane.

Ask Coolidge to Sign Bill

(Continued from page 3)

objections to the equalization fee provisions in the measure are fundamental. We trust this will not prove to be the case. You have repeatedly discussed the problem of agricultural surpluses, recognizing it as a barrier to the successful stabilization and protection of the widely grown cash crops of agriculture. We urge that you consider the equalization fee in the light of the following facts:

Distributes Cost Fairly

"It is the only device yet proposed by which the cost of organized handling of the surplus may be distributed fairly over all the producers who market the commodity. To deny the equalization fee is to deny the producer of some of the most important American crops his place in the American protective system.

"Without it we feel that experience has proven there is no possibility for the development of large-scale co-operative associations competent to deal with surpluses in an orderly manner. It is true others have insisted co-operative associations will be able to accomplish these ends if they are assisted through additional credit. It is in recognition of this latter view that Congress has provided for such loans in the measure just passed.

A Patriotic Board

"We respectfully urge that this measure be judged in the light of administration in the hands of an able and patriotic board such as it would be your concern and wish to select. It would deal fairly and conscientiously with the problems that arise.

"We believe, and we desire nothing so much as to have you share our conviction, that under the administration of such a board the provisions of this measure can be made effective for good in all branches of agriculture, laying the foundation for a new national farm policy, bringing renewed hope and encouragement to farmers in every part of the United States, thus restoring the purchasing power of the American farmers, which is essential for permanent national prosperity.

Many in Party

Included in the party who called on the President, in addition to Thompson and Smith, were Geo. N. Peek, chairman Executive Committee of 22; Wm. Hirth, chairman, Corn Belt Committee; Chas. E. Hearst, president, Iowa Farm Bureau; Wm. H. Settle, president, Indiana Farm Bureau; Dr. B. W. Kilgore, president American Cotton Growers' Exchange; W. W. Pitts, chairman, Legislative Committee, American Cotton Growers'; Frank W. Murphy, chairman, Legislative Committee, Corn Belt Committee; Ralph Snyder, president, Kansas Farm Bureau; Ed. O'Neil, vice-president, American Farm Bureau Federation; Chester Gray, legislative representative, American Farm Bureau; A. H. Stone, president, Long Staple Cotton Growers' Association; C. E. Huff, president, Kansas Farmers' Union; and Chester C. Davis, agricultural economist.

President Coolidge indicated that the statement and request would receive his careful consideration.

16 Hour Debate

The final vote on the Haugen bill in the House, which came on May 3, followed a long 16-hour debate marked by heated argument and discussion. The vote of 204 in favor to 121 against lacked only 12 votes of being a two-thirds majority of all those voting in favor of the bill.

Illinois Congressmen gave the measure 18 votes, the largest number from any state. Voting in favor of the measure were the following Illinois Congressmen: Adkins, Allen, Arnold, Denison, Hall, Holaday, Wm. E. Hull, Johnson, King, Major, Rainey, Rathbone, Reid, Williams, Yates, Buckbee, Irwin, and Sabath.

Against the measure were Chindblom, Morton D. Hull, Sproul, Michaelson, and Igoe—all from Chicago. Not voting were Doyle, Kunz, and Britten.

Smith Represents I. A. A.

The Illinois Agricultural Association was represented at Washington by its President throughout the period during which the bill was under preparation and consideration. The I. A. A. was largely responsible for simplifying and clarifying many provisions in the measure. After full explanation and clarification of the equalization fee principle, the Illinois Bankers' Association gave the measure its hearty endorsement. The equalization fee merely safeguards the loan feature and asks those who benefit to pay a proportionate share of the cost of handling the surplus of farm crops.

Sam H. Thompson

The measure passed the Senate previously without hearings.

The bill came up in the House on April 26, the day before the sudden death of Congressman Madden. On Apr. 28, it was announced that the bill would not be open to amendments until the following Thursday.

The measure was called up unexpectedly on Wednesday when many friends of the bill were absent, and by a fluke vote of 141-120 the House sitting as a committee of the whole eliminated the equalization fee.

Illinois Does Good Work

This vote was taken without roll call, and subsequently the forces favoring the bill were rallied with the results noted.

Congressman Charles Adkins of Decatur proved to be an outstanding leader in defense of the measure.

He was second to none in answering the arguments of opponents on the floor during debate. Other Illinois congressmen worked faithfully in behalf of the measure, and gave it their best support.

Newspaper reports implying that a trade had been made with advocates of flood control, and the boulder dam for support of the surplus control bill were entirely unfounded, declared President Smith.

Farm Relief In Vermilion Obtained Through Tax Cut

Landowners Save $150,000 Declares County Treasurer

"IN checking over the tax figures of Vermilion county, I find that the horizontal cut of 30 per cent in farm land values secured through the efforts and co-operation of the Vermilion County Farm Bureau in its hearing before the Board of Review last August 24, has saved the farmers of this county more than $150,000 in actual taxes," stated F. L. Endicott, county treasurer, in a recent letter to the directors of the Vermilion County Farm Bureau. "With a few specific exceptions in one or two townships and school district where local improvements required more money than usual, the reduction has averaged approximately 25 per cent lower than last year.

Urge Support F. B.

"The cut in valuations of farm lands in Vermilion county has been greater than that of any other county in the state and in my judgment the consistent and thorough manner in which the Vermilion County Farm Bureau carried out its program, together with the statistical data which is furnished at considerable expense of time and money, has been largely responsible for the satisfactory manner in which adjustments have been made. I feel it would have been impossible for me as your county treasurer, and it is very improbable that the Board of Review could have made such a horizontal cut of land taxes, without the efforts, statistics, and legal help which your organization of farmers furnished.

"I do not hesitate to say that I feel that every land owner in the county should loyally support your organization."

Corn Borer Due

(Continued from page 3)

Since the finding of a lone borer in Kankakee county in the fall of 1926, field workers have failed to find other traces of the insect.

The Purnell bill now before Congress which will probably be enacted appropriates $7,000,000 additional funds for the use of the government in continuing its warfare against the borer.

The Illinois Agricultural Association gave its support to this measure and will continue to aid any movement designed to curb the progress of the borer through Illinois cornfields.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Edited by Department of Information, E. G. Thiem, Director, 608 South Dearborn Street, Chicago, Illinois. Entered as second-class matter October 20, 1925, at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Accepted for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the ILLINOIS AGRICULTURAL ASSOCIATION RECORD. Postmaster: In returning an uncalled for or missent copy please indicate key number on address as is required by law.

Our New Grandmother

THE organized middlemen speaking through their official mouthpiece, the Federated Agricultural Trades of America, would make a great distinction between co-operative marketing initiated by farmers, and that induced by what they term "subsidized" government agencies.

The F. A. T. asserts that it is not opposed to co-operative marketing; it is merely against the government giving aid and encouraging farmers to this end. It would abolish the Division of Co-operative Marketing in the U. S. D. A., kill appropriations to the agricultural colleges under the Purnell Act for co-operative marketing investigation, and prevent Congress from passing legislation designed to help agriculture as other industries have been fostered and helped.

What nonsense is this? No one is being fooled by such a contradictive declaration of principles. Whenever a co-op spokesman counters to the organization's attack, he is suavely assured that the F. A. T. is the farmers' best friend. It's like the old story of Little Red Riding Hood and the wolf posing as her grandmother. We might have greater respect for the F. A. T. of America if it sailed under its true colors.

"Keep Out Of Politics"

DR. WM. E. DODD of the University of Chicago uttered several significant thoughts in his recent article, "Shall Our Farmers Become Peasants," published in the May issue of the Century Magazine.

Answering the critics who tell farmers to keep out of politics he writes: "The present vast industrial privilege is the result of a hundred years of business men in politics. The railway leaders have been in politics since 1850, and they operate now under the protecting law of 1920. There has never been a time when bankers were not in politics, and the great army of financial men are now protected and guided to steady and increasing profits by positive law. Even the labor organizations are shielded by state and national law. 'Let the farmer keep out of politics.'"

"Keep out of politics" is familiar advice. Added to many other delightful gems, this one bears further witness to the farmers' eminence as the most advised man. But this is one admonishment farmers will not follow if its purpose is to let others do their legislating for them. Passage of the McNary-Haugen bill is an illustration. We learn by experience.

We Must Progress

OUR good friend, DeWitt C. Wing, who on June 1 becomes editor-in-chief of the Rural New Yorker—one of the country's oldest and most successful farm weeklies—tells us that the Illinois Agricultural Association is well known in the East.

"A strong, effective farmers' organization that is doing its job," is the description he brought back with him following a visit to New York. It may be useful to analyze why the I. A. A. has been and is enabled to grow increasingly helpful in performing those tasks which individual farmers or small groups cannot do for themselves.

THE I. A. A. enjoys, first, a close tieup with 94 strong, ably-manned county Farm Bureaus. That the farm adviser or county agricultural agent is an integral part of this relationship is most fortunate. In certain of our neighboring states this is not true. In no other state, to our knowledge, are the county advisers performing as varied and helpful a service as in Illinois. Their activities and interests go beyond the boundaries of the farm, and properly so.

Secondly, the I. A. A. is better financed than many organizations. Money is necessary to maintain an organization and carry on a broad program of service. Thus the Association's activities operating through 13 departments, in addition to committees and subsidiaries, are made possible.

IF THE I. A. A. stands out as a state farm organization that is doing its job, the credit goes to the foresighted, thinking farmers of Illinois who made it. As in most trade organizations, certain benefits accrue to non-members or "free riders" as well as to members. Outsiders there are and always will be. Some folks are that way unalterably. Profound individualists grubbing along content with the present order and unmindful of the future may be found in every walk of life. They will be run over except as their more public-spirited, organized neighbors protect them.

THIS nation is fast becoming dominated by group effort. Great combines are replacing the private enterpriser. Machinery and efficiency are our new gods. Business and economic groups are becoming more highly organized. General Motors, U. S. Steel, Standard Oil, consolidated utilities, chain stores and newspapers, and giant banking systems are on every hand or in the process of development. And every group strives to use the government for its economic advantage.

The individualist farmers can't keep pace with this procession. Organized agriculture can.

Tune in on the I. A. A. half hour program broadcast daily at 12:00 o'clock noon from station WJJD, Chicago (365 meters). The facilities of station WJJD are loaned the Association through the courtesy of the Loyal Order of Moose, Mooseheart, Ill. No program on Saturdays and Sundays.

I. A. A. Broadcast Hour Now 12:00 to 12:30 P. M.

THE period for the daily farm radio program of the Illinois Agricultural Association from Station WJJD was changed recently to 12:00 to 12:30 p. m., Central Standard Time. The new arrangement became effective Monday, Apr. 30. The former broadcast period was 12:30 to 1:00 p. m. The change was made necessary because of the recent initiation of Daylight Saving Time in Chicago.

Tri-City Dealers And Dairymen Study Peoria Co-operative

May Establish Similar Stabilization Plan At Rock Island, Davenport, And Moline

A DELEGATION of producers, county agricultural advisers and dealers from Rock Island county, Ill., and Scott county, Iowa, visited Peoria recently to investigate the farmer-dealer co-operative plan which is operating to the mutual benefit of both producers and distributors there.

A. D. Lynch

A similar organization to stabilize the milk market at Rock Island, Moline, and Davenport is in prospect. Wasteful methods of distribution and competition at the tri-city market have worked against the interests of both dealers and dairymen.

The consumer is paying no less for milk and fails to profit by the lack of co-ordination. The dealers it is reported are in the mood to recognize a dairymen's organization and bargain with the producers for a fair, stabilized price. They are getting nowhere fighting each other. The dairyman is the loser because wasteful competition has resulted in discouraging prices.

A. D. Lynch, dairy marketing director, and several Peoria dealers offered their assistance in establishing a similar plan at the tri-city market. Dealers and dairymen about Rock Island are in a receptive mood for any proposal that will enable them to get on a paying basis for neither, it is reported, is satisfied with the present situation.

PRODUCE MARKET TREND
May 1, 1928

FLORIDA BOYS WANT JOBS

John H. Wahl, Jr., and Henry A. Carter, University of Florida students at Gainesville, Florida, are looking for jobs on Illinois farms during the summer vacation.

"We are both 19 years of age," wrote Wahl recently to the Knox County Farm Bureau, "and 'Pete' (Henry) is the son of an orange grower here in Florida. My father is J. H. Wahl, attorney, Cocoa, Florida. If we can get jobs and have the pleasure of a trip to Illinois we will be more than satisfied.

"Pete is acquainted with agricultural work, and while I have never lived on a farm, I think I could learn. At the present time my accomplishment along that line are: (1) I can milk a cow, (2) I can harness a horse. I think we will work as hard as the average boy. Our address is Phi Kappa Tau House, University of Florida, Gainesville, Fla."

Picnic Committee Meets in 14th District

M. G. LAMBERT, I. A. A. Executive Committeeman from the 14th district, presided at a meeting of the district picnic committee held at Monmouth on Apr. 25.

Tuesday, Aug. 21, was selected as a tentative date.

Col. Ousley, Adam McMullen, Congressman Hill, Dr. H. C. Taylor, and Chester Davis were mentioned as possible speakers.

It was decided to hold the next district I. A. A. conference at Aledo on May 22, and that the conference following be held at Carthage.

W. A. Stevenson, Henderson county; W. O. Kunkel, Hancock county; J. H. Lloyd, Hancock county; M. G. Lambert, Hancock county; P. B. Scott, Mercer county; R. C. Doneghue, McDonough county; Joseph Adcock, R. E. Kirby, and A. A. Olsen, Warren county, attended the meeting.

Direct Buying Increases

DIRECT buying of feeder cattle by corn belt feeders is on the increase, according to the U. S. D. A. The change is due to the fact that many ranchmen prefer to sell their stock at home, while feeders like to buy their stock direct from the range.

Co-operative Movement at Winchester Gets Results

Brings Offer of More Money for Butterfat

FOLLOWING the recent movement of the Scott County Farm Bureau to organize a co-operative produce selling association at Winchester, representatives of a centralized creamery from Jacksonville offered to pick up cream at Winchester and pay farmers in that vicinity one-half cent per lb. more for butterfat than is being paid in Jacksonville.

Alfred Tate

"The fact that we have started to organize a produce marketing association has excited the cream station buyers and they are making every attempt to retain their business if possible," says Farm Adviser Tate, "We are not finding any difficulty in signing up members in the association. I think we have 51 contracts already signed, many of which came in voluntarily."

Old like buyers in Missouri and Illinois are getting their butterfat approximately 10 cents per lb. cheaper than they pay in Minnesota where co-operative creameries are scattered throughout the state according to reports. The Land 'O Lakes Creameries, Inc. of that state deplore this situation since it permits centralized creameries to undersell the Land 'O Lakes organizations on the large butter markets.

Chicago Meeting in June to Defend Co-operatives

J. F. REID of the Minnesota Farm Bureau Federation released a story recently calling attention to a meeting of all co-operative organizations in Chicago early in June to defend co-operative marketing against the attacks of the organized distributors, who, it is reported, have raised a large fund to put the farmers' organizations out of business.

The Federated Agricultural Trades of America is the new anti-co-operative organization formed in Chicago last year.

Don't Like Grading System

FEDERAL grading of grain has nothing to do with the milling value of wheat, and the United States Grain Standards Act, while it has done well for the consumer, has worked against the producer, the Senate Committee on Agriculture and Forestry were told recently by witnesses appearing in support of the Shipstead bill to repeal the grading law.

Philo B. Miles of the Peoria, Illinois, Board of Trade urged that the measure be enacted and the States be permitted to return to the old grading system.

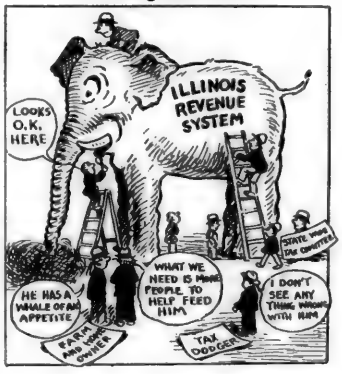
State-wide Committee Seeks Solution to Tax Weaknesses in Illinois

Earl C. Smith Represents I. A. A. on Fact Finding Body

WAYS and means of making facts of taxation and public finance available were discussed at a meeting of the new statewide tax committee at the LaSalle Hotel, Chicago, on May 11. This was the third meeting of the group organized recently to study and investigate the operation of the present revenue laws of Illinois, and to make recommendations for their improvement.

Earl C. Smith

Omar H. Wright of Belvidere, vice-president of the Illinois Bankers' Association, has been designated as chairman of the new fact-finding body. Other members of the executive committee of the tax conference are: Fredrik L. Gjesdahl, secretary, Earl C. Smith, Illinois Agricultural Association, James D. Cunningham, Illinois Manufacturers Association, Victor A. Olander, Illinois State Association of Labor, Max Murdock, Illinois State Association of Real Estate Boards, Robert C. Moore, Illinois State Teachers Association, Miss Grace Temple, Illinois Women's Joint Legislative Council, Chief Justice Harry Olson, Municipal Court of Chicago, Professor Charles E. Merriam, Department of Political Economy, University of Chicago, Dr. Richard T. Ely, and Professor Herbert D. Simpson of the Institute of Land Economics and Public Utilities, and George O. Fairweather of the Joint Commission on Tax Valuations for Cook county.



Others Invited

At a preliminary meeting the executive committee was authorized to increase its membership and invite other state-wide organizations to send representatives to the next meeting of the tax conference. President Earl C. Smith, John C. Watson, and Robert A. Cowles represented the I. A. A. at the first general conference.

Among the experts in taxation and public finance who will bring to the committee their study and investigations are: Dr. Herbert D. Simpson of Northwestern University, George O. Fairweather, Dr. Jacob Viner of the University of Chicago, John C. Watson of the I. A. A., and Professor J. A. Fairley of the University of Illinois.

The committee recognizes that it is entering on a long-time program through which it hopes to bring about changes in laws and constitutional provisions where needed.

Looking Him Over

Country Life Conference June 19-20-21, Urbana

THE eleventh annual conference of the American Country Life Association will be held June 18-19-20 at Urbana in co-operation with the University of Illinois.

A. D. Lynch, dairy marketing director of the I. A. A., will tell how dealers and dairymen are working together at Peoria for their mutual benefit, while John C. Watson, tax director, will discuss "What We Are Learning About Taxes."

Talks and discussions relating to country life and rural improvement by people from many states have been arranged. Eugene Davenport, former dean of the Illinois College of Agriculture, will be the speaker at the annual country life banquet on June 20.

Knox County Farmers Save $87,000 in Taxes

LAND owners in Knox county paid $87,000 less taxes in 1927 than they paid in 1926, according to a recent compilation by John C. Watson, director of taxation.

The reduction in taxes was brought about by a 21 per cent cut in land valuations secured following an appeal to the county board of review by the Knox County Farm Bureau.

Sixteen members of township tax committees in Knox county met at Galesburg recently where Mr. Watson discussed the state revenue laws and their administration. Robert Gibbs, H. S. Brown, Guy Routh, and James McBride, the Farm Bureau's Public Relations Committee, arranged the meeting.

Shaw to Milk Producers'

WILFRED SHAW, farm adviser in Peoria county, has been employed as resident manager of the Illinois Milk Producers' Association to work with A. D. Lynch, dairy marketing director of the I. A. A., in directing the affairs of the co-operative marketing agency at Peoria.

Shaw will begin his new duties as soon as his successor has been chosen by the Peoria County Farm Bureau.

Appeal To Attorney General To Enforce Tax Commission Order

Champaign County Tax Case Awaits Further Action On Reassessment

OSCAR CARLSTROM, attorney general, was asked recently to start proceedings in Champaign county toward enforcing the April 5 order of the Illinois Tax Commission directing a reassessment of property by Champaign county tax officials.

Wm. H. Malone

Action to enforce its orders was taken at a meeting of the State Tax Commission in Chicago on May 7 when the members voted unanimously to authorize Chairman Wm. H. Malone to appeal to the attorney general.

According to reports Champaign county officials ignored the Tax Commission's orders and proceeded to extend taxes on old valuations which the Commission declared null and void. As a result many Champaign county farmers have refused to pay their taxes on the ground that they were being illegally collected.

The controversy, which began early last summer, arose over findings of inequalities in tax valuations between farm lands and property, and real estate in the taxing districts of Champaign, Urbana, and Rantoul by the Champaign County Farm Bureau and the Illinois Agricultural Association.

The Farm Bureau alleges that farm lands, and real estate in the smaller villages of the county, were assessed from 25 to 40 per cent higher than property in the cities mentioned.

After several hearings and subsequent investigations, the Tax Commission found that the farmers had a just complaint, and in December, 1927, ordered a reassessment. The Champaign County Board of Review made a slight revision in assessed valuations which the farmers contended did not bring any substantial relief.

The Farm Bureau again appealed to the Commission which issued its second order for a reassessment on April 5, 1928. This the Champaign county officials ignored.

Section 287 of the state tax laws provides that if any taxing official shall fail or neglect to perform any of the duties required of him under the Act, he shall be liable to a fine of not less than $10 nor more than $500 to be recovered in an action of debt in the Circuit Court of the proper county, and may be removed from office at the discretion of the court.

Reports coming to the State Tax Commission are to the effect that a recent order of reassessment issued for St. Clair county for 1928 taxes is being carried out.

Farm Baseball Season Opens May 26, Eight Divisions To Compete

Each District Schedules Own Games, Keen Competition Seen For State Title

FARM Bureau baseball in Illinois will be ushered in on Saturday, May 26, and to all indications games will be played in the eight divisions of the State League, with one or two exceptions, on that date.

Playing schedules have been or will be announced, it is hoped, within the next 10 days in official Farm Bureau organs or in the local newspapers.

At least seven new teams are expected to compete in the race for the state title which promises to be keenly contested. Division I, comprising Whiteside, Henry, and Stark, has all new teams to play for the first time in years, this season. Whiteside had a team several years ago but neither Stark nor Henry has competed heretofore.

New Counties Enter

Champaign, Scott, Washington, and McDonough counties also will enter Farm Bureau teams for the first time this year. Jackson, and possibly Piatt counties, likewise, may bring out farm baseball nines. With favorable weather there will be more Farm Bureau teams entered in the race this year than ever before.

Playing has improved steadily since the League was organized four years ago. The team captains, managers, and farm advisers are keeping their eyes open for likely talent among the boys and younger men. This activity was revealed in the improved playing of several teams last year.

Division III Leads

Peoria county arose from its cellar position to become a championship contender. This county, as well as others in Division III comprising Tazewell, Peoria, Marshall-Putnam, and Woodford, will fight for League leadership in '28.

Division III has had the championship team ever since the League was organized, although Henderson county was a worthy contender on several occasions. Henderson county has a strong team but the competition in Western Illinois has been less keen, hence this county usually has entered the semi-finals with less playing experience than is the case in other divisions.

Egypt Has Good Teams

The Southern Illinois counties of Lawrence, Wayne, Clay, and Effingham have been placed tentatively in Division VIII, while Jefferson, Bond, Washington, and possibly Jackson will play in Division VII.

Members who are interested in baseball, but have no county team should see their farm adviser about organizing one. Usually it is advisable to play locally a year and get experience before entering the stiffer competition in the State Farm Bureau League. Where the players have had experience working together on local teams this is not necessary.

More Farm Relief

Thirteenth District to Picnic at Freeport

THE I. A. A. Farm Bureau picnic in the 13th congressional district will be held at Taylor's Park, Freeport, according to a recent announcement of C. E. Bamborough, I. A. A. Executive Committeeman from Polo.

Representatives from Jo Daviess, Stephenson, Carroll, Ogle, Lee, and Whiteside counties met at Freeport recently to make preliminary arrangements.

The exact date was not definitely set but members of the committee prefer that it be held the latter part of August.

Whiteside county asked to have the picnic next year. Thereafter the picnic will go to a different county in the district each year until all have been served.

Livestock Shippers at Cissna Park Get Shed

LIVESTOCK shippers about Cissna Park, Iroquois county, recently expressed their thanks to the Iroquois County Farm Bureau and the I. A. A. Transportation Department for the new stock shed built by the C. & E. I. railroad at that point.

The appeal for the new sheds was initiated by L. W. Wise, farm adviser at Watseka. The I. A. A. Transportation Department assisted by presenting the Farm Bureau's plea to the carrier. The Cissna Park Shipping Association had asked for the convenience more than two years ago. Livestock had been without any shelter whatever in these yards before the shed was built.

FIFTY CANADIAN FARMERS are members of the lower house of Parliament, according to the National Farm News. Four others are members of the Federal Cabinet Council.

Railroads May Enter Truck Transportation Field in Near Future

Commerce Commission Makes Recommendation on Motor Truck Regulation

THE Interstate Commerce Commission recently reported the following conclusions as a result of a series of hearings held during 1927 on motor truck and bus transportation: Railroads, whether steam or electric, and water carriers subject to the interstate commerce act should be authorized to engage in interstate commerce by motor vehicles on the public highways, and thereafter such service should be subject to the provisions of the interstate commerce act, with the possible exception of section 15 (a).

Railroads and other carriers subject to the interstate commerce act should be authorized to participate in joint rates and through routes with common carrier motor truck or motor bus lines.

The problem of regulating motor vehicle operations in interstate commerce is so new that it is too early to attempt too detailed regulation.

Need Regulatory Laws

Regulation of interstate commerce by motor vehicles operating as common carriers of passengers on the public highways over regular routes or between fixed termini should be provided for by law.

There does not appear to be at the present time public need for regulating interstate transportation of property by motor vehicles.

The right of any party to appeal to the Interstate Commerce Commission from the action of a state board or a joint board should be provided.

Recommend Operate One Year

The law should provide that an applicant for a certificate of public convenience and necessity must be in operation as a common carrier over the route described in the application at least one year prior to the first day of the legislative session in which such law is enacted.

Holders of certificates of public convenience and necessity should be required to furnish such additional service as the public demands.

The law should require that the interstate fares and charges of motor bus lines be just, reasonable, not unjustly discriminatory, and not unduly preferential or unduly prejudicial. Tariffs should be filed and posted.

Provision should be made for the filing of complaints against fares, charges, practices or service of motor bus lines operating as common carriers.

Additional recommendations are made that broad discretionary powers be given regulatory boards in classifying vehicles, the issuance of free passes and free transportation, transportation of explosives and inflammables, preventing monopolies and effecting co-ordination of all existing transportation agencies.

Co-ops Reply to Attack of Federated Agricultural Trades

Minnesota Farmers Cite Aid Given Business by Department of Commerce

THE Land 'O Lakes Creameries, Inc., the Central Cooperative Association, and the Twin City Milk Producers' Association, all in Minnesota, issued a 16-page pamphlet recently, entitled, "An Answer," which is a reply to the Chicago conference of the organized middlemen known as the Federated Agricultural Trades of America.

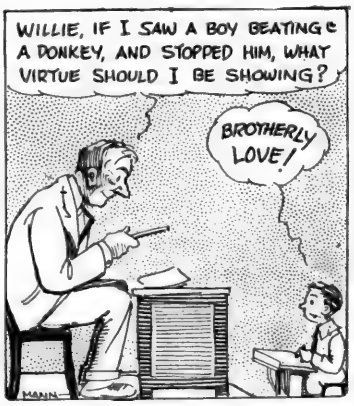
The Chicago conference, which was held last year in the Palmer House, was characterized by the extreme antagonism expressed by many representatives of dealers' organizations to co-operative marketing of farm products. Many of the speakers implied that the farmer had no business selling farm commodities cooperatively. They denounced bitterly the activities of the United States Department of Agriculture and the state universities in studying and teaching marketing, and helping farmers inaugurate cooperative ventures.

Attack Farm Bill

The middlemen attacked the McNary-Haugen bill presumably because it will limit speculation when passed and in operation. One speaker urged the raising of a large defense fund to keep a powerful lobby in Washington to fight such legislation as the McNary-Haugen bill and to work for the farm bill which will interfere the least with the established old line system of distribution.

Replying to the attack of the middlemen on the activities of the Division of Co-operative Marketing of the U. S. D. A., the Minnesota co-operatives said:

"The chairman said, 'We are opposed to the co-operative issue if it requires government subsidies, which must be carried in part or as a whole by the tax payers in other lines.'



"The answer to this is that co-operative marketing has never received a single dollar from the government. The Department of Agriculture has tried to aid farmers just as the Department of Commerce aids business.

All Aid Business

"Here are a few divisions of the Department of Commerce each with a chief in charge paid by the taxpayers of this country to aid business: Regional Information, Textile, Machinery, Foodstuffs, Lumber, Hide, and Leather, Automotive, Iron and Steel, Agricultural Implement, Boot and Shoe, Chemical, Electrical Equipment, Minerals, Commercial Law and Transportation.

"This does not look as though business has been neglected in spending 'the money of tax payers in other lines.'

"Furthermore, the Department of Commerce maintains representatives in most large cities of the entire world to help these American business men who are objecting to the work of the Department of Agriculture.

Subsidies to Private Enterprise

"When it comes to subsidies it is private business and not co-operatives that have benefited. We quote from a letter just received:

" 'The Street Railway Statute vests in the Railroad and Warehouse Commission of Minnesota authority to determine the value of properties and establish rates of fare which will yield a reasonable return on such value.'

"Have you ever heard of any branch of farming that has ever been guaranteed a 'reasonable return' on the investment or is this done because transportation is more important than food? How about the Panama Canal built to aid business although it greatly injures the great Northwest agricultural district? Is not this in fact a subsidy to business?

"None of the middlemen answered C. A. Ewing when he made the statement that the unfair advantage given manufacturing by our tariff laws costs the farmers more each year than there is invested in the business of the middlemen organizing to fight co-operative marketing! Who is subsidized by these tariff laws?"

Richland County Unit Sells 94,305 Lbs. Butterfat

THE farmers' cream station at Olney marketed co-operatively 94,305 pounds of butterfat during 1927. This is a higher record than any other single unit in the state, made last year. During the first three months of 1928 the Olney station increased its intake by more than 21 per cent over a similar period in 1927. The Richland Farmer estimates that Richland county will sell co-operatively at least 150,000 pounds of butterfat before the end of this year. The three units at Olney, Claremount, and Stringtown are adding thousands of dollars to the incomes of their farmer patrons.

Trucks Now Haul Bulk of City Milk Supply Says I. C. C.

Glass Lined Tanks on Trucks Replace Cans at Many Cities

BETWEEN 1910 and 1924, the motor truck had taken over the bulk of the shipments of milk formerly handled by electric railways and wagons and also a part of the steam railroad short-haul shipments, according to a recent report of the Interstate Commerce Commission. This is largely accounted for by the gradual crowding back of dairy farms with the growth of city suburban areas and by the shifting from rail to motor truck transportation for distances up to 50 miles. Among these advantages are: (1) Truck passes producer's gate and the truck driver acts as producer's personal agent in the city; (2) shipment by truck reduces the number of handlings from six or more to only two; (3) trucks lose fewer cans; (4) elimination of the haul from railroad milk platform to the city milk dealer results in an estimated saving of five cents a hundredweight.

Saves Time

Shipping by motor truck saves time where distances are not too great and eliminates the city terminal handling and transportation costs.

Approximately 90 per cent of all milk brought into the cities of Cincinnati, Detroit, Milwaukee, St. Paul, Minneapolis and Indianapolis is brought in by motor truck. About 20 per cent is trucked into Philadelphia, while Baltimore receives 45 per cent of its supply by truck.

Of the trucks hauling milk into these cities 65.6 per cent operated within a radius of 29 miles and only 6.8 per cent operated over routes 50 miles and over in length. The trucks are, for the most part, of the smaller capacity type; 57.1 per cent are one and two-ton trucks while only 7.3 per cent are over four-ton capacity.

The trucks are usually operated by individuals who live in the rural sections and operate one or two trucks. Twenty cents per ton-mile is the usual rate in the 30 to 39-mile zone. For shorter distances the rates are higher. Comparison of rail and motor truck rates for hauling milk shows that truck rates are the same as rail rates or somewhat higher.

In 1924, there were delivered daily to Chicago, 44,000 eight-gallon cans of milk of which 68 per cent were carried by rail and 32 per cent by motor truck. Since then trucks have come into much wider use.

Bulk transportation of milk has developed the tank truck. The glass-lined tank truck is suited for the hauling of milk from country stations to city plants, especially when neither is located directly on a railroad and when the distance is not beyond the economic range of truck haulage. The capacities of the tanks range from about 800 to 2,000 gallons.

The Illinois Agricultural Association RECORD

Volume 6 JUNE, 1928 Number 6

Equality for Agriculture

THE Republican Party is on trial at Kansas City this week. A great national issue is at stake. Shall agriculture be permanently subjected that industry may enjoy greater privilege, protection, and profit, or shall protection be accorded to all alike? This is the paramount question before the Nation. The farmer is fighting for equal opportunity.

Organized agriculture sought to keep the issue out of politics. The administration chose to force it into politics. We accept the challenge. May Illinois acquit itself well in the coming test to determine whether or not this question shall be squarely met in the interest of the future welfare of our country.

Peek Hits Hard In Radio Talk On Veto Message from KFNF

Calls Document Most Intemperate and Ill-Humored of Any In History

AFTER carefully analyzing and explaining the provisions of the recently vetoed McNary-Haugen bill, Geo. N. Peek, chairman of the North Central States Agricultural Conference, launched into a discussion of the veto message and the political elements involved in his radio talk from Station KFNF, Shenandoah, Iowa, on June 7.

Geo. N. Peek

After explaining the bill Mr. Peek said: "This all seems so simple that you wonder why the question has not been settled long ago.

"The answer is that Secretary Wallace did try to get the Harding administration to take definite constructive action, but he was pushed aside for Secretary Hoover who has been the real agricultural adviser and dictator of the last two administrations. Hoover has had for his advisers the grain exporters, dealers in farm commodities, millers, and other manufacturers of the farmers' crops.

Don't Want Anything New

"These men do not want anything to happen which by any possibility might interfere with their business and so the farmers have arrayed against them the exchanges, boards of trade, and I am sorry to say, some of the big bankers who finance their members."

Discussing the veto message in general Mr. Peek voiced the belief that the President knew but little about the bill and what it contained. "His veto message proves that this is still the case," he said. "It is a lengthy document said to be the most intemperate and ill-humored of any veto message in our history. It was openly charged in the Senate debate on May 25 that the President did not himself write the message and no one in Washington believes that he did.

"Many of the assertions in the veto message can only be answered by a blunt statement that they are not true, either as economic fact or as interpretation of the bill.

Adjectives No Argument

"The use of epithets and the calling of names is not argument; they can only be answered in kind, and it is best that such passages be ignored even though that means ignoring much of the last message which, compared with the veto message of February, 1927, adds many new adjectives but no new ideas to the discussion. In general the veto message shows (1) that the real Coolidge objection is not against the equalization fee as has been frequently stated, but against making the protective tariff operate to enhance the profits of farm crops of which we produce a domestic surplus; (2) that his interest in co-operative marketing development is pretended, not real; (3) that in order to support his criticisms of the measure the President is forced to assume that the board which he alone would appoint would be foolish or criminal in its administration of the act; (4) that he has no constructive proposal for an agricultural policy except the dangerous one that American farm production must be reduced to meet domestic demands, which is economically unsound and nationally unwise; and (5) that he is unwilling to permit the Supreme Court to pass upon the constitutional questions involved."

The Real Grounds

Delving into the message Mr. Peek said: "It clearly exposed the real grounds for the Coolidge objections to the McNary-Haugen bill. For months it has been stated on his behalf that his real objection was to the equalization fee provisions of the measure. Talk of the equalization fee is only camouflage.

The speaker denounced the veto message as exposing President Coolidge's pretended interest in co-operative marketing development as a sham. "The bill as presented to him would build co-operative associations," he said. "Mr. Coolidge turned his back upon that bill with its carefully worked-out provisions to do the job he admits needs to be done, and through the very agencies which he himself has suggested for the task."

The Real Question

The rest of Mr. Peek's talk was devoted to amplification and enlargement upon the five points presented above. In closing he said: "The question which confronts the Government is whether it should take effective steps to correct an injustice to the basic industry of agriculture. Shall equality be restored by bringing agriculture under the protection which the tariff law and restrictive immigration give industry and labor—shall the inequality be allowed to persist—or shall the inequality be removed by dragging down the condition of industry and labor to the present condition of agriculture?

"There is practically a concensus of intelligent opinion that the effective remedy which exists for this situation is involved in the proper control of the surplus supply of farm products and the feeding of them out in response to demand through devices for orderly marketing similar to the practice in industry."

Note: Complete copies of Mr. Peek's address may be had by writing the Illinois Agricultural Association, 608 So. Dearborn St., Chicago.

RESOLUTION ADOPTED AT MASS MEETING HELD IN CHAMPAIGN, MAY 31, 8 P. M., AT COLISEUM, 1928

WHEREAS, The President's recent veto message of the McNary-Haugen bill discloses a lack of proper understanding of and genuine sympathy for American agriculture by the present administration and its advisers; and

WHEREAS, The principles of this legislation are well within the pledge of equality for agriculture set forth in the party platform of 1924, upon which this administration came into power; and

WHEREAS, This pledge has been treated as a scrap of paper;

NOW, THEREFORE, BE IT RESOLVED, That we, the citizens of this section in mass meeting assembled, and regardless of party, feel we can no longer depend upon party pledges. We serve notice here and now upon the responsible leaders of all parties of our individual and collective support only of those candidates for President of the United States who have a sympathetic understanding of this great question and who have the initiative and courage to see that the benefits of governmental policies are extended to all economic groups of the United States on an equal basis;

AND BE IT FURTHER RESOLVED, That as an act to secure justice for farmers we will resist by every honorable means every candidate for office from President down to county officials who refuse to give us a square deal.

We request the secretary of this meeting to send a copy of this resolution to each delegate from Illinois to the Republican and Democratic National Conventions.

W. E. Riegel, Chairman,
F. D. Lewis,
John T. Smith,
Eugene Curtis,
Resolutions Committee.

Indiana Farm Bureau Protests Cal's Veto Use Strong Language

Must Have Leader to Administer Office In Perfect Fairness

"FOR the second time we farmers of the Mississippi Valley have been silent witnesses to the exercising of a veto privilege that for sheer audacity and a genuine disregard for the rights of a large group of citizens, is probably the most daring piece of nullification that the world has witnessed since the infamous episode of Germany's 'scrap of paper'," declared the Indiana Farm Bureau Federation following the recent presidential veto message.

"We have just witnessed a most astonishing paroxysm of hate in the message of veto," continued the Federation. "Fortunately for the country, the farmers have just begun to fight, and we are preparing for the day when we can go to the polls and vote into office some Western man who has courage, sympathy, and a desire to be President of *all* these United States. Out of the material already offered, the South and the far West can find a leader that we can elect and depend upon, who will administer this great office in perfect fairness to all citizens and to all classes."

Volume 6 JUNE, 1928 Number 6

THE CORN BELT SPEAKS

Mass Meetings Express Indignation at President's Veto and Coolidge-Hoover Negative Farm Policy

ILLINOIS, Iowa and other corn belt states gave emphasis to the western revolt against the administration's negative farm policy following President Coolidge's second veto message, in a series of great mass meetings held during the past three weeks.

Simultaneous assemblies at Springfield and Galesburg on Saturday, May 26, voiced the pent-up wrath of a long-suffering, patient Middle West populace at the rank injustice of an administration which will go down in history as one controlled and motivated by the narrow sectionalism of selfish and industrial class interest.

Thousands of farmers, bankers, merchants, and business men met to denounce the open opposition of those in control of the government, to equality for agriculture and a square deal to the West.

All Central Illinois turned out more than 3,000 strong in the Springfield arsenal where the aged Joseph W. Fifer of Bloomington, former governor of Illinois and civil war veteran who saw the birth of the Republican Party in the Middle West, made a ringing keynote speech denouncing the action of President Coolidge in twice refusing western agriculture a seat at the table of privilege. Col. Geo C. Seamon, extensive landowner in Christian county, was the chairman of the meeting.

The meeting was not a farmers' meeting alone. Such bankers and business men as E. E. Crabtree, mayor of Jacksonville, and Andrew Russel from the same city espoused the cause of agriculture in vigorous language. John P. Stout, farmer, of Chatham forcefully expressed the resentment of corn belt farmers at the President's harsh and unsympathetic treatment of legislation painstakingly prepared during a five-year effort to make the tariff effective on the major farm products.

A touch of color was added to the scene when a banner carrying the slogan "We Want A Statesman for President," was hoisted in the crowd while Bill Gardner of Logan county sang "Who'll Carry The Banner." Other banners carried the words, "Goodbye Cal and Herby, Hello Frank."

Here Are The Resolutions

The resolutions adopted before the close of the session set forth in unequivocal terms that "the President's veto message of the McNary-Haugen bill discloses a lack of understanding and genuine sympathy of the fundamental problem facing American agriculture, by the President and his advisers:

"That the principles of this legislation are well within the limitations set forth in the Republican party's platform of 1924 upon which the administration came into power;

"That we, the thousands of citizens representing the unalterable sentiment of Central Illinois in mass meeting assembled and regardless of party feel we no longer can depend upon party pledges; and we serve notice here and now upon the respective leaders of all parties that our support will go only to those candidates for President of the United States who have a sympathetic understanding of this great question and who have the initiative and courage to see that the benefits of governmental policies are extended to all economic groups of the United States on an equal basis;

Nothing But Mockery

"That the action of President Coolidge in vetoing the McNary-Haugen bill, after the Congress had done its utmost to fairly meet his expressed views without destroying the principle of the bill by removing the equalization fee, constitutes the final proof that a pledge for a square deal for agriculture is but mockery, unless it be administered by a President who understands and at heart desires a fair solution of the agricultural problem;

"That the developments since 1924 have proven: (1) That members of Congress of all political parties from all agricultural districts are standing firmly and courageously with the farmers in their fight for equality for agriculture. (2) That party lines have disappeared in this fight. (3) That all the efforts that the executive branch of the government has made to redeem the party's pledge to agriculture have been trivial, insincere, and not intended to bring about agricultural equality. (4) That Herbert Hoover, who is spokesman for the exporter and professional trader in farm crops, many of whom are his closest advisers on agricultural questions, has been the guiding influence with President Coolidge in his attitude toward our problem. (5) That hope for the adoption of a fair national policy toward agriculture lies only in the complete repudiation of the Coolidge-Hoover leadership.

Hoover Against Farmers

"That in view of Mr. Hoover's well-known record against the interests of the farmers of the country and the intensely organized campaign, which he and the special interests back of him are making to secure for him the Republican nomination, we call upon all delegates to the Republican National Convention to work to the end for the nomination of a man who is known to have a practical and sympathetic understanding of the farm problem and who has the initiative, ability, and courage to see that this prob-

KEYNOTER AT SPRINGFIELD

EX-GOV. JOS. W. FIFER is known by his friends as "Private Joe." Born in Virginia in 1840, he will celebrate his 88th birthday in October. Mr. Fifer came to McLean county in 1857, where his father started farming, and plied his trade as bricklayer.

Mr. Fifer is a Civil War veteran and saw service with the 33rd Illinois Volunteer Infantry at the fall of Vicksburg. He was wounded in action at Jackson, Miss., when Sherman's forces assaulted the forces of General Johnston.

He graduated from Illinois Wesleyan University in 1868, was admitted to the bar, elected to the State Senate in 1880, and later was elected governor of Illinois.

lem is solved in a manner that is fair to all interests.

"That we warn all delegates to the National Conventions that the agricultural question is the paramount issue before the country and that failure of any party to recognize the condition of agriculture as the paramount issue will result in our support of that party, whose candidates make the solution of the agricultural problem the paramount issue of the campaign."

Representatives from eleven central Illinois counties presented these resolutions which were echoed in the press of the United States from coast to coast within 24 hours after their unanimous adoption.

GALESBURG MEETING 2,500 STRONG

THERE were 2,500 militant farmers from a dozen Western Illinois counties at the Galesburg Court House in Knox county while the Springfield meeting was on.

Long before the meeting was scheduled to open the Knox County Court House was filled to overflowing. Crowds gathered in the adjoining halls and lobbies. It became apparent that some other provision must be made for the crowd, so a large truck was driven up in front of the Court House to serve as a speakers' stand, and the throng adjourned to the Court House lawn when A. N. Skinner, prominent Yates City farmer, called the meeting to order. Many women were present. Ten or twelve Western Illinois counties were represented. Ira Moats of Maquon opened the meeting with prayer, which was followed by the audience singing "Illinois".

Coolidge Advice Followed

"The first McNary-Haugen bill was presented to Congress at the suggestion of President Coolidge," said Mr. Skinner in his opening remarks. "The President had advised farmers and farm representatives who had visited him to go back home and frame adequate legislation to be presented to the Congress. The farmers complied and when their measure was presented the first time it was beaten by a substantial majority.

"The McNary-Haugen bill was revised and was presented again. By that time it had gained so many friends that the 69th Congress passed it with a substantial majority. President Coolidge vetoed the bill, accompanying his action with the long message in which he presented his objections.

"These objections were carefully noted by friends of the measure and again the bill was revised to meet Mr. Coolidge's objections insofar as they could be without emasculating the bill. Again the McNary-Haugen measure was presented to Congress where it passed by an even greater majority than the year previous. Mr. Coolidge vetoed that bill. In undignified language he denounced the results of the farmers' painstaking efforts to frame a measure that would meet with the approval of the President.

"We must have someone in the White House who is not too provincial and who has the interests of American agriculture at heart."

A. G. Bridgford, Banker and Landowner of Mercer County, said:

"The administration would lead us to believe that we are in the most properous condition that has existed. That is quite true east of the Allegheny mountains and the New York Stock Exchange. Stocks and bonds have doubled and tripled, yet in the Middle West there have been more bank failures during the Coolidge administration than in the 60 years preceding it. You have seen agriculture and agricultural products take a deflation of over twenty billion dollars, a sum sufficient to buy all the railroads in the United States. . . . . Mr. Coolidge might just as well say, 'I am opposed to any farm legislation that will help the farmer,' because any bill he would recommend or sign would be of no avail to us."

R. C. Ford, Farmer, Peoria County:

"It has been said that Calvin Coolidge could slap the farmers in the face and make them like it. I want you to understand that here is one farmer whom he slapped in the face, and he lacks a hell of a lot of making him like it; and if I get the gist of the sentiment of the 800 Farm Bureau members of Peoria county, he has 800 more there that he lacks a lot of making them like it, and I would like to see every Farm Bureau in this United States have the same feeling that the Farm Bureau of Peoria county seems to have."

L. C. Warner, Farmer, Henry County:

"Agriculture is the basic industry of our land, and yet agriculture has been compelled to take a back seat. Organized farmers in this country are not attempting to pull down any other class. They are simply asking that they may be brought up upon an equal basis with industry and manufactures, capital and labor. . . Thousands of men in my county were disappointed when Mr. Coolidge saw fit to veto the McNary-Haugen bill, but I have not yet heard one single man say he would not still carry on. There was a little meeting over in my county a few days ago, representing some four thousand votes in the County of Henry, and they passed unanimously a set of resolutions, which pledged themselves not to support a certain man, who it has been said is one of the chief agricultural advisers of the President, and that they would use all the influence and power which they possess to prevent his nomination at the convention at Kansas City, and if he was nominated they would use all their power to defeat him at the polls."

R. E. Kirby, Farmer, Warren County:

. . . . . "It seems to me we have had the poor end of it all the time. Until just recently we farmers were so near asleep that we never could see the advantage of organizing, and a good many farmers are still sleeping, but there are some 60,000 in this State of Illinois who have awakened, and I think a great many of them are thinking and meeting today under this same kind of a gathering, and I think we will let the people of the United States know that we have awakened from our long slumber."

C. C. Craig, Former Supreme Court Judge, Banker, and Landowner:

"Our legislators have passed laws to help the railroads; they have passed laws to help the manufacturers; laws which are a benefit to all of those different lines of business, at the expense of the great basic industry, the farmers, the producers. Let me tell you, my friends, those who have to do the making of the laws, they listen to an assemblage like this. They will listen to you. They will listen to others, and we hope to make such a noise that we will keep them awake for a while until something will be accomplished."

M. G. Van Buskirk, Knox County:

"We are here today to serve notice upon the Republican party that Herbert Hoover is not acceptable to the voters of the Middle West and that he will not receive our votes. We are here today to serve notice upon both parties that unless the Middle West is taken into consideration in Kansas City and in Houston, and men satisfactory to the voters of the states in this territory are nominated as President, that the results of the November election must rest upon the shoulders of those who so blundered as to leave out of the reckoning so large a percentage of the constituency of either party, a constituency that is interested not only in its own welfare, but in the welfare of the nation in its entirety. . . . . Justice must be done the Middle West and by so doing the entire nation made to prosper and enjoy happiness. We will accept nothing less than this."

Resolutions were passed similar to those presented above.

3,000 AT DEKALB

CLOSE to 3,000 farmers, bankers, merchants, and others assembled on the DeKalb high school grounds Saturday, June 2, to express their resentment of the administration's veto message on the McNary-Haugen bill, the Coolidge-Hoover farm policy, and their apparent partiality to the industrial interests of the East.

None of the speakers protested more vigorously than Omar H. Wright, president-elect of the Illinois Bankers' Association. He stated emphatically that when Coolidge vetoed the McNary-Haugen bill he slapped the Illinois Bankers' Association as well as the Middle West in the face. "We resent the words that he used in denouncing the legislation upon which we

Here's part of the crowd that assembled on the De Kalb High School grounds Saturday, June 2. It was a determined audience, demanding equality for agriculture.

had pinned our hopes," said Mr. Wright. "The language in that message was unnecessary."

Wright Is Applauded

Mr. Wright was loudly applauded when he said: "I know more in 30 minutes about the agricultural problem of this section than all the citizens combined in Pennsylvania, Massachusetts, Vermont, and the other New England states. We don't want any plank, resolutions, or platitudes," he said. "What we need is a man. Frank Lowden our neighbor has the ability, knowledge, and courage to solve this question."

Henry White of DeKalb County presided. At least a half dozen delegates to the Republican and Democratic National Conventions gave short talks. C. E. Bamborough of Ogle county and George R. Tullock of Winnebago represented their respective counties on the program. Mr. Tullock read telegrams from Congressmen Buckbee and Rathbone expressing their regrets at being unable to attend.

Vrooman Suggests Coalition

Carl Vrooman of Bloomington told his large audience that what they must do is to raise less hogs and more hell. "If you don't nominate Lowden at Kansas City," he said, "I shall try to get him to go to Houston so we can nominate him there." Mr. Vrooman is a prominent dry Democrat who held the office of Assistant Secretary of Agriculture in Wilson's administration. Mr. Vrooman presented a plea for a coalition ticket of Republicans and Democrats which the South and West could support in the event that both parties fail to nominate a Middle West man who has the courage to be for equality for agriculture. The crowd listened intently to Vrooman's by-partisan plan and applauded loudly at the close of his speech.

Kessinger Speaks

"It doesn't take statesmanship to oppose everything and be for nothing," declared State Senator Harold Kessinger from Aurora. Senator Kessinger expressed his opposition to a third party but voiced his interest in nominating Middle West candidates for President in both parties. He lauded Ex-Governor Lowden and called attention to the war governor's deep interest in farm problems long before the McNary-Haugen plan was formulated. "Business will get worse unless farming gets better," he said. "If the farmer doesn't get protection others will lose it." Senator Kessinger closed his remarks by an urgent plea for farmers to drive en masse to Kansas City and demand the nomination of a Middle West man.

A dozen Northern Illinois counties were represented. One hundred and fifty auto loads came from Lee county alone.

One of the most significant acts of the meeting was the adoption of a resolution presented by Henry Watts of LaSalle which read as follows:

"Mr. Chairman, I move that we perpetuate the spirit of this meeting by the formation of a permanent organization, that the chairman appoint a county chairman for each county here represented and that each county chairman shall appoint a township chairman and that each township chairman shall appoint a school district chairman, all whose names shall be reported to the county chairman. That the purposes of this organization shall be to fight at the polls next November, any candidate, whether of the Republican or Democratic party, who favors the Hoover-Coolidge policies of subordinating agriculture to industry."

Other Speakers Talk

Other speakers who made short addresses were W. I. Hibbs, former president of the Ottawa Chamber of Commerce; Phil Sanford, Boone county; Wm. Heath, Kane county; the Mayor of DeKalb, and Earl Buck, Lee county. Many of the speakers emphasized the fact that "We are here in the interest of equality for agriculture. We must make the tariff effective on farm products. We must have an American price for American farm products."

It was a conservative, orderly meeting marked by the determination written on the faces of the audience. Many women were present. The resolutions adopted early in the meeting condemned the Coolidge veto, and demanded that delegates use all their influence to nominate a Middle West candidate for President who knows the farm problem.

A similar mass meeting was scheduled at Taylorville in Christian county for Saturday, June 9.

MEET AT CLINTON, IOWA

WESTERN Illinois farmers from Whiteside, Carroll, and Rock Island counties joined with their neighbors across the Mississippi in a meeting at Clinton, Iowa, Saturday afternoon, June 2.

State Senator J. O. Shaff presided. Impromptu talks and addresses expressing the resentment of farmers and merchants from this section over the McNary-Haugen veto message were made by many who attended. A. C. Everingham of Illinois expressed the sentiment of the mass meeting when he stated that the Middle West would not stand for another President who had no policy for agriculture other than to keep farmers subjected for the benefits of a prosperous industry.

Resolutions were adopted condemning the veto message and the Hoover-Coolidge policy of favoritism to industry.

Farmer-Banker Meeting

MORE than 100 farmers and bankers from Knox county attended a joint banquet in Galesburg recently. Thirteen banks of the county were represented. In addressing the gathering, President Earl C. Smith stated that according to the most recent census report farm lands in the county had declined $32,000,000 since the war while the total assets of agriculture had depreciated 34 per cent during the same period.

A. N. Skinner, member of the I. A. A. Executive Committee, presided. The dinner was sponsored by the Knox County Farm Bureau.

Swine growers produced 752 ton litters in 1927.

The Corn Belt Uprising

SEVERAL months ago, administration leaders were consoling themselves with statements to the effect that the cry from the West for equality for agriculture emanated from a small group of organization and political leaders. Secretary Jardine told New York business men a year ago when speaking of the Corn Belt agitation that "a small pack of wolves could make a lot of noise." President Coolidge has been assured by his advisers from time to time that the farmers are not for the McNary-Haugen type of farm relief, that the fight for the bill is being made by only a handful of men for political purposes.

Overnight, it seems that the Corn Belt picture to the down-easterners has changed. Farmers' mass meetings at Clinton, Iowa, Springfield, Galesburg, DeKalb, Champaign, and Taylorville, Illinois, and at other points in adjoining states have awakened the country to the fact that the West is in earnest.

Farmers are patient and long-suffering. But the President spilled the beans in his ill-conceived, bitter denunciation of the farmers' request for equal opportunity legislation. The resentment it aroused was to be expected. These uprisings merely reveal what has been apparent for years to those who know the true situation.

Judging from the sentiment expressed at these mass meetings, it would not be surprising to see a coalition, bipartisan ticket placed in the field that the South and West would support unless the major parties nominate men acceptable to the voters of these great sections. The Middle West has no hope of getting a square deal from Coolidge or Hoover. These men undoubtedly are dominated by the selfish industrial interests of the East and by the exchanges and dealers handling farmers' products. What the Republican Party does at Kansas City this week may determine to a large extent its future power and influence in the section of its birth.

The Tail Wags the Dog

HOW the populous industrial east, comprising a very small area of the United States but with a native son in the strategic position of chief executive, dictated the agricultural policy of the nation for a period of five years, will go down in history as one of the ironies of a so-called democratic form of government.

Even a casual observer of the map on page 7 is struck at once with this great truth. Never have we had a more vivid example of how the tail may wag the dog. It causes us to wonder whether we actually have a government of the people, by the people, and for the people that Lincoln dwelled upon in his Gettysburg address.

Such an unwarranted encroachment by the executive on the legislative branch of the government as we have seen in the two McNary-Haugen vetoes never was contemplated by the framers of our constitution. Nor did they assume when they provided for a supreme court that the executive and a cabinet member would usurp the function of passing upon the constitutionality of measures.

To do anything effective for agriculture in a national way is a bold undertaking. Shortly before his death, President Wilson lamented the fact that the agricultural problem was still unsolved. He admitted it was the greatest of all and the most difficult of solution. We have heard expressions of admiration for the "courage" President Coolidge showed in using his veto power. This is superficial reasoning. It requires much more courage to launch an untried plan, such as was embodied in the farm surplus bill, than to do nothing. It is deplorable that the President passed up a great opportunity. His administration has not been barren of useful works. But on the great national issue of bringing about equality for agriculture it has failed almost completely.

Farming As Is

STRAWBERRIES are rotting on the ground in Southern Illinois for want of a market says A. B. Leeper, manager of the Illinois Fruit Growers' Exchange. At $1.75 a crate, less than 8 cents a box, the growers can not afford to pay for picking, packing, and the freight to market.

Large shipments of berries from Kentucky and Missouri and the fact that there was no market Decoration Day combined to bring about a glut on all markets. We are told that holidays cost the fruit and vegetable growers of America hundreds of thousands of dollars annually.

The producer of perishables is continually faced with the hazard of unprofitable prices in a season of flush production. Canning plants are reducing this hazard in many communities, but in others the possibility is ever present. The biggest single item of expense in marketing is freight which for years has increased steadily, along with other fixed charges.

Theoretically, co-operative marketing might solve this problem if the growers over the country were closely organized so as to feed the market only what it could consume at profitable prices to the producers. Practically there is little hope for such a utopia with the producing

(Continued on page 11)

Tune in on the I. A. A. half hour program broadcast daily at 12:00 o'clock noon from station WJJD, Chicago (365 meters). The facilities of station WJJD are loaned the Association through the courtesy of the Loyal Order of Moose, Mooseheart, Ill. No program on Saturdays and Sundays.

Wing to New York

"WE are admonished to bear one another's burdens, but farmers are carrying some that a lot of easy-going people have saddled onto them," stated DeWitt C. Wing, newly appointed editor the Rural New-Yorker in a farewell address to corn belt farmers on the I. A. A. radio program recently.

D. C. Wing

"If a pack horse doesn't buck and unload some of his excess baggage, you can be sure that he will be loaded up with more, until he will either balk or lie down in abject, hopeless despair. When a man's spirit breaks, he is no longer a man but a drudge. So long as he will fight in his own interest there is hope for him.

"The champions of mechanical efficiency seem to rejoice in the fact that our farm population is decreasing. Our agricultural troubles, they say, are caused by a surplus of inefficient farmers. They overlook the important fact that national decay begins when farmers are compelled to give up their land and join the landless hordes in cities and towns.

Source of Strength

"The living waters of life spring from the hills and valleys, from which man draws the strength and power that produce clean, rugged people. The stream of life is polluted by its passage through cities."

In his closing remarks, Mr. Wing said, "Instead of saying goodbye to my corn belt friends, I would like to leave these questions with you: How many farm journals are published for farmers, in the interest of farmers? How many of them are influenced to a far greater extent by their advertisers than by their farmer readers? Is the farm press a free press? I know a few journals that are free to represent and fight for the rights of farmers. I am going to work for one of this small group."

Mr. Wing succeeds the late H. W. Collingwood. His new address is 333 W. 30th St., New York City.

Editor RECORD:

"We are charter members of the Ancient Order of Radio Bugs and Broadcasters and were delighted to hear you and our mutual friend, DeWitt C. Wing, at noon today on the air.

"Your Ezry Doolittle's dialogue and satire on campaign expenses was amusing and entertaining, but don't get him smeared with oil as that Tea Pot Dome affair is putting the skids under the G. O. P. and Al Smith is running like a new Ford and may some day be getting his mail in Washington."

Carroll County. C. T. CROFTON.

Pure Milk Association Gains New Membership

MEMBERSHIP in the Pure Milk Association is mounting steadily, according to a report recently issued by Don Geyer, field representative. The members of the organization now control more than half of Chicago's daily fluid milk supply.

The organization now embraces 17 counties in Northern Illinois, Southern Wisconsin, and Northwestern Indiana. More than 600 dairymen in Kane county are members and by the end of June officers of the association hope to bring the total of this county to 1,000. The first unit was organized in Lake county, Indiana, on May 23. Work is now in progress toward building the membership in that state.

An important meeting of the Wisconsin Council of Agriculture was held at Madison on June 14 to discuss the fluid milk section and particularly the welfare of the Pure Milk Association. The Council hopes to co-ordinate the major farm and dairy organizations in Wisconsin to bring about some unity and co-operation in fluid milk marketing.

In some instances in the past one group of milk shippers has fought another so as to flood the market and depress prices to the detriment of all. The new movement hopes to stop recurrences of this kind. The 4,000 members of the Pure Milk Association are divided into more than 100 locals which vary in membership from 100 to 275.

The injury done to the Illinois woodlots by using them for pasture is greater than injury from all other sources, according to R. B. Miller, chief forester of the State Department of Conservation. Throughout Central and Northern Illinois, woodland is not only being injured but it is being converted to cleared land by grazing, he says.

Farm production in the United States in the five years from 1922-26 was about 14 per cent greater than in the five years 1917-21, whereas population increased less than nine per cent.

The Government printing office at Washington is by far the largest book and job printing plant in the world.

Malone Speaks At Champaign County Tax Gathering 31st

Declares There Is No Tax Roll at Present Time

CHAMPAIGN county farmers turned out 800 strong at a meeting of taxpayers in Champaign on May 31 to hear William H. Malone, chairman of the State Tax Commission, bring the latest word on the controversy over the legality of the assessment in that county.

Wm. H. Malone

Mr. Malone stated that there is no tax roll in Champaign county at the present time since the present assessment was declared null and void by the Commission.

"The order of reassessment will stand until it is changed by a court of competent jurisdiction," said Mr. Malone.

"The Tax Commission gave a fair and open hearing to the farmers of Champaign county, to the Board of Review, and numerous lawyers and county and city officials. They found that property in Champaign county had not been equally assessed and signed an order for reassessment. And I say to you, if the assessors reassess and it comes back the same as before I will sign an order for another reassessment.

Obey the Law

"The State Tax Commission, created under the law of this state and vested with the powers I have read to you, plain, clear, and definite, has ordered a reassessment of Champaign county. I suggest that the county officers obey the law and if they don't, the State Tax Commission will go into the Supreme Court of this state and ask for a writ of mandamus to compel them to, and ask for a writ of malfeasance in office to put them out where they belong."

John C. Watson, director of taxation, spoke briefly following Mr. Malone. He read excerpts of the October 6 hearing before the Commission revealing that the Board of Review had knowledge of the tax summary as presented; that it did not question the method by which these facts were secured; and agreed that the summary stated the facts as the board knew.

Sixty-two livestock growers from Logan county visited the Chicago Producers on May 31. J. H. Checkley, farm adviser, led the pilgrimage.

They came up in a special car on the I. C. R. R. returning home the same day.

Meet to Further Grain Marketing Plan for Illinois

To Recommend I. A. A. Employ a Grain Marketing Director

A FURTHER clarification of common ground on which the I. A. A. and the State Farmers Grain Dealers' Association can work in a co-operative grain marketing program for Illinois resulted from the joint meeting of committees held in the I. A. A. offices on May 29.

The I. A. A. recognizes that the farmers' elevators should be the nucleus for building co-operative grain marketing machinery and to this end it promised whole-hearted support toward strengthening and aiding these units.

The program recommended by the committees will include closer co-operation between elevators and Farm Bureaus, urging farmers to support their elevators, making elevators more truly co-operative, better co-operation between elevators, and improvement of methods and practices.

A Starting Point

The marketing committee agreed to recommend that the Executive Committee of the I. A. A. employ a grain marketing director to develop this program as a foundation and starting point for co-operative grain marketing in Illinois.

Representing the Farmers Grain Dealers' Association at the meeting were President D. H. Allen, Delavan; Secretary Lawrence Farlow, Bloomington; Joe Henebry, Plainfield; V. A. Wertsch, Delavan; and representing the I. A. A. were President Earl C. Smith, Treasurer R. A. Cowles; A. R. Wright, Varna; Frank Barton, Cornell; George J. Stoll, Chestnut; Sam Sorrells, Raymond; and Harrison Fahrnkopf, Bloomington.

Ex-Farm Advisers Now Manage Lands

WALTER W. McLAUGHLIN, who resigned recently as farm adviser in LaSalle county, is the new farm manager for the Citizens National Bank at Decatur. McLaughlin will manage approximately 10,000 acres of land most of which has been turned over to the trust department of the bank in recent years.

Many persons have become owners of valuable lands in Central Illinois, who, for various reasons, cannot supervise or handle these farms properly. Some are non-residents and others are in business and have no time to give attention to their farm interests. In some cases owners of land have died leaving it to persons untrained and unskilled in farm management, and for the benefit of such persons the new service is being offered by this bank.

McLaughlin's success as farm adviser in LaSalle county fits him admirably for his new work. He is the third farm adviser within the past three months to undertake the management of land of this class. Chas. Robinson, of Decatur, and F. E. Fuller of Bloomington are the other two. Banks have acquired many farms in recent years through bankrupt proceedings and inability of owners to make payments and hold them.

Like Producer Service

C. S. THOMAS, manager of the Brown County Shipping Association, shipped 700 calves last year. Practically all of these went to Producer Agencies at St. Louis, Indianapolis, or Chicago. Mr. Thomas handled several consignments of calves sent in by a local buyer. The buyer voluntarily offered as explanation for his use of the Association that he received 50c to 75c per hundred weight more by selling to the Producers. Last year Thomas shipped 116 cars of livestock from various points in his county. One hundred three cars, or 88%, went to Producer Agencies. Mr. Thomas says that his sales and the service which he got from the Producer Agencies are satisfactory to him. What is more, the service and sales are satisfactory to his patrons. Some managers "pass the buck" to their members by saying that the latter will not let them ship to Producers. Investigation brings to light the fact that where the managers will give the Producer Agencies a fair trial, their members will not let them ship anywhere else. Mr. Thomas reports that his members would object strongly if he attempted to direct his shipments to other than Producer Agencies.—Ray E. Miller.

Madison Co. Tries New Member Plan

Continuous efforts to build membership instead of one big drive at the end of a three-year period will be tried out in Madison county. Thus memberships will expire at different times and the work of maintaining the organization will be spread over the three-year period.

DETENTION of cattle and hogs for tuberculosis at the packing centers is showing a decided reduction as a result of the nation-wide campaign to exterminate the disease in cattle. The Department of Agriculture's recent survey that bovine tuberculosis now affects only about two per cent of the animals is against four per cent in 1922. Sixty-nine counties in the United States report infection of more than 15 per cent.

Baseball League Gets Away to Flying Start New Teams Play

West Central Illinois Division Meets in Peoria June 8

FARM Bureau baseball in Illinois got under way on May 26, with games in most of the districts over the state. A general shower which fell over west central Illinois the opening day brought several games to an abrupt close.

All teams in Division three comprising Tazewell, Peoria, Marshall-Putnam, and Woodford have played each week. This division leads in baseball interest, and perhaps in proficiency of playing. It has won the state championship each year since the League was organized in 1924.

The first series of games resulted in a tie between Woodford and Tazewell, and a called game between Peoria and Marshall-Putnam, the result of which is still in dispute.

Stark and Henry counties, playing their first games in the League, met twice. Both games went to the Henry county team. Whiteside, the third team in the division, was scheduled to play Henry on June 9.

Jefferson County Wins

In Southern Illinois Jefferson county trounced Washington, a new team, on May 26 while the following week Lawrence county won easily from Wayne in a one-sided game.

McDonough county is the dark horse in the Western Illinois divisions. Playing for the first time, this team defeated Henderson county 5 to 1. Henderson county always has been a dangerous team and a hard one to beat.

Champaign county has shown considerable activity in baseball this season. A county league of four teams has been organized from which a county team will be selected to compete against other county teams in that division. The first county league games were played on Saturday, June 2, with Pesotum opposing the Cardinals at Rantoul, and Urbana playing Tolono-Sadorus at Tolono. Paul Meharry has been selected to organize a county team to compete in the state league.

At a meeting of League officers and leaders in Division 3 at Peoria on June 8 it was recommended that all disputed questions be referred to the League commissioner and that the constitution with respect to the eligibility clause be interpreted to promote the best interests of the League. It was generally agreed that no players should be declared eligible who have no farming interest or who have no interest in the Farm Bureau other than to play baseball. The League frowns on attempts to professionalize it by signing semi-pros or paying Farm Bureau dues of proficient players simply for their services on the Farm Bureau team.

area strung out from the Gulf to Canada, and each section trying to get the best of the other. Such illustrations serve to impress us with the limitations of co-operative marketing and the highly speculative features of farm production under the present system.

8,374 On June 7

EIGHT thousand three hundred and seventy-four applications for auto insurance in the Illinois Agricultural Mutual Insurance Company were received up to the night of Thursday, June 7. The company now has policyholders in more than 80 per cent of the counties in Illinois and has total assets of nearly $175,000.

The directors recently voted to advertise in a broad, effective way and to this end purchased the back cover of the RECORD for 12 consecutive issues. Since policies are limited to Farm Bureau members there is no wastage in circulation.

The company made an enviable record of low cost in its first year of operation. And now that the number of policyholders is nearly double the average of last year, further decreases in overhead may be expected.

Do not fail to read the monthly messages on the back cover. Further information may be had by writing the company at 608 So. Dearborn St., Chicago.

WHY YOU SHOULD BEGIN TO THINK SYMPATHETICALLY OF THE FARMERS' TROUBLES

17th Dist. To Meet at Pontiac

THE next I. A. A. Conference in the 17th district will be held at Pontiac Friday, June 29, according to an announcement by Geo. J. Stoll of Chestnut who represents the district on the I. A. A. Executive Committee.

All Farm Bureau members in from the counties in the district are urged to attend this meeting. Further plans for the district picnic at Bloomington on Aug. 31 will be discussed among other questions.

Money Goes Abroad

CONGRESSIONAL investigation of foreign investments has been requested by Representative Celler of New York City. He states that figures compiled by the Department of Commerce show that in addition to the loans to the Allies, $11,611,364,736 had been loaned abroad up to January, 1928.

"Europe alone has received over $5,000,000,000," he said, "while Canada and Newfoundland have borrowed $3,000,000,000."

THERE IS ONE MOTOR VEHICLE to every 5.13 persons in the United States. More than 23,000,000 motor vehicles were registered in 1927. Illinois was fifth among the states with 1,438,985.

Hail Stones Like These Fell in Illinois Last Year

Be on the Safe Side

of that hailstorm when it strikes

A HAILSTORM usually cuts a path of varying width through the country like a tornado. Sometimes it's only a half-mile or a mile wide, sometimes many miles. When the black hail cloud comes, you can't steer it away from your farm. You can't cover up. You are helpless.

The only way you can protect yourself against hail loss is by Insurance.

Farm Crop Hail Insurance, Fruit and Garden Truck Hail Insurance, Fire and Lightning Insurance, Windstorm, Tornado, and Cyclone Insurance all at cost, which means cheaper than in any old line company.

W. C. Stuckey of Knox County says he lost enough in one year from Hail to pay his insurance for the next 40 years.

Get Ready for District Picnics

Issues of Interest to Agriculture Will Be Discussed at 14 Great Outdoor Gatherings

COMMITTEES in 14 congressional districts are meeting regularly these days, each determined to outdo the others in organizing the best I. A. A.-Farm Bureau picnics in the state.

Bring 'em along

That these gatherings will compare favorably with former I. A. A. state picnics is assured according to news and information coming from various sections of the state. Baseball games, horseshoe pitching, hog calling and chicken calling contests, races for the kids, and all the attractions heretofore associated with the annual state picnics will feature the district events.

As one farm adviser put it, "We expect to have just as large a crowd and as much fun at our district picnic with the further advantage that the members can make the drive much more easily and be home in time to do chores."

Want Baseball Teams

The districts already are vieing with each other to get the leading teams in the Illinois Farm Bureau Baseball League to play off their regular semi-final and final games at their respective picnics. League leaders are co-operating in this move. The semi-finals are expected to begin about the third week in August.

A movement is underway to arrange for a state horseshoe tournament where the winners at the district picnics will meet to decide the state championship. Whether this tournament will be held in connection with the last picnic of the season on Labor Day at Jacksonville has not been definitely decided. But this picnic in the 20th district is being favorably considered because of the advantages in time and location afforded.

"Fighting Bill" Settle

Speakers already have been definitely scheduled for all except three of the 14 picnics. These include congressmen and leaders who have been prominent in the cause of equality for agriculture during the past six years. Wm. H. Settle, known as "Fighting Bill" in the Hoosier state where he is president of the Indiana Farm Bureau Federation, will be a popular attraction at Taylorville on August 8, Highland Aug. 9, and at Sullivan on Aug. 10.

Mr. Settle is a director in the American Farm Bureau Federation and acts as manager of the Central States Soft Wheat Growers Association.

Smith to Speak

The last picnic to be scheduled will be held first, namely, the 11th district picnic booked for Herrick Lake near Wheaton in Dupage county on Wednesday, July 25. Earl C. Smith will be speaker.

Congressman Charles Adkins of Decatur will speak at Marion Aug. 17, and at Macomb on Aug. 21. Mr. Adkins is well known to Illinois farmers. For many years he was active in the grain business, and later served as state director of agriculture. He was especially prominent in the McNary-Haugen debates in the 70th congress.

THE FAMOUS ED TORBERT AND JOE HESKITT TEAM

The late Ed Torbert, who succumbed to a fatal attack of pneumonia recently and Joe Heskitt, his partner, did much to raise the standard of horseshoe pitching in Illinois. They won the state championship three years in succession.

Congressman Charles Brand of Urbana, Ohio, one of the most able spokesmen for agriculture in congress, will appear at Olney on Aug. 30, Bloomington Aug. 31, Freeport, Sept. 1, and Jacksonville, Sept. 3.

Tune up Lizzie

Some of the best picnic sites in Illinois have been chosen. Estimates of the expected crowds vary from 6,000 to 10,000 to as high as 20,000 people. Knox county heretofore has had unusually large crowds at the annual Farm Bureau picnics. With the aid of other counties in the district this year, the picnic at Galesburg on Aug. 15 promises to surpass those held in previous years.

Peach Crop Harvest

For the most part the dates have been chosen to avoid conflicts with harvest. Whether or not the peach crop will be out of the way around Marion by Aug. 17 is problematical, but local leaders are in hopes that most of the peaches will have been disposed of by that time.

Some of the old familiar faces will be missing at the picnics this year. Such prominent figures as Ed Torbert and his son Walter of Dewitt county, always the center of attraction where the horseshoes were flying at former I. A. A. state picnics, will not be there. Father and son passed away recently from a short but fatal attack of pneumonia. Harry alone is left of this most famous trio of barnyard golf experts in Illinois history.

The poster part of which is reproduced on the cover page will advertise the picnics in every congressional district. Local committees will provide their own windshield stickers and arrows to mark the roads to the picnics.

The fourteenth annual meeting of the I. A. A. will be held at Danville, Jan. 30-31, 1929.

The Illinois Agricultural Association RECORD

Published monthly by the Illinois Agricultural Association at 404 North Wesley Ave., Mount Morris, Ill. Entered as second class matter at post-office at Mount Morris, Ill., October 30, 1925, under the Act of Mar. 3, 1879. Acceptance for mailing at special rate of postage provided in Section 412, Act of February 28, 1925, authorized October 27, 1925.

Farm Bureau Day, State Fair, Aug. 24

Vice-Presidential Candidates, Senators Robinson and Curtis Invited to Address Middle West Farmers

PLANS for a bigger and better FARM BUREAU DAY at the Illinois State Fair on Friday, August 24, were being made as this issue of the RECORD went to press.

After conferring with the State Fair Officials, permission was granted the Illinois Agricultural Association, through President Earl C. Smith, to use the mammoth new grandstand overlooking the race track for a discussion of the National Agricultural situation between 10:30 a. m. and 12:30 p. m.

HON. JOSEPH T. ROBINSON

HON. CHARLES CURTIS

In keeping with the non-partisan policy of the Associaton, also seeking to give full and impartial information on this question to the general public as well as to our members, the following telegram of invitation was dispatched to the Vice Presidential candidates of the Republican and Democratic parties, who happen also to be the floor leaders of their respective parties in the United States Senate.

July 13, 1928.

"Hon. Joseph T. Robinson,

Senate Office Bldg.,

Washington, D. C.

"Through the courtesy of the Illinois State Fair Association, Friday, August twenty-fourth, is known as FARM BUREAU DAY. The officers and members of the Illinois Agricultural Association extend to you an invitation to discuss the national agricultural question for one hour beginning at 10:30 a. m. at the Illinois State Fair Grounds at Springfield. The grandstand is equipped with amplifiers and seats 12,000 people. A similar invitation is being extended to Senator Charles Curtis to speak from the same platform on this occasion.

"Your position as floor leaders of the Senate and as candidates for Vice-President of the United States of your respective parties, assures you of the close attention not only of the Middle West but of the whole nation. We hope to receive promptly your acceptance of this invitation.

(Signed)
Earl C. Smith,
President,
Illinois Agricultural Association."

Neither candidate had responded to the invitation up to time of going to press, but acceptances from both were being awaited with confidence.

State fair officials made a special concession in allowing the use of the grandstand. Scheduled attractions for the morning will be dispensed with, and the speed program of the afternoon will be deferred until one o'clock so as to allow time for clearing the grandstand if the candidates agree to speak.

With the two Vice-Presidential candidates as speakers, the program will attract farmers not only from Illinois, but also from adjoining corn belt states. Comparable to the Lincoln-Douglas debates of pre-Civil War days, the occasion may go down in history as one of the high lights of the 1928 presidential campaign.

The I. A. A. will set up a headquarters tent for Fair visitors similar to that of last year. Chairs, drinking water, and rest facilities will be provided under the big top. All visitors are cordially invited.

Get Ready for District Picnics

Issues of Interest to Agriculture Will Be Discussed at 14 Great Outdoor Gatherings

COMMITTEES in 14 congressional districts are meeting regularly these days, each determined to outdo the others in organizing the best I. A. A.-Farm Bureau picnics in the state.

Bring 'em along

That these gatherings will compare favorably with former I. A. A. state picnics is assured according to news and information coming from various sections of the state. Baseball games, horseshoe pitching, hog calling and chicken calling contests, races for the kids, and all the attractions heretofore associated with the annual state picnics will feature the district events.

As one farm adviser put it, "We expect to have just as large a crowd and as much fun at our district picnic with the further advantage that the members can make the drive much more easily and be home in time to do chores."

Want Baseball Teams

The districts already are vieing with each other to get the leading teams in the Illinois Farm Bureau Baseball League to play off their regular semi-final and final games at their respective picnics. League leaders are co-operating in this move. The semi-finals are expected to begin about the third week in August.

A movement is underway to arrange for a state horseshoe tournament where the winners at the district picnics will meet to decide the state championship. Whether this tournament will be held in connection with the last picnic of the season on Labor Day at Jacksonville has not been definitely decided. But this picnic in the 20th district is being favorably considered because of the advantages in time and location afforded.

"Fighting Bill" Settle

Speakers already have been definitely scheduled for all except three of the 14 picnics. These include congressmen and leaders who have been prominent in the cause of equality for agriculture during the past six years. Wm. H. Settle, known as "Fighting Bill" in the Hoosier state where he is president of the Indiana Farm Bureau Federation, will be a popular attraction at Taylorville on August 8, Highland Aug. 9, and at Sullivan on Aug. 10.

Mr. Settle is a director in the American Farm Bureau Federation and acts as manager of the Central States Soft Wheat Growers Association.

Smith to Speak

The last picnic to be scheduled will be held first, namely, the 11th district picnic booked for Herrick Lake near Wheaton in Dupage county on Wednesday, July 25. Earl C. Smith will be speaker.

Congressman Charles Adkins of Decatur will speak at Marion Aug. 17, and at Macomb on Aug. 21. Mr. Adkins is well known to Illinois farmers. For many years he was active in the grain business, and later served as state director of agriculture. He was especially prominent in the McNary-Haugen debates in the 70th congress.

Congressman Charles Brand of Urbana, Ohio, one of the most able spokesmen for agriculture in congress, will appear at Olney on Aug. 30, Bloomington Aug. 31, Freeport, Sept. 1, and Jacksonville, Sept. 3.

Tune up Lizzie

Some of the best picnic sites in Illinois have been chosen. Estimates of the expected crowds vary from 6,000 to 10,000 to as high as 20,000 people. Knox county heretofore has had unusually large crowds at the annual Farm Bureau picnics. With the aid of other counties in the district this year, the picnic at Galesburg on Aug. 15 promises to surpass those held in previous years.

Peach Crop Harvest

For the most part the dates have been chosen to avoid conflicts with harvest. Whether or not the peach crop will be out of the way around Marion by Aug. 17 is problematical, but local leaders are in hopes that most of the peaches will have been disposed of by that time.

Some of the old familiar faces will be missing at the picnics this year. Such prominent figures as Ed Torbert and his son Walter of Dewitt county, always the center of attraction where the horseshoes were flying at former I. A. A. state picnics, will not be there. Father and son passed away recently from a short but fatal attack of pneumonia. Harry alone is left of this most famous trio of barnyard golf experts in Illinois history.

The poster part of which is reproduced on the cover page will advertise the picnics in every congressional district. Local committees will provide their own windshield stickers and arrows to mark the roads to the picnics.

THE FAMOUS ED TORBERT AND JOE HESKITT TEAM

The late Ed Torbert, who succumbed to a fatal attack of pneumonia recently and Joe Heskitt, his partner, did much to raise the standard of horseshoe pitching in Illinois. They won the state championship three years in succession.

The fourteenth annual meeting of the I. A. A. will be held at Danville, Jan. 30-31, 1929.

Story of the Houston Convention

By R. A. Cowles, Treasurer

THE "Houston Convention"—the National convention of the Democratic party—has now been held and the party's acknowledgments, declarations and commitments with respect to agriculture and its problems, have appeared in the press reports of the Convention. Representatives of farm organizations were there in attendance throughout the Convention, and the Illinois Agricultural Association was represented by Frank Barton, its Vice President and Chairman of its committee on Public Relations, and by its Treasurer.

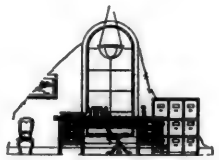
R. A. Cowles

Arriving at Houston Sunday evening, June 24th, we were met by playing bands, and host committees, on the job to welcome arriving delegates and the guests of Houston over the Convention. The beautiful new modern city, elaborately decorated in the National colors, its streets and hotel lobbies filled with the hosts arriving, was at its best. The work was done. The great convention hall had been dedicated during the day by the people of Texas. It was apparent that everything was in readiness, waiting for the opening hour of the Convention. The city and its people of the south land, famous for its hospitality, were "dressed up" ready to receive its guests.

Party Leaders Sympathetic

We looked up George Peek and Chester Davis as we arrived, and during the evening met representatives of farm organizations and talked with friends in Congress, and others who have supported our cause in Congress, already on the ground. Party leaders were generally reported to be interested in our problem and sympathetic.

The following morning we had breakfast with the representatives of the American Farm Bureau Federation there, Ed O'Neal of Alabama, Vice-President and Chairman of the Legislative Committee, and Mr. Chester Gray, Washington representative of the Federation. Favorable reports were given by these men. We called at headquarters of the Illinois delegation, in the Rice Hotel, and talked with Mr. Brennan, Chairman of the delegation, and with Mike Igoe, and others of the delegation. We were cordially received and were pleased to learn that Mr. Igoe was to be selected by the Illinois delegation for the place on the Platform and Resolutions Committee of the Convention.



During the day, representatives of other farm organizations were arriving at "Farm Headquarters" in the Rice Hotel. Favorable reports were coming in to us in regard to others, selected by state delegations, for places on the important Committee on Platform and Resolutions. We were gratified to learn that a number of Senators and others, who have loyally supported our legislative program at Washington, were being selected by their respective state delegations to be appointed on the Committee. The Committee was found to include such outstanding and able men as Senator Key Pittman of Nevada; Senator T. H. Caraway of Arkansas; Senator Sam Bratton of New Mexico, and Messrs. Thomas Cashman of Minnesota; John Simpson of Oklahoma, among others who have ably and loyally fought for our cause. It appeared that the Committee was being formed from those of the delegates best informed and most able to draft a comprehensive platform for the party. Any suggestion that the Committee was "picked" or "packed" was conspicuous by its absence. The Committee was later announced, with Senator Pittman of Nevada as its chairman. The Senator always has been sympathetic to our problem and program and his selection, as its chairman, was therefore, pleasing and reassuring to us.

Resolutions Committee Meets

The Committee assembled and duly organized for its task, delegating to a smaller sub-committee, the responsibility for drafting the platform, for later consideration and recommendations. The sub-committee included Senators Pittman, Caraway, Harrison, Wagner and Bratton, Governor Dan Moody of Texas, Mr. Cashman and others.

As the Committee met and organized, a group of our people, headed by Ed O'Neal of Alabama, called on the Chairman of the Committee, and respectfully asked that representatives of farm organizations there, be given an opportunity to appear before the Committee and present their views on the agricultural situation. Our request was received and we were informed that a sub-committee might be expected to set aside an appropriate period of time for the hearing. The sub-committee, as appointed, immediately convened and directly announced that three hours had been set aside for those to be heard on this subject, before the Committee on Platform and Resolutions. The hearing was scheduled for 4:00 that afternoon. Our group retired to "Farm Headquarters" and prepared its program.

Among those who appeared before the Committee and addressed them, were: Mrs. Verna Hatch and Bill Settle of Indiana, both well known to our people in Illinois; Ed O'Neal of Alabama; J. F. Reed of Minnesota; C. E. Huff and C. E. Brasted of Kansas; Dr. B. W. Kilgore of North Carolina and our Frank Barton. Congressman Henry Rainey of Illinois also addressed the Committee and urged the party to meet the agricultural issue courageously and squarely. Hon. Clarence Ousley of Texas, also well known to some of our people, spoke forcefully on the subject.

THE GREAT SECRET OF SUCCESS IN LIFE IS TO BE READY WHEN THE OPPORTUNITY COMES.—*Disraeli.*

Job Well Done

Space does not permit a full report here of our appearance before the Committee that afternoon. It is sufficient for our people to know that the job was well done in every respect. The program was so arranged that there was little repetition and the subject was completely covered, for the purposes of the hearing. As one of those who "stood by," the writer felt great pride in the splendid presentation made by each one of our group.

In the meantime, the Convention on the evening of its first day's session had listened to the "keynote" address, delivered by Claude G. Bowers, formerly of Indiana, had heard the keynoter's plea to "give farm equal chance with factory." And as he developed the thought, that great Convention arose to its feet and we witnessed a demonstration that gladdened our hearts. The Agricultural situation was to be the paramount issue. It encouraged us much in our undertaking, in which we were about to appeal to the party to pronounce a national policy for agriculture and pledge its support in putting it into force.

Platform Is Presented

The sub-committee concluded the draft of the platform, in an all-night session, and the following morning made its report. Later in the day we were informed that the sub-committees' draft had been accepted in its entirety and that the Committee on Platform and Resolutions was ready to make an unanimous report to the Convention. The platform was presented that night and unanimously adopted by the Convention as our people learned through press reports. It may be fairly said that the agricultural plank of the platform was prepared with the collaboration of those who had given the subject most careful thought and study, included on the Committee. At all times our views were welcomed and were solicited by the party leaders who were sympathetic and seemed to want to make comprehensive acknowledgment and commitment by the party.

No attempt here is made to analyze the agricultural plank, included in the platform. Those of us who were there and were informed of what the plank was to include, as it was developed, were agreed, and it seemed to us, to be comprehensive in its acknowledgments of present day problems of agriculture and the situation as it actually exists, and particularly, in its acknowledgment of the fundamental problem confronting agriculture, the surplus problem; and it seemed equally comprehensive in its pronouncement on behalf of the party, of a national policy for agriculture, which by the language of the plank, pledges the party to undertake to carry out.

We all returned from the Convention greatly encouraged, appreciative of the consideration given our cause, and of the many courtesies extended us by party leaders throughout the Convention. We left the Convention, waiting the expression and commitment of the man who was selected as the party's standard bearer.

THE REPUBLICAN FARM PLANK

AGRICULTURE

(Adopted at Kansas City, June 14, 1928)

THE agricultural problem is national in scope and, as such, is recognized by the Republican party, which pledges its strength and energy to the solution of the same. Realizing that many farmers are facing problems more difficult than those which are the portion of many other basic industries, the party is anxious to aid in every way possible.

Many of our farmers are still going through readjustments, a relic of the years directly following the great war. All the farmers are being called on to meet new and perplexing conditions created by foreign competition, the complexities of domestic marketing, labor problems, and a steady increase in local and state taxes.

The general depression in a great basic industry inevitably reacts upon the conditions in the country as a whole and cannot be ignored. It is a matter of satisfaction that the desire to help in the correction of agricultural wrongs and conditions is not confined to any one section of our country or any particular group.

Achievements Cited

The Republican party and the Republican administration, particularly during the last five years, have settled many of the most distressing problems as they have arisen, and the achievements in aid of agriculture are properly a part of this record. The Republican congresses have been most responsive in the matter of agricultural appropriations, not only to meet crop emergencies, but for the extension and development of the activities of the department of agriculture.

The protection of the American farmer against foreign farm competition and foreign trade practices has been vigorously carried on by the department of state. The right of the farmers to engage in collective buying and cooperative selling as provided for by the Capper-Volstead act of 1922 has been promulgated through the department of agriculture and the department of justice, which have given most valuable aid and assistance to the heads of the farm organizations.

The treasury department and the proper committees of congress have lightened the tax burden on farming communities, and through the federal farm loan system there has been made available to the farmers of the nation $1,850,000,000 for lending purposes at a low rate of interest, and through the intermediate credit banks $665,000,000 of short term credits have been made available to the farmers.

Rural Free Delivery

The post office department has systematically and generously extended the rural free delivery routes into even the most sparsely settled communities.

When a shortage of transportation facilities threatened to deprive the farmers of their opportunity to reach waiting markets overseas, the president, appreciative and sensitive of the condition and the possible loss to the communities, ordered the reconditioning of shipping board vessels, thus relieving a great emergency.

Last, but not least, the federal tariff commission has at all times shown a willingness under the provisions of the flexible tariff act to aid the farmers when

REPRESENT ILLINOIS AT 4-H CLUB CAMP, WASHINGTON

THE four boys and girls with their state leaders shown above represented Illinois at the 4-H club encampment recently at Washington, D. C.

Above are E. I. Pilchard and Miss Mary L. Grady, state club leaders, Harold Hixson, 20, of Wellington, Iroquois county, who has been active in club work for six years, and Clarence Ropp, 20, of Normal, McLean county, who has been prominent in club work for nine years.

Below are Dorothy McGaughey of Macon county and Lois Hubbard of Adams county, both of whom have done outstanding club work.

The trip to Washington represents the highest award that can be given to 4-H club boys and girls in Illinois. Before leaving for Washington, the boys and girls and their leaders discussed club work on the I. A. A. farm radio program. The Association has contributed $100 each year for several years to help pay expenses of the winners to the national capitol.

THE DEMOCRATIC FARM PLANK

AGRICULTURE

(Adopted at Houston, June 28, 1928)

DECEPTION upon the farmer and stock raiser has been practiced by the Republican party through false and delusive promises for more than 50 years. Specially favored industries have been artificially aided by Republican legislation. Comparatively little has been done for agriculture and stock raising upon which national prosperity rests. Unsympathetic inaction with regard to this problem must cease. Virulent hostility of the Republican administration to the advocates of farm relief, and denial of the right of farm organizations to lead in the development of farm policy, must yield to Democratic sympathy and friendliness.

Four years ago, the Republican party, forced to acknowledge the critical situation, pledged itself to take all steps necessary to bring back a balanced condition between agriculture and other industries and labor. Today it faces the country not only with that pledge unredeemed, but broken by the acts of a Republican President who is primarily responsible for the failure to offer a constructive program to restore equality to agriculture.

Coolidge Vetoes Cited

While he had no constructive and adequate program to offer in its stead, he has twice vetoed farm relief legislation and has sought to justify his disapproval of agricultural legislation partly on grounds wholly inconsistent with his acts making industrial monopolies the beneficiaries of government favor; and in endorsing the agricultural policy of the present administration the Republican party in its recent convention served notice upon the farmer that the so-called protective system is not meant for him; that while it offers protection to the privileged few, it promises continued world prices to the producers of the chief cash crops of agriculture.

We condemn the policy of the Republican party, which promises relief to agriculture only through a reduction of American farm production to the needs of the domestic market. Such a program means the continued deflation of agriculture, the forcing of additional millions from the farms and the perpetuation of agricultural distress for years to come, with continued bad effects on business and labor throughout the United States.

The Democratic party recognizes that the problems of production differ as between agriculture and industry. Industrial production is largely under human control, while agricultural production, because of lack of coordination, among the 6,500,000 individual farm units, and because of the influence of weather, pests, and other causes, is largely beyond human control. The result is that a large crop frequently is produced on a small acreage and a small crop on a large acreage; and measured in money value it frequently happens that a large crop brings less than a small crop.

Producers of crops whose total volume exceeds the needs of the domestic market must continue at a disadvantage until the government shall intervene as seriously and as effectively in behalf of the farmers as it has intervened in behalf of labor and industry. There is a need of supplemental legislation for the control and orderly handling of agri-

THE REPUBLICAN FARM PLANK

AGRICULTURE

(Adopted at Kansas City, June 14, 1928)

THE agricultural problem is national in scope and, as such, is recognized by the Republican party, which pledges its strength and energy to the solution of the same. Realizing that many farmers are facing problems more difficult than those which are the portion of many other basic industries, the party is anxious to aid in every way possible.

Many of our farmers are still going through readjustments, a relic of the years directly following the great war. All the farmers are being called on to meet new and perplexing conditions created by foreign competition, the complexities of domestic marketing, labor problems, and a steady increase in local and state taxes.

The general depression in a great basic industry inevitably reacts upon the conditions in the country as a whole and cannot be ignored. It is a matter of satisfaction that the desire to help in the correction of agricultural wrongs and conditions is not confined to any one section of our country or any particular group.

Achievements Cited

The Republican party and the Republican administration, particularly during the last five years, have settled many of the most distressing problems as they have arisen, and the achievements in aid of agriculture are properly a part of this record. The Republican congresses have been most responsive in the matter of agricultural appropriations, not only to meet crop emergencies, but for the extension and development of the activities of the department of agriculture.

The protection of the American farmer against foreign farm competition and foreign trade practices has been vigorously carried on by the department of state. The right of the farmers to engage in collective buying and cooperative selling as provided for by the Capper-Volstead act of 1922 has been promulgated through the department of agriculture and the department of justice, which have given most valuable aid and assistance to the heads of the farm organizations.

The treasury department and the proper committees of congress have lightened the tax burden on farming communities, and through the federal farm loan system there has been made available to the farmers of the nation $1,850,000,000 for lending purposes at a low rate of interest, and through the intermediate credit banks $665,000,000 of short term credits have been made available to the farmers.

Rural Free Delivery

The post office department has systematically and generously extended the rural free delivery routes into even the most sparsely settled communities.

When a shortage of transportation facilities threatened to deprive the farmers of their opportunity to reach waiting markets overseas, the president, appreciative and sensitive of the condition and the possible loss to the communities, ordered the reconditioning of shipping board vessels, thus relieving a great emergency.

Last, but not least, the federal tariff commission has at all times shown a willingness under the provisions of the flexible tariff act to aid the farmers when

REPRESENT ILLINOIS AT 4-H CLUB CAMP, WASHINGTON

THE four boys and girls with their state leaders shown above represented Illinois at the 4-H club encampment recently at Washington, D. C.

Above are E. I. Pilchard and Miss Mary L. Grady, state club leaders, Harold Hixson, 20, of Wellington, Iroquois county, who has been active in club work for six years, and Clarence Ropp, 20, of Normal, McLean county, who has been prominent in club work for nine years.

Below are Dorothy McGaughey of Macon county and Lois Hubbard of Adams county, both of whom have done outstanding club work.

The trip to Washington represents the highest award that can be given to 4-H club boys and girls in Illinois. Before leaving for Washington, the boys and girls and their leaders discussed club work on the I. A. A. farm radio program. The Association has contributed $100 each year for several years to help pay expenses of the winners to the national capitol.

THE DEMOCRATIC FARM PLANK

AGRICULTURE

(Adopted at Houston, June 28, 1928)

DECEPTION upon the farmer and stock raiser has been practiced by the Republican party through false and delusive promises for more than 50 years. Specially favored industries have been artificially aided by Republican legislation. Comparatively little has been done for agriculture and stock raising upon which national prosperity rests. Unsympathetic inaction with regard to this problem must cease. Virulent hostility of the Republican administration to the advocates of farm relief, and denial of the right of farm organizations to lead in the development of farm policy, must yield to Democratic sympathy and friendliness.

Four years ago, the Republican party, forced to acknowledge the critical situation, pledged itself to take all steps necessary to bring back a balanced condition between agriculture and other industries and labor. Today it faces the country not only with that pledge unredeemed, but broken by the acts of a Republican President who is primarily responsible for the failure to offer a constructive program to restore equality to agriculture.

Coolidge Vetoes Cited

While he had no constructive and adequate program to offer in its stead, he has twice vetoed farm relief legislation and has sought to justify his disapproval of agricultural legislation partly on grounds wholly inconsistent with his acts making industrial monopolies the beneficiaries of government favor; and in endorsing the agricultural policy of the present administration the Republican party in its recent convention served notice upon the farmer that the so-called protective system is not meant for him; that while it offers protection to the privileged few, it promises continued world prices to the producers of the chief cash crops of agriculture.

We condemn the policy of the Republican party, which promises relief to agriculture only through a reduction of American farm production to the needs of the domestic market. Such a program means the continued deflation of agriculture, the forcing of additional millions from the farms and the perpetuation of agricultural distress for years to come, with continued bad effects on business and labor throughout the United States.

The Democratic party recognizes that the problems of production differ as between agriculture and industry. Industrial production is largely under human control, while agricultural production, because of lack of coordination, among the 6,500,000 individual farm units, and because of the influence of weather, pests, and other causes, is largely beyond human control. The result is that a large crop frequently is produced on a small acreage and a small crop on a large acreage; and measured in money value it frequently happens that a large crop brings less than a small crop.

Producers of crops whose total volume exceeds the needs of the domestic market must continue at a disadvantage until the government shall intervene as seriously and as effectively in behalf of the farmers as it has intervened in behalf of labor and industry. There is a need of supplemental legislation for the control and orderly handling of agri-

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Edited by Department of Information, E. G. Thiem, Director, 608 South Dearborn Street, Chicago, Illinois. Entered as second-class matter October 20, 1925, at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Accepted for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the ILLINOIS AGRICULTURAL ASSOCIATION RECORD. Postmaster: In returning an uncalled for or missent copy please indicate key number on address as is required by law.

I. A. A. Policy

SINCE the close of the political conventions, many inquiries and suggestions as to our future course in these matters have been received. After careful consideration at the regular meeting on Friday, July 13th, the Executive Committee of the Association authorized the following statement be issued:

"The primary interest and purpose of the Illinois Agricultural Association is to serve the true and permanent interests of the farmers of Illinois. The policy of the Association in all political matters has always been and will continue to be strictly non-partisan.

"We recognize that agricultural issues are economic rather than political. This was conclusively shown by the majority vote of both parties in each house of the 69th and 70th Congresses, by which the McNary-Haugen Bill was passed. It has also been repeatedly revealed by the non-partisan vote supporting and passing such constructive agricultural legislation in our state.

"National, state and district issues should be carefully considered on their relative merits and in no way become confused.

"We seek to furnish full, fair and impartial information on agricultural issues to our members and friends, also the records and commitments on these issues of political parties, men in office and those seeking positions of trust and responsibility. With this information in hand, farmers and all true friends of agriculture are in a position to support candidates for office who will best serve the economic interests of agriculture. We urge our members at all times to support those candidates, regardless of party, who by their records or definite commitments have proven their worthiness of this support.

"The policy as above set forth will be continued."

The Republican Farm Plank

Excerpts from Statement Made by Earl C. Smith at the Kansas City Convention

THE agricultural section of the Republican platform is unsatisfactory for the following reasons:

First, while farmers have been struggling for legislation necessary to control crop surpluses in a manner to secure benefits of the tariff, it fails to suggest the ways and means through which the party proposes to accomplish this end. In fact, it is silent on that question.

Second, it fails to state the means by which the party proposes to accomplish its general pledge to restore economic equality to agriculture.

Summed up, it fails utterly to recognize the fundamental problems facing agriculture, dealing as it does in general phrases which will be particularly unsatisfactory to farmers, due to the failure of the party in the past seven years to suggest constructive remedial legislation for the correction of agricultural conditions recognized, and general pledges made in the 1920 and 1924 platforms.

The Democratic Farm Plank

Statement by Earl C. Smith, President

THE agricultural plank in the Democratic platform adopted at Houston covers the essentials of a national farm policy more completely than any platform previously adopted by a political party. It fully recognizes the fundamental problem of crop surpluses which farm groups have for years contended must be met by any legislation if it is to be effective and satisfactory.

It further frankly recognizes the impossibility of effectively controlling surpluses unless there is authority to spread costs of such operation over all the commodity benefited.

It pledges the enactment of legislation to prevent the price of surpluses from determining the price of the entire crop and also recognizes the soundness of distributing costs incurred in handling surpluses over the commodity benefited.

While it pledges the enactment of legislation to prevent the price of surpluses from determining the price of the entire crop and also recognizes the soundness of distributing costs incurred in handling crop surpluses over the commodity benefited, it fails to pledge the party specifically to enact legislation embodying the only device yet proposed or seriously considered by Congress to accomplish that end. It does, however, pledge the party to an earnest endeavor to solve this problem, making it a matter of prime and immediate concern of a Democratic administration.

The Democratic tariff pledge is satisfactory and in addition, the platform covers the farm demand for a way to make existing tariffs, whatever they may be, effective on the crops whose production exceeds the needs of the domestic market. Farmers will watch with interest and concern for the interpretation placed upon this plank by the party candidate, in view of the treatment which platform pledges have recently received by officials after election.

THE PRESS SAYS

Translating the Platforms

NEITHER party has made a hit with its platform this year, with the single exception of the farm plank in the democratic platform, and even this is given various constructions by the press and politicians. Because of this fact and the further one that the candidates are both men of unusual personality, the voters will be inclined to construe the meaning of the various planks according to the views of the candidates themselves.

Platforms as a rule are a sort of catch-all designed to attract one class of voters without offending others who hold opposite views. Where it is deemed safe, the platform straddles an issue; often it is so vague that its meaning is obscure to the most discerning and analytical voter.

This year, the platforms as guides to the electorate are less satisfactory than usual. They will only exert an influence upon intelligent people as the candidates themselves translate them into action. This, after all, is the safest, if not the only safe guide for the voter.—Chicago Journal.

Water Transportation Will Help

How Farm Prices May Be Raised by Barge Line Development Down the Mississippi

Lachlan Macleay, Secretary Mississippi Valley Association

IN speaking of the problem of getting a fair price for the products of the farms, it has been said "the farm price becomes the retail price less the costs of assembling, transporting, processing, and distributing." Assuming that this is a correct statement, then any agency that reduces the cost of getting the products of the farms to their markets will result in higher prices on the farms, and the farmer, therefore, has a direct cash interest in Inland Waterway development which will lower these transportation costs.

Lachlan Macleay

It is 7346 miles from Buenos Aires, Argentine, to Liverpool, where the world price of wheat is made. From central Kansas to Liverpool via the port of New Orleans, it is 6010 miles, —1336 miles less distance, and yet Kansas wheat pays nearly 12c per bushel more to get to market than Argentine wheat. The average rail haul to seaboard in Argentine is 141 miles against an average rail haul from Kansas to seaboard of 800 miles. In 1927 Argentine corn was marketed on the Pacific Coast, United States of America, in competition with Illinois, Iowa, and Nebraska corn, and despite the duty paid, I am told by reliable authority that it undersold our Middle West product so much that we lost the market almost completely.

Argentine Corn Competes

What do you think of wheat moving 12,691 miles from Melbourne, Australia, to Liverpool for 19.8 cents per bushel as against 27c a bushel for an 800 mile rail haul from Kansas to New Orleans? Buenos Aires is 6,722 miles from New York, and Illinois is only an average of about 900 miles, and yet Argentine corn, despite the duty, often finds a profitable market in New York, New Jersey, Boston, and Philadelphia.

The average earnings of Atlantic ocean carriers last year is given by the Shipping Board as 3 mills per ton mile. The average earnings of Class A railroads is given by the Interstate Commerce Commission as 11.1 mills per ton mile. The average earning of the Federal Barge Line on the Mississippi River was 4.12 mills, and it made a profit on that figure after paying all of its costs and depreciation.

The Federal Barge Line is handicapped by shortage of equipment to take care of the full volume of traffic offered to it. It has not adequate terminal facilities, and its river channels are not more than two-thirds completed. In addition to these physical handicaps, it is being bitterly opposed by powerful east and west rail lines, despite all of which it carries grain from St. Louis to New Orleans for 11½c per cwt., as against a rail rate of 18c per cwt. and shows a profit on that rate while it brings back Yucatan sisal to make the farmers' binder twine at a saving of 20% under the rail rate, and makes a profit on that. It brings north a thousand cars of sugar a month and saves the public $60 per car.

Carries Grain Cheaper

I could go on enumerating commodities the Barge Line handles at a saving for the shippers and consumers, almost covering the entire list of staples used by the people of the Valley.

It is carrying grain from the Twin Cities of Minneapolis and St. Paul to New Orleans for export at a rate of 14.8 cents per cwt., as against a rail rate of 35½c, and bringing back sisal, binder twine, sugar, and coffee, also farm machinery from Moline and Rock Island for use on the farms of Minnesota, Wisconsin, North and South Dakota.

If the Barge Lines can do as well as they are doing while battling against the present handicaps to their operation, it is a fair assumption that they can do much better when these difficulties have been overcome. I am not making an extravagant statement, nor an over-optimistic one, when I tell you that on many commodities the Barge Lines will be able to cut their present rates in half, and they will move coal, lumber, and steel products at tremendous savings when their equipment, terminals and channels are adequate and completed.

Need More Facilities

There is urgent need for grain elevators at Barge line terminals on the rivers so that the farmers' grain can be put on the river barges at the nearest port to the farm and move by water to the nearest port to its ultimate market. A grain elevator at Memphis, Tenn., for instance, will be of great value to grain growers in the north and northwest who can then ship by water at a substantial saving a larger part of the 50,000,000 bushels of coarse grains and wheat that are used annually in the southeastern states. This would move from the farm by rail to the river, by river to Memphis, and then by rail to destination, thus enjoying the advantage of low cost water transport for a great portion of its journey.

There is a big market for hay in Cuba and the West Indies. High freight costs shut out the Middle West entirely, and while in our country there is in some hay-growing sections as much as three years' crops in storage awaiting a market that will get the grower even his production cost. Canadian hay is moving into Cuba at rates that our shippers cannot compete with.

Canadian Rates Lower

Speaking of Canadian rates, you may be interested in a comparison of American with Canadian rail rates on grain from the farms to the seaboard for export which was made in testimony favoring the Denison Barge Line Bill by George J. Miller, Executive Secretary of the Missouri River Navigation Improvement Association. His testimony showed that from points in Alberta province, Canada, averaging 1,200 miles to Port Arthur on Lake Superior, the rate on grain per 100 pounds is 25c. The rail rate from Port Arthur to Quebec for export, 1372 miles, is 18.34 per cwt. or a total of 43.34 cents for a total rail haul of about 2,600 miles. From Manitoba to Port Arthur, an average of 650 miles, the rate is 18c per cwt. From Saskatchewan to Port Arthur, an average of 800 miles, the rate is 20c.

In the United States the average 650 mile haul from Nebraska and Kansas points to Chicago carries a rate of 35c per cwt., as against the Canadian rate of 18c.

The average rate on export grain for an 800-mile haul from the Middle West to seaboard is 38c per cwt. as against the Canadian rate of 20c.

(Continued on page 8)

Republican Farm Plank

(Continued from page 5)

foreign competition, made possible by low wage scales abroad, threatened to deprive our farmers of their domestic markets. Under this act the president has increased duties on wheat, flour, mill feed and dairy products. Numerous other farm products are now being investigated by the tariff commission.

We promise every assistance in the reorganization of the marketing system on sounder and more economical lines and, where diversification is needed, government financial assistance during the period of transition.

Federal Farm Board Promised

The Republican party pledges itself to the enactment of legislation creating a federal farm board clothed with the necessary powers to promote the establishment of a farm marketing system of farmer-owned and controlled stabilization, corporations or associations to prevent and control surpluses through orderly distribution.

We favor adequate tariff protection to such of our agricultural products as are affected by foreign competition.

We favor, without putting the government into business, the establishment of a federal system of organization for co-operative and orderly marketing of farm products.

The vigorous efforts of this administration toward broadening our exports market will be continued.

The Republican party pledges itself to the development and enactment of measures which will place the agricultural interests of America on a basis of economic equality with other industry to insure its prosperity and success.

Democratic Farm Plank

(Continued from page 5)

cultural surpluses, in order that the price of the surplus may not determine the price of the whole crop. Labor has benefited by collective bargaining and some industries by tariff. Agriculture must be as effectively aided.

Pledges Adequate Laws

The Democratic party, in its 1924 platform, pledged its support to such legislation. It now reaffirms that stand and pledges the united efforts of the legislative and executive branches of government, as far as may be controlled by the party, to the immediate enactment of such legislation, and to such other steps as are necessary to place and maintain the purchasing power of farm products and the complete economic equality of agriculture.

The Democratic party has always stood against special privilege and for common equality under the law. It is a fundamental principle of the party that such tariffs as are levied must not discriminate against any industry, class or section. Therefore, we pledge that in its tariff policy the Democratic party will insist upon equality of treatment between agriculture and other industries.

Farm relief must rest on the basis of an economic equality of agriculture with other industries. To give this equality a remedy must be found which will include among other things:

(A) Credit aid by loans to co-operatives on at least as favorable a basis as the government aid to the merchant marine.

(B) Creation of a federal farm board to assist the farmer and stock raiser in the marketing of their products as the federal reserve board has done for the banker and business man.

Lowden Withdraws

Frank O. Lowden's signed statement read to the Republican Convention by Hon. Otis F. Glenn.

Frank O. Lowden

I HAVE stated publicly that I did not want the nomination unless the Republican party was prepared to meet fully and fairly the agriculture problem.

"I have waited upon no particular remedy but I have stated at all times if there was a better method than the so-called equalization fee, I would gladly accept it. I have urged, however, that it is the duty of the Republican party to find some way to rescue agriculture from the ruins that threaten it.

"This in my judgment the convention by its platform just adopted has failed to do.

"I therefore authorize the withdrawal of my name from before the convention.

"Though I cease to be a candidate my interest in the cause is in no way abated."

Passed Federal Reserve Act

When our archaic banking and currency system was revised after its record of disaster and panic under Republican administrations, it was a Democratic congress in the administration of a Democratic president that accomplished its stabilization through the federal reserve act creating the federal reserve board, with powers adequate to its purpose. Now in the hour of agriculture's need the Democratic party pledges the establishment of a new agricultural policy fitted to present conditions, under the direction of a farm board vested with all the powers necessary to accomplish for agriculture what the federal reserve board has been able to accomplish for finance. In full recognition of the fact that the banks of the country, through voluntary co-operation, were never able to stabilize the financial system of the country until government powers were invoked to help them.

(C) Reduction through proper government agencies of the spread between what the farmer and stock raiser gets and what the ultimate consumer pays with consequent benefits to both.

(D) Consideration of the condition of agriculture in the formulation of government financial and tax measures.

Will Aid Co-ops

We pledge the party to foster and develop co-operative marketing associations through appropriate government aid.

We recognize that experience has demonstrated that members of such associations alone cannot successfully assume the full responsibility for a program that benefits all producers alike. We pledge the party to an earnest endeavor to solve this problem of the distribution of the cost of dealing with crop surpluses over the marketed units of the crop whose producers are benefited by such assistance. The solution of this problem would avoid government subsidy to which the Democratic party has always been opposed. The solution of this problem will be a prime and immediate concern of a Democratic administration.

We direct attention to the fact that it was a Democratic congress, in the administration of a Democratic president, which established the federal loan system and laid the foundation for the entire rural credits structure, which has aided agriculture to sustain in part the shock of the policies of two Republican administrations, and we promise thoroughgoing administration of our rural credits laws, so that the farmers in all sections may secure the maximum benefits intended under these acts.

Water Transportation

(Continued from page 7)

The average rate for a 1,050 mile haul is 49 cents from Mid-Western points to Galveston and New Orleans, as against a Canadian rate of 18.34 cents for 1300 miles.

Here are a couple of more export rail rates on wheat which are illuminating:

Kansas City to New York, 1287 miles, $.40 per cwt.

Port Arthur, Canada, to Quebec, 1372 miles, $.1834 per cwt.

They Favor Agriculture

Some people will tell you that these very favorable Canadian rates are secured for the grain growers by subsidies to rail lines, or by Government ownership, and that huge deficits are made up by Canadian tax payers. The Canadian Pacific Railroad is a party to all these rates, and it must be doing quite well because it is not under government management or subsidy and its stock is selling today on the New York market for 203. This is an advance of 25 points over its price one year ago. The fact is that Canada and the Canadian Pacific Railroad are favoring agriculture with helpful rates so as to build up and develop agricultural wealth and resources. They are finding this a profitable undertaking as will we of these United States as we begin to realize the benefit and help of our low waterway rates on the products of the farm, and the purchases of the farmer.

Include Many Tributaries

Our inland waterways of the Mississippi Valley include the Mississippi River from the Gulf of Mexico to Minneapolis and St. Paul, the Illinois River to Lake Michigan, and the Hennepin Canal, which connects the Illinois with the Mississippi at Rock Island, Moline, and Davenport; the Missouri River from its mouth near St. Louis to Yankton, South Dakota, and even beyond there to Fort Benton, Montana; the Ohio from its confluence with the Mississippi at Cairo to its sources in the Allegheny and Cumberland mountains; the Tennessee, the Cumberland, the Red, the Arkansas, and many other tributaries reaching into the very heart of twenty-three of the most productive states of the Union. These great water routes, "nature's own streets," must be developed and used in coordination with the railroad lines serving this vast territory so that the products and purchases of the people who live here and do business here may enjoy the most economical and expeditious transportation services that it is possible to develop. Thus, we will be taking a long step toward putting agriculture in the United States on an even basis so far as transportation facilities and costs are concerned, with the competing areas of Canada, Europe, Australia, and South America.

Need Home Industries

It has been said that "Waterways build up industry in the midst of agriculture." This is very true, and thus is created vast home markets for the products of the farm. We

(Continued on page 10)

Discuss Pledges of Major Parties at 17th I. A. A. Dist. Conference

Geo. J. Stoll Outlines Policy of Association on Political Matters

THE Democratic and Republican farm planks adopted at Houston and Kansas City respectively figured prominently in the discussion at the I. A. A. district conference at Pontiac on June 29 when 150 members from the 17th district assembled.

George Stoll of Chestnut who represents the district on the I. A. A. Executive Committee called the meeting to order. When urged to seek an active stand on the part of the I. A. A. in the coming election, Mr. Stoll replied that he considered the stand of the Association already known.

"The policy of the Association is to make known the records of the political parties and candidates and let each member know by such records which candidate is most favorable to agriculture," he said.

"The simple publication of the party platforms on agriculture, and the utterances of the candidates themselves, he said, should be enough. Every member of the Association knows what our stand has been in the past. There is no indication that that stand will be changed."

Why Change Policy

George Potter of Graymont suggested that the I. A. A. should do as is always done—publish the information for the members and let them decide how they will vote. E. D. Lawrence of Bloomington said he would like to see the Association insist upon its position just as strongly as it always had done. Several speakers thought the Association should campaign actively for the Democratic ticket because the Democratic platform was most favorable to agriculture. Others cautioned against the Association telling its members how to vote.

Co-operative marketing, buying, and the coming I. A. A. picnic at Bloomington on August 31 were considered. Lawrence Farlow of the State Farmers Grain Dealers Association discussed farmers' elevators and their place in a grain marketing system.

Why Co-operative Buying

L. T. Skeffington of the I. A. A. Livestock Marketing Department told of the Producer movement and what farmers can gain by complete co-operation in selling their livestock.

Frank Gougler, director of Produce Marketing, told what farmers' cream pools, and co-operative creameries were doing to improve the quality of cream, and get for their members a better price. E. D. Lawrence called attention to the fact that farmers' difficulties were brought about to some extent by the high prices they were forced to pay. Co-operative buying, he said, is a legitimate part of the Farm Bureau program because it seeks to make the farmer's dollar go farther.

Sam Thompson On Democratic Plank

(Statement given newspapers and press associations)

S. H. Thompson

PRINCIPLES of agricultural relief embodied in the farm plank of the Democratic platform were indorsed today by Sam H. Thompson, president of the American Farm Bureau Federation, who announced his organization would support the plank on which Al Smith will oppose Herbert Hoover for the presidency.

"The agricultural plank in the Democratic platform completely covers the fundamental principles we advocated," Thompson said. "It outlines a permanent agricultural policy of the type that will place agriculture on an economic basis equivalent to that of industry, labor, transportation and finance in the American protective system."

When asked if his group would actively support the Democratic candidate for President, Thompson replied. "Under the federation's constitution we are prohibited from partisan political activity. I may say, however, that the federation will continue to advocate the principles indorsed by the Democratic platform and do everything in its power to obtain a permanent policy which will give agriculture the bargaining power necessary to stabilize the industry."

Bankers Stand By I. A. A. Farm Policy At Recent Meeting

Renew Confidence in Leadership and Pledge Further Co-operation

THE thirty-eighth annual convention of the Illinois Bankers' Association, Rock Island, June 22, renewed its previous expressions of confidence in the agricultural policy of the Illinois Agricultural Association, and pledged its continued co-operation in bringing about greater stabilization of the farm industry.

Omar H. Wright

Omar H. Wright of Belvidere was elected president, Lyon Karr of Wenona, vice president, and M. A. Graettinger was unanimously chosen again as secretary.

The resolution on agriculture follows:

Agriculture

"Serious and adverse economic conditions continue to confront agriculture. The best hope for the solution of the problem is the fact that it now occupies the center of public interest and commands the serious study and intelligent thought of our best minds.

"In the front rank of those representative bodies which are striving for the adoption of a constructive national policy is our sister organization, the Illinois Agricultural Association. We renew our expressions of confidence in its capable leadership and again charge the officers of our Association with the responsibility of maintaining the closest possible co-operation with the Illinois Agricultural Association in its endeavor to give to agriculture an assured place along with industry, commerce, transportation and finance, in our national economy."

On the subject of taxation the following resolution was passed:

Taxation

"While we are gratified at the continuing reduction of federal taxes, we find that state and local taxes are an ever increasing factor in the expense accounts of our banking institutions. The item of taxes alone, in many instances, is accountable for the difference between a profit and a loss in a bank's operation.

Our present system of taxation in Illinois is generally conceded to be inadequate and out-of-date. We realize that the day has passed when most of our wealth was tangible and when the general property tax therefore fell upon the citizens in accordance with their ability to pay.

Much Property Escapes

With the vast increase of intangible wealth, a large amount of property escapes taxation. Economically speaking, bank shares are classed with money, notes, bonds, and the like, as intangibles, but for taxation purposes they are unfortunately most tangible. With real estate, bank shares bear an unjust proportion of taxation.

This is a subject which looms larger and larger as a menace to our whole economic structure. The recent union of nine state-wide organizations, of which our own Association is one, in a co-operative movement to effect relief, is a move in the right direction.

THE Illinois State Horticultural Society will hold its summer meeting and tour in the Centralia district, July 19 and 20.

Reservations should be made with Frank Welch, secretary of the Centralia Chamber of Commerce.

Illinois Livestock Shippers Hang Up Good Record 1927-'28

Consign 55.4 Per Cent of All Shipments Handled by Chicago Producers

"ILLINOIS livestock producers can point with pride to their record of last year in supporting co-operative livestock marketing," says H. H. Parke of Genoa, Illinois, president of the Chicago Producers' Commission Association.

H. H. Parke

"Of the 15,936 rail car loads of livestock received by the Chicago Producers' during their sixth fiscal year, which closed July 1, 8,829 were received from Illinois shippers," says Mr. Parke. "This constituted 55.4 per cent of the total Producer receipts. It represented a gain of 10.6 per cent over the preceding year."

Much Progress Made

The progress made in each of the departments of the Chicago Producers' is of special interest to Illinois shippers. In competition with over 125 other selling agencies, the Producers' handled 3.17 per cent of all the cattle sold, while the 44,110 calves that were handled represented 5.8 per cent of all those sold at Chicago; an increase of 41.3 per cent over the calf business of the preceding year.

While hog receipts on the market increased only 14.5 per cent during the past fiscal year the Producers' receipts of 858,344 show an increase of 34.4 per cent. Last year the Producers' handled 9.1 per cent of all the hogs received on the Chicago market, but at the present time they are handling 10.77 per cent of all the hogs received.

Sheep receipts of the co-operative, likewise, show a gain. Sheep receipts at Chicago during the past year decreased 19.4 per cent, but the total sheep handled by Producers' decreased only 13.8 per cent. Last year the Producers' handled 7.3 per cent of all the sheep received, but now this figure has jumped to 8.3 per cent.

Mr. Parke stated that the National Livestock Producers' Association, with its 13 member agencies, is not simply another commission house on the various terminal markets, but represents a definite plan which has much more than justified its existence and its support from the livestock growers. When the livestock marketing program is completely carried out it promises to give farmers bargaining power and influence in stabilizing prices to a point where they will receive cost of production plus a reasonable profit.

Water Transportation

(Continued from page 8)

vision nine thousand miles of main trunk line waterways in the Mississippi Valley with common carrier service, adequately equipped, well managed, with terminals and elevators at principal rail and river crossings feeding traffic to and receiving it from rail lines, thus reaching into every interior section on joint rates that give the shipper the benefit of the low water route costs.

That is the picture I want to leave with you, and that is the program that the Mississippi Valley Association is working to accomplish. We do not favor permanent government operation. We do not believe the Government can conduct our transportation services as effectively or as well as private enterprise can, but we must insist upon the Government continuing its present demonstration until it has achieved the conditions necessary to private success:

1. Dependable channels.
2. Adequate terminals with necessary elevators.
3. Joint rates between rail and river carriers in the interests of the shippers.

Want Service to Peoria

These three things, it is the Government's job to secure and establish so that private capital going into boat and barge line operation on our Valley waterways will be safe to operate and safe from successful assault by powerfully entrenched interests whose ambitions are to gain and retain a monopoly on Valley transportation facilities.

We are urging the Secretary of War to extend the present services of the Federal Barge Line to the Illinois River as far as Peoria and to the Hennepin Canal immediately. (They will come on into Chicago, too, when the channel is finished.) This will enable Illinois River elevators to serve the Barge Lines with grain for export via New Orleans or for distribution through the Memphis gateway into the Southeast by next season. It will enable the Northwestern wheat grower to ship his wheat into central freight territory through the Peoria-Pekin gateway at substantial savings which will be reflected back to him. It will make savings to the Illinois farmer on binder twine, sugar, coffee, etc., northbountd.

I. A. A. Helps at Washington

All of these ambitions were very materially advanced by the passage of the Denison Barge Line Bill by the recent session of the 70th Congress. This legislation had excellent support from the farm organizations. Mr. Cowles of the Illinois Agricultural Association, and officials of the American Farm Bureau, were most active in their efforts to help the passage of the Bill. The Nebraska Farm Bureau sent its Secretary, Mr. Charles Steward, to Washington, and kept him there during the hearings, and while the measure was pending before the House and Senate.

In the final hours of the session, when the air in the legislative chambers and in the lobbies was fairly crackling with final efforts and suspense, and when the strongly organized opposition was bringing all its heavy power to bear to delay the bill until the next session which would be after election (get this, it's significant, after election) and when the workers for the Bill were reaching in every direction for help and using every influence they could command to push the Bill to final passage, Bob Cowles and Charlie Steward were on the job, and they were a powerful influence.

Among the many problems facing the American farmer, the one of present high cost of transportation is not the least. The Mississippi Valley Association believes that the best solution to this problem is the fullest use and development of common carrier service on our inland waterways.

Larger Volume Cuts Cost Handling Cream Co-op. Reports Show

Gougler Pegs Away on Produce Units and Makes Progress

THE second annual report recently received from an Illinois produce unit shows that this co-operative handled 81,515.2 lbs. of butterfat at an average operating cost of 1.97 cents per lb. during its first year of operation, whereas, during the second year it handled 99,536.2 lbs. of fat at an operating cost of only 1.72 cents per lb. fat.

Frank A. Gougler

"This substantial reduction in operating cost was largely brought about by increase in business," declared Frank Gougler, director of produce marketing. "When a larger percentage of the farmers in the community where the unit is operating co-operate, further reductions may be expected."

Cream improvement meetings held in several communities have been attended by 200 to 400 people each, and the result has been an increase in the volume of produce handled cooperatively.

What They Show

May and June reports recently received by Mr. Gougler indicate the following volumes for these months: Logan county unit at Lincoln handled 11,717 lbs. of butterfat during May; Geneseo unit, Henry county, 8,904 lbs.; Mt. Sterling unit, Brown county, 12,121 lbs.; and the Rushville unit, Schuyler county, 8,484 lbs. of butterfat, 6,807 dozens of eggs, and 2,380 lbs. live poultry. The latter unit had a trading income of $650.08 for the month, with total expenses amounting to $357.16, leaving a net surplus of $292.92.

On July 2 the cream for the new unit at Winchester, Scott county, was sold for the coming year. Several new units are being organized as follows: Stronghurst, Henderson county; Virden, Macoupin county; Bement, Piatt county; Tuscola, Douglas county; Farmer City, DeWitt county; and Fisher, Sadorus, and Sidney, Champaign county.

"With 17 units now marketing and eight being organized it appears that co-operative produce marketing is developing safely and satisfactorily," said Gougler. "This phase of marketing should not develop faster than is consistent with good business practice."

Want Any Peaches? Illinois Has Good Crop; Growers to Pick Soon

Illinois Fruit Growers Exchange Seeks to Market More Peaches at Home

CAN you use any strictly No. 1 peaches at wholesale dealers' prices?

A. B. Leeper

If so, the Illinois Fruit Growers' Exchange will help fill your wants, for Southern Illinois is getting ready to harvest one of the best crops in the history of peach-raising in that section.

A. B. Leeper, manager of the Exchange at Centralia, says that in previous years he has received numerous inquiries from County Farm Bureaus and dealers in small towns asking for information and prices. "As a rule," he says, "such information is not requested until the shipping season has begun. Peaches, one of the most perishable crops, must be handled quickly. For this reason we are asking the co-operation of all Farm Bureaus and Farm Bureau members toward assisting the peach growers of Illinois in marketing what appears to be one of their largest crops, and at the same time aid the members of the Farm Bureau in all counties to obtain strictly No. 1 peaches at the wholesale dealers' price."

Elbertas Mostly

Most of the peaches are the yellow free-stone Elbertas. A few cars of white peaches, of especially fine quality, also will be available. The fruit will be packed according to U. S. standards with a diameter of two inches and up.

Peaches will be sold at a guaranteed delivered price and orders placed now will be received subject to final approval price. No peaches will be shipped, in other words, until the price is agreed upon by both parties. Shipments will begin Aug. 1 and will continue through the month of August.

"Early shipments usually sell for less money than later ones," says Leeper, "because the earlier fruit comes in competition with peaches from other growing sections." A carload of peaches contains from 387 to 396 bushels.

Congressman Henry T. Rainey will address the I. A. A. District picnic at Watseka on August 22.

COLORADO CYCLONE FATAL TO FOUR

A CYCLONE that tore through Colorado about 50 miles north of Denver on June 29 took a toll of four lives and did property damage that will run into the hundreds and thousands. The scene above was photographed near Johnstown, Colorado, and shows homeless people wandering about the uprooted trees and razed houses looking for remnants of their belongings.

WHY TAKE A CHANCE?

A DISASTER like the one pictured above can happen anywhere in Illinois. The Southern Illinois tornado of 1925 took a heavy toll. A tornado may strike your farm. What if it does? Will you lose all, or will the insurance company reimburse you?

Why take a chance when you can get protection against windstorms, cyclones, and tornadoes in your own company at cost?

Buy FARM BUREAU AUTO INSURANCE ... *and save the difference*

YOUR COMPANY pays back a higher percentage of the money collected for losses than any other operating in Illinois.

This means that you pay less for equal insurance PROTECTION in YOUR OWN COMPANY than you would pay in any other. There's a reason. The Illinois Agricultural Mutual Insurance Co. was ORGANIZED FOR and is CONTROLLED BY the FARM BUREAU members of the state; hence it makes no profits. The company is operated as a service to members. The profits, which privately owned companies keep, are returned by YOUR COMPANY in the form of lower premiums and assessments.

Dear Sirs:

A few days ago we asked for a cancellation of our policy which you willingly sent. A friend of ours told of an insurance that he had which was so much cheaper. But come to find out, we can pay our premiums in your company and pay our $15 Farm Bureau dues at less cost than his insurance.

I am returning check you sent us, also personal check covering the premium for the coming or past six months. By doing this and paying our Farm Bureau dues will it be possible for us to be reinstated? We still have our policy, etc., just as it was.

Hoping to hear from you about this matter, I thank you.

AGRICULTURAL LIBRARY

COME TO FARM BUREAU DAY, ILLINOIS STATE FAIR, AUG. 24

The Illinois Agricultural Association RECORD

Volume 6 AUGUST, 1928 Number 8

Caraway and Dickinson Speakers

Will Present Party Views On Agriculture On Farm Bureau Day, State Fair, Aug. 24

SENATOR THADDEUS H. CARAWAY, of Arkansas, that sharp, witty, discerning son of the South who is at his best on the speaking platform; who delights in expounding the virtues of Democracy and defending its principles of government has been chosen by the National Democratic Committee to represent his party in a discussion of the agricultural question on the morning of Farm Bureau Day at the State Fair, Springfield, Friday, Aug. 24. Senator Caraway was an ardent supporter of the McNary bill in the 70th Congress.

Sen. T. H. Caraway

Cong. L. C. Dickinson

Congressman L. C. Dickinson of Iowa, grey-haired but young-looking, vigorous, a practical politician, an orator of note, and a champion of the McNary-Haugen surplus control measure in the last two sessions of Congress is the choice of the Republican National Committee. He will present his party's views on the farm issue from the same platform with the Democratic senator from Arkansas.

Both for Surplus Control

What a setting for an interesting time. Both men champions of the vetoed farm surplus control measure in the 70th Congress and now both on opposite sides of the fence working for their party's success in November.

The two speakers will address the farmers of Illinois at the invitation of the Illinois Agricultural Association. Previously the Association had invited the two vice-presidential nominees, Senators Charles Curtis and Joseph T. Robinson, to speak. Both declined. Then the matter was left in the hands of the two National Committees. Dickinson and Caraway were named only last week.

I. A. A. Policy Non-Partisan

In announcing this feature for Farm Bureau Day, President Earl C. Smith said, "The invitation to the two Parties to provide representative speakers was extended in pursuance of the Association's policy to furnish full, fair, and impartial information to our members on political and partisan questions. Farmers who hear these two men will not be disappointed. Both are nationally prominent, and both eminently qualified in ability and experience to discuss the agricultural question."

There All Week

The Illinois Agricultural Association will be at the State Fair the entire week beginning Aug. 20. Farm Bureau headquarters will be in a large tent near the grandstand. Several department exhibits illustrating the many services available to Farm Bureau members in Illinois will be presented.

There will be chairs, drinking water, checking facilities for leaving wraps and packages, and other conveniences for the benefit of visitors.

Fair Officials Co-operate

The invitation to the two speakers was made possible by the permission and excellent co-operation of S. J. Stanard, state director of agriculture, and State Fair officials. The morning special feature program will be called off and the races postponed at least half an hour after lunch to provide ample time for Caraway and Dickinson to speak.

A public address system, permanent equipment in the grandstand, will carry the voices of the two speakers to remote parts of the stand.

The speaking program will begin promptly at 10:30 a. m. Each speaker will be given approximately an hour. President Earl C. Smith of the I. A. A. will be there to introduce the two men.

Farm Bureau headquarters on the fair grounds will be open to all visitors whether affiliated with the organization or not.

Don't Miss the I. A. A. Farm Bureau Picnic in Your District

Harvest Cuts Crowd At First I. A. A. Dist. Picnic in DuPage Co.

Hear Earl C. Smith's Address Broadcast Over New I. A. A. Amplifier

HARVESTING and "picnicking" mix like oil and water.

And because the I. A. A. district picnic at Herrick's Lake near Wheaton in DuPage county came on July 25 when farmers of the 10th and 11th districts were riding their binders, the turnout was not so heavy.

Nevertheless, several hundred men and women, boys and girls, were there to enjoy a cool swim in this placid little lake, the shade of the spreading oaks and maples, the games and contests, the music, and the clean-cut discussion of the agricultural problem and the issues of the day by Earl C. Smith, president of the Illinois Agricultural Association.

The I. A. A.'s latest acquisition, a made-to-order public address system, was used to call the swimmers up from the lake for the afternoon program.

Vial Is Chairman

Harold C. Vial of Downers Grove was master of ceremonies. He introduced Earl Smith as the speaker of the day after several popular songs had been sung by the Woodstock male quartet. George Metzger preceded President Smith with a brief address on organization. The St. Charles Boys' Band supplied the music.

Although the crowd was small, the amplifier was placed in use. The speaker's voice could be heard far beyond the last straggler at the edge of the audience. The public address system was pronounced a success. One listener commented on the fact that he heard a member of the quartet whisper congratulations to his mates after a lusty folk-song had been broadcast before the microphone. Every sound made before the "mike" is amplified innumerable times.

K. T. Wright of the farm management department, University of Illinois, won first prize in the auto driving and parking contest held after the speaking program. Wright drove a model T Ford and scored 350 out of a possible 400 points.

Second prize went to Dr. E. E. Byrum, county veterinarian, who also drove a Ford, and third prize to R. Lichtenwalter, who drove a Dodge. The contestants drove their cars around a series of barrels placed in a row at intervals. They were also made to park their cars in a designated space and to enter and leave an improvised garage.

The contestants were judged on ease of handling, gracefulness, accuracy, time required, precaution, and carefulness in driving. Cars were inspected for brakes and efficiency of operation, and each contestant had to answer ten questions on rules of the road and the care of an automobile. The Illinois Agricultural Mutual Insurance Company sponsored the contest which attracted much interest.

A similar contest was held at the Randolph County Farm Bureau picnic on July 26. In the ladies contest the winners were Florence Fulton, first, in an Overland; Grace Wilson, second, in a Ford, and Jean McHatton, third, in a Ford. In the men's contest prizes were awarded as follows: First, Joe Smith, Ford; second, W. H. Moreland, Chevrolet; and third, Roy McHatton, Ford.

WALKS 70 MILES TO I. A. A. MEETING

J. E. HARRIS

Farm Adviser J. E. Harris of Mercer county broke all records recently by walking and bumming his way for 70 miles to the I. A. A. conference at Carthage.

Through a misunderstanding he was left stranded west of Alexis in Warren county. Instead of giving up and going home he started out on foot about 9:00 a. m. and arrived at the meeting in Carthage, more than 70 miles away, in time for lunch at 12:30. He was picked up three different times by automobilists.

24th District Passes Resolutions In Flora Meeting On July 27

Members Urged to Continue Watchful Waiting Policy

FARMERS were urged to continue their policy of watchful waiting until the presidential candidates have had an opportunity to interpret their respective party platforms and state specifically what they intend to do in resolutions passed at the 24th I. A. A. district conference at Flora on July 27.

Chas. Marshall

Further resolutions were passed asking farmers to rise above party allegiance and support only candidates definitely committed to the policy outlined above.

Representatives from the counties of White, Edwards, Saline, Johnson, Gallatin, Clay, Wayne, and Marion attended the meeting.

Charles Marshall of Belknap, I. A. A. Executive Committeeman, called the meeting to order. Leo Lybarger, president of the Clay County Farm Bureau, presided. George Metzger, director of organization, represented the I. A. A.

It was agreed to hold the next conference in Gallatin county.

Cabbage and Sauerkraut

CABBAGES for sauerkraut cost approximately $2,500,000 per year, according to the United States Department of Agriculture. It is estimated that 250,000 tons of cabbages were made into kraut in one year. This was about one-half of the commercial crop. Manufacturers sold the kraut for more than $3,500,000.

Helping Flood Victims

COUNTY agricultural agents in the Mississippi flood areas are devoting nearly all their time to aiding flood sufferers in the rural areas. The problem of living with the evils the water left after it has been the primary concern of those engaged in extension service in these areas. Approximately 25,000 horses and mules, 50,000 cattle, 148,000 hogs, and more than 1,000,000 chickens were lost in the 124 counties experiencing the first overflow last year.

The Illinois Agricultural Association RECORD

Published monthly by the Illinois Agricultural Association at 404 North Wesley Ave., Mount Morris, Ill. Entered as second class matter at post-office at Mount Morris, Ill., October 20, 1925, under the Act of Mar. 3, 1879. Acceptance for mailing at special rate of postage provided in Section 412, Act of February 28, 1925, authorized October 27, 1925.

Volume 6 | AUGUST, 1928 | Number 8

Hoover States Position on Agriculture

(Following is the text of the Republican presidential candidate's statement on agriculture delivered in his speech of acceptance at Palo Alto, Cal., on Aug. 11.)

"The most urgent economic problem in our nation today is in agriculture. It must be solved if we are to bring prosperity and contentment to one third of our people directly and to all of our people indirectly. We have pledged ourselves to find a solution.

"In my mind most agricultural discussions go wrong because of two false premises. The first is that agriculture is one industry. It is a dozen distinct industries incapable of the same organization. The second false premise is that rehabilitation will be complete when it has reached a point comparable with that before the war. Agriculture was not upon a satisfactory basis before the war. The abandoned farms of the northeast bear their own testimony. Generally there was but little profit in midwest agriculture for many years except that derived from the slow increases in farm land values. Even of more importance is the great advance in standards of living of all occupations since the war. Some branches of agriculture have greatly recovered, but taken as a whole it is not keeping pace with the onward march in other industries.

Many Factors Involved

"There are many causes for failure of agriculture to win its full share of national prosperity. The after war deflation of prices not only brought great direct losses to the farmer, but he was often left indebted in inflated dollars to be paid in deflated dollars. Prices are often demoralized through gluts in our markets during the harvest season. Local taxes have been increased to provide the improved roads and schools. The tariff on some products is proving inadequate to protect him from imports from abroad. The increases in transportation rates since the war have greatly affected the price which he receives for his products. Over six million farmers in times of surplus engage in destructive competition with one another in the sale of their product, often depressing prices below those levels that could be maintained.

"The whole tendency of our civilization during the last fifty years has been toward an increase in the size of the units of production in order to secure lower costs and a more orderly adjustment of the flow of commodities to the demand. But the organization of agriculture into larger units must not be by enlarged farms. The farmer has shown he can increase the skill of his industry without large operations. He is today producing 20 per cent more than eight years ago with about the same acreage and personnel. Farming is and must continue to be an individualistic business of small units and independent ownership. The farm is more than a business; it is a state of living. We do not wish it converted into a mass production machine. Therefore, if the farmer's position is to be improved by larger operations it must be done not on the farm but in the field of distribution. Agriculture has partially advanced in this direction through coöperatives and pools. But the traditional coöperative is often not a complete solution.

Common Ground Needed

"Differences of opinion as to both causes and remedy have retarded the completion of a constructive program of relief. It is our plain duty to search out the common ground on which we may mobilize the sound forces of agricultural reconstruction. Our platform lays a solid basis upon which we can build. It offers an affirmative program.

"An adequate tariff is the foundation of farm relief. Our consumers increase faster than our producers. The domestic market must be protected. Foreign products raised under lower standards of living are today competing in our home markets. I would use my office and influence to give the farmer the full benefit of our historic tariff policy.

"A large portion of the spread between what the farmer receives for his products and what the ultimate consumer pays is due to increased transportation charges. Increase in railway rates has been one of the penalties of the war. These increases have been added to the cost to the farmer of reaching seaboard and foreign markets and result therefore in reduction of his prices. The farmers of foreign countries have thus been indirectly aided in their competition with the American farmer. Nature has endowed us with a great system of inland waterways. Their modernization will comprise a most substantial contribution to midwest farm relief and to the development of twenty of our interior states. This modernization includes not

(Continued on page 6)

President Earl C. Smith Says:

Mr. Hoover in his acceptance speech frankly recognizes that the most urgent economic problem in our nation today is agriculture; and that the solution of this question constitutes the most important obligation of the nation. His general statement of the necessity to establish for farmers an income equal to that of other occupations is good. No farm organization could ask for more in the way of general expression. The responsibility of a farm organization to its members, however, requires that before a program can be accepted as satisfactory, it must give assurance of the means that will be adequate to secure the ends promised. This, in my judgment, Mr. Hoover's statement fails to do. He promises higher tariffs, waterway improvement and a Farm Board to set up stabilization corporations financed by Government loans. This last proposal was the basis of the Crips bill, which Congress rejected in the last session and which failed to secure farm support.

Mr. Hoover says the tariff is the foundation of farm relief and promises to use his office and influence to give the farmer the full benefit of our historic tariff policy. For five years, western farmers have demanded not only that agricultural tariffs be adequate, but that a way be found to make such tariffs effective on that portion of our surplus crops consumed at home. On the latter, Mr. Hoover is silent. This question has been too much in the forefront of farm relief discussion to be ignored. Farmers will want this question answered before they go to the polls in November.

Harvest Cuts Crowd At First I. A. A. Dist. Picnic in DuPage Co.

Mr. Hoover in his acceptance speech frankly recognizes that the most urgent economic problem in our nation today is agriculture; and that the solution of this question constitutes the most important obligation of the nation. His general statement of the necessity to establish for farmers an income equal to that of other occupations is good. No farm organization could ask for more in the way of general expression. The responsibility of a farm organization to its members, however, requires that before a program can be accepted as satisfactory, it must give assurance of the means that will be adequate to secure the ends promised. This, in my judgment, Mr. Hoover's statement fails to do. He promises higher tariffs, waterway improvement and a Farm Board to set up stabilization corporations financed by Government loans. This last proposal was the basis of the Crips bill, which Congress rejected in the last session and which failed to secure farm support.

Mr. Hoover says the tariff is the foundation of farm relief and promises to use his office and influence to give the farmer the full benefit of our historic tariff policy. For five years, western farmers have demanded not only that agricultural tariffs be adequate, but that a way be found to make such tariffs effective on that portion of our surplus crops consumed at home. On the latter, Mr. Hoover is silent. This question has been too much in the forefront of farm relief discussion to be ignored. Farmers will want this question answered before they go to the polls in November.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Edited by Department of Information, E. G. Thiem, Director, 608 South Dearborn Street, Chicago, Illinois. Entered as second-class matter October 29, 1925, at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Accepted for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the ILLINOIS AGRICULTURAL ASSOCIATION RECORD. Postmaster: In returning an uncalled for or missent copy please indicate key number on address as is required by law.

OFFICERS

President, Earl C. Smith ..... Detroit
Vice-President, Frank D. Barton ..... Cornell
Treasurer, R. A. Cowles ..... Bloomington

EXECUTIVE COMMITTEE
(By Congressional Districts)

1st to 11th ..... H. C. Vial, Downers Grove
12th ..... G. F. Tullock, Rockford
13th ..... C. E. Bamborough, Polo
14th ..... M. G. Lambert, Ferris
15th ..... A. N. Skinner, Yates City
16th ..... A. R. Wright, Varna

Farmers Win In Tennessee

SENATOR KENNETH McKELLAR won a sweeping victory over Congressman Finis J. Garrett, minority leader of the Democratic party, in the race in Tennessee for the Senatorial nomination. McKellar's lead will likely mount to 50,000 majority when the final returns are received. McKellar carried nine of the ten congressional districts in the State.

And farm relief was the issue.

More farmers in Tennessee are alive to the need of surplus control legislation than ever before.

"It's unconstitutional," shouted Garrett from a number of stumps.

"Let the Supreme Court of the United States say so," was McKellar's rejoinder.

"It involves bureaucracy," asserted Garrett.

"We've set up bureaucracies for everybody else. Let's do something for the farmer," replied McKellar.

"It won't work; it's economically unsound," proclaimed Garrett.

"That's what they said about Fulton's steamboat," replied McKellar.

"The equalization fee involves taxing the farmer," declared Garrett.

From McKellar: "Look how the farmer is taxed by the effect of uncontrolled surplus production, and how much an equalization fee, which would give him bargaining power, would save him."

Back and forth the debate swept over the state. And the whole nation looked on.

For Senator McKellar was the first democratic senator from the South to espouse the cause of the farmers; and the first publicly to announce his support of the McNary-Haugen bill. McKellar's candidacy was not helped by the fact that he was seeking the nomination for the third term. No Tennessee Senator has served three terms since the Civil War.

Other issues in the campaign were soldier legislation, the Esch-Cummings bill, woman suffrage, and labor legislation. But the farm issue transcended them all.

If there is doubt that the cotton growers and the tobacco raisers in the south are interested in surplus control legislation, look to Tennessee.

For Tennessee, for the last two months, has been the battleground. Every argument of the Coolidge Republicans was echoed by reactionary democrats and by Garrett. Every argument was met and answered by McKellar, to the satisfaction of the voters of Tennessee.

Washington says the farmers won't vote for their own interests. Let official Washington look to Tennessee.

Opponents of justice to the farmers say that the demand for farm legislation is voiced by a few job-holders who are farming the farmers. Let these look to Tennessee.

Down in the old Volunteer State lives Senator McKellar, the tried and trusted champion of the farmers.

He has been re-nominated for the Senate, in a state where nomination is almost equivalent to election. His majority is overwhelming. He swept nine of the ten Congressional districts. He defeated Finis Garrett, arch-enemy of justice to the farmer, of equality for agriculture.

The farmers of Tennessee rallied to McKellar as never before. By their votes, they proclaimed to the nation: "He has fought the good fight; he has kept the faith!"

At Albany

IN LINE with the non-partisan policy of the Illinois Agricultural Association to be impartial in presenting facts to its members, and in expressing itself fearlessly and honestly on agricultural questions as it sees them, President Earl C. Smith journeyed with other farm leaders to Albany, New York, recently at the invitation of Gov. Alfred E. Smith to discuss the economics involved in surplus control legislation.

Those attending the conference held in the Governor's mansion on August 13 were Geo. N. Peek, Earl C. Smith, Wm. Hirth of Missouri, Frank Murphy of Minnesota, J. N. Kehoe of Kentucky, B. W. Kilgour of North Carolina, Wm. H. Settle of Indiana, and Chester C. Davis of Illinois.

Following the conference, the leaders authorized that the following statement be made:

We came to Albany at the invitation of Governor Smith to discuss the agricultural problem with him, and to explain our view of national policies which should be adopted toward its solution. We were not invited to discuss the political situation in our states or sections.

In general, our position, as explained to Governor Smith, is that before agriculture can be afforded stability and protection equivalent to that developed for other groups, an effective control of agricultural surpluses must be provided, which will permit the handling of supplies that are in excess of seasonal or domestic requirements, independently of the portion needed at home. If such surplus control is to be effective, and if treasury subsidy is to be avoided, we explained our conviction that the costs involved in handling the surplus must be assessed against the units of the commodity benefited.

We expressed the view that if the surplus crops of agriculture are to secure without government subsidy the results from tariffs that compact industrial groups secure, these principles must be embodied in national legislation.

We were pleased with the Governor's interest in and understanding of the agricultural problem.

Farm Congressmen To Speak At Coming I. A. A. Dist. Picnics

Ed. A. O'Neal of Alabama To Talk At Freeport, Bloomington, and Jacksonville

LEADING corn belt congressmen, all of whom were in the forefront of the fight for surplus control legislation in the 70th session of congress, are scheduled as speakers at coming I. A. A. district picnics.

A short sketch of Congressman Chas. Adkins who speaks at Marion and Macomb appears on page 10 in this issue. Congressman Adkins is an old war horse, thoroughly experienced and schooled in the game of politics. He got his training in Illinois, first in Piatt county, later in the state legislature where he became speaker of the house, and following his service there, Gov. Frank O. Lowden appointed him as his state director of agriculture in 1917.

Able In Debate

Adkins is the rough and ready type but he's long-headed, an able man in debate, and has a background of farm experience that places him distinctly at an advantage when answering the arguments of opponents to farm legislation. The congressman from Decatur is an interesting speaker. He can be depended upon to please his audience.

Gilbert N. Haugen of Iowa is characterized by his bull-dog determination and tenacity. He hammers away until the opposition weakens. Not a brilliant speaker, but sound and deliberate he is. His honesty and sincerity is impressive, and he knows his agriculture. Haugen comes from hardy Norwegian stock. He was born in Rock county, Wisconsin, April 21, 1859. That makes him 69 years old, but he is a vigorous man for his age.

Entered Politics Early

After securing a common school education, he entered business at the age of 14. When 18 years old he purchased a farm in Worth county, Iowa, continuing his studies in Decorah, Iowa, and finishing with a course at Janesville, Wis.

He was one of the organizers and has been president of the Northwood (Iowa) Banking Company since 1890, operating banks at Northwood and Kensett. Mr. Haugen entered politics in his home county and became county treasurer in 1887.

He was twice a member of the Iowa House of Representatives. In 1899 he was elected to Congress, and since that time he has represented his district in the House of Representatives at Washington continuously. Mr. Haugen is chairman of the Committee on Agriculture in the House and is author of the Haugen Packer Control and Stockyards Act. More recently he has become nationally known through sponsoring the Haugen farm surplus control bill in the House.

He is a Republican and his home is in Northwood, Iowa.

Long a Congressman

Congressman Henry T. Rainey of Carrollton is something of a polished gentleman farmer and ex-lawyer who was educated at Amherst in the east, the college of Calvin Coolidge and Dwight Morrow. He took his law work at Northwestern in Chicago. He knows agriculture from first hand experience for he lives on and manages a farm in Greene county. Congressman Rainey is one of the oldest members of Congress in point of service. He has represented the 20th Illinois district for 24 years. He is Democratic nominee for the 71st congress.

He has represented the agricultural constituency in his district well, and in the last congress he was a strong supporter of the farm surplus control measure bearing Mr. Haugen's name. He will speak at Watseka on Aug. 22 and at Olney on Aug. 30.

O'Neal Of Alabama

Ed O'Neal of Alabama has been introduced heretofore to members of the Farm Bureau in Illinois. He is vice-president of the American Farm Bureau Federation. The serious picture of O'Neal on page 7 is not characteristic for he usually wears a broad smile and exudes optimism. Some of his friends occasionally refer to him jocularly as the "Wild Irishman" but as a farm organization executive he is anything but that. Good business judgment and ability in addition to his enthusiasm and knowledge of organization have placed Ed O'Neal high in the ranks of farm leaders.

O'Neal makes an interesting and instructive talk. He knows the problems of the cotton farmers and his long experience in managing the Alabama Cotton Co-operative Association has given him a practical knowledge of marketing farm products and the business side of agriculture.

The counties which will participate in the district picnics at Bloomington, Freeport, and Jacksonville on Aug. 31, Sept. 1, and Sept. 3 respectively are fortunate in securing O'Neal as the speaker of the day.

Schuyler Association Prospers

SINCE its doors were opened for business on March 9, 1928, the Schuyler County Produce Association at Rushville had handled 28,475 pounds of butterfat, 27,685 dozens of eggs, and 7,215 pounds of poultry up to July 1. The Association likewise had accumulated a surplus of $973.15, all of which belongs to the patrons of the organization.

The Condit Farm Bureau unit in Champaign county recently decided to organize a baseball team to compete in the County Farm Bureau League.

Veteran Manager Says Producer Service Is O. K.; Is Old Shipper

Sends All Livestock To Chicago Producers

R. J. BEATTY, manager of the Woodstock Shipping Association in McHenry County, Ill., says, "Producer service can't be beat. There is not a firm that does more for the farmers."

Prior to taking over the management of the Woodstock Association, Beatty bought and shipped livestock from that community for 35 years. He has managed the Association for three years and ships practically all of his stock to the Chicago Producers. He reports that his membership is well satisfied and says that there is no disposition to demand that the Association consign its shipments to firms other than the Producers.

Mr. Beatty believes in going to market with his shipments because it keeps him in closer touch with the market and is helpful in explaining sales to his patrons. He knows the producer salesmen intimately, having done business with Ed. Stephens, particularly, for 30 years. He says, "There's a man that can't be influenced and there is no better judge of cattle anywhere." He speaks with equal confidence of the other salesmen on the producer staff.

The Woodstock Association shipped 112 carloads to the Chicago producers during the year ending June 30, 1928. A good deal of this livestock was brought into the loading point in a truck owned by Mr. Beatty. He does not figure to make a profit on the operation of the truck, although he charges sufficient to cover cost of operation and the employment of the necessary labor to run the truck. During the busy season, at least 50% of the livestock is trucked in and throughout the year this service is used and appreciated by the patrons. While Woodstock is only about 50 miles from the Chicago market, Beatty reports that trucking competition has not cut into his business to any material extent and he attributes this to the fact that he is giving his patrons trucking service from their farms to the loading point.—Ray E. Miller, director livestock marketing.

National Air Highway

THE awarding of contracts covering radio equipment for 12 radio control stations, six radio beacons, and 12 marker beacons to be established on the national airways was announced recently by the Assistant Secretary of Commerce for Aeronautics, William P. MacCracken, Jr.

FIFTY-FIVE THOUSAND OF THE 188,000 farmers in New York State have electricity either from a central station or from their own plants, according to an estimate by the New York State College of Agriculture.

Hoover on Agriculture

(Continued from page 3)

only the great Mississippi system, with its joining of the great lakes and of the heart of midwest agriculture to the gulf, but also a shipway from the great lakes to the Atlantic. These improvements would mean so large an increment in farmers' prices as to warrant their construction many times over. There is no more vital method of farm relief.

Pledges Marketing Aid

"But we must not stop here.

"An outstanding proposal of the party program is the whole-hearted pledge to undertake the reorganization of the marketing system upon sounder and more economical lines. We have already contributed greatly to this purpose by the acts supporting farm coöperatives, the establishment of intermediate credit banks, the regulation of stockyards, public exchanges, and the expansion of the department of agriculture. The platform proposes to go much farther. It pledges the creation of a federal farm board of representative farmers to be clothed with authority and resources with which not only to still further aid farmers' coöperatives and pools and to assist generally in solution of farm problems, but especially to build up with federal finance farmer-owned and farmer-controlled stabilization corporations which will protect the farmer from the depressions and demoralization of seasonal gluts and periodical surpluses.

"Objection has been made that this program, as laid down by the party platform, may require that several hundred millions of dollars of capital be advanced by the federal government without obligation upon the individual farmer. With that objection I have little patience. A nation which is spending ninety billions a year can well afford an expenditure of a few hundred millions for a workable program that will give to one-third of its population their fair share of the nation's prosperity. Nor does this proposal put the government into business except so far as it is called upon to furnish initial capital with which to build up the farmer to the control of his own destinies.

An Enduring Program

"This program adapts itself to the variable problems of agriculture not only today but those which will arise in the future. I do not believe that any single human being or any group of human beings can determine in advance all questions that will arise in in so vast and complicated an industry over a term of years. The first step is to create an effective agency directly for these purposes and to give it authority and resources. These are solemn pledges and they will be fulfilled by the Republican party. It is a definite plan of relief. It needs only the detailed elaboration of legislation and appropriations to put it into force.

"During my term as secretary of commerce I have steadily endeavored to build up a system of coöperation between the government and business. Under these coöperative actions all elements interested in the problem of a particular industry, such as manufacturer, distributor, worker, and consumer, have been called into council together, not for a single occasion, but for continuous work. These efforts have been successful beyond any expectation. They have been accomplished without interference or regulation by the government. They have secured progress in the industries, remedy for abuses, elimination of waste, reduction of cost in production and distribution, lower prices to the consumer, and more stable employment and profit. While the problem varies with every different commodity and with every different part of our great country, I should wish to apply the same method to agriculture so that the leaders of every phase of each group can advise and organize on policies and constructive measures. I am convinced that this form of action, as it has done in other industries, can greatly benefit farmer, distributor, and consumer.

"The working out of agricultural relief constitutes the most important obligation of the next administration. I stand pledged to these proposals. The object of our policies is to establish for our farmers an income equal to those of other occupations; for the farmer's wife the same comforts in her home as women in other groups; for the farm boys and girls the same opportunities in life as other boys and girls. So far as my own abilities may be of service, I dedicate them to help secure prosperity and contentment in that industry where I and my forefathers were born and nearly all my family still obtain their livelihood."

President Sam H. Thompson Says:

"Farm people will be disappointed with Mr. Hoover's statements regarding agriculture. They had every right to expect a specific outlined proposal on agricultural relief."

This statement was made at the conclusion of Herbert Hoover's acceptance speech by Sam H. Thompson, president of the American Farm Bureau Federation.

"In dealing with the agricultural problem, Mr. Hoover in his speech of acceptance shows no progress in advanced thought that would provide fundamental principles for a concrete marketing policy for American agriculture," Mr. Thompson added.

"Mr. Hoover does not amplify the broad general statement contained in the 1928 Republican platform."

Lowers Shipping Cost

A SUMMARY of shipping costs from the Illinois Valley Shipping Association at South Ottawa, Ill., covering exactly two years, indicates an average cost per hundred weight of 1.8c less on shipments to Producer Agencies as compared to all shipments to non-cooperative commission firms. The average cost per hundred pounds on consignments to Chicago Producers was 51.9c as against 53.7c to all others.

O. D. Center, manager of this Association, believes that the principle of co-operation should be applied in the selling of livestock at the Terminal market as well as in the shipment from local points. His experience with the producers has convinced him that this Cooperative Commission Association is rendering as good or better service than he is able to get on the Terminal market and at less cost, besides the satisfaction of knowing that his Association is co-operating in the development of a selling organization under the control of the livestock producer. —Ray E. Miller.

Mendota Association Has Trucking Service

ED. BROWN, manager of the Mendota Shipping Association, LaSalle county, has found that his members appreciate the truck service which he offers them in getting their livestock from their farms to the loading point. So far this year the Mendota Shipping Association has sent in 128 carloads of livestock. Mr. Brown reports that he is drawing shipments from a widely extended territory through the truck service which he offers. The truck is owned by the manager personally and charges are based upon the amount hauled and the distance covered. A special effort is made to so route the drivers that the livestock can be hauled at minimum expense to his shippers.—Ray E. Miller, director livestock marketing.

Uncle Ab says: Don't give up in a tight place; the worse it gets the more likely it is to get better.

BASEBALL DOPE

Eligibility Question

Baseball Commissioner,
Illinois Farm Bureau Baseball League.

"During our recent membership drive we signed up many new members for the new three-year period which begins on October 1, 1928. Our Executive Committee voted to give these new members Farm Bureau service immediately, that is, during the summer months. For example, they may avail themselves of the opportunity to buy serum and virus even though a non-member is not granted this privilege.

"Now then, can we say to any of these men interested in baseball that they are eligible to play on our baseball team, although their membership period does not begin until October 1? We would like very much to be able to grant them this privilege along with our other privileges. We have one or two good prospects."

HARRISON FAHRNKOPF,
Farm Adviser, McLean County.

Answer:—

If the Farm Bureau chooses to give a man full and regular standing as a Farm Bureau member after signing, there is no reason why he or a member of his family should be barred from playing Farm Bureau baseball. When the Farm Bureau serves such people on the same basis as it does old members, in effect it says that such men are members in good and regular standing. Therefore they should be allowed to play.

Champaign Beats DeWitt

CHAMPAIGN county defeated DeWitt in a one-sided game played at the 19th district I. A. A. picnic at Sullivan on Aug. 10. The score was 17 to 2. Champaign made 11 hits to DeWitt's 5. At least part of the large number of runs made by Champaign were due to DeWitt county's five errors. Champaign made three.

The game was played before a large picnic crowd following the speaking program. Batteries for DeWitt were W. Bell and B. Mills, pitchers, and L. Bell, catcher. Buddemeier and Parker acted for Champaign. The same two teams were scheduled to cross bats again at the Atlanta Fair, on Aug. 14. McLean and Logan counties are leading in this division.

THE REMOVAL OF RUBBISH and unnecessary accumulation of combustible materials is important in lessening the number of farm fires, says the National Fire Protection Association. Rubbish accumulated during the winter should be burned now.

O'NEAL IS LAUDED

Ed A. O'Neal

Senator Key Pittman of Nevada paid the following tribute recently to Ed A. O'Neal, who speaks at the I. A. A. Farm Bureau district picnics to be held at Bloomington, Aug. 31, Freeport, Sept. 1, and Jacksonville, Sept. 3, for his good work in presenting the need for an adequate farm plank at the Democratic National Convention, Houston:

"It was due to the clear and patient arguments made by you, George N. Peek, and others that resulted in the adoption of the farm plank in the party platform."

OFFICIAL STANDING OF TEAMS IN THE ILLINOIS FARM BUREAU BASEBALL LEAGUE FOR WEEK ENDING AUGUST 11, 1928

RADIO NEWS

New Radio Features

NEW radio features, recently announced by the United States Department of Agriculture for the coming fall, will include the U. S. Radio Farm Forum, Outdoors with the Scientist, Farm Science Snapshots, and the Agricultural Situation.

The Farm Forum will be broadcast exclusively on the I. A. A. program from WJJD, Mooseheart, in this territory beginning October 1. The Farm Forum will be a daily discussion of farm problems. Much of it will be devoted to useful economic information.

The Agricultural Situation will be broadcast the first Monday of each month. This will be a fifteen-minute summary of farm conditions in the corn belt.

Morse Salisbury, director of radio for the U. S. Department of Agriculture, visited the I. A. A. radio studio recently when he outlined the department's program for the coming fall and winter.

Hancock Demonstrates Grape Spray Schedule

A COMPLETE spraying schedule for grapes is being demonstrated in the old Nauvoo vine-yard section of Hancock county under the auspices of the Hancock County Farm Bureau and the University of Illinois.

An effort is being made to show what can be done toward producing clean fruit free from the berry moth and brown rot, and to prevent damage to vines by grape root worms, leaf hoppers, and other insects.

Check plots have been left in the vineyards on the George Marzolf and Richard Baxter farms. Other experiments are being conducted to show the use of fertilizers and to learn which method of pruning is most successful.

Grape growing is an important industry in the Nauvoo territory.

Co-operation Pays in Minnesota, Prices Show

DURING the week ending April 22, dairymen in one section of Minnesota received 51 cents per pound butterfat for sour No. 1 cream, according to a statement made by a prominent Chicago commission merchant. Sweet cream brought 54 cents per pound butterfat.

During the same week, states Frank Gougler, director of produce marketing for the I. A. A., the Illinois cream stations paid on the average only 42 to 43 cents, a discount of eight to nine cents from the Minnesota prices.

Law Is Unfair To Corn Sugar, Wider Use Will Help Price Corn

By Mrs. Thora M. Carmean
Casner, Illinois

THE farmer wants more corn used and a better price for corn sold. The governmental discriminations against corn sugar must be removed.

Mrs. Carmean

The corn belt farmer is overlooking an opportunity which, if seized, would improve his market and put dollars in his pocket. Corn sugar offers this opportunity—a sugar manufactured from a product of the corn belt—a fine white sugar generally used in hospitals and sanitariums because of its wholesomeness and food value—a sugar rated by the Journal of the American Medical Association as "par excellence the physiologic sugar."

The purity, wholesomeness and food value of corn sugar is accepted without question by the medical profession as well as the U. S. Department of Agriculture, which is responsible for the administration of the Pure Food and Drugs Act of 1906. The arbitrary system of definitions and standards, under which this Act is administered, requires special label mention of the use of corn sugar, dextrose, as an ingredient, although declaration of the use of imported foreign sugars is not required. On account of this unfair discrimination, potential consumers of large quantities of corn sugar refuse to use it except in those products where this discrimination does not prevail.

Need Protection

The United States sends between four and five hundred million dollars into foreign countries every year in payment for sugar produced by cheap foreign labor. A large portion of that amount could be directed into the pockets of her own citizens in return for sugar of equal, if not greater, merit. Not content with allowing the foreign sugar interests to dominate the policy by which that portion of the Pure Food and Drugs Act is administered, a very light tariff of $2.21 per cwt. has been placed on foreign sugar, while Cuba is allowed a preferential rate of 80 per cent of that paid by other foreign countries.

Bills To Be Introduced

It is up to the farmers to work through the agricultural organizations to bring about a change of attitude on the part of the Department of Agriculture toward the use of corn sugar and through Senators and Representatives in Congress to secure enactment of proper legislation to remove this unjust discrimination against an important product of the American farms. Bills having this purpose are now before the U. S. Senate and House of Representatives, but thus far organized agriculture has withheld endorsement. This attitude of aloofness should be changed without delay.

When we buy twenty-five pounds of corn sugar, we are buying a bushel of our own corn. If we can help create a market for corn at $1 or $1.25 a bushel, it will be to our advantage to do it.

14th District OK's Insurance Program Endorses I. A. A. Policy

Urge That Members Weigh All Facts In Coming Contest

RESOLUTIONS were adopted at the I. A. A. district conference, Carthage, on July 27, urging that life insurance be made available as soon as possible to members, commending Farm Bureau leaders for their action in political matters, and urging that members remain open-minded regarding their political allegiance until the Illinois Agricultural Association can give full information concerning the stand and records of all candidates.

Nearly 50 leaders in the 14th district attended the meeting. Hancock county had the largest representation. A. D. Lynch, director of dairy marketing for the I. A. A., discussed the value of collective effort in marketing dairy products. R. J. Hamilton talked on Farm Bureau organization. Executive Committeeman M. G. Lambert presided. The late Sidney S. Carney of Rock Island acted as secretary of the meeting.

Messages by Wireless

THE Radio Corporation of America recently applied to the Federal Radio Commission for construction permits to cover 65 short wave transmitters for the establishment of a domestic communications network serving 24 important cities throughout the United States.

"It is our intention," said the application, "to provide rapid and direct connection between our international transoceanic service now operated from New York and San Francisco, and the largest possible number of important points within this country, thus supplying the need for an all-radio international telegraphic service not now available to the public except in New York, San Francisco, Boston, and Washington. In conjunction therewith we will offer a domestic radio telegraph service competing favorably in quality and in rates with the existing wire line telegraphs."

Farm Adviser Carney Answers Last Call Many Attend Funeral

Was One of Outstanding Men In Farm Bureau Movement

MORE than 300 Farm Bureau members, farm advisers, business men, and representatives of local and state-wide organizations attended the services held for Sidney S. Carney, Rock Island county farm adviser, in the chapel at Rock Island Monday, July 30. Burial took place the following day from the First Methodist Church at Rochelle from which the body was taken to the cemetery at Greenwood, north of Woodstock in McHenry county.

Sidney S. Carney

Mr. Carney lost his life in an automobile accident on Friday night, July 27, when A. D. Lynch and R. J. Hamilton of the I. A. A., who were riding with him, were injured. Glenn Westcott, a passenger in the other car, died after the collision. Three other passengers were seriously injured.

Born Near Steward

Carney was born near Steward in Lee county, April 25, 1889.

After graduating from the local schools he attended Evanston Academy and later entered the University of Illinois where he graduated with honors from the College of Agriculture. After securing his Master's degree he became a member of the teaching staff in the Agronomy Department where he served for five years. He left the University to become farm adviser in Rock Island county, February 1, 1925. His ability was soon recognized, and as a result of his hard faithful work the Rock Island County Farm Bureau was strengthened and improved in membership and activities.

During the war Carney served as a Lieutenant in the Reserve Corps.

He was a Mason, president of the Rock Island Kiwanis Club, a member of the American Legion, a member of the Elks lodge, and while at the University was elected to Sigma Xi, honorary scientific fraternity.

He is survived by his wife, formerly Miss Mildred Marble of Greenwood, McHenry county, and by his mother, a brother, and five sisters.

Farm Adviser Frank Barrett of Pike county tendered his resignation recently to become effective September 1.

Picnic Crowds Grow In Size As Season Advances, Last, Sept. 3

Harvest Conflicts With Gatherings At Taylorville, Highland and Sullivan

DISTRICT I. A. A. picnics held last week at Taylorville, Highland and Sullivan were highly successful in spite of the fact that they competed with threshing in each case. Beginning with the picnic at Taylorville on Aug. 8, which drew a crowd estimated at 3,000 to 5,000, attendance increased at the gatherings held in the days following at Highland and Sullivan. More than 5,000 crowded into Wyman Park, Sullivan, the scene of the 19th district gathering on Aug. 10, according to official observers.

Wm. H. Settle, of Indiana, known to corn belt farmers as "Fighting Bill," spoke at all three picnics. His listeners were not disappointed. Mr. Settle laid bare the issues of the campaign, reiterated organized farmers' stand on the agricultural question, fearlessly discussed candidates as well as principles, and challenged the world to dispute his assertions as they were vigorously marshalled out for the enlightenment of his thousands of interested listeners.

Public Address System

With the help of the public address system which carried the speaker's voice to remote parts of the picnic grounds, Settle probably reached 10,000 people in the three-day speaking tour.

At Taylorville, President Earl C. Smith again emphasized the policies of the I. A. A. in political affairs which were fully presented in the last issue of the RECORD. He urged that farmers study the issues of the day, fully inform themselves on the expressions of candidates, and vote for the best interests of agriculture.

Settle spoke approvingly of the Democratic farm plank and of the presidential candidate's frankness in asserting he would stand on that plank as adopted at Houston. He expressed the belief that the prohibition act must be modified and that the Drys should lead in the modification, not the Wets.

Study the Issues

"Farmers should study both platforms and also the promises made by both candidates and vote for what they believe to be the best for their business and their families," said Mr. Settle. "We should not allow any other issue to confuse our minds on this question.

J. L. Whisnand, Con. Chas. Adkins and Wm. H. Settle at Sullivan

"Now seems to be the opportune time to secure for agriculture legislation that will place the industry on an equal basis with other great industries, and establish a permanent policy with a degree of bargaining power which is essential to the farming business as it is for any other business that can ever hope for success," continued Settle.

"Regardless of who is selected President, a majority of the agricultural people of the country will carry on this fight until victory is attained and the American farmers will have secured equality with industry and labor under our protective policy."

Executive Committeemen Samuel Sorrells, Frank Oexner, and J. L. Whisnand presided at the 21st, 22nd and 19th district picnics, respectively.

Whitlers Champ Pitchers

O. Whitler and his brother, C. Whitler, of Macoupin county, carried off the honors in horseshoe pitching at Taylorville. Macoupin and Christian counties each entered two teams, Sangamon and Montgomery counties only one. Frank Ritchie and Tollie Whitler, another brother, also of Macoupin, placed second high in the contest. The champions won each of the six games played.

Merrill Sorrells of Raymond, son of Executive Committeeman Samuel Sorrells, won first in the auto driving contest. Verna Deal of Morrisonville placed first in the contest for women. Ernest Minnis of Taylorville took the Cow Calling Contest, and Mrs. John R. James, the Husband Calling Contest. An improvised Andy Gump in effigy was the target for many a rolling pin in a contest for women, which was won by Mrs. Minnie Deal of Christian county. Montgomery county won the relay race, Dick Wilson of Christian county the Fat Man's Race; Helen Henry of Farmersville proved to be the champion ball thrower, while Ray Privott of Kincaid carried off the honors in the Milk Man's Special.

O. Whitler and C. Whitler of Macoupin Co., Horseshoe Champs at Taylorville

Highland Picnic a Success

Highland Park in Madison county proved to be an ideal location for the 22nd district picnic on Aug. 9. The crowd was estimated to be larger than that of the day before at Taylorville. The horseshoes were hurling through the air long before 10 a. m., and by 10:15 the cars were rolling in at the rate of two a minute. Threatening clouds hid the sun at times during the day but the rain held off until after the picnickers had started for home.

Prairie Farmer's newly painted airplane, carrying Murvin Ator, pilot, and Floyd Keepers, flew low over the crowds at all three picnics. The plane attracted much attention. Men, women and children craned their necks to see the spanking white Waco flyer as she maneuvered about, skimming the tree tops.

Law Is Unfair To Corn Sugar, Wider Use Will Help Price Corn

By Mrs. Thora M. Carmean
Casner, Illinois

THE farmer wants more corn used and a better price for corn sold. The governmental discriminations against corn sugar must be removed.

Mrs. Carmean

The corn belt farmer is overlooking an opportunity which, if seized, would improve his market and put dollars in his pocket. Corn sugar offers this opportunity—a sugar manufactured from a product of the corn belt—a fine white sugar generally used in hospitals and sanitariums because of its wholesomeness and food value—a sugar rated by the Journal of the American Medical Association as "par excellence the physiologic sugar."

The purity, wholesomeness and food value of corn sugar is accepted without question by the medical profession as well as the U. S. Department of Agriculture, which is responsible for the administration of the Pure Food and Drugs Act of 1906. The arbitrary system of definitions and standards, under which this Act is administered, requires special label mention of the use of corn sugar, dextrose, as an ingredient, although declaration of the use of imported foreign sugars is not required. On account of this unfair discrimination, potential consumers of large quantities of corn sugar refuse to use it except in those products where this discrimination does not prevail.

Need Protection

The United States sends between four and five hundred million dollars into foreign countries every year in payment for sugar produced by cheap foreign labor. A large portion of that amount could be directed into the pockets of her own citizens in return for sugar of equal, if not greater, merit. Not content with allowing the foreign sugar interests to dominate the policy by which that portion of the Pure Food and Drugs Act is administered, a very light tariff of $2.21 per cwt. has been placed on foreign sugar, while Cuba is allowed a preferential rate of 80 per cent of that paid by other foreign countries.

Bills To Be Introduced

It is up to the farmers to work through the agricultural organizations to bring about a change of attitude on the part of the Department of Agriculture toward the use of corn sugar and through Senators and Representatives in Congress to secure enactment of proper legislation to remove this unjust discrimination against an important product of the American farms. Bills having this purpose are now before the U. S. Senate and House of Representatives, but thus far organized agriculture has withheld endorsement. This attitude of aloofness should be changed without delay.

When we buy twenty-five pounds of corn sugar, we are buying a bushel of our own corn. If we can help create a market for corn at $1 or $1.25 a bushel, it will be to our advantage to do it.

14th District OK's Insurance Program Endorses I. A. A. Policy

Urge That Members Weigh All Facts In Coming Contest

RESOLUTIONS were adopted at the I. A. A. district conference, Carthage, on July 27, urging that life insurance be made available as soon as possible to members, commending Farm Bureau leaders for their action in political matters, and urging that members remain open-minded regarding their political allegiance until the Illinois Agricultural Association can give full information concerning the stand and records of all candidates.

Nearly 50 leaders in the 14th district attended the meeting. Hancock county had the largest representation. A. D. Lynch, director of dairy marketing for the I. A. A., discussed the value of collective effort in marketing dairy products. R. J. Hamilton talked on Farm Bureau organization. Executive Committeeman M. G. Lambert presided. The late Sidney S. Carney of Rock Island acted as secretary of the meeting.

Messages by Wireless

THE Radio Corporation of America recently applied to the Federal Radio Commission for construction permits to cover 65 short wave transmitters for the establishment of a domestic communications network serving 24 important cities throughout the United States.

"It is our intention," said the application, "to provide rapid and direct connection between our international transoceanic service now operated from New York and San Francisco, and the largest possible number of important points within this country, thus supplying the need for an all-radio international telegraphic service not now available to the public except in New York, San Francisco, Boston, and Washington. In conjunction therewith we will offer a domestic radio telegraph service competing favorably in quality and in rates with the existing wire line telegraphs."

Farm Adviser Carney Answers Last Call Many Attend Funeral

Was One of Outstanding Men In Farm Bureau Movement

MORE than 300 Farm Bureau members, farm advisers, business men, and representatives of local and state-wide organizations attended the services held for Sidney S. Carney, Rock Island county farm adviser, in the chapel at Rock Island Monday, July 30. Burial took place the following day from the First Methodist Church at Rochelle from which the body was taken to the cemetery at Greenwood, north of Woodstock in McHenry county.

Sidney S. Carney

Mr. Carney lost his life in an automobile accident on Friday night, July 27, when A. D. Lynch and R. J. Hamilton of the I. A. A., who were riding with him, were injured. Glenn Westcott, a passenger in the other car, died after the collision. Three other passengers were seriously injured.

Born Near Steward

Carney was born near Steward in Lee county, April 25, 1889.

After graduating from the local schools he attended Evanston Academy and later entered the University of Illinois where he graduated with honors from the College of Agriculture. After securing his Master's degree he became a member of the teaching staff in the Agronomy Department where he served for five years. He left the University to become farm adviser in Rock Island county, February 1, 1925. His ability was soon recognized, and as a result of his hard faithful work the Rock Island County Farm Bureau was strengthened and improved in membership and activities.

During the war Carney served as a Lieutenant in the Reserve Corps.

He was a Mason, president of the Rock Island Kiwanis Club, a member of the American Legion, a member of the Elks lodge, and while at the University was elected to Sigma Xi, honorary scientific fraternity.

He is survived by his wife, formerly Miss Mildred Marble of Greenwood, McHenry county, and by his mother, a brother, and five sisters.

Farm Adviser Frank Barrett of Pike county tendered his resignation recently to become effective September 1.

Picnic Crowds Grow In Size As Season Advances, Last, Sept. 3

Harvest Conflicts With Gatherings At Taylorville, Highland and Sullivan

DISTRICT I. A. A. picnics held last week at Taylorville, Highland and Sullivan were highly successful in spite of the fact that they competed with threshing in each case. Beginning with the picnic at Taylorville on Aug. 8, which drew a crowd estimated at 3,000 to 5,000, attendance increased at the gatherings held in the days following at Highland and Sullivan. More than 5,000 crowded into Wyman Park, Sullivan, the scene of the 19th district gathering on Aug. 10, according to official observers.

J. L. Whisnand, Con. Chas. Adkins and Wm. H. Settle at Sullivan

Wm. H. Settle, of Indiana, known to corn belt farmers as "Fighting Bill," spoke at all three picnics. His listeners were not disappointed. Mr. Settle laid bare the issues of the campaign, reiterated organized farmers' stand on the agricultural question, fearlessly discussed candidates as well as principles, and challenged the world to dispute his assertions as they were vigorously marshalled out for the enlightenment of his thousands of interested listeners.

Public Address System

With the help of the public address system which carried the speaker's voice to remote parts of the picnic grounds, Settle probably reached 10,000 people in the three-day speaking tour.

At Taylorville, President Earl C. Smith again emphasized the policies of the I. A. A. in political affairs which were fully presented in the last issue of the RECORD. He urged that farmers study the issues of the day, fully inform themselves on the expressions of candidates, and vote for the best interests of agriculture.

Settle spoke approvingly of the Democratic farm plank and of the presidential candidate's frankness in asserting he would stand on that plank as adopted at Houston. He expressed the belief that the prohibition act must be modified and that the Drys should lead in the modification, not the Wets.

Study the Issues

"Farmers should study both platforms and also the promises made by both candidates and vote for what they believe to be the best for their business and their families," said Mr. Settle. "We should not allow any other issue to confuse our minds on this question.

"Now seems to be the opportune time to secure for agriculture legislation that will place the industry on an equal basis with other great industries, and establish a permanent policy with a degree of bargaining power which is essential to the farming business as it is for any other business that can ever hope for success," continued Settle.

O. Whitler and C. Whitler of Macoupin Co., Horseshoe Champs at Taylorville

"Regardless of who is selected President, a majority of the agricultural people of the country will carry on this fight until victory is attained and the American farmers will have secured equality with industry and labor under our protective policy."

Executive Committeemen Samuel Sorrells, Frank Oexner, and J. L. Whisnand presided at the 21st, 22nd and 19th district picnics, respectively.

Whitlers Champ Pitchers

O. Whitler and his brother, C. Whitler, of Macoupin county, carried off the honors in horseshoe pitching at Taylorville. Macoupin and Christian counties each entered two teams, Sangamon and Montgomery counties only one. Seek Better Barge Line Terminals On Ill. and Mississippi

Robt. A. Cowles Represents I. A. A. On Important Waterways Committee

TO provide suitable terminal facilities for the federal barge line service on the Illinois and Mississippi Rivers and other local tributary streams will be the work of the new Uniform Waterway Terminals Committee recently named by John H. Camlin, president of the Illinois Chamber of Commerce.

The committee will be entrusted with the job of assisting in making the barge line service of greatest use and benefit to Illinois shippers. To this end it will work for adequate and uniform terminals at cities and shipping points adjoining the Illinois, Mississippi, and other tributaries within and adjoining the state.

Meeting Aug. 2

The work of the Committee was outlined at a meeting held in Chicago on Aug. 2, when preliminary plans were made for a definite campaign. The opening move to carry out the program will be a tour of inspection of the ports in Illinois on the Lakes-to-the-Gulf Waterway to be arranged by George Stephens, secretary of the Committee.

W. F. Mulvihill, superintendent of state waterways, Theo. Brent, Lachlan Macleay of the Mississippi Valley Association, and others have pledged their support.

Robert A. Cowles, treasurer of the I. A. A., will represent the Association on the Committee. The other members are as follows: A. T. Griffith, Peoria, chairman; Congressman Wm. E. Hull, Peoria; F. L. Stephen, Morris; John Hanifen, Ottawa; Bedor Wood, Jr., Col. Robert Isham Randolph, Chicago; Ray Williams, Cairo; Francis Kilduff, La Salle; F. F. McNaughton, Pekin; R. B. Glenn, Beardstown; E. T. Harris, Chicago; Wayne Hummer, La Salle; John H. Camlin, Rockford, and Walter W. Williams, Benton.

Form New Produce Unit

HARRY REID was elected president, Lloyd Elmore, vice-president, Jay Basom, secretary-treasurer, and Wayne Herrick and Sherman Ready, directors of the recently organized Farmer City Dairy Marketing Association in DeWitt county.

The association will handle produce, mostly cream and poultry products.

More than a hundred members have already signed the agreement. Bids are being received from creameries for the entire year's output of the association.

Farm Adviser Allen of Dewitt county and Frank Gougler, director of produce marketing for the I. A. A., are assisting in getting the association launched.

PICNIC SPEAKER

Cong. Chas. Adkins

CONGRESSMAN CHARLES ADKINS of Decatur was born February 7, 1863, in Pickaway county, Ohio. He was educated in the country schools, and taught school for a time. He moved to Piatt county, Illinois, in 1885 and has been engaged in farming and stock raising since that time.

He served as a member of the 45th, 46th, and 47th General Assemblies, and was speaker of the house in the 47th Assembly. Congressman Adkins was appointed Director of the State Department of Agriculture during the administration of Gov. Frank O. Lowden.

He is married and has five boys and five girls. He is a Methodist and a member of the Hamilton Club of Chicago.

Mr. Adkins was elected to the 70th Congress where he distinguished himself in support of farm legislation. He proved to be an effective and formidable fighter on the floor of the House for the McNary-Haugen bill.

Congressman Adkins will speak on the farm question at the District I. A. A. picnics scheduled for Marion on Aug. 17, and Macomb on Aug. 21. Mr. Adkins appeared on the program with "Fighting Bill" Settle, the speaker of the day, at the 19th District Picnic, Sullivan, on Aug. 10.

NEW LIMESTONE PLAN

Be sure and see your Farm Adviser for details about the new limestone purchasing plan. If you are going to order limestone this season, it is worth ten cents (10c) a ton to you "through a refund" to place your order through your County Farm Bureau and not send it in direct.

No discount at time of payment applies under the new plan.

Games and Contests Attract Many At I. A. A. Picnic, Sullivan, Aug. 10

Jersey Calves Selected For State Fair

WATER sports, Farm Bureau baseball, horseshoe pitching, auto driving contests, and a bangup purebred Jersey calf exhibit by the Monroe County 4-H clubs were entertaining features at the I. A. A.-Farm Bureau district picnic held at Sullivan on Friday, Aug. 10.

The baseball game between the Champaign and DeWitt county Farm Bureau teams, the details of which are given elsewhere in this issue, went to Champaign, 17 to 2.

Owners of calves selected to go to State Fair, Springfield, are as follows:

Senior Yearlings:
1. Hugh Righter, Sullivan.
2. Vincent Eary, Bethany.
3. George Atchison, Lovington.
4. Alex Mitchell, Bethany.
5. Glen Clark, Bethany.

Senior Calves:
1. Merwyn Tipsward, Bethany.
2. Ralph Sharp, Bethany.

Horseshoe Pitching:
1. Emmett Burcham, Lovington.
2. W. A. Kamm, Atwood.
3. R. Temple, Oakland.

Milkmaid Contest:
1. Geraldine Keyes, Lake City.
2. Grace Clark, Sullivan.
3. Dorothy Winings, Lake City.

Water Carnival:
Boys 12 and under—100 feet.
1. Dean Feeter.
2. George Poland.
3. Wendel Turner.

Boys 15 and under, dive from pier and swim 150 feet.
1. Elmer Dunscomb.
2. Chas. Cummins.
3. John McDonald.

Men's Free for All—Across the Lake—100 yards:
1. K. K. Hoagland.
2. John Moran.
3. Sam Bolin.

Girls 15 and under—100 feet:
1. Eileen Myers.
2. Norma Hanson.
3. Beatrice Hill.

Women's Free for All—200 feet:
1. Dorothy Wood.
2. Beatrice Hill.
3. Ruth Monroe.

Men's Fancy Dive:
1. Will Baker.
2. George Poland.
3. Sam Bolin.

Men's High Dive from Tower:
1. Sam Bolin.
2. Jack Condon.
3. Luke Parker.

Men's Long Dive under water:
1. Will Baker.
2. Roy Bailey.
3. Sam Bolin.

NINETY-TWO STATE PRISONS and reformatories had a total of 41,942 prisoners during the year 1926 as compared with 33,298 in 1923, and 26,415 in 1910. The federal prisons had 5,010 admissions in 1926 compared with 3,703 in 1923, and 987 in 1910.

St. Clair Co. Defeats Washington In Base-Ball At I. A. A. Picnic

Frank G. Oexner Pays Tribute To Strong Farm Leadership

"IF AGRICULTURE is established and equality attained on a sound program it must be brought about by leadership of men who know farm problems," declared Frank G. Oexner, executive committeeman from the 22nd district in introducing the speaker of the day at the I. A. A. District picnic in Highland Park, Madison county.

F. G. Oexner

"It is necessary to have aggressive leadership of Wm. H. Settle's type, if we are to get the attention and gain the confidence of people in other pursuits," he continued. "Bill Settle is such a man and because he has fought so aggressively and whole-heartedly in behalf of agriculture we have invited him here today."

Oexner paid tribute to the co-operation of the Highland business men in staging the picnic. He used the opportunity as an illustration of the "inclination of business men, bankers, and other groups to help bring about stability in agriculture and solve the troublesome problem of crop surpluses."

"We have faith in the fairness of the American people to right an injustice," he said, "when they become aware that our protective policies are not being applied impartially."

Baseball In Afternoon

The baseball game scheduled for the morning between Bond county and a Madison county team from about Troy failed to materialize. The Bond county players were at home in the harvest fields threshing grain.

In the afternoon Washington and St. Clair county Farm Bureau teams hooked up for a battle which was won by the St. Clair boys 11 to 4. St. Clair county's team has not entered the Illinois Farm Bureau Baseball League and so it was not an official game.

Following is a list of the prize winners in the races and contests:

Chicken calling contest for ladies, 10 competitors, Mrs. Emma Kleinert, St. Clair County, first.

Hog calling contest for men, 10 competitors, Edgar North, Lebanon, first.

Three-legged race for boys, Franklin Reiss and Irwin Reiss, Freeburg, Ill.

Egg race for girls, Jeanne Thompson, Greenville, Ill.

Running race for girls, Edna Kaiser, Highland, Ill.

Sack race for boys, Dan Kleiner, Highland, Ill.

Nail driving contest for ladies, Mrs. J. G. Mueller, Highland, Ill.

Horse-shoe pitching, teams, W. A. Cope and Edwin Twenhafel, Clinton County.

Horse-shoe pitching, singles, Louis Monken, Highland, first and Richard Kunz, St. Jacob, second.

Tug of War, Albert G. Hebrank, Robert Buehlmann, Oswald Doll, Adolph Wernle, Chris Jakel, Gus A. Reichert, Wm. Maack.

Picnic Crowds Grow

(Continued from page 9)

Business Men Help

The business men of Highland entered into the spirit of the day, closed shop, and joined their neighbor farmers in the festivities. Wm. Vieth, president of the Madison County Farm Bureau, Executive Committeeman Frank Oexner of Monroe County, Farm Adviser Raut, John Miller, and H. U. Landon of Edwardsville officiated in carrying out the program.

Adkins at Sullivan

Bill Settle shared the speaking program at Sullivan with Congressman Chas. Adkins of Decatur, who came out to attend the picnic in his home district.

Mr. Adkins reviewed early farm organizations in Illinois, told of his interest in the farmers' grain elevator movement, discussed early farm legislation in the state legislature, where he served for many years, and later discussed the fight for surplus control legislation in the last congress.

Contrary to newspaper reports, Mr. Adkins did not renounce his advocacy of the equalization fee. He said that he believed the plan embraced in the McNary-Haugen bill was worthy of a trial and would prove effective, but he doubted if the bill could be enacted into law. He said he expected to vote for the farm bill that had the best chance of passage if he was returned to the next congress.

THE McLEAN COUNTY FARM Bureau, now engaged in renewing its memberships for a new period, has increased its membership considerably in all those townships which have been thoroughly solicited.

The Work of the I. A. A.

Representation

Legislation has a profound influence on the prosperity or lack of prosperity of any industry or business. Witness what the tariff did for steel and aluminum, and many other industries. The I. A. A. is effectively organized (b) To stop harmful legislation; (a) To secure helpful and enabling legislation when and where needed.

Taxation

Taxes are commonly levied most heavily against those who offer the least resistance. Not until the I. A. A. prosecuted its tax investigations in Illinois were many glaring inequalities disclosed and remedied. That work is but well started. The I. A. A. Department of Taxation is on the job.

Transportation Claims

Freight rates are ever subject to increase. Every industry is organized and bidding for preferential rates. The carriers are always seeking an opportunity to increase their revenue. Agriculture is willing to pay its share of the freight bill but not the other fellow's share. The I. A. A. maintains a Transportation Department to see that the farmer gets a square deal in freight rates. The Department also handles claims against rail carriers.

A strong organization can secure a settlement of a claim when an individual farmer can't. Ask your neighbor who has tried. The I. A. A. collects thousands of dollars worth of these claims annually. It is performing a valuable service for Farm Bureau members, and for co-operatives.

Public Utilities

The farmer is a user of the services offered by public utilities, such as telephone, electricity, transportation. His interests are often at stake in matters before the Commerce Commission which regulates these closely associated utilities. The I. A. A. has able, trained men to represent the farmer. They know what to do and when.

Bargaining Power

The farmer must organize his bargaining power. The I. A. A. has several active departments directed by trained men who are working and succeeding with this problem. The object is to secure for farmers a larger share of the consumer's dollar.

Marketing

Orderly marketing must replace "dumping." The progress that has been made in this direction was brought about by organization. The Illinois Agricultural Association already has accomplished much. Its five marketing departments are assisting not only in forming new selling units, but also in helping those already established to serve the farmers of Illinois.

Business Service

Successful management of co-operatives and farmers' business enterprises has been the aim and end of the I. A. A.'s co-operative accounting and audit service. We must protect our present ventures. Good management and accurate, informative records go hand in hand.

Buying Power

Farmers can learn much from big business. Big business uses its buying power to reduce the cost of those materials necessary to manufacture and production. Buying at retail and selling at wholesale isn't good business. The I. A. A. is making progress in organizing farmers' buying power through the purchase of limestone, fertilizers, petroleum products, serum and other supplies.

Insurance

Farmers learned long ago that by group action they could carry their own insurance cheaper than they could buy it from privately controlled companies. The I. A. A. has assisted in extending and improving this service for the farmers of Illinois. It has helped bring about substantial savings on hail, windstorm, tornado, fire and automobile insurance.

Publicity

The light of publicity is the first step in effecting a cure for economic ills. Organized agriculture has succeeded in focusing the eyes of the nation on the fact that it is not included in the charmed circle of protection created by legislative subsidies. The Illinois Agricultural Association played a leading part in telling the story of agriculture's needs and in winning the support of other groups in our national life.

The Illinois Agricultural Association RECORD

Published monthly by the Illinois Agricultural Association at 404 North Wesley Ave., Mount Morris, Ill. Entered as second class matter at post-office at Mount Morris, Ill., October 20, 1916, under the Act of Mar. 3, 1879. Acceptance for mailing at special rate of postage provided in Section 412, Act of February 28, 1925, authorized October 17, 1924.

Governor Alfred E. Smith on Agriculture

Following is the text of the Democratic presidential candidate's statement on agriculture delivered in his speech of acceptance at Albany, N. Y., of Aug. 22.

"Publicity agents of the Republican administration have written so many articles on our general prosperity that they have prevented the average man from having a proper appreciation of the degree of distress existing today among farmers and stock raisers. From 1910 to the present time the farm debt has increased by the striking sum of ten billions of dollars, or from four billion to fourteen billion dollars. The value of farm property between 1920 and 1925 decreased by twenty billions of dollars. This depression made itself felt in an enormous increase of bank failures in the agricultural districts. In 1927 there were 830 bank failures, with total liabilities of over 270 millions of dollars, almost entirely in the agricultural sections, as against 49 such failures during the last year of President Wilson's administration.

Disparity Continues

"The report of Nov. 17, 1927, of a special committee of the Association of Land Grant Colleges and Universities states: 'Incomes from farming since 1920 have not been sufficient to pay a fair return on the current value of capital used and fair wages for the farmers' labor, or to permit farm people to maintain a standard of living comparable with other groups of like ability.' The business men's commission on agriculture said in November, 1927, 'Since the war the prices of farm products have persisted in an uneconomic and unfavorable adjustment to the general scale of prices of other goods and services' and 'the disparity between urban and farm incomes has emphasized the disparity in standards of living in the rural and urban populations. The value of farm land and farm property decreased heavily in the post-war deflation' and 'large numbers of farmers have lost all their property in this process.'

"We have not merely a problem of helping the farmer. While agriculture is one of the most individualized and independent of enterprises, still, as the report of the business men's commission points out, 'Agriculture is essentially a public function, affected with a clear and unquestionable public interest.' The country is an economic whole. If the buying power of agriculture is impaired, the farmer makes fewer trips to Main street. The shop owner suffers because he has lost a large part of his trade. The manufacturer who supplies him likewise suffers, as does the wage earner, because the manufacturer is compelled to curtail his production. And the banker can not collect his debts or safely extend further credit. This country can not be a healthy, strong economic body if one of its members, so fundamentally important as agriculture, is sick almost to the point of economic death.

"The normal market among the farmers of this country for the products of industry is ten billions of dollars. Our export market, according to latest available figures is, exclusive of agricultural products, approximately one billion, six hundred millions of dollars. These large figures furnish striking indication of the serious blow to national prosperity as a whole which is struck when the buying power of the farmer is paralyzed.

"When, therefore, I say that I am in accord with our platform declaration that the solution of this problem must be a prime and immediate concern of the Democratic administration, I make no class appeal. I am stating a proposition as vital to the welfare of business as of agriculture.

Republicans Break Promise

"With the exception of the administrations of Cleveland and Wilson, the government of this country has been in Republican hands for half a century. For nearly eight years the President and Congress have been Republican. What has been done to solve this problem? Many promises were made which have never been fulfilled.

"The tariff is ineffective on commodities of which there is exportable surplus without controlled sale of the surplus. Our platform points the way to make the tariff effective for crops of which we produce a surplus. There has been government interference with laws of supply and demand to benefit industry, commerce and finance. It has been one-sided because business,

Statement by Earl C. Smith

President Illinois Agricultural Association

"GOVERNOR SMITH promises his support and leadership in the development of a legislative program for farm relief which recognizes two specific principles that have been uppermost in the farm relief program backed by agricultural organizations in recent years. He points out that the tariff is ineffective upon crops of which we produce an exportable surplus; and he pronounces, as does the Democratic platform, in favor of legislation to make the tariff effective on such crops.

"In pledging support to cooperative marketing development, he recognizes, as did the Democratic platform, that the costs of dealing with crop surpluses should be distributed over the crop whose producers are benefited by such assistance.

"His position on this major principle of farm legislation squares exactly with that of the Illinois Agricultural Association. Governor Smith did not commit himself, however, to any specific legislative plan to make it effective. The mechanics, he admits, remain to be devised, and he proposes that this shall be worked out immediately after election in co-operation with farm leaders throughout the country who have given thought to this problem, with the assistance of economists and business men."

industry and finance would have been helped more if proper attention had been given to the condition of agriculture. Nothing of substance has been done to bring this basic part of our national life into conformity with the economic system that has been set up by law. Government should interfere as little as possible with business. But if it does interfere with one phase of economic life, be it by tariff, by assistance to merchant marine, by control of the flow of money and capital through the banking system, it is bad logic, bad economics and an abandonment of government responsibility to say that as to agriculture alone, the government should not aid.

Co-ordinated Marketing Needed

"Twice a Republican Congress has passed legislation only to have it vetoed by a President of their own party, and whether the veto of that specific measure was right or wrong, it is undisputed that no adequate substitute was ever recommended to the Congress by the president and that no constructive plan of relief was ever formulated by any leader of the Republican party in place of the plan which its Congress passed and its President vetoed. Only caustic criticism and bitter denunciation were provoked in the minds of the Republican leaders in answer to the nation-wide appeal for a sane endeavor to meet this crisis.

"Co-operative, co-ordinated marketing and warehousing of surplus farm products is essential, just as co-ordinated, co-operative control of the flow of capital was found necessary to the regulation of our country's finances. To accomplish financial stability, the federal reserve system was called into being by a Democratic administration. The question for agriculture is complex. Any plan devised must also be co-ordinated with the other phases of our business institutions. Our platform declares for the development of co-operative marketing and an earnest endeavor to solve the problem of the distribution of the cost of dealing with crop surpluses over the marketed unit of the crop whose producers are benefited by such assistance.

Pledges Immediate Action

"Only the mechanics remain to be devised. I propose to substitute action for inaction, and friendliness for hostility. In my administration of the government of my state, whenever I was confronted with a problem of this character, I called into conference those best equipped on the particular subject in hand. I shall follow that course with regard to agriculture.

"Farmers and farm leaders, with such constructive aid as will come from sound economists and fair-minded leaders of finance and business, must work out the detail. There are varying plans for the attainment of the end which is to be accomplished. Such plans should be subjected at once to searching, able and fair-minded analysis, because the interests of all require that the solution shall be economically sound.

"If I am elected, I shall immediately after election ask leaders of the type I have named, irrespective of party, to enter upon this task. I shall join with them in the discharge of their duties during the coming winter and present to Congress, immediately upon its convening, the solution recommended by the body of men best fitted to render this signal service to the nation. I shall support the activities of this body until a satisfactory law is placed upon the statute books."

Statement Issued by President Sam H. Thompson

American Farm Bureau Federation

GOVERNOR SMITH in his acceptance speech last night recited facts that clearly represent the present agricultural situation.

He reiterated the Democratic party pledge adopted at Houston. As I have already said, that party platform covers the fundamental principles adopted by the American Farm Bureau Federation five years ago.

The avoidance of Government subsidy by assessing the cost of surplus control to the product benefited is fundamental.

Governor Smith's plan to find a way of spreading the marketing costs over the marketed unit of the commodity benefited is satisfactory.

Nearly Two Million Leave Farms in 1927

THE Bureau of Agricultural Economics estimates that 1,978,000 persons left farms last year compared with 2,155,000 in 1926, and 1,900,000 in 1925. Offsetting this movement, 1,374,000 persons moved from cities to farms last year compared with 1,135,000 in 1926, and 1,066,000 in 1925.

These figures show a net movement of 604,000 persons from farms to cities for 1927 compared with 1,020,000 persons in 1926, and 834,000 persons in 1925. Only a small reduction, however, is shown in farm population, an excess of births over deaths bringing the population to 27,699,000 persons on January 1, 1928, compared with 27,892,000 on January 1, 1927, a decrease of 193,000 persons, compared with a decrease of 649,000 in 1926, and 441,000 in 1925.

A survey made last winter shows that 87 per cent of those moving from cities to farms had had farm experience.

THE PRESS SAYS

THAT LONGING FOR MR. LOWDEN

Recently Gov. Smith, in addressing certain spokesmen for agriculture, named Frank O. Lowden as one of the intellectual leaders and practical farmers whom he would ask to serve on a committee of experts to be appointed at once, in the event of his election, to devise a solution of the complex and difficult farm-relief problem.

In his speech on that problem the other day at West Branch, Iowa, Mr. Hoover remarked that "outstanding farmers such as Gov. Lowden would be asked to join in the search for common ground upon which we can act."

The assiduous cultivation of Mr. Lowden by both candidates and both parties is one of the features of the campaign which is not devoid of humor for the observer. Mr. Lowden's aid and advice would be both scientific and practical, but the value of his political support is not underestimated by either anxious aspirant to Presidential honors.

While awaiting some sign from the eminent Illinoisan both candidates and their respective campaign managers might study with profit the many speeches, magazine articles and statements which Mr. Lowden has contributed to the discussion of the farm problem. They should ponder especially his insistence upon what he calls the penalty clauses of farm-relief legislation, upon the necessity of distributing the cost of surplus control over all the beneficiaries and upon preventing abuse of devised remedies by selfish, stubborn, narrow-minded or short-sighted farmers who, avid to take advantage of others' costly co-operative efforts, have no scruples about neutralizing those efforts by grabbing profits in their own good time while contributing nothing to the common welfare.

Investigation of the obvious would be a waste of time and effort. The crux of the problem is known and should not be dodged. The urgent need is for some workable substitute for the equalization fee of the McNary-Haugen bill.—Chicago Daily News.

LOGAN COUNTY LIVESTOCK GROWERS VISIT CHICAGO PRODUCERS

Thousands of Illinois livestock men already have taken advantage of recent opportunities to tour with their neighbors to learn more about selling livestock co-operatively through the PRODUCERS at the terminal markets in and adjoining Illinois. This snapshot was made some time ago when a large delegation led by Farm Adviser Checkley and Logan county shipping association managers visited the Union Stock Yards, Chicago.

Auto Insurance Company Nears 10,000 Policy Mark

APPLICATIONS for auto insurance policies by the Farm Bureau members of Illinois neared the 10,000 mark on September 1, according to an announcement by the Illinois Agricultural Mutual Insurance Company. On that date exactly 9,678 policies were in force or had been applied for. By the first of October it is expected that the policies in force will exceed the 10,000 mark by a substantial number.

"Our policyholders indicate frequently that they are well pleased with this service of the Farm Bureau," said Manager A. E. Richardson. "With the growth of the company claims are coming in regularly and we are making an effort to adjust them to the entire satisfaction of the policyholders. Our motto is to make a fair settlement in every case, and to do it promptly."

A Code of Ethics For City Folks

A CONDENSED code of outdoor ethics has just been issued by the Izaak Walton League of America.

"If this code is followed, even fifty per cent, by the vast hordes of people who are taking to the outdoors this summer, the condition of our great natural playground, hard pressed by the outdoor movement occasioned by modern transportation facilities, will be safe from the destruction which threatens it," declared Dr. Henry Baldwin Ward, national president of the organization.

The code of ethics was compiled by Seth E. Gordon, conservation director of the League, whose talks are enjoyed by the I. A. A. radio audience. Here is the code of ethics for city folks as Mr. Gordon presented it over Station WJJD, Mooseheart, recently:

1. Your outdoor manners tell the world what you are when at home.
2. What belongs to the public isn't your own—play fair.
3. Respect the property of rural residents—ask before using it.
4. Save fences, close gates and bars, go around planted fields.
5. People, livestock, trees and birds were never meant to be target practice backstops.
6. Respect the law—catch enough legal fish to eat, then quit.
7. Protect public health — keep springs and streams clean.
8. Clean up your camp and don't litter the highways with trash.
9. Finish what you start—carelessness with fires is cussedness.
10. Leave flowers and shrubs for others to enjoy. Do your share to keep outdoor America beautiful.

160 Visit Producers

ONE hundred and sixty members of the Wenona Shipping Association from Marshall county visited the Chicago market June 29. Farm Advisers R. J. Laible and C. E. Gates accompanied the party.

The C. and A. railroad provided a special train for the group, the members of which were entertained by the Chicago Producers' Commission Association. The morning was spent in inspecting the Producers' alleys, and in the afternoon Swift and Company entertained the entire group at luncheon and later conducted a tour through their packing plant.

Axel Helander, manager of the Association, was largely responsible for making arrangements for the trip. This live Association has 170 members in La Salle and Marshall counties. This was the largest delegation ever to visit the Chicago Producers' from any one shipping association up to that time.

New Produce Co-op. Organized At Bement

THE twentieth and most recent co-operative produce marketing association to be organized is the Piatt County association with the first unit at Bement, Ill. A dozen or more bids were received for members' produce for the coming year. The contract was awarded to Swift & Co., Decatur.

Officers elected to direct the Bement unit of the Piatt County Produce Marketing Association are A. E. Larson, Lester Cook, John W. Hammon, Harry M. Coffin, and John Hendrix, all of Bement.

As soon as this unit opens for business a second will be organized at Monticello in Piatt county.

Immense Loss From Kansas Hail Storm

ONE of the most disastrous hailstorms in Kansas since 1917 swept across eight southwestern counties recently and caused approximately $2,000,000 damage in a path 100 miles long by 15 miles wide.

Communication lines, crippled by the storm, were not restored until several days later. The hail was followed by a three-inch rain.

Grant county suffered the greatest loss with about a million dollars damage done to wheat fields. Other counties in the path of the storm were Stanton, Morton, Stevens, Haskell, Seward, Meade, and Clark. It is estimated 1,500,000 bushels of wheat were destroyed. Wind also damaged wheat fields.

THE FARMERS SHIPPING ASSOCIATION of Chapin, Morgan county, shipped $126,457.26 worth of livestock during the fiscal year ending March 1, 1928. Two hundred and seventy-five farmers shipped through the association which handles more than 50 per cent of the livestock sold in the community.

industry and finance would have been helped more if proper attention had been given to the condition of agriculture. Nothing of substance has been done to bring this basic part of our national life into conformity with the economic system that has been set up by law. Government should interfere as little as possible with business. But if it does interfere with one phase of economic life, be it by tariff, by assistance to merchant marine, by control of the flow of money and capital through the banking system, it is bad logic, bad economics and an abandonment of government responsibility to say that as to agriculture alone, the government should not aid.

Co-ordinated Marketing Needed

"Twice a Republican Congress has passed legislation only to have it vetoed by a President of their own party, and whether the veto of that specific measure was right or wrong, it is undisputed that no adequate substitute was ever recommended to the Congress by the president and that no constructive plan of relief was ever formulated by any leader of the Republican party in place of the plan which its Congress passed and its President vetoed. The Proposed $20,000,000 Bond Issue

The Executive Committee of the I. A. A. unanimously adopted the following report of its Public Relations Committee with reference to the proposed bond issue of $20,000,000 for acquiring a state-wide system of fishing and hunting grounds at its regular meeting on Sept. 7, 1928:

"IN THE general election in November of this year, the people of Illinois will vote upon a proposition submitted by the Fifty-fifth General Assembly authorizing the State of Illinois, through the Governor and Department of Conservation, to issue, sell, and provide for the retirement of bonds of the State to the amount of twenty million dollars for the purpose of acquiring and establishing a state-wide system of fishing and hunting grounds.

"It is provided in the Act submitting the bond issue that, to be approved by the people, it must receive a majority of the votes cast for members of the General Assembly in the November election.

"If the Act is appryoved by the people, it is provided that the rate of interest on any bonds that may be issued shall not exceed four per cent per annum, and that no bond shall be issued for a period of more than thirty years.

"If the issue of bonds for the purpose stated is approved by vote of the people, the state officers will be authorized to levy a tax on property from year to year sufficient to meet interest on the outstanding bonds and to retire the bonds as they become due. It is provided, however, that moneys in the Game and Fish Fund be first used for such payments and requires the omission of a direct tax on property in any year in which sufficient money from other sources of revenue has been appropriated to meet such payment for such year..

"The Act also declares its intent that the state-wide system of fishing and hunting grounds, including all fishing and hunting grounds, fish and game preserves, refugees, rest grounds, and sanctuaries now owned by the State of Illinois, shall be spread out over the entire state roughly proportionate to population, so that all the people shall have approximately the same opportunity to partake of its benefits.

"The officers and the Committee on Public Relations of the Association have been urged to endorse and to give public notice of their position on the proposed bond issue.

"Due consideration has been given to the arguments and figures presented by supporters of the bond issue, and to additional figures compiled by our Department of Taxation. The Committee has reports for recent years giving the receipts from hunting and fishing licenses into the Game and Fish Fund of the State, and appropriations and expenditures therefrom by the former Division of Game and Fish of the State Department of Agriculture, and, beginning in 1925, by the State Department of Conservation.

"All of this information has been analyzed by the Department of Taxation for the purpose of determining as definitely as possible whether the proposed bond issue involves serious danger of requiring a state tax on general property either for the payment of interest on outstanding bonds and the retirement of the bonds as they become due, or for the expense of administration by the Department of Conservation.

"If the bond issue is approved, the extensive system of hunting and fishing lands purchased with the proceeds of the bond issue will require very large additional expense for improvement, maintenance, stocking with game and fish, and protection, and for administration by the Department of Conservation. All such expense must be paid out of the Game and Fish Fund of the State derived from hunting and fishing licenses alone, or out of appropriations therefor out of the general or other funds of the State.

"The Committee does not believe that the number of hunting and fishing licenses issued in the state, or the schedule of fees therefor, will be increased to such an extent as to meet all the expenses of the Department and the principal of the bonds and interest thereon. The Committee is convinced, therefore, that approval of the bond issue by the people of the State will soon result in the levy of a state tax on general property for these purposes. Once levied, such a tax, like other taxes, is likely both to become permanent and to increase in amount.

"Following the well defined policy of the Association to give information on all state and national questions involving agriculture, we are here giving our conclusions on this matter. The Illinois Agricultural Association is not opposed to a state-wide program of conserving and developing natural resources for hunting and fishing; however, with all the information available, the Association does not believe it possible to establish, improve, maintain, and protect so extensive a system without a further increase in general property taxes.

"The Illinois Agricultural Association is definitely committed to a program of resisting any tax increases at least until assessments of property in this state are made upon a uniform basis and the state constitution is amended in such a way as to permit a fair taxing system."

Executive Committee Reaffirms Policy

The following report of the Committee on Public Relations held on September 5, 1928, attended by Earl C. Smith, president, R. A. Cowles, treasurer, J. L. Whitmand, Chas. Marshall and Frank D. Barton, was unanimously adopted by the I. A. A. Executive Committee at its regular meeting in Chicago, Sept. 7, 1928:

"HAVING received a report of the 14 district picnics for which our Association had secured speakers of national reputation, among whom were farm leaders from North, South, East and West, as well as Republican and Democratic leaders in Congress who had demonstrated their loyalty to agriculture and therefore were asked to discuss the agricultural issue fully and impartially; and after hearing a report on Farm Bureau Day at the State Fair where Congressman Dickinson of Iowa, representing the National Republican Committee, told how the Republican Party expected to solve the agricultural problem in the next session of Congress, while Senator Caraway of Arkansas, representing the National Democratic Committee, told how the Democratic Party expected to solve the same problem, and

"Also having carefully considered the developments up to date in both the great political parties on the paramount issue of the national campaign —that of establishing a national policy for agriculture comparable to that already established for industry, labor, transportation, and finance, and

"In view of all these reports and developments your committee on Public Relations wishes to recommend to you, the Executive Committee, that we reaffirm and recommend a continuance of the policy adopted at your regular meeting on July 13 and reaffirmed at the regular meeting of the Committee on August 11, which is as follows:

"The primary interest and purpose of the Illinois Agricultural Association is to serve the true and permanent interests of the farmers of Illinois. The policy of the Association in all political matters has always been and will continue to be strictly non-partisan.

"We recognize that agricultural issues are economic rather than political. This was conclusively shown by the majority vote of both parties in each house of the 69th and 70th Congresses, by which the McNary-Haugen Bill was passed. It has also been repeatedly revealed by the non-partisan vote supporting and passing such constructive agricultural legislation in our state.

"National, state and district issues should be carefully considered on their relative merits and in no way should they become confused.

"We seek to furnish full, fair and impartial information on agricultural issues to our members and friends, also the records and commitments on these issues of political parties, men in office and those seeking positions of trust and responsibility. With this information in hand, farmers and all true friends of agriculture are in a position to support candidates for office who will best serve the economic interests of agriculture. We urge our members at all times to support those candidates, regardless of party, who by their records or definite commitments have proven their worthiness of this support.

"The policy as above set forth will be continued."

SWEETENING UP IN BROWN COUNTY

A TRAINLOAD of limestone, 46 cars in all, moved into Brown county on Aug. 16 to prepare the way for bigger and better crops of sweet clover, alfalfa, corn and wheat. A special feature of the train was eighteen side-dump cars which were unloaded along the Wabash Railroad between stations. The Wabash provided a special crew to assist and the farmers picked the sites for unloading the limestone. Each purchaser furnished two men for each car bought and these men accompanied the train during the day. Thirty-six men unloaded the 18 carloads in 7½ hours. The Brown County Farm Bureau, the Wabash Railroad, and the Brownell Improvement Co. co-operated in the project. Farmers remotely situated from the railroads will crush approximately 2000 tons this year with the two crushers now working on local limestone deposits.

The Ohio Farm Bureau Mutual Auto Insurance Company has 27,000 Farm Bureau member policyholders. It recently established a branch office in Maryland at the invitation of the Maryland Farm Bureau where the auto insurance service will be made available to Farm Bureau members there.

L. Burl Hornbeck, of Winchester, a member of the Scott County Farm Bureau, won one of the twelve prizes offered in a national contest promoted by the Bureau Farmer, official magazine of the American Farm Bureau Federation, in which entrants submitted letters on the topic, "What My Farm Bureau Means to Me." First place, with a prize of $10, went to H. E. Meeker, Galt, Iowa, and second place to Mrs. Louise W. East, Warren, Utah, who received $5. The other ten received $1 each. A second Illinois prize winning letter was submitted by Sartory Brothers, Warsaw, Hancock County, Ill.

Farmers Warned Not To Let Insurance Lapse Thru Neglect

Attention Called To Mistakes By Policy Holders

FARMERS should be careful not to void their fire and tornado insurance through failure to comply with certain well-established rules of all insurance companies. In a letter to all its borrowers, the Federal Land Bank of St. Paul calls attention to the fact that a number of its clients who had fire losses during the past year had voided their policies by neglecting to observe the conditions of the contract, and offers the following words of caution:

"If your buildings are vacated, fire insurance becomes null and void in a certain number of days, unless the insured obtains a 'vacancy permit.'

"Remedy: If your buildings are not occupied, even for a short time, report the matter to the insurance company at once and obtain a 'vacancy permit.' In writing, request one from the local agent.

"The insurance company's liability ceases at once when the farm is transferred.

"Remedy: Report transfer of farm to the insurance company immediately, in writing. The policies can either be transferred to the new owner, in which case the company should be asked to make the transfer and the new owner should pay for the unexpired insurance, or the policies can be cancelled and the unused premium recovered from the company.

"Insurance is immediately suspended and of no force if any premium note given in settlement for it is not paid when it comes due. This is also true as regards assessment policies where assessments are not paid in a certain number of days (according to the terms of the policy) after they are levied.

"Remedy: Pay premiums and assessments when due."

The Tampico Livestock Shipping Assn. in Whiteside county sold $253,270.40 worth of livestock during the 12 months ending March 1, 1928.

THE race for the state championship in the Illinois Farm Bureau Baseball League has narrowed down to three or four outstanding teams. Tazewell county, a favorite with many fans by reason of its victory in Division III over the strong Marshall-Putnam, Peoria, and Woodford nines had won consistently until its recent defeat by Logan county. On August 15 at Galesburg the Tazewell boys played the fast Henry county team, undefeated this year, and the Tazewell players came through with a 2 to 0 victory. Again at Peoria, three days later, these two teams hooked up and Tazewell, true to form, won the game 9 to 7 and with it the series. At Macomb on August 21, Logan county defeated McDonough county 10 to 2. These two teams crossed bats again at Bloomington on August 31 when Logan county won its second victory 11 to 7. Woodford county defeated McLean in the first game that day 3 to 2, the better game of the two.

Logan and Tazewell counties fought their first battle in the race for the championship on Labor Day at Morton. It was a hard-fought battle but Logan county came out on top with a 1 to 0 victory in the first of the three-game series that will decide the championship of northern and central Illinois. It was by far the best Farm Bureau baseball exhibition of the year, and in the opinion of Farm Adviser Checkley, the game saw Logan county at its best.

Same Lineup

The lineup of the two teams was practically the same as heretofore. Ackerman pitched for Tazewell and Hanahan for Logan. Ackerman struck out six men and Hanahan 4. Two base hits were made by Beaver of Logan and by Bluemenshine and R. Israel of Tazewell county. Ackerman suffered his first defeat in 16 games. A pass to Galen Shirley, the only pass issued by Ackerman during the game, a stolen base and Perry's single scored the lone tally of the game in the ixth inning. Perry was out stealing and the second hit of the inning by Chrisman was wasted. Hanahan pitched an excellent game for Logan and held the Tazewell sluggers to six hits. Neither pitcher secured many strike outs, but excellent support by both infields retired hitters in rapid fire fashion.

Many Spectators

A large number of Logan and Tazewell county farmers as well as townspeople attended the game. Another large crowd was expected at the second game on Sept. 8. The winner of this series will probably play Lawrence county, the southern Illinois champions, in the near future for the state championship.

Jefferson county went down to defeat to Lawrence county in two games played at Flora and at Olney. Jefferson had won the championship in Division VII by defeating Washington, Clay, and Wayne consistently. The Lawrence county nine romped away with the title rather early in Division VIII. The Lawrence team is rated as one of the best in the state because its players are all experienced and play regularly in the Lawrence County Community League.

Game One-sided

The game at Olney on August 30 was a one-sided affair with Lawrence county winning easily 20 to 1. The game was played on a rough, uneven diamond. As a result there was plenty of loose playing and errors. Both teams hit the ball freely, although the Lawrence batsman made the majority of the long drives.

The winning team in Division V has not been reported up to date, although Cass and Morgan counties are running neck and neck in the championship race. Each team has defeated the other once. So far they have failed to play a third game to determine which team has the best right to claim the championship.

Mason and Scott Enter

Mason and Scott counties both entered teams in the League this year and made a good showing against the experienced Cass and Morgan county nines.

At this writing efforts are being made to bring the season to a close at an early date. It is expected that the two leading teams will play a championship series of two out of three games. The teams which compete in the championship series will select the time and place for their games, which will be announced by radio and newspapers as soon as the information is available.

OFFICIAL STANDING OF TEAMS IN THE ILLINOIS FARM BUREAU BASEBALL LEAGUE FOR WEEK ENDING SEPTEMBER 8, 1928

SEMI-FINALS

Lawrence county, southern Illinois champions, defeated Jefferson in two games:

At Flora—Aug. 24		At Olney—Aug. 30	
Lawrence 11	Jefferson 6	Lawrence 20	Jefferson 1
13 hits, 5 errors	12 hits, 7 errors	25 hits, 6 errors	6 hits, 1 error

Batteries: H. Conrad and S. Conrad; Spangler, Mills and Corder

In Division V Cass & Morgan tied for championship, each having won five games and lost one to each other.

Tazewell county eliminated Henry in two games at Galesburg and Peoria previously reported. Logan county eliminated McDonough at Macomb (previously reported) and at Bloomington on Aug. 31.

At Bloomington—Aug. 31	
Woodford 3	McLean 2
7 hits, 2 errors	6 hits, 1 error
Batteries: Young and Moser; Van Dyke and Payne	
Logan 11	McDonough 7
16 hits, 2 errors	13 hits, 3 errors
Batteries: Hoerr and Myers; Mead and L. Mings	

Logan defeated Tazewell in first game of three games series

At Morton—Sept. 3	
Logan 1	Tazewell 0
5 hits, 1 error	6 hits, 0 errors
Batteries: Hanahan and Quisenberry; Ackerman and Carius	

Club Work At Walnut Is Very Successful

C. M. HATLAND, instructor of vocational agriculture in the Walnut Community High School, supervises the work of almost 100 club members besides discharging his other duties as teacher. During the present year he has acted as leader for the following clubs with enrollments as indicated.

C. M. Hatland

Sow and Litter, 21; Dairy Heifers, 19; Baby Beef, 8; Lamb Clubs, 3; Ton Litter, 4; Corn Clubs, 21; Poultry, 15.

Mr. Hatland started the Vocational Agriculture Department at the Walnut Community High School five years ago. The enrollment in his classes has averaged 35 boys per year. He took an active interest in club work in cooperation with the Bureau County Farm Bureau from the beginning. For the last five years his club members have exhibited a full carload of their stock at the Aurora Fair. He has also had a carload at Springfield for three years and has exhibited at the International for four years. Each year and from each fair his club members and team have returned to Bureau county in the Walnut Community bedecked with ribbons and bearing trophies of every description.

Mr. Hatland reports that practically all of his pupils have returned to the farm and are making agriculture their life work. The type of livestock in that community, particularly hogs, is unusually good and Hatland has found that there is keen rivalry between the farmers of that section and his club members as to who shall breed and raise the best hogs or feed the best calf.—Ray E. Miller.

I. A. A. Non-Partisan Policy Approved By Members, Survey Shows

Total Attendance at 14 District Picnics Approaches 100,000 Mark

THE non-partisan political policy of the Illinois Agricultural Association is meeting with the approval of the Farm Bureau members of Illinois, according to a survey conducted at the 14 district I. A. A.-Farm Bureau picnics held throughout the state during the summer. Following its established policy, farm leaders and Congressmen of varied political faiths were selected to address the outdoor gatherings.

Among these were such men as Congressman Haugen of Iowa, a Republican who spoke at Sandwich; Congressman Adkins of Illinois, a Republican who delivered speeches at Sullivan, Marion and Macomb; Congressman Rainey of Illinois, a Democrat who delivered the addresses at Watseka and Olney; Edward A. O'Neal of Alabama, a Democrat and vice-president of the A. F. B. F., who was speaker of the day at Bloomington, Freeport, and Jacksonville; President Sam H. Thompson, a Republican who spoke at Galesburg; Wm. H. Settle of Indiana, a Republican who was speaker at Taylorville, Highland and Sullivan; and M. S. Winder of Utah, Republican and Secretary of the A. F. B. F. who addressed the Peoria gathering. President Smith was principal speaker at the first district picnic held near Wheaton in July.

These men confined their remarks for the most part to a discussion of the agricultural situation, the economics involved, and the necessity for farmers to disregard fictitious party allegiance and vote for those candidates whose records and statements show them to be fair and friendly to agriculture. Nearly 100,000 farmers and their families and guests, including business and labor groups, came out to the 14 picnics. This number is approximately five times greater than the largest crowd ever assembled at a former state picnic of the I. A. A.

Fair Weather Prevails

Fair weather prevailed for the most part at every gathering. Cloudy weather and light showers held down the attendance the morning of the picnics at Marion and at Sandwich, but before noon in each case the sun broke through the clouds and in the afternoon from three to five thousand people had gathered to hear the speaking and to take part in the sporting events of the day. Horseshoe pitching tournaments, baseball games, hog calling, and chicken calling contests, races for the children, and other events featured the majority of the gatherings.

President Earl C. Smith addressed ten of the picnics and before introducing the speaker of the afternoon outlined the definite policy of the I. A. A. in political matters, told of the efforts of organized agriculture throughout the past three sessions of Congress, explained how this economic issue had been injected into politics by the last presidential veto, commented on the agricultural planks of the major party platforms and the acceptance speeches of the two candidates, and urged farmers to continue their careful study of the situation and reserve judgment until the issues involved had become sufficiently clarified, so that they might cast an intelligent vote in behalf of their own interests.

Interest Great

There was comparatively little open discussion of political questions at the gatherings, but it was very apparent that interest in the situation was great. Never before was such careful and close attention given the speakers who had larger audiences than at any previous picnics. The I. A. A. public address system was an important factor in making this possible.

Picnics held early in August conflicted with harvesting and threshing. As a result the attendance was reduced considerably at all the gatherings held the first three weeks of the month. Threshing was still in progress as late as the first of September in northern Illinois, and the 13th district picnic at Freeport on September 1 was affected by this situation.

BIGGEST BAY WINDOW

Logan Barber of Logan county measures 58 inches around the middle. He won first prize in a walkaway at the 17th Dist. Picnic, Bloomington, Aug. 31.

Galesburg, Ill., Aug. 15.—A crowd estimated at 12,000 gathered here today for the 15th district I. A. A.-Farm Bureau picnic. Warm, sunshiny weather greeted the arrivals who began pouring into Lincoln Park, north of here, shortly after nine o'clock.

President Sam H. Thompson of the A. F. B. F. and President Earl C. Smith of the I. A. A. arrived shortly before noon. The Galesburg Chamber of Commerce ably assisted the Farm Bureaus in preparing for the large crowd and in arranging the program. Galesburg business men contributed liberally also to the expense fund. Many of the business houses closed for the afternoon. The Chamber of Commerce quartet enlivened the afternoon program with its excellent music which was broadcast over the grounds by means of the I. A. A. public address system.

Sam Thompson reviewed the efforts of farmers to gain equal privilege legislation. He touched the hearts of his audience with his deep sincerity and earnestness in fighting the battles of agriculture. President Smith answered charges that the corn belt farm leaders had no rank and file by pointing to the great audience from the various counties of the district.

E. F. Griggs and E. C. Griggs, the latter a 16-year-old boy of Adams County, defeated Henry County, represented by W. H. Miller and Jesse

CHAMPION NAIL DRIVERS AT MARION

Nail driving contests for the ladies were popular at several of the district picnics. The young lady in the center, Esther Beasley, Jackson County, won first prize by driving 19 tenpenny nails into a pine plank in one minute.

Anderson, in the horseshoe pitching tournament by score of 52 to 45, taking the double title to Adams County. Tazewell defeated Henry County 2 to 0 in the first semi-final game for the championship of the Illinois Farm Bureau Baseball League.

Macomb, Aug. 21.—Logan county defeated McDonough here today, 10 to 2, in the first game of a 3-game series in the semi-finals of the Illinois Farm Bureau Baseball League. A crowd estimated at 5,000 people gathered in the natural amphitheatre on the Western Illinois State Teachers College campus to hear Cong. Charles Adkins of Decatur. M. G. Lambert of Ferris opened the program. Pres. Lloyd Welch, of the McDonough County Farm Bureau, presided. Earl C. Smith, I. A. A. president, spoke briefly before introducing Congressman Adkins.

Sandwich, Aug. 23.—Nearly 5,000 Farm Bureau members and their guests from the 12th congressional district attended the I. A. A.-Farm Bureau picnic here today. Heavy showers fell during the morning, but the weather cleared up before noon. The horseshoe tournament started immediately after the rain and though courts were sloppy and bleachers wet, enthusiasm was not dulled.

The sun pierced the clouds at noon, and by 1:30 p. m. the amphitheatre was more than filled. The overflow crowded about the loud-speakers to hear Congressman Gilbert N. Haugen, Republican of Iowa, speak on the agricultural situation. Congressman John T. Buckbee of Rockford, President Earl C. Smith of the I. A. A., and George F. Tullock, I. A. A. Executive Committeeman, made short talks prior to the introduction of Mr. Haugen. Henry White, president of the DeKalb County Farm Bureau, presided.

Watseka, Aug. 22.—Congressman Henry T. Rainey of Carrollton, Democrat from the 20th Illinois district, discussed the agricultural platform of the two major parties and the two presidential candidates here today before 2,000 Farm Bureau members from the 18th district who had gathered for the I. A. A.-Farm Bureau picnic.

Calmness of mind is one of the beautiful jewels of wisdom. It is the result of long and patient effort in self-control. Its presence is an indication of ripened experience and of a more than ordinary knowledge of the laws and operations of thought.—James Allen.

Congressman Holaday, Republican of Danville, spoke briefly before introducing the speaker. R. F. Karr, of Iroquois, presided. Robt. A. Cowles, treasurer, represented the Illinois Agricultural Association.

WIN STATE HORSESHOE TITLE

Rollo Siegfried, left, and W. I. Earls of Hancock county are the new Illinois State Farm Bureau Horseshoe Champions for 1928. They won at Jacksonville on Sept. 3. "They throw the prettiest horseshoes I ever saw, and I'll back 'em against all comers," said "Hank" Lloyd, farm adviser from Hancock who came to the tournament with his champions. Each was presented with a large, handsome silver loving cup by the President of the I. A. A. Scott county was runner-up.

THE PAWNEE QUARTET

Left to right: D. C. Dragoo, H. B. Austin, W. L. Dragoo, E. V. Hoagland.

These men are past masters at singing Farm Bureau songs and entertaining their audiences. On Sept. 3 at Jacksonville, they were encored time after time during the afternoon. Their "Down On The Farm At Half Past Four" by Homer Hall was a popular choice.

Freeport, Sept. 1.—Whiteside county won the Farm Bureau baseball title of the 13th congressional district here today, defeating the newly organized Stephenson county nine 5 to 3, before more than 1,000 spectators who had gathered for the I. A. A.-Farm Bureau picnic. Stephenson county retaliated later by winning the horseshpe pitching tournament.

Cool sunshiny weather prevailed throughout the day. By early afternoon a crowd estimated at between 4,000 and 5,000 assembled to hear Ed. A. O'Neal of Alabama, vice-president of the American Farm Bureau Federation, discuss agriculture's bill of rights, the name he gave to surplus control legislation passed by the 70th Congress. President Earl C. Smith, who preceded O'Neal, discussed briefly the I. A. A.'s non-partisan policy in political matters. C. E. Bamborough of Polo presided.

Hog calling and chicken calling contests featured the late afternoon program.

Jacksonville, Sept. 3.—The State Hospital Grounds in the east part of town was the scene of a great gathering of Farm Bureau members and their guests, and laboring and business men here today. The picnic was sponsored by the I. A. A. and the Farm Bureau of the 20th Congressional district. A crowd variously estimated at 7,000 to 10,000 turned out for the day.

Cool but bright, clear weather and a cold breeze heralded the approach of autumn. Warm wraps and top coats were much in evidence.

Morgan and Scott County Farm Bureau baseball teams crossed bats in an interesting game played after the speaking program in the afternoon. Morgan county won easily.

The strong Hancock county horseshoe pitching team comprising Rollo Siegfried and W. I. Earls carried off the silver trophies awarded by the I. A. A. in the annual State Farm Bureau Horsehoe Pitching Tournament. Scott county's team was runner-up in the contest.

Ed. A. O'Neal of Alabama, speaker of the day, was introduced by President Earl C. Smith. Dr. Bowes of Jacksonville spoke briefly in behalf of organized labor. Executive Committeeman Charles Black presided. Guy Bender, 1927 champion hog caller, had charge of the contests following the speeches.

The Pawnee male quartet from Sangamon county was a special attraction.

Peoria, Aug. 18.—Milton Newman, president of the Glen Oak Park Board, stated here today that the I. A. A.-Farm Bureau picnic crowd was the largest he had ever seen in the park.

A beautiful sunshiny day greeted

the picnickers. Threshing was out of the way in most sections of Peoria and Tazewell counties, and as a result the turnout from these counties was large.

M. S. Winder, secretary of the A. F. B. F., was the speaker of the day. O. L. Hatch, president of the Stark County Farm Bureau, opened the afternoon program and presided. He first introduced Executive Committeeman A. R. Wright of Varna, then the other Farm Bureau presidents in the district, Congressman Hull of Peoria, and later the speaker. Tazewell defeated Henry county in the second game of their series in the State Farm Bureau Baseball League elimination contest. Marshall-Putnam won the horseshoe tournament.

Bloomington, Aug. 31.—Beautiful Miller Park, Bloomington's show place, was the scene here today of the I. A. A.-Farm Bureau picnic for members of the organization in the 17th Congressional district. A crowd estimated by Charlie Hill, park superintendent, at between 12,000 and 15,000 filled the spacious grounds by early afternoon.

Two hotly contested baseball games held in the morning drew an immense audience. Woodford county defeated McLean's fast team in the first game 3 to 2 while Logan administered its second beating to the McDonough County Farm Bureau nine in the second game. The first contest was unofficial, and the second was an official game in the semi-finals toward selecting the champions of the Illinois Farm Bureau Baseball League.

Logan Barber, who weighs 325 pounds and measures 58 inches around the belt, won the first prize for the man with the biggest bay window. Gus Gilard, a professional clown from Chicago, entertained young and old throughout the day. President Earl C. Smith of the I. A. A. introduced Ed. A. O'Neal of Alabama, speaker of the day. George Stoll of Chestnut presided. Sam Smith of Anchor and Ed Kruse of Colfax, McLean county's entry, won the horseshoe tournament. Hog calling, chicken calling, and other stunts were held following the speeches.

Olney, Aug. 30.—The largest crowd ever assembled at a Southern Illinois Farm Bureau picnic gathered here today for the 23rd district I. A. A.-Farm Bureau picnic. The gathering was estimated at between 8,000 and 10,000 people. It was held on the Richland County Fair Grounds. Threatening clouds cleared away late in the morning and before noon the grounds were packed with Farm Bureau members, their guests and friends from over the district.

Lawrence county defeated Jefferson county's Farm Bureau nine in the second game of the Southern Illinois Championship series. It was a one-sided contest with the fast Lawrence county boys getting the long end of a 20 to 1 score.

The Cover

MORE than 30 years ago, President Draper of the University of Illinois said that "the wealth of Illinois lies in her soil and her future in its development." This statement which adorns the entrance to the old agricultural building at Urbana is more than half true even today. Thirty or fifty years ago it was a more accurate statement.

Today it is apparent that the future of agriculture lies in the hands of the farm men and women of tomorrow. These are the farm boys and girls of today. The Four H clubs whose representatives are featured on the cover page are doing their bit toward giving farm boys and girls a vision of what is best in agriculture.

W. L. Cope, of Salem, I. A. A. executive committeeman from the 23rd district, presided and introduced the speakers. Congressman Henry T. Rainey of Carrollton discussed the national agricultural situation. Pres. Earl C. Smith spoke briefly before presenting the Congressman who has represented Mr. Smith's home district, the 20th, for more than 20 years.

Marion, Aug. 16.—A light rain which fell here early this morning coupled with the fact that the peach harvest was in full swing in several sections of the 24th and 25th districts, held the crowd down to approximately 3,000 to 5,000 people. The occasion was the joint I. A. A.-Farm Bureau picnic of the two districts.

The picnic site was the beautiful grounds of the Williamson County Fair at the edge of town.

The address of Congressman Charles Adkins of Decatur, speaker of the day, was presented in the September issue of the Bureau Farmer.

Wins at Fairbury

Fairbury, Sept. 3.—Gaylord Peterson, a 19-year-old Toluca lad, won the first prize in the annual horseshoe pitching tournament at the Fairbury Fair here today. The tournament, open to everyone, was sponsored by the Illinois State Horseshoe Pitchers' Association. Peterson won a medal and $50 in cash. The champion tossed 272 ringers in the seven games played. Joe Bennett of Congerville placed second. Walter Torbert, deceased, of Clinton, was the 1927 champion. Harry Torbert, Walter's brother, entered the contest this year but failed to place.

Sam G. Smith, Farm Bureau member from Anchor, won first place in Class B.

Illinois Woman Hangs Up New Horseshoe Record

Rochester, N. Y., Sept. 5.—Three world's records were broken in the opening elimination trials of the Women's National Horseshoe Pitching tournament here Monday, held in connection with the annual Rochester exposition and horse show. The world records were established by Mrs. C. A. Lanhan, Bloomington, Ill., former world champion, and Miss Doris Perkins, Springfield, Mass., high school girl, pitching in her first national tournament.

Both tossed 54 ringers each, establishing a new record for number of ringers pitched in a 50-point game. The women broke another record by putting four ringers on the pegs four consecutive times and Miss Perkins established the third record with 18 double ringers, the largest number ever made in a 50-point game. Mrs. Lanhan, Miss Perkins, Mrs. E. E. Cole, Ann Arbor, Mich., and Mrs. Edith Hough, Willard, Ohio, emerged victorious in the trials.

The four winning women will compete in further trials this week for the title of world champion now held by Mrs. Mayme Francisco, St. Petersburg, Fla., who is not defending her laurels.

$700,000 Saved Farmers By Freight Reduction

AT least $700,000 a year has been lopped off the freight bill Farm Bureau folks in Ohio, Indiana, Michigan and Illinois have been paying for the commercial fertilizer they need on their farms. Through the combined efforts of the Farm Bureaus in these states, and with the co-operation of the American Farm Bureau Federation, a four-year fight for reduction of the fertilizer freight rates was won when on July 11 the Interstate Commerce Commission ordered a reduction, effective at an early date.

The decrease varies in amount from 80 cents to $1.60 a ton according to distance from point of origin of the shipments, but the average reduction for the entire territory is $1 per ton. An estimate made during the course of the hearing placed the quantity used in this region as 700,000 tons.

This means a saving of $300,000 annually to Ohio farmers; $250,000 to Indiana farmers and about $100,000 to Michigan farmers. If you are one of the farmers to be benefited, get out the comptometer and figure up how much you will clear from this one deal over and above the cost of your membership in the Farm Bureau.

Frank Barton of Cornell, vice president of Illinois Agricultural Association, was the speaker at a Peoria county community meeting at the Dave Wykoff farm near Laura, Friday evening, August 31.

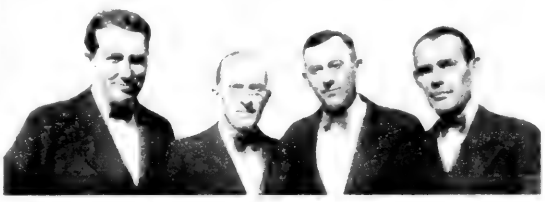
Anderson, in the horseshoe pitching tournament by score of 52 to 45, taking the double title to Adams County. Tazewell defeated Henry County 2 to 0 in the first semi-final game for the championship of the Illinois Farm Bureau Baseball League.

Calmness of mind is one of the beautiful jewels of wisdom. It is the result of long and patient effort in self-control. Its presence is an indication of ripened experience and of a more than ordinary knowledge of the laws and operations of thought.—James Allen.

Macomb, Aug. 21.—Logan county defeated McDonough here today, 10 to 2, in the first game of a 3-game series in the semi-finals of the Illinois Farm Bureau Baseball League. A crowd estimated at 5,000 people gathered in the natural amphitheatre on the Western Illinois State Teachers College campus to hear Cong. Charles Adkins of Decatur. M. G. Lambert of Ferris opened the program. Pres. Lloyd Welch, of the McDonough County Farm Bureau, presided. Earl C. Smith, I. A. A. president, spoke briefly before introducing Congressman Adkins.

Sandwich, Aug. 23.—Nearly 5,000 Farm Bureau members and their guests from the 12th congressional district attended the I. A. A.-Farm Bureau picnic here today. Heavy showers fell during the morning, but the weather cleared up before noon. The horseshoe tournament started immediately after the rain and though courts were sloppy and bleachers wet, enthusiasm was not dulled.

The sun pierced the clouds at noon, and by 1:30 p. m. the amphitheatre was more than filled. The overflow crowded about the loud-speakers to hear Congressman Gilbert N. Haugen, Republican of Iowa, speak on the agricultural situation. Congressman John T. Buckbee of Rockford, President Earl C. Smith of the I. A. A., and George F. Tullock, I. A. A. Executive Committeeman, made short talks prior to the introduction of Mr. Haugen. Henry White, president of the DeKalb County Farm Bureau, presided.



Watseka, Aug. 22.—Congressman Henry T. Rainey of Carrollton, Democrat from the 20th Illinois district, discussed the agricultural platform of the two major parties and the two presidential candidates here today before 2,000 Farm Bureau members from the 18th district who had gathered for the I. A. A.-Farm Bureau picnic.

Congressman Holaday, Republican of Danville, spoke briefly before introducing the speaker. R. F. Karr, of Iroquois, presided. Robt. A. Cowles, treasurer, represented the Illinois Agricultural Association.

WIN STATE HORSESHOE TITLE

Rollo Siegfried, left, and W. I. Earls of Hancock county are the new Illinois State Farm Bureau Horseshoe Champions for 1928. They won at Jacksonville on Sept. 3. "They throw the prettiest horseshoes I ever saw, and I'll back 'em against all comers," said "Hank" Lloyd, farm adviser from Hancock who came to the tournament with his champions. Each was presented with a large, handsome silver loving cup by the President of the I. A. A. Scott county was runner-up.

THE PAWNEE QUARTET

Left to right: D. C. Dragoo, H. B. Austin, W. L. Dragoo, E. V. Hoagland.

These men are past masters at singing Farm Bureau songs and entertaining their audiences. On Sept. 3 at Jacksonville, they were encored time after time during the afternoon. Their "Down On The Farm At Half Past Four" by Homer Hall was a popular choice.

Freeport, Sept. 1.—Whiteside county won the Farm Bureau baseball title of the 13th congressional district here today, defeating the newly organized Stephenson county nine 5 to 3, before more than 1,000 spectators who had gathered for the I. A. A.-Farm Bureau picnic. Stephenson county retaliated later by winning the horseshoe pitching tournament.

Cool sunshiny weather prevailed throughout the day. By early afternoon a crowd estimated at between 4,000 and 5,000 assembled to hear Ed. A. O'Neal of Alabama, vice-president of the American Farm Bureau Federation, discuss agriculture's bill of rights, the name he gave to surplus control legislation passed by the 70th Congress. President Earl C. Smith, who preceded O'Neal, discussed briefly the I. A. A.'s non-partisan policy in political matters. C. E. Bamborough of Polo presided.

Hog calling and chicken calling contests featured the late afternoon program.

Jacksonville, Sept. 3.—The State Hospital Grounds in the east part of town was the scene of a great gathering of Farm Bureau members and their guests, and laboring and business men here today. The picnic was sponsored by the I. A. A. and the Farm Bureau of the 20th Congressional district. A crowd variously estimated at 7,000 to 10,000 turned out for the day.

Cool but bright, clear weather and a cold breeze heralded the approach of autumn. Warm wraps and top coats were much in evidence.

Morgan and Scott County Farm Bureau baseball teams crossed bats in an interesting game played after the speaking program in the afternoon. Morgan county won easily.

The strong Hancock county horseshoe pitching team comprising Rollo Siegfried and W. I. Earls carried off the silver trophies awarded by the I. A. A. in the annual State Farm Bureau Horsehoe Pitching Tournament. Scott county's team was runner-up in the contest.

Ed. A. O'Neal of Alabama, speaker of the day, was introduced by President Earl C. Smith. Dr. Bowes of Jacksonville spoke briefly in behalf of organized labor. Executive Committeeman Charles Black presided. Guy Bender, 1927 champion hog caller, had charge of the contests following the speeches.

The Pawnee male quartet from Sangamon county was a special attraction.

Peoria, Aug. 18.—Milton Newman, president of the Glen Oak Park Board, stated here today that the I. A. A.-Farm Bureau picnic crowd was the largest he had ever seen in the park.

A beautiful sunshiny day greeted

the picnickers. Threshing was out of the way in most sections of Peoria and Tazewell counties, and as a result the turnout from these counties was large.

M. S. Winder, secretary of the A. F. B. F., was the speaker of the day. O. L. Hatch, president of the Stark County Farm Bureau, opened the afternoon program and presided. He first introduced Executive Committeeman A. R. Wright of Varna, then the other Farm Bureau presidents in the district, Congressman Hull of Peoria, and later the speaker. Tazewell defeated Henry county in the second game of their series in the State Farm Bureau Baseball League elimination contest. Marshall-Putnam won the horseshoe tournament.

Bloomington, Aug. 31.—Beautiful Miller Park, Bloomington's show place, was the scene here today of the I. A. A.-Farm Bureau picnic for members of the organization in the 17th Congressional district. A crowd estimated by Charlie Hill, park superintendent, at between 12,000 and 15,000 filled the spacious grounds by early afternoon.

Two hotly contested baseball games held in the morning drew an immense audience. Woodford county defeated McLean's fast team in the first game 3 to 2 while Logan administered its second beating to the McDonough County Farm Bureau nine in the second game. The first contest was unofficial, and the second was an official game in the semi-finals toward selecting the champions of the Illinois Farm Bureau Baseball League.

Logan Barber, who weighs 325 pounds and measures 58 inches around the belt, won the first prize for the man with the biggest bay window. Gus Gilard, a professional clown from Chicago, entertained young and old throughout the day. President Earl C. Smith of the I. A. A. introduced Ed. A. O'Neal of Alabama, speaker of the day. George Stoll of Chestnut presided. Sam Smith of Anchor and Ed Kruse of Colfax, McLean county's entry, won the horseshoe tournament. Hog calling, chicken calling, and other stunts were held following the speeches.

Olney, Aug. 30.—The largest crowd ever assembled at a Southern Illinois Farm Bureau picnic gathered here today for the 23rd district I. A. A.-Farm Bureau picnic. The gathering was estimated at between 8,000 and 10,000 people. It was held on the Richland County Fair Grounds. Threatening clouds cleared away late in the morning and before noon the grounds were packed with Farm Bureau members, their guests and friends from over the district.

Lawrence county defeated Jefferson county's Farm Bureau nine in the second game of the Southern Illinois Championship series. It was a one-sided contest with the fast Lawrence county boys getting the long end of a 20 to 1 score.

The Cover

MORE than 30 years ago, President Draper of the University of Illinois said that "the wealth of Illinois lies in her soil and her future in its development." This statement which adorns the entrance to the old agricultural building at Urbana is more than half true even today. Thirty or fifty years ago it was a more accurate statement.

Today it is apparent that the future of agriculture lies in the hands of the farm men and women of tomorrow. These are the farm boys and girls of today. The Four H clubs whose representatives are featured on the cover page are doing their bit toward giving farm boys and girls a vision of what is best in agriculture.

W. L. Cope, of Salem, I. A. A. executive committeeman from the 23rd district, presided and introduced the speakers. Congressman Henry T. Rainey of Carrollton discussed the national agricultural situation. Pres. Earl C. Smith spoke briefly before presenting the Congressman who has represented Mr. Smith's home district, the 20th, for more than 20 years.

Marion, Aug. 16.—A light rain which fell here early this morning coupled with the fact that the peach harvest was in full swing in several sections of the 24th and 25th districts, held the crowd down to approximately 3,000 to 5,000 people. The occasion was the joint I. A. A.-Farm Bureau picnic of the two districts.

The picnic site was the beautiful grounds of the Williamson County Fair at the edge of town.

The address of Congressman Charles Adkins of Decatur, speaker of the day, was presented in the September issue of the Bureau Farmer.

Wins at Fairbury

Fairbury, Sept. 3.—Gaylord Peterson, a 19-year-old Toluca lad, won the first prize in the annual horseshoe pitching tournament at the Fairbury Fair here today. The tournament, open to everyone, was sponsored by the Illinois State Horseshoe Pitchers' Association. Peterson won a medal and $50 in cash. The champion tossed 272 ringers in the seven games played. Joe Bennett of Congerville placed second. Walter Torbert, deceased, of Clinton, was the 1927 champion. Harry Torbert, Walter's brother, entered the contest this year but failed to place.

Sam G. Smith, Farm Bureau member from Anchor, won first place in Class B.

Illinois Woman Hangs Up New Horseshoe Record

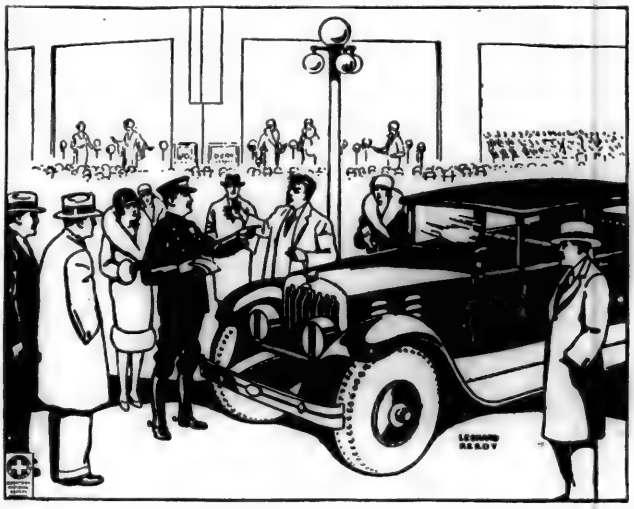
Rochester, N. Y., Sept. 5.—Three world's records were broken in the opening elimination trials of the Women's National Horseshoe Pitching tournament here Monday, held in connection with the annual Rochester exposition and horse show. The world records were established by Mrs. C. A. Lanhan, Bloomington, Ill., former world champion, and Miss Doris Perkins, Springfield, Mass., high school girl, pitching in her first national tournament.

Both tossed 54 ringers each, establishing a new record for number of ringers pitched in a 50-point game. The women broke another record by putting four ringers on the pegs four consecutive times and Miss Perkins established the third record with 18 double ringers, the largest number ever made in a 50-point game. Mrs. Lanhan, Miss Perkins, Mrs. E. E. Cole, Ann Arbor, Mich., and Mrs. Edith Hough, Willard, Ohio, emerged victorious in the trials.

The four winning women will compete in further trials this week for the title of world champion now held by Mrs. Mayme Francisco, St. Petersburg, Fla., who is not defending her laurels.

$700,000 Saved Farmers By Freight Reduction

AT least $700,000 a year has been lopped off the freight bill Farm Bureau folks in Ohio, Indiana, Michigan and Illinois have been paying for the commercial fertilizer they need on their farms. Through the combined efforts of the Farm Bureaus in these states, and with the co-operation of the American Farm Bureau Federation, a four-year fight for reduction of the fertilizer freight rates was won when on July 11 the Interstate Commerce Commission ordered a reduction, effective at an early date.



The decrease varies in amount from 80 cents to $1.60 a ton according to distance from point of origin of the shipments, but the average reduction for the entire territory is $1 per ton. An estimate made during the course of the hearing placed the quantity used in this region as 700,000 tons.

This means a saving of $300,000 annually to Ohio farmers; $250,000 to Indiana farmers and about $100,000 to Michigan farmers. If you are one of the farmers to be benefited, get out the comptometer and figure up how much you will clear from this one deal over and above the cost of your membership in the Farm Bureau.

Frank Barton of Cornell, vice president of Illinois Agricultural Association, was the speaker at a Peoria county community meeting at the Dave Wykoff farm near Laura, Friday evening, August 31.

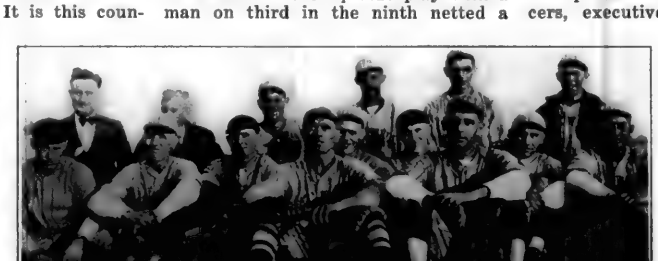
Illinois Agricultural Association RECORD

Volume 6 OCTOBER, 1928 Number 10



Tazewell County Wins State Farm Baseball Title at Bloomington

Defeats Lawrence Nine From Southern Illinois in Hard Fought Games

TAZEWELL County has the state championship Farm Bureau baseball team for 1928. It is this county's second victory in five years. Tazewell came out on top in the race for the coveted title in 1925, but in the two years following Marshall-Putnam was the victor. In the five years' history of the Illinois Farm Bureau Baseball League, Marshall-Putnam county has won the state title three times and Tazewell twice.

The final game of the season was played at Bloomington, Saturday September 29. It was a hard-fought battle from beginning to end. Tazewell came to bat first. Wagonseller, star hurler for the Lawrence county team, opened the game but after three pitched balls it was apparent that his arm, which had been strained in the previous Lawrence-Tazewell game, was not in condition. He retired and was replaced by Conrad. The Tazewell batsmen, all of whom are dangerous against most pitchers, started the bombardment early and by bunching two hits, aided by an error at second, drove in two runs before three men were out.

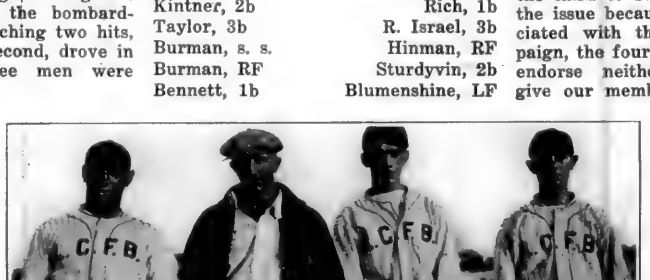
1928 STATE CHAMPIONS FROM TAZEWELL COUNTY

Front row, left to right:—Jack Carius, captain, and William Ackerman, pitcher. Center row—George Israel, Milton Rich, Ralph Israel, Earl Hinman, Delmar Sturdyvin, Lester Blumenshine, and Paul Graff.

Back row—Wayne A. Gilbert, manager and asst. adviser, George Storey, George Schmidt, Jesse Myers, William Ellenson, and Lester Keil.

Lawrence Plays Well

Lawrence county was especially effective in catching runners stealing to second. Two Tazewell men were caught off second during the first three innings. Lawrence county came back in the second with one run, but Tazewell increased its lead in the fourth and fifth innings with two more runs. In the sixth Lawrence came back with two runs making the score 4 to 3.



Several bystanders commented on the fact that Lawrence county did not take advantage of its opportunities. The southern Illinois champions seemed unable to hit the ball with men on bases when any kind of a hit would mean runs. Taylor, Lawrence county third baseman, was unfortunate in handling grounders on several occasions. He let one go through in the fourth, another grounder was fumbled, and in the fifth a bad peg to first base meant more runs for Tazewell. Nevertheless, the Lawrence county boys who hit the ball freely drove in one run to tie the score in the last of the eighth. Here the Tazewell fans took a hand and cheered their boys on to victory as they came to bat in the ninth. A beautiful demonstration of the squeeze play with a man on third in the ninth netted a run and paved the way for a victory. The inning placed Tazewell two runs ahead. Lawrence county failed to even the score in the last of the ninth and the game was over.

Following was the lineup in the championship game:

Lawrence	Tazewell
Miller, CF	G. Israel, s. s.
Kintner, 2b	Rich, 1b
Taylor, 3b	R. Israel, 3b
Burman, s. s.	Hinman, RF
Burman, RF	Sturdyvin, 2b
Bennett, 1b	Blumenshine, LF
Conrad, C	Ellenson, CF
Conrad, LF	Carius, C
Wagonseller, P	Ackerman, P
Conrad, P	Graff, CF

Innings	1	2	3	4	5	6	7	8	9
Tazewell	2	0	0	1	1	0	0	0	2
Lawrence	0	1	0	0	0	2	0	1	0

Tazewell had defeated Lawrence county in a previous game at Morton, score 9 to 6, and thus took the series in two games.

FOUR LAWRENCE COUNTY PLAYERS

Left to Right:—Conrad, pitcher; Wagonseller, pitcher; Bennett, 1b; and Kintner, 2b. These men and their teammates, Southern Illinois Champions, fought hard for victory.

Farm Bureau Policies And Activities of I. A. A. Discussed at Decatur

More than 200 Presidents, Advisers, and I. A. A. Leaders and Staff Members Meet

MORE than 200 Farm Bureau presidents, farm advisers, officers, executive committee, and staff members of the Illinois Agricultural Association gathered for a two-day conference at Decatur on September 27-28.

The first day was devoted to the activities and service offered Farm Bureau members by the I. A. A. The discussion was led by the department directors. Following a banquet on Thursday night, a detailed review and explanation of the Association's activities during the past three years toward securing adequate surplus farm crop control legislation were presented by President Earl C. Smith.

"After the party conventions we had our choice," said Mr. Smith, "of following one of four courses. One was to endorse the Republican candidate. The second was to endorse the Democratic candidate, the third to back entirely away from the issue because it had become associated with the 1928 political campaign, the fourth to stand our ground, endorse neither candidate, but to give our members complete information regarding the statements and expressions of the two nominees with such official comment as seemed justified by our policy. We chose the latter course."

On motion of Lloyd Welch, president of the McDonough County Farm Bureau, the Farm Bureau presidents gave a unanimous vote of confidence to the Association and its leadership endorsing the policy in political matters being pursued.

The life insurance program was outlined by Donald Kirkpatrick and V. Vaniman and considered in detail on Friday morning.

The proposed $20,000,000 bond issue was presented in detail by John C. Watson. The I. A. A.'s stand on the measure was reiterated as presented by the Public Relations Committee in the September issue of the RECORD.

Don't fail to vote on Nov. 6.

The Illinois Agricultural Association RECORD

An Editorial

OUR POLICY

THE primary interest and purpose of the Illinois Agricultural Association is to serve the true and permanent interests of the farmers of Illinois. The policy of the Association in all political matters has always been and will continue to be strictly non-partisan.

We recognize that agricultural issues are economic rather than political. This was conclusively shown by the majority vote of both parties in each house of the 69th and 70th Congresses, by which the McNary-Haugen Bill was passed. It has also been repeatedly revealed by the non-partisan vote supporting and passing such constructive agricultural legislation in our state.

National, state and district issues should be carefully considered on their relative merits and in no way should they become confused.

We seek to furnish full, fair and impartial information on agricultural issues to our members and friends, also the records and commitments on these issues of political parties, men in office and those seeking positions of trust and responsibility. With this information in hand, farmers and all true friends of agriculture are in a position to support candidates for office who will best serve the economic interests of agriculture. We urge our members at all times to support those candidates, regardless of party, who by their records or definite commitments have proven their worthiness of this support.

FOR several years the Illinois Agricultural Association has put forth every effort to develop and secure from our national government recognition of a sound permanent policy for American agriculture.

During recent months the I. A. A. RECORD has carried impartial information as to the attitude and commitments of major political parties and their candidates on this great question. Because of the nature of their development, some issues of the RECORD have been confined largely by commitments by one or the other of these parties.

Recognizing that possibly some of our members or friends might not have followed carefully all issues of the RECORD, the Executive Committee directed that this issue again carry full and impartial information as it has developed up to the time of going to press.

Here you will find the agricultural planks in the Republican and Democratic party platforms adopted at Kansas City and Houston, the references to agriculture in the acceptance speeches of Herbert C. Hoover and Alfred E. Smith, the Republican candidate's amplification of his original statement, made at West Branch, Iowa, and Elizabethton, Tenn., and the Democratic candidate's further expressions delivered at Omaha, Neb., and Chicago, Ill.

We also again publish the official statement adopted by the Association's Executive Committee on legislative policy.

If agriculture is to receive its share of protection commensurate with that accorded other groups in our economic life, farmers must hold their economic interests in the forefront. They must consider the welfare of their industry first. The only means we have of doing this insofar as government is concerned is through our votes. As an industry we are contributing little or nothing to campaign expenses of the political parties. It is only natural for those in office to be friendly and partial to those individuals and interests which pay the campaign bills.

The Illinois Agricultural Association is non-partisan. We do not attempt to tell our members how to vote. Agriculture has its friends in all political parties. It is our purpose to assist farmers in recognizing their friends and to urge their support of same. While in nowise a political organization, yet we are forced to recognize the close relationship between politics and the distribution of our national income. A large percentage of bills enacted into law, either directly or indirectly, affect the economic interests of agriculture. The deep interest of other organized groups in legislation is proof that there is widespread recognition of this fact. One of the major purposes for which the I. A. A. was organized is to seek and secure for agriculture a square deal in legislation.

When President Coolidge vetoed the Farm Surplus Control Bill, passed by a bipartisan vote in the 70th Congress, the agricultural question, purely an economic one, immediately was picked up by the parties and made a political issue. Farm organizations up to this time had kept it out of politics.

Thus we were faced with a new problem. Should we abandon our efforts in behalf of an adequate farm measure, or seek to get an endorsement of the farm program by the political parties at their conventions? Organized agriculture followed the usual and regular way, namely to present its cause before the Resolutions Committees at both the Republican and Democratic Conventions. Our purpose was and has been to get both parties and candidates committed to a definite program for an adequate solution to the farm problem in line with our well-known position in favor of protective tariffs, price stabilization, the right of farmers through their organizations to participate in devising the plan to be applied for the improvement and welfare of their industry, and specific legislation for making the tariff effective

on crops of which we produce a normal surplus.

The Republican Convention at Kansas City rejected the resolution known as the minority farm plank, presented and advocated by organized agriculture. The Democratic Convention at Houston a short time later adopted a farm plank which frankly recognized the cardinal principle sought by farmers, namely that of spreading the cost of handling burdensome crop surpluses over each unit of the commodity benefited. However, it did not commit the party definitely to the manner in which this principle was to be made effective.

Commitments of Presidential candidates mean more than party platforms. We have learned this by experience. We, therefore, have followed with interest and concern the expressions of the nominees on agriculture. You will find them elsewhere in this publication. As these statements which appeared in the acceptance and campaign speeches of the candidates came to our attention, we compared them with our program for a solution of the farm problem, the program which was twice passed by a bi-partisan vote in the 69th and 70th sessions of Congress.

We have given full credit for the commendable expressions and commitments in the acceptance speeches of both Secretary Hoover and Governor Smith. We also pointed out what each candidate had failed to say by way of specific pledges in recognition of the agricultural problem. We sought to make our comments square with the policy and program organized agriculture has heretofore supported. In doing this, we followed our adopted policy of rejecting inadequate substitutes and standing for what we believe is best.

The disposition of Illinois farmers to break away from party lines and vote for those candidates whose records and agricultural commitments are most satisfactory denotes constructive and sound thought. Our greatest hope toward electing fair and friendly public officials and law-making bodies lies in this direction. The records of candidates for Congress and the State legislature who served in the 70th Congress and in the last General Assembly were published in the March issue, which we asked you to save for future reference. We have purposely gathered all this material in one issue, and we again repeat our policy so as to remove any misapprehension or misunderstanding in the minds of our members.

Ponder carefully the expressions, commitments and records of all candidates for public office. Again we repeat, we endorse no candidate. We merely present their records and ask you to go to the polls and vote for the candidate, who in your judgment, will best serve agriculture.

In 1920 only about half of the qualified men and women voted. Help beat that record at the polls on Nov. 6.

THE REPUBLICAN FARM PLANK

AGRICULTURE

(Adopted at Kansas City, June 14, 1928)

THE agricultural problem is national in scope and, as such, is recognized by the Republican party, which pledges its strength and energy to the solution of the same. Realizing that many farmers are facing problems more difficult than those which are the portion of many other basic industries, the party is anxious to aid in every way possible.

Many of our farmers are still going through readjustments, a relic of the years directly following the great war. All the farmers are being called on to meet new and perplexing conditions created by foreign competition, the complexities of domestic marketing, labor problems, and a steady increase in local and state taxes.

The general depression in a great basic industry inevitably reacts upon the conditions in the country as a whole and cannot be ignored. It is a matter of satisfaction that the desire to help in the correction of agricultural wrongs and conditions is not confined to any one section of our country or any particular group.

Achievements Cited

The Republican party and the Republican administration, particularly during the last five years, have settled many of the most distressing problems as they have arisen, and the achievements in aid of agriculture are properly a part of this record. The Republican congresses have been most responsive in the matter of agricultural appropriations, not only to meet crop emergencies, but for the extension and development of the activities of the department of agriculture.

The protection of the American farmer against foreign farm competition and foreign trade practices has been vigorously carried on by the department of state. The right of the farmers to engage in collective buying and cooperative selling as provided for by the Capper-Volstead act of 1922 has been promulgated through the department of agriculture and the department of justice, which have given most valuable aid and assistance to the heads of the farm organizations.

The treasury department and the proper committees of congress have lightened the tax burden on farming communities, and through the federal farm loan system there has been made available to the farmers of the nation $1,850,000,000 for lending purposes at a low rate of interest, and through the intermediate credit banks $665,000,000 of short term credits have been made available to the farmers.

Rural Free Delivery

The post office department has systematically and generously extended the rural free delivery routes into even the most sparsely settled communities.

When a shortage of transportation facilities threatened to deprive the farmers of their opportunity to reach waiting markets overseas, the president, appreciative and sensitive of the condition and the possible loss to the communities, ordered the reconditioning of shipping board vessels, thus relieving a great emergency.

Last, but not least, the federal tariff commission has at all times shown a willingness under the provisions of the flexible tariff act to aid the farmers when foreign competition, made possible by low wage scales abroad, threatened to deprive our farmers of their domestic markets. Under this act the president has increased duties on wheat, flour, mill feed and dairy products. Numerous other farm products are now being investigated by the tariff commission.

We promise every assistance in the reorganization of the marketing system on sounder and more economical lines and, where diversification is needed, government financial assistance during the period of transition.

The Republican party pledges itself to the enactment of legislation creating a federal farm board clothed with the necessary powers to promote the establishment of a farm marketing system of farmer-owned and controlled stabilization, corporations or associations to prevent and control surpluses through orderly distribution.

We favor adequate tariff protection to such of our agricultural products as are affected by foreign competition.

We favor, without putting the government into business, the establishment of a federal system of organization for co-operative and orderly marketing of farm products.

The vigorous efforts of this administration toward broadening our exports market will be continued.

The Republican party pledges itself to the development and enactment of measures which will place the agricultural interests of America on a basis of economic equality with other industry to insure its prosperity and success.

THE DEMOCRATIC FARM PLANK

AGRICULTURE

(Adopted at Houston, June 28, 1928)

DECEPTION upon the farmer and stock raiser has been practiced by the Republican party through false and delusive promises for more than 50 years. Specially favored industries have been artificially aided by Republican legislation. Comparatively little has been done for agriculture and stock raising upon which national prosperity rests. Unsympathetic in action with regard to this problem must cease. Virulent hostility of the Republican administration to the advocates of farm relief, and denial of the right of farm organizations to lead in the development of farm policy, must yield to Democratic sympathy and friendliness.

Four years ago, the Republican party, forced to acknowledge the critical situation, pledged itself to take all steps necessary to bring back a balanced condition between agriculture and other industries and labor. Today it faces the country not only with that pledge unredeemed, but broken by the acts of a Republican President who is primarily responsible for the failure to offer a constructive program to restore equality to agriculture.

Coolidge Vetoes Cited

While he had no constructive and adequate program to offer in its stead, he has twice vetoed farm relief legislation and has sought to justify his disapproval of agricultural legislation partly on grounds wholly inconsistent with his acts making industrial monopolies the beneficiaries of government favor; and in endorsing the agricultural policy of the present administration the Republican party in its recent convention served notice upon the farmer that the so-called protective system is not meant for him; that while it offers protection to the privileged few, it promises continued world prices to the producers of the chief cash crops of agriculture.

We condemn the policy of the Republican party, which promises relief to agriculture only through a reduction of American farm production to the needs of the domestic market. Such a program means the continued deflation of agriculture, the forcing of additional millions from the farms and the perpetuation of agricultural distress for years to come, with continued bad effects on business and labor throughout the United States.

The Democratic party recognizes that the problems of production differ as between agriculture and industry. Industrial production is largely under human control, while agricultural production, because of lack of coordination, among the 6,500,000 individual farm units, and because of the influence of weather, pests, and other causes, is largely beyond human control. The result is that a large crop frequently is produced on a small acreage and a small crop on a large acreage; and measured in money value it frequently happens that a large crop brings less than a small crop.

Producers of crops whose total volume exceeds the needs of the domestic market must continue at a disadvantage until the government shall intervene as seriously and as effectively in behalf of the farmers as it has intervened in behalf of labor and industry. There is a need of supplemental legislation for the control and orderly handling of agricultural surpluses, in order that the price of the surplus may not determine the price of the whole crop. Labor has benefited by collective bargaining and some industries by tariff. Agriculture must be as effectively aided.

Pledges Adequate Laws

The Democratic party, in its 1924 platform, pledged its support to such legislation. It now reaffirms that stand and pledges the united efforts of the legislative and executive branches of government, as far as may be controlled by the party, to the immediate enactment of such legislation, and to such other steps as are necessary to place and maintain the purchasing power of farm products and the complete economic equality of agriculture.

The Democratic party has always stood against special privilege and for common equality under the law. It is a fundamental principle of the party that such tariffs as are levied must not discriminate against any industry, class or section. Therefor, we pledge that in its tariff policy the Democratic party will insist upon equality of treatment between agriculture and other industries.

Farm relief must rest on the basis of an economic equality of agriculture with other industries. To give this equality a remedy must be found which will include among other things:

(A) Credit aid by loans to co-operatives on at least as favorable a basis as the government aid to the merchant marine.

(B) Creation of a federal farm board to assist the farmer and stock raiser in the marketing of their products as the federal reserve board has done for the banker and business man.

When our archaic banking and currency system was revised after its record of disaster and panic under Republican administrations, it was a Democratic congress in the administration of a Democratic president that accomplished its stabilization through the federal reserve act creating the federal reserve board, with powers adequate to its purpose. Now in the hour of agriculture's need the Democratic party pledges the establishment of a new agricultural policy fitted to present conditions, under the direction of a farm board vested with all the powers necessary to accomplish for agriculture what the federal reserve board has been able to accomplish for finance. In full recognition of the fact that the banks of the country, through voluntary co-operation, were never able to stabilize the financial system of the country until government powers were invoked to help them.

(C) Reduction through proper government agencies of the spread between what the farmer and stock raiser gets and what the ultimate consumer pays with consequent benefits to both.

(D) Consideration of the condition of agriculture in the formulation of government financial and tax measures.

We pledge the party to foster and develop co-operative marketing associations through appropriate government aid.

We recognize that experience has demonstrated that members of such associations alone cannot successfully assume the full responsibility for a program that benefits all producers alike. We pledge the party to an earnest endeavor to solve this problem of the distribution of the cost of dealing with crop surpluses over the marketed units of the crop whose producers are benefited by such assistance. The solution of this problem would avoid government subsidy to which the Democratic party has always been opposed. The solution of this problem will be a prime and immediate concern of a Democratic administration. We direct attention to the fact that it was a Democratic congress, in the administration of a Democratic president, which established the federal loan system and laid the foundation for the entire rural credits structure, which has aided agriculture to sustain in part the shock of the policies of two Republican administrations, and we promise thoroughgoing administration of our rural credits laws, so that the farmers in all sections may secure the maximum benefits intended under these acts.

Secretary Hoover's Acceptance Speech

(Following is the text of the Republican presidential candidate's statement on agriculture delivered in his speech of acceptance at Palo Alto, Cal., on Aug. 11.)

"THE most urgent economic problem in our nation today is in agriculture. It must be solved if we are to bring prosperity and contentment to one-third of our people directly and to all of our people indirectly. We have pledged ourselves to find a solution.

"In my mind most agricultural discussions go wrong because of two false premises. The first is that agriculture is one industry. It is a dozen distinct industries incapable of the same organization. The second false premise is that rehabilitation will be complete when it has reached a point comparable with that before the war. Agriculture was not upon a satisfactory basis before the war. The abandoned farms of the northeast bear their own testimony. Generally there was but little profit in midwest agriculture for many years except that derived from the slow increases in farm land values. Even of more importance is the great advance in standards of living of all occupations since the war. Some branches of agriculture have greatly recovered, but taken as a whole it is not keeping pace with the onward march in other industries.

Many Factors Involved

"There are many causes for failure of agriculture to win its full share of national prosperity. The after war deflation of prices not only brought great direct losses to the farmer, but he was often left indebted in inflated dollars to be paid in deflated dollars. Prices are often demoralized through gluts in our markets during the harvest season. Local taxes have been increased to provide the improved roads and schools. The tariff on some products is proving inadequate to protect him from imports from abroad. The increases in transportation rates since the war have greatly affected the price which he receives for his products. Over six million farmers in times of surplus engage in destructive competition with one another in the sale of their product, often depressing prices below those levels that could be maintained.

"The whole tendency of our civilization during the last fifty years has been toward an increase in the size of the units of production in order to secure lower costs and a more orderly adjustment of the flow of commodities to the demand. But the organization of agriculture into larger units must not be by enlarged farms. The farmer has shown he can increase the skill of his industry without large operations. He is today producing 20 per cent more than eight years ago with about the same acreage and personnel. Farming is and must continue to be an individualistic business of small units and independent ownership. The farm is more than a business; it is a state of living. We do not wish it converted into a mass production machine. Therefore, if the farmer's position is to be improved by larger operations it must be done not on the farm but in the field of distribution. Agriculture has partially advanced in this direction through cooperatives and pools. But the traditional cooperative is often not a complete solution.

Common Ground Needed

"Differences of opinion as to both causes and remedy have retarded the completion of a constructive program of relief. It is our plain duty to search out the common ground on which we may mobilize the sound forces of agricultural reconstruction. Our platform lays a solid basis upon which we can build. It offers an affirmative program.

"An adequate tariff is the foundation of farm relief. Our consumers increase faster than our producers. The domestic market must be protected. Foreign products raised under lower standards of living are today competing in our home markets. I would use my office and influence to give the farmer the full benefit of our historic tariff policy.

"A large portion of the spread between what the farmer receives for his products and what the ultimate consumer pays is due to increased transportation charges. Increase in railway rates has been one of the penalties of the war. These increases have been added to the cost to the farmer of reaching seaboard and foreign markets and result therefore in reduction of his prices. The farmers of foreign countries have thus been indirectly aided in their competition with the American farmer. Nature has endowed us with a great system of inland waterways. Their modernization will comprise a most substantial contribution to midwest farm relief and to the development of twenty of our interior states. This modernization includes not only the great Mississippi system, with its joining of the great lakes and of the heart of midwest agriculture to the gulf, but also a shipway from the great lakes to the Atlantic. These improvements would mean so large an increment in farmers' prices as to warrant their construction many times over. There is no more vital method of farm relief.

Pledges Marketing Aid

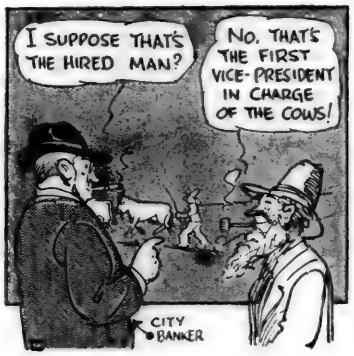
"But we must not stop here.

"An outstanding proposal of the party program is the whole-hearted pledge to undertake the reorganization of the marketing system upon sounder and more economical lines. We have already contributed greatly to this purpose by the acts supporting farm cooperatives, the establishment of intermediate credit banks, the regulation of stockyards, public exchanges, and the expansion of the department of agriculture. The platform proposes to go much farther. It pledges the creation of a federal farm board of representative farmers to be clothed with authority and resources with which not only to still further aid farmers' cooperatives and pools and to assist generally in solution of farm problems, but especially to build up with federal finance farmer-owned and farmer-controlled stabilization corporations which will protect the farmer from the depressions and demoralization of seasonal gluts and periodical surpluses.

"Objection has been made that this program, as laid down by the party platform, may require that several hundred millions of dollars of capital be advanced by the federal government without obligation upon the individual farmer. With that objection I have little patience. A nation which is spending ninety billions a year can well afford an expenditure of a few hundred millions for a workable program that will give to one-third of its population their fair share of the nation's prosperity. Nor does this proposal put the government into business except so far as it is called upon to furnish initial capital with which to build up the farmer to the control of his own destinies.

An Enduring Program

"This program adapts itself to the variable problems of agriculture not only today but those which will arise in the future. I do not believe that any single human being or any group of human beings can determine in advance all questions that will arise in so vast and complicated an industry over a term of years. The first step is to create an effective agency directly for these purposes and to give it authority and resources. These are solemn pledges and they will be fulfilled by the Republican party. It is a definite plan of relief. It needs only the



detailed elaboration of legislation and appropriations to put it into force.

"During my term as secretary of commerce I have steadily endeavored to build up a system of cooperation between the government and business. Under these cooperative actions all elements interested in the problem of a particular industry, such as manufacturer, distributor, worker, and consumer, have been called into council together, not for a single occasion, but for continuous work. These efforts have been successful beyond any expectation. They have been accomplished without interference or regulation by the government. They have secured progress in the industries, remedy for abuses, elimination of waste, reduction of cost in production and distribution, lower prices to the consumer, and more stable employment and profit. While the problem varies with every different commodity and with every different part of our great country, I should wish to apply the same method to agriculture so that the leaders of every phase of each group can advise and organize on policies and constructive measures. I am convinced that this form of action, as it has done in other industries, can greatly benefit farmer, distributor, and consumer.

"The working out of agricultural relief constitutes the most important obligation of the next administration. I stand pledged to these proposals. The object of our policies is to establish for our farmers an income equal to those of other occupations; for the farmer's wife the same comforts in her home as women in other groups; for the farm boys and girls the same opportunities in life as other boys and girls. So far as my own abilities may be of service, I dedicate them to help secure prosperity and contentment in that industry where I and my forefathers were born and nearly all my family still obtain their livelihood."

SECRETARY HOOVER AT WEST BRANCH, IA., AUG. 21, 1928

"JUST as there is transformation in agriculture so there is in other industries. Just as there is more specialization on the farm, so there is in other industries. We live today by the exchange of goods among ten thousand sorts of producers of specialties. A large number of occupations which were conducted on the farm in old days are now conducted in the factory. That is one reason why we have a decreasing proportion of our people on the farms. By this revolution the American farmer has become enmeshed in

powerful and yet delicate economic forces which are working to his disadvantage.

"In my acceptance speech 10 days ago I made an extended statement upon the legislative proposals for relief to the agricultural industry which the Republican Party has put forward in its platform. You would not wish me to take your time to review that statement. I should, however, like to emphasize that the spirit of those legislative proposals is to work out a more economical and stable marketing system. A federal farm board is to be set up with the necessary powers and resources to assist the industry to meet not alone the varied problems of today but those which may arise in the future. My fundamental concept of agriculture is one controlled by its own members, organized to fight its own economic battles and to determine its own destinies. Nor do I speak of organization in the narrow sense of traditional farm cooperatives or pools, but in the much wider sense of a sound marketing organization. It is not by these proposals intended to put the government into the control of the business of agriculture, nor to subsidize prices of farm products and pay the losses thereon either by the federal treasury or by a tax or fee on the farmer. We propose with governmental assistance and an initial advance of capital to enable the agricultural industry to reach a stature of modern business operations by which the farmer will attain his independence and maintain his individuality.

"And upon this whole question I should like to repeat from my acceptance that:

Quotes Acceptance

"'The working out of agricultural relief constitutes the most important obligation of the next administration. The object of our policies is to establish for our farmers an income equal to those of other occupations; for the farmer's wife the same comforts in her home as women in other groups; for the farm boys and girls the same opportunities in life as other boys and girls. So far as my own abilities may be of service, I dedicate them to help secure prosperity and contentment in that industry where I and my forefathers were born and nearly all my family still obtain their livelihood.'

"In formulating recommendations for legislation to carry out the proposals of the party, I trust that we may have full assistance of the leaders of agricultural thought. I am not insensible of the value of the study which sincere farm leaders have given to this question of farm legislation. They have all contributed to the realization that the problem must be solved. They will be invited into conference. Outstanding farmers such as Governor Lowden will be asked to join in the search for common ground upon which we can act.

Interior Waterways

"I had thought today to particularly point out the importance of the development of our interior waterways as bearing on the prosperity not only of agriculture but of the whole of our midwest business and commerce. It is a most important supplement to agricultural relief. The necessarily large advances in railway rates from the war militate against the economic setting of this whole interior section. This, together with the completion of the Panama Canal and the fact that ocean rates have increased but little since before the war, further disturbs the whole economic relationships of the midwest. It is as if a row of toll gates had been placed around this whole section of our country. It seriously affects the farmer. I think we can accept it as an economic fact that the farmer on most occasions pays the freight on his products. It is a deduction from the ultimate price. You yourselves can test this. In a general way, the center point of markets is overseas or the Atlantic seaboard, where prices are determined by the meeting of the streams of world products. For every hundred miles you are removed from these market centers, the price of farm products is lower by the amount of freight rates. Some calculations which I made a few years ago showed that the increase in railway rates had in effect moved the midwest 200 to 400 miles further from seaboard. Moreover, some of the competitive agricultural regions such as the Argentine and Australia are close to seaboard and with sea rates about the same as before the war, they are able to compete with the American farmer in foreign markets to a greater advantage than before the war. This increase in transportation rates also affects the prices of many things which the farmer must buy, for much raw ma-

terial which comes into the midwest pays the increased freight and this in turn is taken up by the consumer. We cannot return to pre-war railway rates without ruin to the railways. Therefore, I have long asserted that the real hope of reducing charges upon our bulk goods was through the modernizations of our great interior waterways. By modernization, I mean increasing depths to a point where we can handle five or ten thousand tons in a line of barges pulled by a tug. This administration has authorized the systematic undertaking of this modernization. Within a few years we will have completed the deepening of the Ohio up to Pittsburgh, the Missouri up to Kansas City, Omaha, and beyond, the Mississippi to St. Paul and Minneapolis, the Illinois to Chicago. We already have experience with results, for with only the main river from St. Louis to New Orleans as yet working properly, the rates for transportation of bulk agricultural products through that section are near pre-war railway rates. We will not have the advantage of full results until the entire Mississippi and its tributaries are in one connected transportation system.

Modernization of Waterways

"We have another great opportunity of relief in the building of a shipway from the Great Lakes to the sea. Our engineers have recommended the St. Lawrence route as the preferable outlet. The administration has undertaken negotiations with Canada upon the subject. If these negotiations fail we must consider alternative routes. In any event, the completion of this great system of barge lines on the rivers and connecting the lakes with the gulf, of opening a shipway from the lakes to the sea, will make an effective transportation system 12,000 miles in length penetrating 20 midwest states. It will connect these states with seaboard at the gulf on one hand and with the North Atlantic on the other. And this means more than the mere saving upon the actual goods shipped over these routes. If part of your crops can move to market at a seven-to-ten-cent saving per bushel, the buyers' competitive bidding for this portion of the crop will force upward the price of the whole crop."

Horses and mules, which in 1926 were worth relatively less than any time in the past 40 years, are advancing in price, says the United States Department of Agriculture. The number of horses and mules in certain states has decreased steadily since 1900. In 1913 Illinois had 1,659,000 horses and mules compared with 1,045,000 this year.

SECRETARY HOOVER AT ELIZABETHTON, TENN., OCT. 6, 1928

"GREAT expansion of agricultural production in Canada and the southern hemisphere combined with increasing efficiency and larger production by our own farmers have rendered unstable those branches of our agriculture which are dependent upon foreign markets. These circumstances have brought a long train of difficulties to the American farmer. With fewer men needed upon the farm and with more needed in other lines of production our great cities have, within this 14 years, a little less than doubled in population, with resultant social problems.

"We must continue our endeavor to restore economic equality to those farm families who have lagged behind in the march of progress.

Proposals For Relief

"In the past seven and a half years congress has passed more than a score of constructive acts in direct aid of the farmer and the improvement of his marketing system. They have contributed greatly to strengthen the agricultural industry. Our party has undertaken to go farther than this and to still further reorganize farmers' marketing systems, placing it on a basis of greater stability and security. I may repeat these proposals. We stand specifically pledged to create a federal farm board of men sympathetic with the problem, to be clothed with powers and resources with which not only to further aid farmers' co-operatives and assist generally in solving the multitude of different farm problems which arise from all quarters of our nation, but in particular to build up with initial advances of capital from the government, farmer-owned and farmer-controlled stabilization corporations which will protect the farmer from depressions and the demoralization of summer and periodic surpluses. Such an instrumentality should be able to develop as years go on the constructive measures necessary to solve the new farmers' problems that will inevitably arise. It is no proposal of subsidy or fee or tax upon the farmer. It is a proposal to assist the farmer onto his own feet into control of his own destinies. This is not a theoretic formula. It is a business proposition designed to make farming more profitable. No such far-reaching and specific proposal has ever been made by a political party on behalf of any industry in our history. It marks our desire for establishment of farmers' stability and at the same time maintains his independence and individuality."

Farmer-Business Men's Picnic

BETWEEN 500 and 600 business men, farmers, and their wives, of Mt. Vernon, held a picnic at the Fair grounds on October 2. The Jefferson County Farm Bureau and the luncheon and business clubs of Mt. Vernon sponsored the get-together. S. J. Stanard, director of the State Department of Agriculture, was the principal speaker.

W. L. Cope

W. L. Cope of the Illinois Agricultural Association Executive Committee represented the I. A. A.

"We ought to hold more meetings of this kind," declared Mr. Cope. "Business and agriculture working together can accomplish great things."

The two groups joined in providing food and entertainment for the picnic dinner. It was voted to make the picnic an annual affair. Farm Adviser Lloyd Caldwell was largely responsible for the success of the meeting.

Visit Chicago Producers

ONE hundred and sixty-two people, including the officers, directors, and manager of the Varna Shipping Association in Marshall county, attended a tour to the Chicago live stock market early in September.

The Varna Shipping Association has been sending 100 per cent of its live stock to the Producers' since the co-operative agency was organized in Chicago in 1922.

The party made the trip to Chicago on a special train over the C & A railroad, returning the same day. Armour & Company served a free luncheon after which the party was conducted through the Armour & Company packing plants.

President Earl C. Smith was the speaker of the day at the Wayne County Farm Bureau picnic, Richmond, Indiana, on September 15.

Governor Smith's Acceptance Speech

Following is the text of the Democratic presidential candidate's statement on agriculture delivered in his speech of acceptance at Albany, N. Y., on Aug. 22.

"PUBLICITY agents of the Republican administration have written so many articles on our general prosperity that they have prevented the average man from having a proper appreciation of the degree of distress existing today among farmers and stock raisers. From 1910 to the present time the farm debt has increased by the striking sum of ten billions of dollars, or from four billion to fourteen billion dollars. The value of farm property between 1920 and 1925 decreased by twenty billions of dollars. This depression made itself felt in an enormous increase of bank failures in the agricultural districts. In 1927 there were 830 bank failures, with total liabilities of over 270 millions of dollars, almost entirely in the agricultural sections, as against 49 such failures during the last year of President Wilson's administration.

Disparity Continues

"The report of Nov. 17, 1927, of a special committee of the Association of Land Grant Colleges and Universities states: 'Incomes from farming since 1920 have not been sufficient to pay a fair return on the current value of capital used and fair wages for the farmer's labor, or to permit farm people to maintain a standard of living comparable with other groups of like ability.' The business men's commission on agriculture said in November, 1927, 'Since the war the prices of farm products have persisted in an uneconomic and unfavorable adjustment to the general scale of prices of other goods and services' and 'the disparity between urban and farm incomes has emphasized the disparity in standards of living in the rural and urban populations. The value of farm land and farm property decreased heavily in the post-war deflation' and 'large numbers of farmers have lost all their property in this process.'

"We have not merely a problem of helping the farmer. While agriculture is one of the most individualized and independent of enterprises, still, as the report of the business men's commission points out, 'Agriculture is essentially a public function, affected with a clear and unquestionable public interest.' The country is an economic whole. If the buying power of agriculture is impaired, the farmer makes fewer trips to Main street. The shop owner suffers because he has lost a large part of his trade. The manufacturer who supplies him likewise suffers, as does the wage earner, because the manufacturer is compelled to curtail his production. And the banker can not collect his debts or safely extend further credit. This country can not be a healthy, strong economic body if one of its members, so fundamentally important as agriculture, is sick almost to the point of economic death.

"The normal market among the farmers of this country for the products of industry is ten billions of dollars. Our export market, according to latest available figures is, exclusive of agricultural products, approximately one billion, six hundred millions of dollars. These large figures furnish striking indication of the serious blow to national prosperity as a whole which is struck when the buying power of the farmer is paralyzed.

"When, therefore, I say that I am in accord with our platform declaration that the solution of this problem must be a prime and immediate concern of the Democratic administration, I make no class appeal. I am stating a proposition as vital to the welfare of business as of agriculture.

Republicans Break Promise

"With the exception of the administrations of Cleveland and Wilson, the government of this country has been in Republican hands for half a century. For nearly eight years the President and Congress have been Republican. What has been done to solve this problem? Many promises were made which have never been fulfilled.

"The tariff is ineffective on commodities of which there is exportable surplus without controlled sale of the surplus. Our platform points the way to make the tariff effective for crops of which we produce a surplus. There has been government interference with laws of supply and demand to benefit industry, commerce and finance. It has been one-sided because business, industry and finance would have been helped more if proper attention had been given to the condition of agriculture. Nothing of substance has been done to bring this basic part of our national life into conformity with the economic system that has been set up by law. Government should interfere as little as possible with business. But if it does interfere with one phase of economic life, be it by tariff, by assistance to merchant marine, by control of the flow of money and capital through the banking system, it is bad logic, bad economics and an abandonment of government responsibility to say that as to agriculture alone, the government should not aid.

Co-ordinated Marketing Needed

"Twice a Republican Congress has passed legislation only to have it vetoed by a President of their own party, and whether the veto of that specific measure was right or wrong, it is undisputed that no adequate substitute was ever recommended to the Congress by the president and that no constructive plan of relief was ever formulated by any leader of the Republican party in place of the plan which its Congress passed and its President vetoed. Only caustic criticism and bitter denunciation were provoked in the minds of the Republican leaders in answer to the nation-wide appeal for a sane endeavor to meet this crisis.

"Co-operative, co-ordinated marketing and warehousing of surplus farm products is essential, just as co-ordinated, co-operative control of the flow of capital was found necessary to the regulation of our country's finances. To accomplish financial stability, the federal reserve system was called into being by a Democratic administration. The question for agriculture is complex. Any plan devised must also be co-ordinated with the other phases of our business institutions. Our platform declares for the development of co-operative marketing and an earnest endeavor to solve the problem of the distribution of the cost of dealing with crop surpluses over the marketed unit of the crop whose producers are benefited by such assistance.

Pledges Immediate Action

"Only the mechanics remain to be devised. I propose to substitute action for inaction, and friendliness for hostility. In my administration of the government of my state, whenever I was confronted with a problem of this character, I called into conference those best equipped on the particular subject in hand. I shall follow that course with regard to agriculture.

"Farmers and farm leaders, with such constructive aid as will come from sound economists and fair-minded leaders of finance and business, must work out the detail. There are varying plans for the attainment of the end which is to be accomplished. Such plans should be subjected at once to searching, able and fair-minded analysis, because the interests of all require that the solution shall be economically sound.

"If I am elected, I shall immediately

after election ask leaders of the type I have named, irrespective of party, to enter upon this task. I shall join with them in the discharge of their duties during the coming winter and present to Congress, immediately upon its convening, the solution recommended by the body of men best fitted to render this signal service to the nation. I shall support the activities of this body until a satisfactory law is placed upon the statute books."

GOVERNOR SMITH AT OMAHA, NEBR., SEPT. 18, 1928

"I STRONGLY believe in co-operative marketing. It is clearly all right—as far as it goes. I have encouraged it in my own state. In New York today we have over one thousand co-operative marketing associations. With our major cash crops and with a device for taking care of the surplus at the cost of the commodity benefited, co-operatives would be given a great opportunity for development.

"Their field is limited, however, without such a device, for the reason that when the membership alone is compelled to pay the whole cost of the attempt at stabilization, those outside the membership receive the benefits of the increased prices without bearing any of the burdens incident thereto. And the attempt at stabilization is in large measure impaired by the activities of the non-members.

"The fundamental fact is that none of the methods can function with respect to the major cash crops unless they are coupled with the control of the exportable surplus with the cost of lifting it out of the domestic market assessed back on the crop benefited.

"Various people have attempted to misrepresent and confuse my attitude with respect to the McNary-Haugen bill. I do not propose to leave the slightest doubt in anybody's mind on that subject.

"As I read the McNary-Haugen bill, its fundamental purpose is to establish an effective control of the sale of exportable surplus with the cost imposed upon the commodity benefited. For that principle the Democratic platform squarely stands, and for that principle I squarely stand. Mr. Hoover stands squarely opposed to this principle by which the farmer could get the benefit of the tariff. What remains of the McNary-Haugen bill is a mere matter of method, and I do not limit myself to the exact mechanics and method embodied in that bill.

Pledges Prompt Action

"Here is a clean-cut issue, which the farmers and the voters of this country must decide. It remains but to work out the details by which this principle shall be put into effect, and I have pledged myself to name a non-partisan commission of farm leaders and students of the problem to work out these details.

"I shall make that appointment, if I am elected, not when I take the oath of office as President, but immediately after election; and I pledge to the farmers and to the people of this country that no stone will be left unturned to give immediate and adequate farm relief, by legislation carrying into practice this definite principle for which my party and I stand. This course alone gives promise of rescuing the farmers of this country from the complete ruin which threatens them today."

GOVERNOR SMITH AT CHICAGO, OCT. 19, 1928

AFTER commenting upon the Republican Party's past record and future proposals for farm relief, Governor Smith said:

"On the other hand, the Democratic Party, in a clear-cut, concise, and definite platform plank, recognizes the great underlying and fundamental difficulty confronting agriculture, and promises immediate solution of the problem with a constructive program for its relief.

"I stand hard and fast by that platform, and I promise you that if I am elected President of the United States, it will be entirely unnecessary for me to seek excuses for non-performance in the carrying out of that pledge, because I shall make good that promise, and I shall not be scurrying around the United States to look for words to build up the reason why it was not done."

Our forefathers fought for the privilege of self-determination in government. Exercise the right they won for you by voting at the polls on Nov. 6.

Dean Mumford Returns

DEAN H. W. MUMFORD, College of Agriculture, Illinois, recently returned from a three months' leave of absence spent in Germany. While in Europe, Dean Mumford served with nine other men on the American Study Commission formed for the purpose of obtaining first-hand information regarding agricultural conditions and organization in Germany.

Dean H. W. Mumford

The members of the Commission travelled extensively from farm to farm, and through packing houses, creameries, stock yards, and shipping centers. A special study of the meat and dairy situation was made. The report submitted by the Commission to the industrial and banking interests of Germany will be published at a later date.

Dean Mumford, former member of the staff of the Illinois Agricultural Association, served on the National Farmers' Livestock Marketing Committee of 15, which set up the producers' co-operative livestock commission agencies now operating on all the principal livestock markets.

Lack of Efficiency in Retail Selling Analyzed

THE cost of retail selling in stores was analyzed recently in the Department of Commerce. The report indicates that one of the most difficult problems facing the retail merchants today is in connection with the costs entailed in actually selling his wares over the counter.

Less than half of the clerks' time is used in actual sales. In a prominent retail establishment having stores in four large cities, it was found that the sales force were idle one-third of their time. Taking care of stock required 17 per cent of the working day, and interviews without sales another eight per cent. Only 42 per cent of the sales person's time was taken up in the actual selling of merchandise.

These figures were based on 1927 business and represent a more favorable situation than existed two years previous.

REASONABLE DISPATCH OR promptness in transporting perishable goods by a common carrier is a question for the jury, where farmers suffer losses on perishable products in transit. Farmers can sue and collect damages if the plaintiff can prove that the carrier was negligent in expediting delivery.

Frank D. Barton, vice-president of the Illinois Agricultural Association, was the principal speaker at the recent annual meetings of the Mercer and Marshall-Putnam County Farm Bureaus.

I. A. A. Organizes New Life Insurance Service for Bureau Members

More Than 95 Per Cent of County Organizations Endorse Project

AFTER two years of careful investigation the I. A. A. has completed plans for a life insurance company. The project was discussed at two annual meetings of the Association, namely at Peoria in 1927 and at Rock Island in 1928. The Rock Island meeting authorized the Association to proceed with the project when 60 per cent of the County Farm Bureau executive committees had approved it. To date 95 per cent of the Farm Bureaus have endorsed the project. Plans for the new company were unanimously approved at a meeting of the Farm Bureau presidents held at Decatur on September 28.

The plan, briefly, provides for the formation of a legal reserve life insurance company with capital and surplus of $125,000.

There will be a first special participating ordinary whole life policy. It will not only participate in the mortuary savings and interest earnings, but in addition it will participate in the profits of the company on an equal basis with a share of stock in the life insurance company, based on the premiums paid in for insurance. This policy will be issued for a limited length of time only and is offered to Farm Bureau members and members of their immediate family.

Cost of Insurance

The premium for the insurance is approximately 5 per cent less than the most favorable of the large companies in the field. The tentative rate at age 35 is $21.63 and age 50, $39.35. Insurance will be written up to age 70.

Twelve million dollars is the probable limit in amount for the first special policy. If an amount in excess of this is secured it will be pro-rated among the members in the respective counties based on quota for county.

The limit of insurance for any individual on the first special policy is $5,000.

After the first special policy is discontinued there will be a full line of policies issued, both participating and non-participating.

The life insurance company will be controlled by the I. A. A. An intensive survey is being made at the present time as to the interest of Farm Bureau members in having their own life insurance company. A sufficient amount of insurance of the first special policy must be secured in a reasonable time or the whole project will be postponed indefinitely.

CONVINCING ANOTHER

EXPERIENCE has taught me that the way to convince another is to state your case moderately and accurately, and then scratch your head or shake it a little, and say that, that is the way it seems to you, but that you of course may be mistaken about it; which causes your listener to receive what you say, and as like as not turn about and try to convince you of it since you are in doubt; but if you go at him with a tone of positiveness and arrogance you only make an opponent of him.—*Benjamin Franklin.*

Every Farm Bureau member who is interested in providing, at a substantial saving in cost, a real life insurance service for himself and his family as well as for future generations should become a charter member.

A Great Benefit

WHEN Ralph Overholser of Whiteside county lost a heifer shortly after its arrival with a carload of others from St. Paul, he tried to get a settlement from the railroad by appealing to the local agent but failed.

Then he referred the claim to the I. A. A. Transportation Department, after he had almost resigned to take the loss and let the matter drop. By appealing to the proper authorities, the Association secured prompt action and a short time ago sent Mr. Overholser a check for $50. This service is free to Farm Bureau members.

I. A. A. Transportation Dept.

Received your letter and money for that heifer.

The Farm Bureau and all it is doing is a great benefit to the farmers, if they only make use of it. We ought to stick closer together.

I want to thank the Association for its help in getting this money. Maybe you have a bill for this. If so, send it to me. It is enough to pay my dues for three years in our county organization.

RALPH OVERHOLSER.
Whiteside County.

Minnesota Bureau Against Crippling Prison Industries

Manufacturers Would Abolish Twine and Farm Implement Making By Convicts

THE Minnesota State Farm Bureau will oppose a movement in the next legislature on the part of northwest farm equipment manufacturers to stop the manufacture of twine and farm equipment in the state prison.

The secretary of the Northwest Farm Equipment Association has been carrying on a campaign through the organization's official paper against the prison industry claiming that he is making a fight for the taxpayers of the state. The Farm Bureau contends that the machinery manufacturers, on the other hand, are fighting only in the interest of their own business and to the detriment of the majority of Minnesota taxpayers.

Save Farmers Money

The state prison industries, it is claimed, have saved the farmers of the northwest close to $20,000,000 in prices payed for twine and farm machinery, and several times that amount indirectly by acting as a price leveler in the twine and machinery business. As proof that farmers rather than farm manufacturers need help, the Farm Bureau points to the fact that International Harvester Company stock of par value $100 is now selling at more than $300 a share on the New York Stock Exchange and that the company has reserves in cash securities of over $200,000,000.

A Great Benefit

The Farm Bureau claims that not only are the prison industries of benefit to farmers of the northwest, but the prisoners are helping support themselves, thus relieving taxpayers of the state from a large burden. The State Farm Bureau will oppose any attempt in the next legislature to cripple the prison industries that will tend to raise appropriations for the penal institutions.

THE Illinois Agricultural Association is not opposed to the conservation of natural resources, nor a state system of fish and game preserves. It is opposed to a $20,000,000 bond issue which to all indications must be paid out of the general taxes collected by the state.

The proposed $20,000,000 bond issue will cost approximately $16,000,000 in interest charges alone at 4 per cent if paid off over a period of 30 years on an amortized basis. A pay-as-you-go plan is far more economical. Keep this in mind when you vote on the proposition Nov. 6.

The Farm Bureau is a business organization for progressive farmers.

PROTECTION
—then—

THE EARLY Puritans were forced to protect themselves against savage, hostile Indians as they went to church for divine worship. In the picture the artist portrays the stern Pilgrim father with musket and Bible on his way to Sunday service. His daughter, who accompanies him, is happy in the security afforded by her sturdy, courageous protector.

—and now—

THE SAVAGE is no longer a menace, but the dangers of modern travel are infinitely greater than they were in the days of the Puritan.

Auto insurance is the modern protector of the automobile owner and his estate against the hazards of driving on the public highway. Fire and theft, collision, property damage and public liability are the enemies the auto owner needs protection against today.

You will be surprised to know how little such protection costs when you secure a **FARM BUREAU** auto insurance policy in **YOUR OWN COMPANY**, which serves you **AT COST.**

You can't afford to be without protection that guards your estate against confiscation and protects you against damage to your car and by your car. Call at your County Farm Bureau office, or let us give you complete information. It is yours without charge for the asking.

Nat'l Horticultural Council is Formed To Represent Growers

Chas. E. Durst is Secretary, A. B. Leeper a Director

THE National Horticultural Council, organized to represent the economic interest of fruit and vegetable growers in the United States, was incorporated under the laws of Illinois, October 18, 1928. The first meeting of the 15 directors was held in Chicago on October 31 when by-laws were adopted, officers and the executive committee elected, and plans and policies decided upon.

It is expected that the Council will function similarly to the National Dairy Council for the dairy industry, the National Poultry Council for the poultry industry, and the National Live Stock and Meat Board for the live stock industry. The Council is organized with broad powers and will be in position to represent the industry and work for the solution of economic problems facing fruit and vegetable growers.

Many Activities

Its activities and interest will include legislation, tariff problems, transportation, standardization of commodities, fruit juice and by-product questions, trade practices, better methods of marketing, and collection and dissemination of information on economic questions. The Council will not engage in marketing nor in the purchase of supplies.

C. E. Durst

The following officers and executive committee have been elected: John Napier Dyer, president; F. L. Granger, first vice-president; Frank T. Swett, second vice-president; and Charles E. Durst, secretary-treasurer. The executive committee consists of John Napier Dyer, F. L. Granger, M. C. Burritt, Louis F. Miller, and Charles Carmichael. Charles E. Durst of Chicago, former director of fruit and vegetable marketing for the I. A. A., has been appointed executive secretary.

Leeper A Director

The directors are as follows: John Napier Dyer, Indiana, owner of 1,000 acres of land and 350 acres of orchard; Senator H. M. Dunlap, Illinois, owner of 1,400 acres of orchard, and the senior senator in point of service in the Illinois senate; F. L. Granger, general manager of the Michigan Fruit Growers' Inc., largest co-operative in Michigan; Louis F. Miller, large greenhouse growers of Ohio, and leader in various vegetable organization movements; M. C. Burritt, president of the New York State Horticultural Society, vice-president of the Western New York Fruit Growers' Cooperative Association and former leader of state extension in New York; V. H. Davis, president of the Ohio State Horticultural Society and manager of the Catawba Island Orchard Company, Ohio; W. C. Reed, Indiana,

FROM GROWER TO CONSUMER DIRECT

Thousands of dollars worth of apples and other fruits are sold from this storage house in Rock Island annually. It is owned by Smith's Fruit Farm which markets its products direct to consumers in the tri-cities. Incidentally, the buildings here are insured in the Farmers' Mutual Reinsurance Co., which has headquarters with the I. A. A. in Chicago.

owner of 220 acres of orchard and president of the Vincennes Nurseries, largest growers of cherry trees in the United States; Wilson Rood, New York, sales manager of the Chautauqua and Erie Grape Growers' Association; Frank T. Sweet, California, president and general manager of the California Pear Growers' Association and owner of extensive pear orchards in California; A. B. Leeper, manager of the Illinois Fruit Growers' Exchange, Illinois, and owner of orchards in western Illinois; Charles Carmichael, Missouri, secretary of the Ozark Fruit Growers' Association, a large fruit and vegetable co-operative operating in Missouri, Arkansas, Tennessee, and southern Illinois; Ben E. Niles, Kentucky, secretary of the Kentucky State Horticultural Society and orchard owner; E. L. Balch, Washington, Wenatchee Valley orchardist and leader in organization movements in the Pacific Northeast; Warren E. Beebe, Iowa, manager of the largest orchard in Iowa; and Charles E. Durst, editor of Fruits and Gardens, a commercial fruit growers' paper with headquarters in Chicago.

The Council is to be financed by memberships held by individual growers, horticultural societies, and fruit and vegetable co-operatives. The country has been divided into nine sections, each of which will have one director. In addition, there will be six directors at large. Each state will be represented also by state committees.

The headquarters of the National Horticultural Council are at 608 So. Dearborn Street, Chicago, and all correspondence relating to the organization should be directed there.

New Bulletin Out

"Market Destinations of Illinois Grain" is the title of a new bulletin recently published by the University of Illinois. The publication concludes a three-year study by C. L. Stewart, L. J. Norton, and L. F. Rickey of the agricultural college staff.

An estimated total of 215,000,000 bushels of corn, oats, and wheat were shipped out of Illinois as the annual average for the five years, 1922-26. During the same years, Iowa shipped out 90 per cent as much as Illinois, Kansas 60 per cent, Nebraska 47 per cent, and Indiana 37 per cent.

Illinois Farmers Are Invited To St. Louis Waterways Meeting

Well Known Speakers Will Discuss Water Transportation

ILLINOIS farmers are invited to attend the annual meeting of the Mississippi Valley Association to be held at St. Louis, November 26-27, 1928.

A long list of able speakers is announced by the Association, who will appear sometime during the two-day session. Some of the speakers are as follows: Secretary of War Dwight F. Davis; U. S. Senator Henrik Shipstead of Minnesota; Congressman Wm. E. Hull of Illinois; Major Gen. Edgar Jadwin, chief of Army Engineers; William R. Dawes, president, Chicago Association of Commerce; Hon. James A. Reed, U. S. senator from Missouri; Major-General T. Q. Ashburn, Inland Waterways Corporation; and Hon. Harry B. Hawes, U. S. senator from Missouri.

Want 9-Foot Channel

The M. V. A. is working to complete the Lakes-to-the-Gulf Waterway. It hopes to bring about a nine-foot channel from Minneapolis to New Orleans on the Mississippi, from Chicago to Mississippi through Illinois, from Pittsburgh to Cairo on the Ohio, and similar channels on other tributaries.

The Association states that on a joint haul where both water and rail service is used, farmers may save approximately 20 per cent of the rail rate that parallels the water haul. If the freight originates on the river and is consigned to another point on the river, the shipper may save as much as 50 per cent of the rail rate between the river ports.

The Denison bill, fostered by the Mississippi Valley Association, and passed in the last session of congress, provides for the establishment of joint rates between rail and river carriers on the entire Mississippi Waterway system.

A. F. B. F. Prepares for 10,000 at Convention Chicago, Dec. 10, 11, 12

I. A. A. Selects Four Voting Delegates to Represent State

ILLINOIS will be represented by fully 1,000 farmers at the tenth annual meeting of the American Farm Bureau Federation at the Hotel Sherman, Chicago, December 7 to 12, it is indicated by advance requests for reservations received at national federation headquarters. Official delegates from the Illinois Agricultural Association will include President Earl Smith, C. E. Bamborough, Polo, A. R. Wright, Varna, and George F. Tullock, Rockford. The entire I. A. A. Executive Committee and department heads will also be present, together with officers of County Farm Bureaus and farm advisers.

LaSalle, Fulton, Tazewell and Hancock County Farm Bureaus it is reported already have organized delegations. In other sections of the state neighborhood groups are being enrolled to avail themselves of the special reduced railroad rates to the convention. Ask the county adviser about these rates and get the necessary certificate from him if you contemplate attending.

Sam H. Thompson

Prepare For 10,000

Many parties are planning motor bus trips to the convention and a few are considering the airplane as their preferred vehicle of transportation. Every effort is being made by the American Farm Bureau Federation to have a record-breaking crowd at this great national assembly of farmers and farm women and plans have been perfected to care for 10,000 visitors during the six-day affair.

A program of general interest has been prepared. It is intended to pre-

(Continued on col. 1, page 9)

REMEMBER THE DATES

The annual convention of the American Farm Bureau Federation, Hotel Sherman, Chicago, comes on Dec. 10, 11, 12, 1928; the annual meeting of the Illinois Agricultural Association on Jan. 30, 31, 1929, at Danville. Mark these dates on your calendar. The meetings are yours for you to help decide the future course of the Farm Bureau.

International Time

THE Hay and Grain Show is expected to be an outstanding feature of the International Live Stock Exposition which opens December 1 at Chicago. A large number of Illinois farmers already have entered seed corn and small grain exhibits in the contest.

Eleven hundred and fifty cash prizes, in addition to eight handsome silver trophies, are being awarded to the exhibitors in this division.

The United States Department of Agriculture and the state universities will have their usual exhibits and demonstrations. The fact that seed corn from sections of Ohio, Indiana, Michigan, and other states infested with the corn borer is barred offers an unusual opportunity for exhibitors from areas not so handicapped.

Thousands of 4-H Club boys and girls from every corner of the country will be in Chicago on the opening day. The Illinois Agricultural Association will provide a dinner for the Illinois winners in accordance with its usual custom. This dinner will be held on the night of December 5, the place to be announced later.

President Earl C. Smith, C. E. Bamborough of Polo, George F. Tullock of Rockford, and A. R. Wright of Varna will represent Illinois as official delegates at the annual convention of the American Farm Bureau Federation, Chicago, December 7 to 12. Alternates are as follows: Charles Marshall, Frank Oexner, W. L. Cope, and Samuel Sorrells. The entire executive committee of the Illinois Agricultural Association was authorized to attend the meeting

Jan. 30, 31 Are Dates Set For 14th Annual Convention of I. A. A.

County Farm Bureaus Are Asked to Select Official Delegates to State Gathering

COUNTY FARM BUREAUS in Illinois will select delegates within the next few weeks for the 14th annual meeting of the Illinois Agricultural Association to be held at Danville, January 30-31, 1929.

The program now being arranged will include speakers of wide reputation. Agricultural legislation to be presented before the coming general assembly will be considered. Group meetings will be arranged as heretofore for the consideration of specific activities such as legislation, co-operative marketing, business service, organization and publicity, etc.

Easy To Get There

Hotel accommodations are being arranged for a large assembly and while it is thought that hotel facilities will be ample, all those who plan to attend are being asked to make reservations early. Danville is fortunately situated so as to be readily accessible to all parts of the state. It is on the main line of the C. & E. I. Railroad north and south, and on the Big Four in all four directions.

Subsidiary organizations of the Illinois Agricultural Association will meet on January 29, the day before the opening of the convention, as has been the custom in the past. The annual meetings of the Illinois Agricultural Mutual Insurance Company, the Illinois Agricultural Co-operatives Association, the Illinois Farm Bureau Baseball League, and the Illinois Farm Bureau Serum Association will come on this day according to present plans.

Vermilion Is Host

The Vermilion County Farm Bureau will be hosts to visitors and members from the far corners of the state and will co-operate with the local Chamber of Commerce and business men in making local arrangements.

This will be the first annual meeting of the Illinois Agricultural Association held in the extreme part of the state outside Chicago.

Nat'l Horticultural Council is Formed To Represent Growers

Milk Producers at Peoria Close Second Successful Period

Pool More Than 27,000,000 Pounds Milk Which Brought $636,123.28

THE Illinois Milk Producers' Association, the farmers' collective bargaining organization at Peoria, pooled 27,178,608 pounds of milk valued at $636,123.28 in the year ending September 30, 1928. It brought an average price of $2.34 per 100 pounds. The net worth of the company after two years of operation is $13,157.24 as compared with a net worth of $6,276.18 a year ago.

The association was organized without any capital stock or investment. The milk pooled by some 1,200 members was sold by the association to dealers operating on the Peoria market at a cost of a fraction over one cent per 100 pounds. Commenting upon the financial standing of the company, the auditor said:

Lauds Management

"We wish to compliment the management upon the splendid showing during the two years which this pool has operated. With no initial investment of capital, the net worth of $13,157.24 has been accumulated out of earnings and at the same time returns to members for their product have been increased."

The outstanding accomplishment of the company is not the earnings over the two-year period. The improvement in quality of milk, marketing conditions, price to the producer, and elimination of waste brought about are far greater accomplishments. The producers about Peoria received an average of 25 cents per 100 pounds more for their milk during the year than they did prior to the organization of the pool. The consumers received better milk. Based on the volume sold co-operatively during the year, it is conservatively estimated that the members of the association received $67,946.52 more for their product than they would have received otherwise.

Dealers Profit

The dealers were enabled to secure reasonable compensation for their services because waste due to poor milk, cut-throat competition, and price-wars was reduced to a minimum.

Wilfred Shaw, Peoria, is resident manager of the Association. A. D. Lynch, dairy marketing director of the I. A. A., who assisted in its organization is retained as marketing counsel.

Help prevent colds this year by eating plenty of bulky foods and those rich in vitamins, such as milk, eggs, spinach, carrots, oranges, and cod liver oil.

MITCHELL KNOWS INSURANCE

Roy Mitchell of Champaign, county director of insurance sales for the I. A. A. auto insurance company, sent in 66 applications in the six weeks ending Oct. 1, placing first in the state-wide contest.

European Farmers Suffer

"EUROPEAN farmers are suffering from hard times just as American farmers are suffering," says Dr. F. A. Pearson, who recently returned from a study of agricultural conditions in Germany and other European countries. "European farmers," he says, "are troubled with high retail prices and low prices in farm products just as much as American farmers. Taxes that farmers have to pay are as high in Germany, Scotland, and England as in America. Farmers in Germany complain of the high interest rates on mortgages and short term credit.

"Farmers in the United States," he says, "raise more bushels of grain and tons of hay per day than European farmers. Farm wages are lower on the continent than in the United States, but farmers do less work in the old country than in America," says Pearson.

Within 10 Per Cent

THE purchasing power of farm products in terms of other commodities continues within 10 per cent of the 1909-14 pre-war parity, says the Bureau of Agricultural Economics.

"The chief sustaining influence in agricultural prices," says the Bureau, "is the favorable position of the livestock industries."

Life Insurance Co. Applies For Charter Sell Special Policies

Members Who Sign Now Will Have the Best of It

APPLICATION has been made for the charter for the proposed life insurance company being organized by the Illinois Agricultural Association and the Illinois Farm Bureaus. The name of the company as selected by the Executive Committee of the I. A. A., after getting suggestions from the County Farm Bureaus, is the "Country Life Insurance Company."

Charter membership pledges for the first special participating policy are now being received. The maximum amount of pledges for the first special participating policies will be limited. The quota for each County Farm Bureau has been fixed upon a basis of membership within the county. The first special participating policy will not only participate in the mortuary savings and excess interest savings, but will also participate in the profits of the company the same as a share of stock in the life insurance company. The first special policy is offered to Farm Bureau members and members of their immediate families.

More Hog Cholera

"SEPTEMBER, October, and November are the worst months for hog cholera," says the U. S. Department of Agriculture. "More hog cholera this fall than a year ago was reported from Iowa, Illinois, Ohio, Missouri, Nebraska, Oklahoma, Maryland, Georgia, North Carolina, South Carolina, and Florida.

"The disease is readily controlled by the preventive-serum treatment without which cholera would cause vastly greater losses than the swine industry now sustains."

The County Farm Bureaus and the Illinois Farm Bureau Serum Association are reducing hog cholera losses in Illinois to a minimum.

Shelby Is Clean

Shelby County Farm Bureau announces that Shelby county is now on the tuberculosis free list as a modified, accredited area, effective October 1.

Hogs from this county when properly tattooed are eligible to a premium of 10 cents per hundred at the central markets.

Managers of the county's shipping associations were recently provided with tattoo irons for marking the hogs.

Illinois farmers are buying their rock phosphate from $1.50 to $2 less than the same companies are selling the same grade of phosphate in other states. Collective bargaining through organization is responsible for this saving.

FACTS EVERY MEMBER SHOULD KNOW

PRODUCTION of food stuffs in foreign countries has a direct and important bearing on farm prices in the United States. Particularly is this true when American farmers produce a surplus and must sell on a world market. Therefore, it is well to know something of production in foreign countries.

The dairying season in New Zealand opened with a 30 per cent increase in production over a similar period last year or an increase of more than 50 per cent over the 1926 season. Prices nevertheless are satisfactory, says the U. S. Dept. of Commerce.

Butter has been offered and sales made at from 34.5 cents to 34.75 cents per pound f. o. b. New Zealand ports for shipments to the end of December and in some cases to the end of January and February.

Queensland, Australia, nearly doubled its exports of butter in the year ended June 30, 1928, compared with a similar period the year previous.

On September 19, 1928, a committee representing the dairy farmers and dairy distributors in Great Britain reached an agreement in respect to the contract terms for milk for the year beginning October 1, 1928. The farmers were given an increase over present prices. Under the new agreement they are to receive 34 cents per gallon for four months, 32 cents per gallon for four months, and 24 cents per gallon for four months, or an average of 30 cents per gallon for the next year. The dairy distributors intend to pass the price increase along to the consumers. The present retail price for ordinary milk in London is 12 cents per quart during the six summer months and 14 cents per quart during the six winter months. Under the new arrangement, the distributors intend to charge 14 cents per quart for eight months and 12 cents per quart for four months. Considerable resentment to price increase to the consumer has been expressed in the public press and the Food Council has been asked to investigate to determine whether the increased cost to the public is justified.

The principal significance of this victory by farmers, says Trade Commissioner Brice M. Mace of the U. S. Dept. of Commerce, is in the organized power of the National Farmers' Union which has over 100,000 members on its rolls. The National Farmers' Union is going to be greatly strengthened by the outcome of this milk dispute and because they held out as long as possible against any increase in the price to the consumer, they have come out of this dispute in better favor than the distributors. There still remains in Great Britain the problem of the disposal of surplus milk. Until surplus milk can be profitably marketed in manufactured products, the dairy industry will be unbalanced in its growth and will continue to suffer because it is almost entirely a fluid milk proposition.

Argentine exported 753,360 pounds of butter and 71,876 pounds of cheese during August, 1928. None of the butter, but 7,359 pounds of the cheese came to the United States.

The organization of the Swiss dairy industry is unique when compared with similar organizations in any other country, in that all branches work in harmony and co-operation, reports Commissioner Kenneth M. Hill. The central organization, known as the Swiss Cheese Union, is composed of three branches called (1) the Central Union of Dairy Farmers, (2) the Swiss Cheese Manufacturers Union, and (3) the Trade Branch. The Swiss government does not constitute a fourth party nor exercise any control whatsoever.

The Central Union of Dairy Farmers is the organization of the producing end of the industry and includes about 95 per cent of all dairy farmers in its membership. It is made of hundreds of small local co-operative societies located in practically every dairying community. These local co-operatives act as central collection stations and are often cheese manufacturers as well. The price which the milk producer receives in Switzerland is fixed relatively by the Central Union of Dairy Farmers through a guarantee of the price of cheese. This system of guaranteeing the price of milk through the price of cheese eliminates to a very large extent any tendency of other milk consuming industries to attempt to purchase at a price lower than the standard.

The Swiss Cheese Union then sells to its Trade Branch, composed of the exporters and wholesalers. This branch attends to the distribution to the consumer.

The 1928 season for egg products in the Tientsin district in China has been full of difficulties for both the manufacturers and exporters, it is reported. The manufacturers have been confronted with high first costs and a rather indifferent market for dried products, which has resulted in increased production of liquid egg yolk for the European trade.

Exports of dried egg albumen from Tientsin amounted to only 1,370,300 pounds during the first six months of 1928, whereas 2,041,900 pounds were exported during the corresponding period of 1927.

Oranges are being grown in considerable quantities in Paraguay and Argentina in South America. The industry is just being developed on an extensive scale in Argentina where the Southern Railway is planting oranges and grapefruit trees along their lines.

Oranges were formerly brought from Paraguay into Argentina by merely shoveling them on the boat. Recently, however, the Argentina government forbade their marketing in Buenos Aires unless the fruit is wrapped in a separate paper. Cuttings for the new orange and grapefruit plantations are being imported in large quantities from the United States.

Cutting In

IT HAS BEEN HELD that, where the defendant drove his automobile at an unlawful or unreasonable rate of speed up to and past the automobile in which plaintiff was riding without signal or warning, and forced his car across and in front of the plaintiff's car, in such a manner as to disconcert the driver of plaintiff's machine, and cause the latter car to go over an embankment, to the injury of the plaintiff, the defendant might be liable even though the impact of the defendant's machine was not sufficient in itself to forcibly throw the plaintiff's car out of its course.

Public liability and property damage insurance in your own company, would protect you against loss in such an accident.

Save $100,000

Illinois Farm Bureau members are buying limestone at a saving of 25 to 30 cents less per ton than are farmers in adjoining states. This saving is made possible through the use of the I. A. A.'s collective buying power. On the basis of 400,000 tons sold and used in Illinois since Jan. 1, 1928, the saving to Illinois farmers amounts to more than $100,000.

Champaign Accredited

Champaign county was recently added to the tuberculosis free list as a modified accredited area. All the cattle in the county have been tested and the infection now is less than one-half of one per cent. All hogs shipped to Chicago are eligible to a 10 per cent per hundred premium provided they are tattooed and are found to be free from tuberculosis upon slaughter.

Shipping association managers are buying tattoo markers and will market all hogs shipped to market.

Corn Price Outlook

The outlook for better corn prices is good according to Secretary of Agriculture Jardine. The Rumanian crop was about 23 per cent less than last year and the carry-over of old corn in the United States this year was small. "This, coupled with a comparatively high price for Argentine corn, will increase export demand for our corn," says Mr. Jardine, "unless the new Argentine crop is available.

"If farmers will refrain from rushing the new market," he says, "and will adjust their feeding to produce slightly heavier cattle and hogs, the market should be well maintained and improvement is likely before the end of the season."

Chicago Producers Entertain

Visiting journalists, farm paper and newspaper editors will be entertained by the Chicago Live Stock Producers' Commission Association on November 30, the day before the opening of the International.

The Producers' will conduct a tour through the Yards and their guests will be shown the method used in handling and selling livestock. In the afternoon a tour will be conducted through one of the large packing plants. The journalists also will be entertained at dinner that evening.

More than 30,000 Illinois farmers will be purchasing gasoline, oil, and petroleum products co-operatively by the end of 1929 is the opinion of Geo. R. Wicker, manager of the Illinois Farm Supply Co. Twenty-one county co-operative oil companies in the state are now supplying approximately 23,000 farmers with motor fuel and lubricants.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Edited by Department of Information, E. G. Thiem, Director, 608 South Dearborn Street, Chicago, Illinois. Entered as second-class matter October 20, 1925, at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Accepted for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the ILLINOIS AGRICULTURAL ASSOCIATION RECORD. Postmaster: In returning an uncalled for or missent copy please indicate key number on address as is required by law

The Election Is Over

THE 1928 political campaign is now history, and a new president is elected. It may be useful and interesting to recapitulate and analyze the farmers' position with respect to the past and future.

More than five years ago, organized agriculture, led by the Farm Bureau, sought to impress upon the public consciousness that there was a farm problem. Farmers who had studied the question knew fairly well the cause of the trouble. They recognized that only in isolated instances were they getting the benefit of the protective tariff, whereas, nearly everything they bought was priced on an artificial basis because of high and effective tariffs on the commodities purchased.

The exportable farm surplus sold on the world markets fixed a world price on American farm products sold at home. Government intervention and legislation had assisted in bringing on this inequality. Farmers thought they were justified in seeking like intervention to correct it. The public was slow to respond to the farmers' appeal. The press at first was hostile, but enlightenment eventually came and interest was finally aroused in the farmers' plight.

The Republican Party met in 1924 and pledged itself to cure agriculture's ills. A short time after his election, farm representatives called on President Coolidge and asked his aid. He replied saying that he had no plan. He advised farm organization representatives to prepare and bring in a plan which they thought would solve the problem.

The McNary-Haugen bill was the result. Farmers secured the support of their measure in two different sessions of Congress. The President vetoed it each time. That much is history and is well-known to everyone.

The issue then became involved in politics. For the most part farmers held their peace and awaited developments. They refused to commit themselves for one party or the other. They asked of the candidates, "what have you to offer, what will you do about it?" The two presidential nominees responded. Never before in the history of the United States was agriculture given so much consideration in the campaigns of two political parties. Never before in the history of the country were such far-reaching declarations and commitments made by presidential nominees. From this point of view it was a victory for the American farmer. Organized agriculture had done its job and done it well.

In his acceptance speech, the successful candidate, Mr. Hoover said: "The most urgent economic problem in our nation today is in agriculture. It must be solved if we are to bring prosperity and contentment to one-third of our people directly and to all of our people indirectly. We have pledged ourselves to find a solution. . . .

"The working out of agricultural relief constitutes the most important obligation of the next administration. I stand pledged to these proposals. The object of our policies is to establish for our farmers an income equal to those of other occupations; for the farmer's wife the same comforts in her home as women in other groups; for farm boys and girls the same opportunities in life as other boys and girls. So far as my abilities may be of service, I dedicate them to help secure prosperity and contentment in that industry where I and my forefathers were born and nearly all my family still obtain their livelihood."

This is the pledge of President-elect Hoover. It is the promise of the 30th President of the United States. Farmers will take him at his word. Organized agriculture undoubtedly will offer President Hoover support and cooperation in any plan he proposes which will bring about the promised ends.

Protection For All

COMMENTING upon the American protective system and the farmer, an English writer concludes with some truth that "protection for everyone is protection for no one." His point is that if the tariff were made effective on all agricultural products, special privilege would be abolished and the tariff would fail of its purpose. The reason for its existence would be wiped out.

Prof. Boyle of Cornell University, in a recent article admits that "the tariff has been put there (on farm products) as a mere sop to the farmers. In other words, the farmer has the shadow of protection, the manufacturer the substance."

Both views lend color to the suspicion that opposition to an effective plan for applying the protective principle impartially was based purely on selfish motives. It implies recognition of the fact that someone must pay for the other fellow's protection. The future will enlighten us further on this point. It will reveal whether or not there is honesty and sincerity of purpose in those given the power to distribute real protection equitably. The farmer is fully aware of his obligation to produce efficiently and in accordance with market demands. But he also recognizes natural limitations in his industry which can be bridged only by proper machinery built with government assistance.

Radio Schedule
Station WJJD, Mooseheart
Monday to Friday Inclusive

9:30 to 10:30 A. M.—Ellen Rose Dickey "Happy Thought Hour"
10:45 to 11:30 A. M.—Musical Program
12:00 to 12:30 P. M.—Palmer House Noontime Musical
12:30 to 12:45.—Daily Farm Program Broadcast from Illinois Agricultural Association, Transportation Building, Chicago
12:45 to 1:00—Palmer House Orchestra
2:00 to 3:00—Studio Program
3:30 to 4:30—Mooseheart Children
4:30 to 6:00—Singing—Victor Half-hour Musical Gala and Organ Recital
6:20 to 6:30—Newscasting
6:30 to 6:55—Palmer House Symphony
6:55 to 7:00—Sport News
7:00 to 10:30—Mooseheart Children, and Music by Palmer House Quintette
10:30—Weather Forecast

On Saturdays the program over WJJD opens at noon, with music, newscasting, and weather forecasts as usual in the evening. On Sundays the program opens at 6:00 P. M. and continues throughout the evening until 11:00 o'clock.

"I tuned in on WJJD at noon today, and although there was practically no static or other interference, will have to say that I have never had a Chicago station come in so distinctly."

A. B. Leeper,
Centralia, Ill.

"We get Station WJJD, Mooseheart, probably better than any other in the whole country," writes E. E. Glick, farm adviser in Franklin county, Ill.

FRENCH GOV'T. TO BROADCAST

THE French government plans to institute a regular broadcast of weather reports and market and crop news within the near future.

Professor Bernard Trouvelot of the French national school of horticulture, who recently visited America, was particularly impressed by the great number of farmers having radio sets and getting regular information and instruction through the air. He also noted that one American radio manufacturer had produced 50 per cent more receivers than all the radios owned in France.

FLORIDA LEADS IN PHOSPHATE

FLORIDA was the source of 83 per cent of all the phosphate rock sold or used by producers in the United States in 1927. Last year producers in the United States used 3,166,102 long tons of phosphate rock valued at $11,234,863. The value of Tennessee rock used was $2,300,296. All of the rock phosphate used in Illinois comes from Tennessee. The use of phosphate rock sold or used by producers in the western states in 1927 increased 37 per cent as compared with 1926.

THE 1928 NATIONAL CHAMPION

Walter Olson, member of the Knox County Farm Bureau, is the new Illinois State and National champion corn husker. He husks with both a peg and a hook. Elmer Williams of Stark County placed second in both state and national contests.

Knox County Man Is 1928 State Champion Husker with 27.8 Bu.

Noses Out Elmer Williams from Stark, Former National Winner

FIVE thousand fans saw Walter Olson of Knox county win the 1928 state corn husking championship in the annual contest held on the Morgan brothers' farm near Galva, Nov. 3. Olson nosed out his old rival, Elmer Williams of Stark county, by more than a bushel and a half of corn after deductions. Williams, former state and national champion, defeated Olson in the 1925 contests held in Montgomery and Mercer counties. Williams and Olson placed first and second respectively in the state and national meets that year.

A disagreeable drizzle, which started on the afternoon of Nov. 1, continued throughout the night and the following day when it developed into a steady downpour. A hasty conference between local officials and Prairie Farmer representatives, who sponsored the event, resulted in postponing the contest originally set for Nov. 2 until the following day. Elaborate preparations had been made for an expected crowd of 10,000 to 15,000. Nearly $1,000 had been invested in food, and to continue with the contest in the face of the weather would have jeopardized the success of this venture. With the aid of a telephone and Prairie Farmer's radio Station WLS news of the postponement was spread throughout the state. Scores of contestants, their sponsors, and visitors arrived from distant points, but nearly all willingly acquiesced in the new arrangement and stayed over for the event the next

(Continued on col. 1, page 8)

Olson and Williams Place First, Second In National Contest

THE two Illinois entries, Walter Olson of Knox county and Elmer Williams of Stark county, defeated all comers in the fifth national corn husking contest held at Fowler, Indiana, November 13. Olson and Williams are members of the Knox and Stark county Farm Bureaus, respectively.

The match was to some extent a repetition of the second contest held in Mercer county, Illinois, in 1925. At that time Elmer Williams broke all corn husking records and placed first with 35.8 bushels of corn net, husked in one hour and 20 minutes. Walter Olson was second that year. This year it was Walter Olson who carried off first honors with 26.62 bushels husked in the 80-minute period, while Williams placed second with a record of 25.31 bushels.

Favorable Weather

A great crowd variously estimated at from 8,000 to 16,000 saw the 14 huskers from seven states compete. The men were all first and second prize winners in their respective state contests. Beautiful, clear weather and dry fields made conditions unusually favorable for the big farm sporting event of the year. Many followers of the sport in Illinois drove to Benton county, which borders Illinois on the east, to see the match. Backers of Olson and Williams of Knox and Stark counties were there in numbers.

Corn Was Light

An excellent field of upstanding corn had been prepared for the huskers. The fact that many of the ears

were smaller and the corn perhaps drier at this time of the year than the average field, made it difficult to break the 1925 record of 35.8 bushels, held by Williams.

Among the old-time huskers who competed heretofore in state and national contests were Joe Sudik of Nebraska and Ben Grimmus of Iowa, besides the two Illinois men. Fred Stanek of Iowa, national champion last year, did not compete.

The contest was sponsored by Prairie Farmer, Missouri Ruralist, Kansas Farmer, The Farmer of St. Paul, Minnesota, the Nebraska Farmer, and Wallaces' Farmer.

A specially prepared program for the contest was received by radio from WLS and amplified through the Illinois Agricultural Association's loud speaker system. The amplifier, likewise, was used for making all announcements and giving the results to the waiting audience.

State Champion Husker

(Continued from col. 2, page 7)

day. Others drove home and returned early next morning.

Better Weather Saturday

The rain ceased during the night and on Saturday morning better weather prevailed. By 11:00 o'clock more than 2,000 visitors had driven in to see the opening of the race.

Williams and Olson were regarded by all as possible winners. A throng followed each man as he sped down the corn rows. Both picked clean and fast and held their respective positions nearly opposite one another throughout the 80-minute period. The corn was wet and the field soggy. These adverse conditions slowed up all the contestants and prevented making any new high records. Williams' arm, which forced him out of the running last year, gave him no trouble this time. Olson was up to his usual speed but he picked cleaner. A large percentage of ears sailed through the air without husks. Olson had learned his lesson for in past years his heavy loads had suffered severely from deduction for husks.

During the contest complaint was made by several bystanders that the gleaners working behind Williams were leaving corn. After an investigation the judges decided that the corn thus gathered should be deducted from William's load. Good sportsmanship on Williams' part nipped in the bud a possible controversy which might have marred the contest. It was thought by Williams' supporters that the corn in question had been gathered elsewhere.

"Indispensable to Our Business"

"The work of the Illinois Agricultural Co-operatives Association is very satisfactory and its statements are complete in every detail," says H. S. Williams, a director in the Woodland Farmers' Co-operative Elevator at Woodland in Iroquois county. "The audits not only show every detail of the business, but from year to year the accounting is done in a way to actually improve the business and correct exorbitant valuations so that at all times the books show the true condition and actual worth of the elevator.

"Timely comments by the auditor and suggestions as to how the profits may be increased and the financial standing of the company strengthened accompanied each report. These pointers from the auditor are very helpful to the board of directors; and when acted upon quite frequently solve a great many problems.

"We consider these reports very valuable for several reasons: (1) they tend to keep the stockholders informed and satisfied, (2) they furnish a guide for action on the part of the directors, and (3) they serve as an incentive to the manager to excel the former year's record. We consider the audit so important as to be indispensable to our business."

Holmes Is Fifth

Harold Holmes, last year's champion, dropped down to fifth place. Orville Welch, the young lad from Piatt county who has been a consistent contender for honors since the first state contest, placed third. Welch is a fast, clean husker and has staying qualities that may eventually make him a state champion. He has invariably been up near the top in former competitive meets.

The contestants and their records are as follows:

Name	County	Total Wt. of Corn	Gleanings	Deduct For Gleanings	Husks		Deduct For Husks	Total Deductions	Net Corn	Bushels	Ears Per Min.
Walter Olson	Knox	2,155	42.5	127.5	7	11/16	79.73	207.23	1,947.27	27.8	39.3
E. Williams	Stark	2,045	40.25	120.75	8	3/16	94.07	214.82	1,830.18	26.14	41.4
Orville Welch	Piatt	1,905	14	42	5	16/16	36.19	78.19	1,826.8	26.09	41.5
Claude Brown	Macon	1,905	27	81	4	5/16	3.81	84.81	1,820.19	26	40.2
H. Holmes	Henry	1,990	47.5	142.5	6	3/16	43.78	186.28	1,803.72	25.76	38.5
Harold Love	Henry	1,855	17.75	53.25	4		None	53.25	1,801.75	25.73	36.6
Verner Rice	Mercer	1,920	40.5	121.5	6	15/16	55.68	177.18	1,742.82	24.9	37.4
H. Johnson	Ford	1,880	29.25	87.75	7	9/16	67.68	155.43	1,724.57	24.63	36.0
Levi Burgess	McLean	1,855	24	72	7	¼	59.36	131.36	1,723.64	24.62	34.5
George Ramm	Hancock	1,880	58.75	176.25	5	15/16	24.44	200.69	1,679.3	23.99	38.3
Theo Tuftie	LaSalle	2,045	43	129	10	15/16	261.76	390.76	1,654.3	23.6	45.5
R. Hedgecock	Iroquois	1,980	59.5	178.5	10	1/16	261.96	380.46	1,599.6	22.8	40.3
Sam Anderson	Logan	1,650	11	33	3	5/16	None	33	1,597	22.8	35.9
Tom Murphy	Rock Island	1,720	45.75	137.25	7	¼	67.08	204.33	1,515.67	21.6	35.7
E. Pearson	Christian	1,540	11	33	10	15/16	235.5	328.5	1,511.5	21.59	38.1

The usual prizes were offered as follows: first prize, $100 and a free trip to the national contest at Fowler, Ind., on Nov. 13; second prize, $50; third prize, $25; fourth prize $15; and fifth prize $10.

An added attraction of the day was a husking demonstration by each contestant on a platform prepared by the Morgan brothers. Several rows of corn had been erected on the platform in an enclosure where the crowd could see the contestants go through their motions.

Radio In Field

Before and after the contest a radio hookup with the Illinois Agricultural Association's amplifier was made out in the alfalfa field from which a specially prepared program from WLS was broadcast to the crowds who had gathered to hear the results. As the records of the contestants came in from the weighers and judges they were announced over the loud speaker system. A cheer went up as the announcement of Elmer Williams' record was made. A few minutes later, however, the Knox county boosters gave voice to their feelings when their favorite son, Walter Olson, took the lead with the winning score of the day —27.8 bushels. Both Olson and Williams planned to enter the national contest in Indiana on November 13.

This was the fifth annual state corn husking contest held in Illinois. The first one took place in Sangamon county in 1924 and subsequently the state events have gone to Montgomery, Stark, Knox, and Henry counties respectively. Williams' former record of 35.8 bushels made two years ago still remains the highest ever recorded in a state contest.

The Henry County Farm Bureau and its members about Galva received much credit for their work in staging the meet.

The new film entitled "Health, Happiness, and Hogs," produced for a wire fence manufacturer at Peoria, has been shown 193 times to 63,271 farmers, writes C. L. Venard, producer of agricultural films at Peoria.

Venard recently finished a film for the Radio Corporation of America.

400,000 Tons of Limestone, 29,000 Phosphate to Oct. 1

MORE than 400,000 tons of limestone were sold and used in Illinois during the first nine months of 1928, says J. R. Bent, director of the limestone-phosphate department. This limestone was produced largely by the 22 companies operating under signed agreements with the Illinois Agricultural Association. To October 1 the two leading rock phosphate companies operating under the I. A. A. agreement sold approximately 29,000 tons in Illinois.

Copies of orders for limestone ordered through Illinois County Farm Bureaus received at headquarters of the Association amounted to more than 4,000 carloads up to October 1. A total of $14,866.30 was remitted to the various counties as a refund collected from the shipping companies. This sum resulted from the 10 cent per ton refund paid by the co-operating companies to the I. A. A.

All rock phosphate shipped from the phosphate plants in Tennessee is sampled and tested by an impartial chemist selected, instructed and supervised by the Illinois Agricultural Association. This man is entirely disconnected from the phosphate company's payroll or interests.

Seven hundred and thirty-one carloads of ground rock phosphate has been sampled in Tennessee since January 1.

A. F. B. F. Prepares for Convention

(Continued from col. 1, page 3)

sent to the nation an adequate picture of the Farm Bureau's varied activities and to consider what organized agriculture can do to improve its economic condition.

In view of the work the Illinois Agricultural Association has done in reducing the tax bill of farmers in this state, the address on "Rational Taxation," by George H. Duncan, New Hampshire tax expert, will have an especial appeal.

Co-operative Marketing

Co-operative marketing will be discussed by several speakers, including C. B. Denman, president, National Live Stock Producers Association, C. O. Moser, president, American Cotton Growers Exchange, and others.

Dr. Charles M. A. Stine, internationally famous scientist, will have an absorbingly interesting story of the wonders wrought by chemistry in developing uses for agricultural wastes, such as cornstalks and oat hulls, and about the opportunities these discoveries promise for increasing farm profits.

Other noted speakers include William Butterworth, Moline manufacturer, and president of the Chamber of Commerce of the United States, Mrs. Cora Wilson Stewart, director of the National Illiteracy Crusade, Virgil Jordan, of the National Industrial Conference Board, Dean A. R. Mann, Cornell University, Dr. Eben Mumford, Michigan State College, and others.

Training School

A National Training School for Farm Bureau executives will be held Friday and Saturday, December 7 and 8. The I. A. A. will send its district organization workers to this school and assist in the program.

Another feature of the week's events will be the Third National Farm Bureau Agricultural Exposition during the main sessions of the convention, on December 10, 11 and 12.

An old-fashioned party will be given all delegates Tuesday evening, December 11, to commemorate the A. F. B. F.'s tenth anniversary. President Thompson will cut the largest birthday cake ever concocted by a Chicago chef. Numerous other social events are scheduled and an unexcelled program of music and other entertainment features has been provided.

Ford Co-ops Do Well

M. S. WINDER, secretary of the American Farm Bureau Federation, and H. L. Hough of the Illinois Agricultural Association spoke at the recent annual meeting of the Ford County Farm Bureau.

The co-operative subsidiaries of the Farm Bureau were all reported to be in good financial condition. Ford county has emphasized commercial projects, which now include the service company handling oil and petroleum products, several co-operative produce marketing associations, and seed corn storage and testing associations.

A New Record

The Illinois experiment station has discovered that soundness of information can be combined with speed in publishing the results of experiments for the benefits of farmers. Staff members claim that this station recently established a new national record for promptness in getting out experimental reports.

The Kosher Strike

WHEN 9,000 Kosher retail butchers (Jewish) in Greater New York recently went on a strike against conditions in the meat trade of that city, Dr. John Mohler, chief of the Bureau of Animal Industry, was dispatched to New York to intercede and arbitrate. The strike which began October 19 ended October 30. In the meantime 2,000,000 consumers went without meat.

"The industrial conflict was unusual in many respects," states Dr. Mohler. "It represented essentially a protest of Kosher butchers against certain trade practices and especially the operation of meat speculators. During the 12 days of the strike no Kosher meat was sold and approximately 2,000,000 Jewish inhabitants of Greater New York were practically without meat."

Solution Found

A series of conferences called by Dr. Mohler showed that the early morning purchase of meats by speculators, while the butchers were necessarily busy serving their customers, was partly responsible for high prices not warranted by normal market conditions. The only manner by which the butchers were able to obtain wholesale cuts of satisfactory quality was by paying prices which the speculators demanded. The designation of a convenient afternoon trading period, which enabled the butchers to be on the market at the same time as other buyers, was the solution to this cause of the strike.

Didn't Know Conditions

The settlement of various other causes was made difficult because many of the participants were unfamiliar with current conditions in livestock production. Dr. Mohler explained the inability of the department to adjust meat prices in response to the strikers' demand, but arranged for the butchers to receive current market quotations as a guide to their purchases. The United States Department of Agriculture's inspection illustrates the effectiveness of the Packers and Stockyards Act which provides for department inquiry and suitable action when there is report of unfair practices or manipulation of prices.

One of the handicaps toward settling the strike was due to the fact that previous discussions of the conditions leading up to the strike appeared almost exclusively in Jewish publications. It was necessary to translate much of the evidence bearing on the problems.

Note: Kosher meat is that slaughtered and inspected by authorized Jewish dignitaries. The animal is never stunned before bleeding. Only the choicest beef animals are used.

The Illinois Agricultural Association transportation department is co-operating with McLean county farmers about Danvers and Stanford in working out a solution to their power line problems.

Fruits and vegetables in storage need ventilation, especially during the first few weeks.

CO-OPERATIVE MARKETING AS IS

"LOWER meat prices to the consumer, higher returns to the livestock producer, and a profitable business to packers and tradesmen engaged in supplying meat can be brought about by the elimination of waste," Dr. John R. Mohler told the Institute of American Meat Packers at Atlantic City recently.

"Great wastes in the livestock and meat business," he said, "are caused by diseased and parasitic conditions in livestock herds."

"Major Transactions in the 1926 December Wheat Future," is the title of a new bulletin recently issued by the U. S. Department of Agriculture. The bulletin states that heavy trading in futures by the leading grain speculators is frequently an important factor in grain price fluctuations. The conclusion is reached "that without the accumulation of long or short lines of millions of bushels by a very few leading speculators, the major swings in price would not have been so large."

Inspections of Canadian wheat to date indicate that the effective supply for bread-making purposes may be no larger than from last year's crop. Frosts seriously damaged the Canadian crop, and dockage is reported to be heavy. Much more wheat than last year is being classed as feed. This fact has an important bearing on the price situation in the United States, because our 42.5 cent tariff is ineffective.

Continued moderate expansion of the dairy industry in the United Stated in view of steadily increasing population and increasing per capita consumption of dairy products appears to be justified, according to Nils A. Olsen, chief of the Bureau of Agricultural Economics.

The Olney co-operative cream station, organized by the Richland County Farm Bureau, had an increase of 23.6 per cent in September, 1928, business over that of September, 1927. The Claremont station in the same county increased its September, 1928, business 14 per cent over that of the same month last year.

The Crawford County Farm Bureau is organizing produce marketing units in several communities of that county. At a recent meeting held at the county court house, representatives from Oblong, Palestine, Hardinville, Porterville, Annapolis, and Robinson trade territory discussed the project under the leadership of Frank Gougler, director of produce marketing for the Illinois Agricultural Association.

Gougler explained that it would be necessary to secure a minimum membership of not less than 125 members per unit owning 500 cows that will produce approximately 75,000 pounds of butterfat annually.

A plan for furnishing life insurance and old age benefits at a low cost has been developed by the California Fruit Growers' Exchange for its employes, in recognition of the loyal services they have rendered during the more than 30 years that the organization has been operating. The management feels that the "Sunkist Provident Plan," as it is called, will result in developing habits of thrift and will bring great satisfaction to the participants.

Employes who have less than five years' service to their credit are covered by group life insurance, the entire premium being paid by the Exchange.

The Exchange pays the premiums on all its insured employes and deducts a portion of the cost from the salary of the employe.

Farmers' co-operative creameries in Nebraska are taking steps toward federating in the interests of economy and efficiency.

The National Association of Marketing Officials will hold their annual meeting in Chicago, December 3-4-5. Many distinguished speakers on co-operative marketing have been scheduled.

Stopping Without Warning

IF THE DRIVER of a vehicle, with knowledge that another is so close behind him that an abrupt stop or slackening of speed will probably result in the rear vehicle colliding with him, and he suddenly and without warning stops or materially lessens his speed, and a collision follows resulting in injury to him, he is guilty of contributory negligence barring recovery.

He would be reimbursed for the car damage, however, if insured in the I. A. A. Auto Insurance Company.

Hail losses of members of the Saskatchewan Municipal Hail Insurance Association totaled $240,222 more in 1927 than in 1926. Rather than increase the rate the Association took $71,000 from its reserves, levying the same crop rate as in 1926. A flat rate of four cents per acre is charged on all farm land, with additional varying crop rates which average 14 cents an acre on land covered by insurance in the amount of $5 an acre. This plan was put in operation in 1924 and is considered an equitable system.

In round figures, 20,000,000 pounds of wool of the 1927 clip, with a sales value of $7,000,000 was marketed through co-operative agencies.

Three-fourths of this amount was marketed by about 20 large-scale or state-wide associations, and one-fourth by more than 70 independent local associations and pools.

The present season will be the fifth that the members of the Farmers' Co-operative Poultry Association, San Angelo, Texas, have been marketing their turkeys co-operatively.

They started out to ship live turkeys to the Texas markets but, after two years of experience, reached the conclusion that if they were to obtain the best results, they would have to kill, dress, pack and deliver at the eastern markets birds in condition for immediate sale. A dressing and packing plant was erected, which has been entirely paid for. Farmers are required to give notice in advance as to the number of birds they wish to market for the Thanksgiving trade and the number for the Christmas trade, then they are assigned days for delivering, these assignments being arranged to keep the plant operating steadily at full capacity. Much of the work in the plant is done by the farmer-members under the direction of farmer-foremen who have been given special training.

About 12 carloads of dressed turkeys are sent to market each fall, this quantity, the management states, represents about 95 per cent of the turkeys produced about San Angelo. Each member of the association signs a seven-year contract which covers all his poultry products. So far, with the exception of one season when eggs were marketed, the association has confined its activity to the marketing of the turkeys.

Officials of the Saskatchewan Co-operative Poultry Producers, Ltd., are planning for shipping dressed poultry from the province in carlots. They plan to send representatives into districts where poultry is raised in sufficient quantities to warrant carlot shipments and these representatives, in co-operation with the pool secretary, are to instruct the producers on all matters of recording, weighing, packing, and shipping. In those communities where there is enough poultry for carlot shipping, arrangements will be made to conduct a killing and dressing demonstration.

The association will furnish all necessary boxes, paper wrappers, etc., and an official of the government will grade the fowls as they are loaded. Pool representatives will supervise the packing, loading, weighing, and paying, but the actual work is to be done by the producers themselves, as an educational proposition.

Special service will be provided for producers in districts where carlots are not practicable. Growers will receive the dressing bulletin and will be instructed as to where and when they can ship their poultry for sale through the pool. Considerable quantities were assembled in this way last season and the experience gained will be of value this year.

The capital required by the Co-operative Growers' Association, Inc., Beverly, N. Y., has been obtained through the issuing of bonds and of certificates of indebtedness. Six per cent bonds in the sum of $12,000 have been issued, secured by a first mortgage. In addition a portion of the yearly deduction from sales is converted into five-year certificates of indebtedness, another portion is set aside as a reserve for contingencies, and a portion is added to surplus. On January 1, last, bonds outstanding amounted to $9,800, outstanding certificates of indebtedness to $32,876, reserve for contingencies to $4,000, and surplus to $10,947.

This association, formed in 1918, is engaged in marketing peaches, apples, pears, cherries, peas, beans, lima beans, and corn; and in purchasing for its members, packages, spraying material, seeds, fertilizers, etc. Sales of farm products amounted to $923,310 in 1927, and sales of farm supplies to $168,112, making a total business for the year of $1,091,422.

The 11,400 active farmers' co-operative associations transacted business to the amount of $2,300,000,000 in the 1927 marketing season. This figure is less by $100,000,000 than the total business for the 10,803 associations listed by the U. S. Department of Agriculture in 1925. Had prices of farm products, and the prices of supplies bought by farmers, been as high in 1927 as in 1925 the total business of the co-operatives would have been in excess of $2,500,000,000.

The largest amount of business credited to any one group was $680,000,000, this being the sum of the transactions by the associations handling grain. The associations marketing dairy products had a total business of $620,000,000; the livestock associations, $320,000,000; the fruit and vegetable associations, $300,000,000; the associations marketing cotton, $97,000,000; the poultry and egg association, $40,000,000; the nut marketing associations, $14,600,000; tobacco associations, $22,000,000; and the associations handling wool, $7,000,000. The business of the associations selling miscellaneous products and buying farm supplies amounted to nearly $200,000,000.

The Illinois Agricultural Co-operative Association announces the appointment of J. P. Adams as resident auditor in charge of the Champaign office, effective November 12, 1928.

Adams was a student of the College of Commerce, University of Illinois, for three years. He is a graduate of the University of Indiana where he specialized in accounting. He was formerly a member of the staff of Haskins & Sells, certified public accountants, at their Detroit office.

The Illinois Agricultural Mutual Insurance Company reported 10,599 automobile policies in force on November 15.

Total assets of the company as of October 31 were $22,158.41.

"Some farmers like to milk so well they keep ten poor cows rather than five good ones," says "Ye Farme Gossipe" of Clemson College, South Carolina.

For land's sake lime your soil!

Read What Canadian Farmers Have Done in Selling Co-operatively

Get Control of Terminal Agencies and Handle Over Half Wheat Produced

CANADIAN farmers have gradually developed a group of co-operatives which co-ordinate local and terminal elevator facilities with centralized selling, according to a comprehensive bulletin by J. F. Booth, published recently by the United States Department of Agriculture.

The independent local unit has disappeared. Several large-scale co-operative associations market more than one-half of the grain crop of western Canada.

This large volume of grain is at present handled by the Canadian Co-operative Wheat Producers Ltd., known commonly as the Central Selling Agency, which handles the grain of the Manitoba, Saskatchewan, and Alberta wheat pools, also that of the United Grain Growers Ltd., which combines the activities formerly carried on by the Grain Growers Grain Company Ltd. and the Alberta Farmers Co-operative Elevator Company Ltd.

Handled 41,000,000 Bushels

The United Grain Growers Ltd. has 35,000 farmer shareholders. It operates more than 400 country elevators and several large terminal elevators. In 1926 it handled 41,000,000 bushels. Through the parent organization and several subsidiaries the company also handles livestock, farm supplies, and insurance. A farm journal with a circulation exceeding 100,000 is published. The company follows the general principles of operation followed by the trade. It buys from farmers or handles on consignment. It pays current prices and does not pool returns. Grain is handled for both members and non-members. The company is strong financially with reserves aggregating nearly $4,000,000.

140,000 In Pools

The western Canadian wheat pools were organized in 1923 and 1924 and combined to form their central selling agency in 1924. Their total membership is 140,000 and the volume of grain handled exceeds 200,000,000 bushels annually. The members are all signed on five-year contracts.

The Province of Ontario recently organized a grain pool which now has over 9000 members. The Ontario pool, likewise, will sell through the central selling agency.

The pools operate more than 900 country elevators and terminal elevators with capacity exceeding 20,000,000 bushels. The grain is sold direct to domestic and foreign mills and other users of grain both at home and abroad. They have branch offices in Canada and in Europe, with agency connections in most importing countries. Returns from grain sales are pooled among growers on the basis of grades of grain each member delivers.

Deduct 2 Cents Bushel

The pools are permitted, under their contracts, to deduct two cents per bushel for an elevator reserve and up to one per cent of the gross sales value for commercial reserves. These deductions run into millions of dollars.

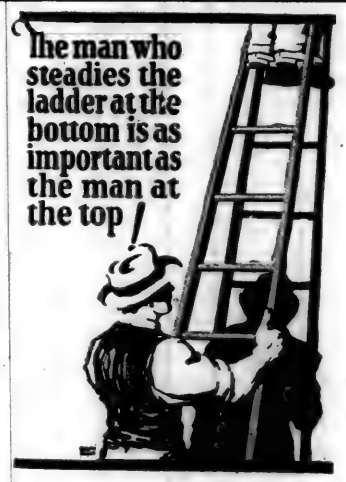
The bulletin cites the differences in co-operative methods of selling grain in the United States and Canada and the reasons for the greater success of centralized efforts in the Dominion.

Crop Loss from Weather

THE United States Weather Bureau estimates that the average farmer loses from one-sixth to one-third of his crop every year as a result of drought, excessive moisture, hail, storms, and other forms of bad weather. The wheat farmer, for example, has his average yield reduced 23 per cent by unfavorable weather; the barley grower fares likewise, while the corn grower loses an average of 24 per cent each year. Hay crops are reduced 17 per cent, apples 33 1/3 per cent, cotton 22 per cent, oats 19 per cent, tobacco 16 per cent, and rice 15 per cent.

Right of Way

AN AUTOMOBILE which enters the intersection of two streets first is, generally speaking, entitled to the right of way; and it is the duty of a motorist approaching at right angles to avoid colliding therewith. And in determining whether he can safely cross, he need not anticipate a sudden violation of the law of the road by an approaching driver. While a motorist may assume that others will exercise due care, he cannot for that reason omit any of the care which the law requires of him.



A statute relating to the right of way at intersections, makes no exception as to drivers who sound their horns. For example, one approaching a state hard road must stop and give the driver on the hard road the right-of-way.

When a car having the right of way arrives at an intersection first, the car approaching on the other street must accord the other such right.

Failure to yield the right of way to a driver entitled thereto is negligence.

Protect yourself against reckless drivers with insurance in your own company. Your County Farm Bureau office will give you full information.

Eighteen hundred carloads of peaches were shipped out of Illinois in 1928. Approximately 4500 carloads were sold by peach growers locally to automobile and truck drivers.

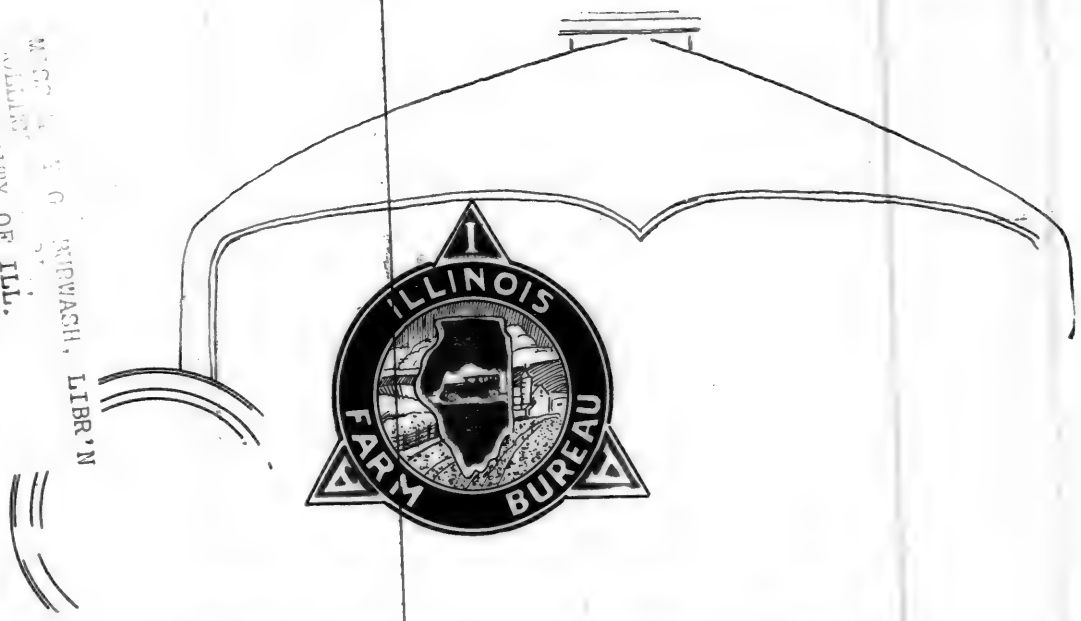
¶ The Farmers Mutual Reinsurance Co. is like the man who steadies the ladder.

¶ It is a large state-wide company organized to protect the local township and and country fire and windstorm mutuals against staggering losses, through reinsurance.

¶ It is designed to carry large risks which the local company should not carry.

¶ It will carry your risk at cost, regardless of value. The company does not operate for profit.

¶ It does not compete with local mutuals, it supplements them.



¶ It provides a way for farmers to secure all their fire, windstorm, and tornado insurance on a mutual basis.

Complete the Waterway, Establish Joint Rates M. V. A. Urges

Illinois to Have 9-Foot Channel From Chicago to Mississippi River

THE early establishment of joint rail and water haul rates in line with provisions in the Denison bill was urged at the recent convention of the Mississippi Valley Association, St. Louis, November 26-27.

Robt. A. Cowles

With much of the work of deepening the inland waterway system already launched or completed, attention is being directed toward the building of municipal dock, and terminal facilities at the principal ports along the Mississippi and its tributaries. Full benefit of the waterways system cannot be obtained by farmers and other shippers until terminal facilities are established and joint rail and water haul rates are brought into being by the Interstate Commerce Commission. All attention is being centered upon these adjuncts which are necessary if waterway transportation is to be of greatest service to the middle west.

Robert A. Cowles, treasurer of the Illinois Agricultural Association and a member of the Illinois Waterway Terminals Committee, represented the I. A. A. at the convention. Speakers of nation-wide prominence participated in the convention.

In the resolutions adopted the M. V. A. states that the system consists of more than 70 projects having a total length of 13,391.42 miles. The sum of $452,270,217 has already been expended or allotted for construction. A comparatively small sum is required for the completion of the system.

Said the resolutions: "The Mississippi river system should be considered in its entirety and as one project with a view to standardization of channel depths, locks, terminals and floating equipment. The main trunk lines should be standardized on the basis of a channel depth of not less than nine feet. These should include the Mississippi river from Minneapolis and St. Paul to New Orleans as the north and south artery, and the Ohio and Missouri rivers as the east and west trunk line. The authorized improvement of the waterways from Chicago to the Mississippi river via the Sanitary Canal and the Illinois river on the basis of nine feet, . . . should be improved upon a standardized basis without delay."

"We direct the attention of all interested communities located on the Mississippi river system to the necessity, as a condition precedent to their enjoyment of the benefits of water transportation, of the construction and maintenance of terminals.

"That industries located adjacent to waterways may not be deprived of their use through lack of connecting rail facilities, we recommend that the Interstate Commerce Act be so amended as to permit, without application to the Commission for specific authority, the construction, acquisition, or operation of new lines of railroad not exceeding 20 miles in length, located wholly within one state where such will furnish railroad facilities for ports, industries, industrial development, or connect with state, county, municipal, or otherwise publicly-owned railroads."

Approval of further flood control efforts was given in other resolutions. The establishment of an American Merchant Marine maintained and operated in the interests of the country at large, was advocated. The Association prefers that such ships eventually be owned and operated by private companies rather than by the government. But until such time as private capital and ownership are able to compete successfully with foreign vessels, the Association favors a continuance of operations by the United States Shipping Board, supported by adequate congressional appropriations.

The Association went on record against the creation of a department of public works and favored the continuation of present building operations by the Corps of Engineers of the United States Army.

William R. Dawes, former president of the Chicago Association of Commerce, was elected president of the Mississippi Valley Association to succeed James E. Smith, of St. Louis.

NOTICE OF ANNUAL MEETING
of
Illinois Agricultural Mutual Insurance Company

TAKE notice that the annual meeting of the members of the Illinois Agricultural Mutual Insurance Company will be held on Tuesday, the 29th day of January, 1929, at the hour of 1:00 o'clock P. M., in the Assembly Room, on the second floor, at the Elks Club, Danville, Illinois, for the purpose of the election of directors, of receiving, and, if approved, confirming the report of the Board of Directors of the company for the fiscal year ending December 31, 1928; and to consider, and, if approved, ratifying and confirming all the acts and proceedings of the Board of Directors done and taken since the last annual meeting of the members of the company; and for the transaction of such further and other business as may properly come before the meeting.

Dated at Chicago, Illinois, December 7, 1928.

Geo A Fox

Secretary.

Horse and Buggy Has as Much Right to Road as Automobiles

Auto Drivers Must Use Higher Degree of Care

DRIVERS of automobiles and of other vehicles and of animals have equal rights in the highways and must, aside from statute or ordinance changing the rule, use ordinary or reasonable care for the safety of themselves and of others.

The degree of care and caution to be used in each case depends upon the character of the vehicle used and the locality and surroundings in which it is being used. The more dangerous the character of the vehicle and the greater its liability to do injury to others, the higher is the degree of care and caution to be exercised by the person charged with the duty of its operation.

There is no imperative duty resting upon pedestrians or upon travelers in a horse-drawn vehicle on public highways to keep a continuous lookout for automobiles, under penalty that if they fail to do so and are injured contributory negligence will be conclusively imputed to them. The mere fact that automobiles are run by motor power and may be operated at a dangerous and high rate of speed gives them no superior rights on the highway over other vehicles, no more so than would the fact that one driving a race horse gives such driver superior rights on the highway over his less fortunate neighbor who is pursuing his journey behind a slower horse.

It has been held that if the driver of a team was sleeping or nodding when an automobile collided with his vehicle when it attempted to pass him going in the same direction, at the same time that a vehicle was passing in the opposite direction, he was guilty of contributory negligence.

Evidence that defendant's automobile, at the time it collided with another vehicle, was being driven at a dangerous rate of speed, without lights, on a dark night, and without sounding the horn, and that the chauffeur turned to the left when meeting the other vehicle instead of to the right, contrary to statute, was held to constitute a prima facie case of negligence on the part of the defendant.

While policy holders in the Illinois Agricultural Mutual Insurance Co. are as a group careful drivers hence preferred risks, they are nevertheless protected against personal liability, loss and damages by a full coverage policy if collision results from their negligence in an unguarded moment.

Gov. Lowden's First Public Statement Since Nov. Election

Suggests Farm Legislation Await Incoming President, Cooperate With Hoover

A LETTER addressed to President Earl C. Smith by the Hon. Frank O. Lowden of Oregon was read by Mr. Smith before the annual convention of the American Farm Bureau Federation, Chicago, last week. The letter bore the first public utterance of Mr. Lowden since the election.

Mr. Smith mounted the platform directly after the principal resolution dealing with the farm legislative situation was read. In introducing the subject he called attention to the fact that every great struggle for economic freedom or justice has developed individuals who have become martyrs to the cause. "The fight initiated by the Farm Bureau organization of America in behalf of a national policy for agriculture," said Mr. Smith, "is no exception in this respect.

Frank O. Lowden

"The I. A. A. has reason to feel very proud," he said, "that its most distinguished member perhaps was more responsible than any other citizen in the United States for the consideration given the farm problem during the past few years and more particularly in recent months. He buried all personal ambition in behalf of the cause he held most closely to his heart."

Mr. Lowden's letter which follows was written in reply to an invitation to address the 14th annual meeting of the I. A. A. at Danville the latter part of January.

The Letter

FRANK O. LOWDEN,
SINNISSIPPI FARM,
OREGON, ILLINOIS

December 7, 1928.

My dear Mr. Smith:

Upon my return home after a brief absence I find your recent letter.

I cannot tell you how greatly I appreciate your invitation, for there is no body of men and women in the United States before whom I would rather speak than the Illinois Agricultural Association. It so happens, however, that we are planning to sail from New York on January 3 for a trip abroad. I regret more than I can say that this will deprive me of the very great pleasure of being with you at your annual meeting.

I should also have greatly appreciated this as a fitting opportunity to say some things that I have had in my mind with reference to the present situation so far as possible legislation is concerned.

There never was a presidential campaign I think in which the problems of agriculture played so conspicuous a part as in the campaign just closed. The candidates of the two chief parties each recognized the gravity and importance of the problems.

A perfectly clean cut issue was developed, however, as to remedies. Both proposed a federal farm board. Mr. Hoover would have the board set up a stabilization corporation, with liberal advances from the Government, the purpose of which would be to stabilize the prices of farm products. Such corporation would, of course, attempt to handle seasonal and occasional surpluses, with the hope that they could prevent the demoralization of the market caused by such surpluses from time to time. He, however, frankly rejected the idea that the cost to the equalization corporation of thus caring for the surplus should be distributed over the

(Continued on page 8)

TO DANVILLE JAN. 29-30-31

The program for our 14th Annual Meeting will be presented in detail in the January RECORD. The dates are Jan. 29-30-31, the place, Danville. Affiliated organizations will meet on Tuesday, the 29th. Make reservations for hotel accommodations and tickets with Otis Kercher, Farm Bureau office, Danville AT ONCE. Watch for further announcements.

Early I. A. A. Leaders Coming To Convention Danville, Jan. 29-30-31

Visitors and Delegates Should Make Reservations For Accommodations Now

THE Hotel Wolford will be headquarters for the 14th annual convention of the Illinois Agricultural Association at Danville, January 30 and 31.

Following a recent conference in Danville between President Earl C. Smith, Treasurer Robert A. Cowles, Farm Adviser Otis Kercher, and officers of the local Chamber of Commerce, the committee on local arrangements was set up with Otis Kercher as chairman. Official delegates and Farm Bureau members are being requested to make early reservations for rooms, and banquet and luncheon tickets with Chairman Kercher, in care of the Vermilion County Farm Bureau, Danville.

Pioneers Invited

While the convention in January will be the 14th I. A. A. annual meeting, it will be the 10th anniversary of the I. A. A.'s reorganization on its present basis. In commemoration of this event, the early officers, directors, and pioneers in the movement, which resulted in the formation of the strongest state farm organization in America, will be invited as guests.

"We are now realizing the fruits of the early efforts of these pioneers," stated President Smith. "It is fitting that they should be recognized."

Speakers are being selected to discuss the major questions and problems of particular interest to farmers of to-day. Speakers' names will be announced later. Entertainment and fun will be provided by the Danville Chamber of Commerce.

The annual banquet will be held on the evening of January 30 and the great luncheon at noon the next day. Both events will take place in Danville's mammoth armory.

Four Groups Meet

Tuesday, January 29, will be devoted to the annual meetings of four affiliated organizations, including the Illinois Agricultural Mutual Insur-

ance Company, the Illinois Agricultural Cooperatives Association, the Illinois Farm Bureau Baseball League, and the Illinois Farm Bureau Serum Association. Officers and directors of the State Baseball League are planning a session on Monday night preparatory to the meeting the following day. Sectional conferences on cooperative marketing, organization and publicity, business service, home and community, and public relations will be held concurrently on Wednesday afternoon, January 30. All business sessions will be held in the Terrace Theatre.

A complimentary dinner and conference for Farm Bureau presidents, farm advisers, I. A. A. officers and staff members is scheduled for Tuesday evening, January 29.

Early Officers

Among the early leaders who will be invited as guests of the Association are: Sam H. Thompson of Quincy; Howard Leonard, Eureka; Herman Danforth, St. Louis; Harvey J. Sconce, Sidell; J. W. Kirkton, J. C. Sailor, Cissna Park; George A. Fox, Sycamore; Dave Thompson, C. V. Gregory, Dean H. W. Mumford, Z. M. Holmes, and a host of others.

The meeting is expected to be a mecca for all the new and old Farm Bureau leaders of the state. There will be much "back-slapping" and renewing old, old friendships. It will be a place where early friends and leaders of the movement can meet and swap stories about "way back when." It will be a time for happy memories of the early days of the Farm Bureau movement in Illinois. Every organized county in Illinois will be represented.

Accommodations Ample

The ease of accessibility of Danville both by train and hard road is expected to bring out one of the largest gatherings held in recent years. Several delegations are considering making the trip in specially chartered motor busses. Ample hotel accommodations have been assured by the Danville Chamber of Commerce, but it is urgent that reservations be made early. The overflow crowd will be housed in private homes if necessary.

Prairie Farmer's radio station WLS has offered its facilities to broadcast the convention. If proper arrangements can be made a special wire will be engaged between the broadcasting station at Crete and Danville for the principal events of the session.

Invite the Women

Three hundred men and women attended the dinner and annual meeting of the Coles County Farm Bureau at Charleston recently.

"It was the best annual meeting ever held in the county," declared J. L. Whisnand, who represents the 19th district on the I. A. A. Executive Committee.

L. J. Dickinson

Dickinson Tells Why Farm Legislation Should Await Hoover

Declares Special Session Is Place To Frame and Pass Surplus Control Bill

DECLARING that farm legislation should await the inauguration of the incoming President, Congressman L. J. Dickison of Iowa stated emphatically that everyone participating in the presidential campaign would be embarrassed if the short session should pass farm legislation, the Hoover program should be ignored, and the personnel of the new administration should be deprived of directing the details by which the pre-election promises are to be enacted into legislation.

"The wording of the new bill will be all important," said Dickinson. "The authority given the Board is to be all controlling. The conditions upon which federal financing can be used is far reaching. The very details of the legislative authority granted is the yard stick by which the benefits of the legislation can be measured. Those interested have every faith that President-Elect Hoover will set forth these provisions in plain definite legislative provisions that cannot be misunderstood."

Wants Special Session

Congressman Dickinson seemed to think that a much better agricultural bill could be written in the special session promised by President-Elect Hoover, directly after the latter's inauguration. He believes that Mr. Hoover should be allowed to counsel with farm leaders in congress, that his own ideas may be incorporated in the bill finally submitted for passage. "Experience has shown us," he said, "that the surest way to write an agricultural law on the statute books is to join with the administration in the program embodying the enactment of such a law as can be mutually agreed upon and thereby procure administration aid in both the legislative approval and the signing of the measure."

Quotes From Record

The Congressman quoted freely from the editorial in the October I. A. A. RECORD. "The Illinois RECORD can proudly say," said Dickinson: " 'Never before in the history of the United States was agriculture given so much consideration in the campaigns of two political parties. Never before in the history of the country were such far-reaching declarations and commitments made by presidential nominees. From this point of view it was a victory for the American farmer. Organized agriculture had done its job and done it well.'

"In his acceptance speech, the successful candidate, Mr. Hoover, said: 'The most urgent economic problem in our nation today is in agriculture. It must be solved if we are to bring prosperity and contentment to one-third of our people directly and to all of our people indirectly. We have pledged ourselves to find a solution . . .' "

Speech Well Received

Congressman Dickinson's speech was well received. There seemed to be general agreement that agricultural legislation should await the incoming President who so definitely committed himself on this point during the campaign.

Dickinson quoted freely from President-Elect Hoover's campaign speeches. He declared that "on general principles the plain duty of an outgoing official is to leave all policy-fixing legislation to his successor, for the incoming official is entitled to an unobstructed field.

"Then the farm relief program will be accepted from the new administration by the farming population of the country, with more confidence," he continued, "and a better spirit of co-operation from the new officials would be forthcoming, and the charge could not be made that the officials in power had failed to keep the faith."

Dickinson called attention to the changes in present economic conditions pertaining to agriculture. "The farming interest," he said, "must prepare itself to meet new conditions. It is my belief that changed conditions on the farm will be met by the farmers themselves. Beyond the control of the farmers and outside of his front gate are legislative policies of state and nation vitally affecting the farmers' interest."

Still Investigating

The Wabash Valley telephone case in which the I. A. A. transportation department and southeastern Illinois Farm Bureaus are representing the interests of rural subscribers is still under investigation.

The Champaign County Milk Producers' Association will begin operations on January 1, 1929.

Sam Thompson Calls Hoover Agricultural Statement Heartening

If A Better Way Can Be Found To Solve Problem We'll Support It

QUOTING freely from the campaign speeches of President-Elect Hoover and calling special attention to his promise to "call a special session in order that we might speedily arrive at a determination of the question before the next harvest" Sam H. Thompson, president of the American Farm Bureau Federation declared that this statement is the most heartening thing that has happened since we waged our battle for equality for agriculture.

Sam H. Thompson

"At last the agricultural problem has become the nation's problem," said Mr. Thompson. "We have always contended and now contend, that the American policy of protection should be made just as effective for agriculture as it has been for industry and labor, and thus assure the farmer an American price for the products of his labor, although it may be necessary to sell a portion of that product abroad.

We Will Cooperate

"It is well known that we have sponsored and supported the measures that we sincerely felt would achieve that purpose, but now, with the forthcoming administration offering a broad program that will give agriculture the benefits of the protective system and achieve for agriculture a place on a basis of equality with industry, labor and finance, it would seem wisdom, on our part, that we hold ourselves in readiness to consider on their merits such measures as will be advanced from time to time, and that we should allow opportunity for the best minds in America to study this program, because we are told in the Good Book that 'in a multitude of counsel there is wisdom.'

"If after mature thought and deliberation, a better way has been found that will do this job, then we should support the better way and see that it is enacted into law. This is of such vital importance to the welfare of thirty million farm people first, and to the nation as a whole, that the way it is accomplished is insignificant in comparison to the importance of having it done well and effectively."

Tax Gathering Proposed

Mr. Thompson's speech, which dealt largely with the present economic situation in agriculture, the ever changing problems brought on by changing habits and new alignments, was highly commended by journalists, observers, and delegates attending the convention.

Mr. Thompson quoted freely from the National Industrial Conference Board report. He stressed the need for a new deal on taxation and assessment of taxes according to ability to pay. He stated that the Federation expects to inaugurate an effective nation-wide campaign for the equalization of taxes in the coming year. To this end a conference of delegates from each state will be called to consider this question early in 1929. He dwelled at length on the goal of the Farm Bureau program which in the last analysis is better farm homes and a satisfactory standard of living for the countryman.

Keeping Christmas

THERE is a better thing than the observance of Christmas Day, and that is, keeping Christmas. Are you willing to forget what you have done for other people, and to remember what other people have done for you; to ignore what the world owes you, and to think what you owe the world; to put your rights in the background, and your duties in the middle distance, and your chances to do a little more than your duty in the foreground; to see that your fellowmen are just as real as you are, and try to look behind their faces to their hearts, hungry for joy; to own that probably the only good reason for your existence is not what you are going to get out of life, but what you are going to give to life; to close your book of complaints against the management of the universe, and look around for a place where you can sow a few seeds of happiness—are you willing to do these things even for a day? Then you can keep Christmas.

—HENRY VAN DYKE.

Champaign Market Sells $366,667.07

The total sales of the farmers marketed at Champaign during 1928 amounted to $366,667.07. Among the farm commodities sold direct to consumers were chickens, geese, butter, eggs, sausage, other meats, pastries, fruits, and vegetables.

A. F. B. F. Stands By Former Policies But Pledges Cooperation

Resolutions Adopted With Little Important Discussion

A STRONG resolution reiterating the faith of the American Farm Bureau Federation in its previous policies with reference to surplus control legislation, but expressing a willingness to cooperate with President-Elect Hoover in any plan he proposes that promises to make the American protective system apply to agriculture, was passed without a dissenting vote on the last day of the American Farm Bureau convention, held in Chicago last week.

There were two major resolutions; one dealing with the question of a national policy for agriculture, the other with the tariff. Since both are of particular importance they are presented in detail as follows:

A National Policy for Agriculture

"The control of agricultural surpluses is the dominant economic question which faces us at the present time. This problem has become a national issue and is not of concern alone to agriculture.

"We reiterate the principles for which we have striven in the past to remove the effects of surpluses which, by imposing upon us a world price rather than an American price and by making the tariff largely without benefit to the producers of farm crops, have in the past and will in the future, if continued, make it impossible to maintain the American standard of living upon our farms.

"The questions of surplus control, seasonal and otherwise, for their proper solution require that the entire crop be brought under the regulation of efficient marketing and distribution which is too great a task for our present cooperative commodity marketing associations of themselves to accomplish. Failures in cooperative marketing have occurred mostly because it has proven to be difficult and in most cases impossible to acquire control of the whole crop. This has resulted in a small part of the crop, produced by a small fraction of the total producers, being required to bear the burden of surplus control and distribution for the entire production; and has made it impossible to require all portions of the crop to share in the cost of bringing the crop into the American Protective System. Tariffs on farm crops, however, are not substitutes for surplus control legislation, and the partially ineffective on crops which produce surpluses. Neither does acreage regulation, by governmental mandate or by voluntary agreement, guarantee control of surplus.

"Legislation must be adopted to make the tariff effective on surplus producing crops using cooperative marketing associations as the instru-

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Edited by Department of Information, E. G. Thiem, Director, 608 South Dearborn Street, Chicago, Illinois. Entered as second-class matter October 20, 1925, at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Accepted for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the ILLINOIS AGRICULTURAL ASSOCIATION RECORD. Postmaster: In returning an uncalled for or missent copy please indicate key number on address as is required by law.

Only Half Sold

ONE of the weaknesses of the Farm Bureau movement in Illinois is that Farm Bureau service is only half sold. Even our members are not aware of the aid the organization has to offer. When this service is forcibly revealed and emphasized, requests for help are proportionately increased.

Early this fall our director of transportation addressed the annual meeting of one of the southeastern County Farm Bureaus. In his talk the I. A. A. representative merely called attention to the service available from his department. He told of the contacts the department had with public utilities and agencies which serve farmers.

Prior to that time there had been only periodic requests for transportation service from that county. Within the next few weeks, 10 different calls for help, some involving individual cases and others involving entire communities, were received. These included freight loss and damage claims, fence repair and right-of-way disputes, state highway culvert complaint, dangerous crossing complaint, request for information and advice on contracts, claim against railroad for wrecking auto, and an appeal for aid from telephone subscribers in one section of the county because of poor service.

The farm adviser of that county in a recent letter said: "I believe that your talk at our annual meeting went home to our people out on the farms of this county for there has been about a 1000 per cent increase in requests for service from your department during the past two months."

A Candid Analysis

THE candid analysis of the agricultural situation presented by Economist Virgil Jordan before the American Farm Bureau Federation convention last week must have been a sharp blow to the farm prosperity salesmen from whom we have heard so much of late.

Said Jordan, "I must emphatically challenge the view that there has been any fundamental improvement in the economic position of American agriculture during the past six years. The official statistics of the Department of Agriculture . . . . prove this up to the hilt."

We take no especial delight in stating that agriculture as a whole is a long ways from prosperity's door. But the ostrich does not better his plight by sticking his head in the sand. He would do better to face the enemy and use such weapons as he has to protect himself.

Two Ways of Self Help

DEFINITE accomplishment has marked the path the Farm Bureau has trod in Illinois. One cannot review the Farm Bureaus' and I. A. A.'s activities during 1928 without concluding that the results justify the effort and money expended. A summary of the year's work will appear in the RECORD next month.

Certain emphasis during recent years has been given to savings, that is to making the farmer's dollar go farther. Some of our friendly critics have intimated that we are getting out of our field by so doing. Mutual insurance and co-operative buying and selling agencies have been frowned upon by the opposition, yet such service is demanded and widely appreciated by farmers. It has been instrumental in giving stability to organized agriculture in Illinois. The I. A. A. contends that it is just as necessary that hard earned money be spent wisely and carefully after receiving it as it is to increase the income. It is equally as important to reduce costs of production as it is to increase prices. A profitless business can be improved by both means.

Our efforts of a business nature are predicated upon the belief that we can serve ourselves through cooperation more efficiently and at less cost than can private enterprises. When this ceases to be true such activities will be abandoned. The greatest possibilities for improving the farmer's financial condition undoubtedly lie in the direction of securing a larger share of the consumer's dollar and an American price for farm products. But thinking farmers will never cease to use every means to cut costs of production. That is the surest road to financial independence.

The Golden Calf

THE story of the seven dollar a pound baby beef club calf fed by Clarence Goecke of Iowa is likely to give great impetus to 4-H club work. The income approximating $10,000 brought by "Dick" to his youthful owner represents a small fortune. The money side of club projects is important but far greater are the moral qualities and business training developed by the successful handling of such enterprises.

The I. A. A. and the Farm Bureaus are deeply interested in the farm boys and girls of Illinois for the future of Illinois agriculture depends on them. Perhaps no influence outside of home and school is working so assiduously toward developing leadership and business sense in the farmers of the future as the 4-H club. Boys and girls are the most important crop on the farm. As such they will bear careful and painstaking cultivation. In honoring the boy and girl club champions at its annual dinner for the Illinois winners the Association seeks to encourage this noble activity.

"IT WAS a pleasure to listen to your radio talk on the I. A. A. farm program from Station WJJD, Chicago, recently," wrote L. W. Solsmon of the Haddon Township Farm Bureau Shipping Association in southern Indiana, to C. G. Randell of the Bureau of Agricultural Economics, Washington, who spoke a short time ago on the I. A. A. program.

"At this shipping point the motor truck is making inroads on the Shipping Association," continued Solsmon, "with probably no more returned for the livestock marketed."

If you want the livestock markets direct from the Chicago Producers tune in on WJJD, Mooseheart, daily at 12:30 p. m. The I. A. A. radio program begins with a review of the Chicago market. Each Friday a representative of the Producers' reviews the market for the week and gives the outlook for the future. Latest economic information, farm news, and talks on the business interests of farmers feature the daily program.

Station WJJD operates on a low wave length, 254 meters, using 20,000 watts by authority of the Federal Radio Commission. Interference with other stations has been reported from some localities but this is being cleared up as rapidly as possible. Good daylight reception is reported from Washington, D. C., according to C. A. Howell, director of the station.

Station WLS has offered to broadcast the I. A. A. annual meeting at Danville Jan. 30-31, if necessary arrangements can be made for securing a private wire.

Reorganize for Profit

MARKED reorganization of farm production plans and the adjustment of the marketing system to changing economic conditions during the past year are reported by Nils A. Olsen, chief of the Bureau of Agricultural Economics.

"Many sections have reorganized their farm activities on a more profitable basis," declared Mr. Olsen. "State and local agricultural workers have joined in in assisting farmers to find the most profitable combination of farm enterprsies under varying conditions."

The St. Clair County Farm Bureau reports total assets of $13,114.40. A nest egg of $7,500 has been put away in real estate mortgage notes. Net worth on Nov. 7, 1928, was $13,109.40.

Annual Meeting Speaker

CHRIS L. CHRISTENSEN

CHRIS L. CHRISTENSEN, director of the Division of Co-operative Marketing, will address the marketing conference at the coming annual meeting of the I. A. A., Danville, January 30-31, 1929. Professor Christensen was reared on a farm near Minden, Nebraska, graduated from the State University, and later did graduate work in economics, marketing, and business administration at the University of Copenhagen, Denmark, and also at Harvard University of Cambridge, Mass.

Stands By Policies

(Continued from page 5)

ments for marketing not only the surplus but all portions of our farm crops, and containing definite checks and penalties upon over-production. This legislation must be of a nature which does not subsidize agriculture.

"It is recognized generally that surplus control legislation and agricultural tariffs are companion measures, each exerting a long-time influence. Emergency action upon either measure is not sought by us since a national policy for agriculture cannot be founded on emergency treatments. These measures are inseparable and cannot be made major features of the second session of the 70th congress since time is not available in a short session of congress adequately to correlate and dispose of these subjects in the proper manner. Both such major legislative projects should be considered at an extra session of the 71st congress. In this we are given assurance by the promise of our President-Elect who said: 'So far as my own abilities may be of service, I dedicate them to help secure prosperity and contentment in that industry where I and my forefathers were born and nearly all my family still obtain their livelihood.'

"We devotedly are seeking to solve these problems as a basis upon which our national agricultural policy may be founded. While we have been nothing up to this time which would cause us to recede from our former position, we are willing to compare legislation which has received our support in the past with that proposed by any other organization. We are also willing to consider these subjects with the forthcoming national administration from time to time to find, if possible, a better way than we have heretofore supported, of effectuating adequate control of agricultural surpluses, of protecting and advancing cooperative commodity marketing, and of establishing on our farms the benefits of the American Protective System, all of which secures that American standard of living which agriculture and industry alike desire.

Tariff

"The cries of the last 10 years have brought all citizens to realize that agriculture in our nation is facing conditions similar to those which existed in England when the Corn Laws were repealed, since which time farmers in that country have striven against insurmountable odds. Tariffs are international issues and have for farmers in the United States constantly increasing world-wide significance. International loans by a creditor nation such as ours has come to be contain no promise of benefit to agriculture.

"Rates of duty on foreign-grown farm commodities which seek markets in our country must be adequate to permit our farmers to enjoy that profit which guarantees the American standard of living. Various commodities which are directly or indirectly competitive with our domestic farm crops should carry high rates of duty. The rates of duty should be based on the value of farm crops to the American producers thereof and should be of such nature that as the value increases the rate of duty automatically will increase.

"It is indispensably necessary that flexibility be provided in tariff rates no matter how accurately such rates may be estimated in the writing of a tariff act. Economic conditions change, which require an elasticity which will permit corresponding changes in the rates of duty. There must be continuously in the federal government a tariff commission under the administration of which this elasticity can be secured. This commission should be non-partisan and the members thereof should be appointed for such a term of years as will give continuity in the carrying out of the policies of our tariff laws and will secure eventually scientific and economic revision of tariff rates rather than revision of a political nature which has been up to the present time too much in evidence."

PRODUCE MARKETING

By Frank Gougler

PRODUCE marketing units were completed recently at Oblong and Robinson in Crawford County. Directors have been elected for each of the units and bids have been received from leading creameries for their yearly output.

These two units added to the former list of marketing units brings the total up to twenty-eight, located in eighteen different counties. Some counties have as many as four of these units.

A dozen or more units are now being organized in various parts of the state. Crawford County has an organization committee at work at Hutsonville and Annapolis; Clark County at Martinsville and West Union; and Lawrence County will soon start membership campaigns at two or three points.

ASSOCIATIONS that were started earlier are carrying on extensive educational work. Champaign County has two new units—one started marketing early in October, the other in November. The Champaign County Farm Bureau is planning programs a year in advance for these units. Some of the problems to be studied will be feeding, herd improvement, cream improvement, causes of variations in cream tests, selling dairy products in the most profitable forms, etc.

The board of directors of the Farmer City Unit held a meeting the evening of November 30. Social features were combined with educational. The Sugar Creek Creamery, the purchaser of this cream, furnished an abundance of refreshments while the unit furnished coffee. A splendid address was made by Mr. Spencer, dairy specialist for Sugar Creek Creamery, on the subject of "Producing Good Cream." The leaders of this organization appreciate the importance of developing a community co-operative spirit. Harry Reed, President, says that the most important work confronting his association is to create a clear understanding on the part of his membership of the value of co-operative marketing.

Schuyler and McDonough Cut Melon

FARMERS, too, can cut melons if they will only co-operate. Their melons do not run up into nine figures, but perhaps eventually they will compare more favorably with those of big business.

December 17 is the day set for the Schuyler Association to hold its second get-together meeting. Several hundred dollars will be returned to producers in the form of patronage refunds. The board believes that just prior to the Christmas holidays is an appropriate time for declaring dividends.

The McDonough County Association held a meeting November 1 to declare patronage dividends. At this time the association had operated nine and one-half months. During this time 54,940 pounds of butterfat was sold and 11,057 dozens of eggs. Total trading income and expenses on these two commodities were as follows:

	Butterfat	*Eggs*
Trading Income	$2,752.53	$186.88
Expenses @ 2.7 per lb. and 1c per doz.	1,521.93	112.16
Net Income on each	$1,230.60	$74.72
	74.72	
	$1,305.32	
Patronage Refunds	800.00	
Surplus	$ 505.32	

The Brown County Association is planning a similar meeting for its members December 19. All three units were organized less than a year ago.

Cartoon of the Season

"Dairymen Not Organized"

O. E. REED, chief of the Bureau of Dairy Industry, U. S. D. A., urged members of the American Association of Creamery Butter Manufacturers, recently, to take a greater interest in the problems of dairymen.

"No part of the industry can be prosperous very long if the man who milks the cows does not get his fair share of profits," said Mr. Reed. "The farmers and dairymen upon whom you depend for your cream are not an organized body such as yours. They do not meet as you are meeting today to discuss their problems with one another. Farming is more of an individual matter. The producers need such organizations as yours to study their problems. I believe they have made much progress along this line, considering the many difficulties they have encountered, but there is still opportunity for greater advancement."

Mr. Reed reminded his audience that the average cow producing about 4,600 pounds of milk and 180 pounds of butterfat a year barely returns to her owner the total cost of production. He said the yearly average of cows in cow-testing associations is about 7,410 pounds of milk and nearly 300 pounds of butterfat. He also urged the manufacturers to pay premiums for quality cream.

First Public Statement

(Continued from page 3)

commodity as a whole. Governor Smith, upon the other hand, clearly and forcefully asserted the principle that the cost of handling the surplus should be borne by the entire commodity. This, in substance, was the substantial principle of the so-called equalization fee. Thus the issue was clearly drawn.

When, therefore, the American people preferred Mr. Hoover to Governor Smith, they in effect issued a mandate to Mr. Hoover to proceed with the program which he had advocated. All sincere friends of farm relief will now, in my opinion, cooperate wholeheartedly with him in giving effect to that program. In view of the fact that Mr. Hoover will have the responsibility of administering whatever legislation there may be enacted, the wise course it seems to me at the present time is to await the incoming of the new administration. Congress will no doubt wish freely to consult with the President as legislation is being shaped. I understand that a special session will be called. That would be the proper time I think for legislation upon this vastly important question. If such legislation shall not prove effective, the President no doubt will lend a ready ear to further suggestions. For he forcefully said, in his acceptance address, "the most urgent economic problem in our nation today is in agriculture."

In addition to Mr. Hoover's frank recognition of the gravity of the agricultural situation, there is a wider understanding of that situation than at any time in the past. Business men recognize as they have not recognized before that a larger measure of prosperity must be given to the farmers of America if we would avoid danger to the entire business structure.

I send my heartiest greetings to all the members of the Association, and with personal regards, am,

Very sincerely yours,
(Signed) Frank O. Lowden.

Mr. Earl C. Smith,
President, Illinois Agricultural Association,
608 South Dearborn Street,
Chicago, Illinois.

The Farmers Mutual Reinsurance Company reports that it now has on the books 4,000 direct and specific fire insurance policies representing $8,250,000.

The term "direct" refers to insurance on individual property placed directly with the state company by the owner. "Specific" insurance refers to reinsured risks placed with the state company through the local mutual which usually carries a portion of the risk.

The Reinsurance Company also had 275 direct and specific windstorm policies amounting to $783,000 on November 15, 1928.

At the 4-H Club Dinner to Illinois Champions

MORE than 80 4-H club boys and girls from Illinois, including the state champions in all kinds of club work, were entertained at dinner by the Illinois Agricultural Association on Wednesday evening, December 5, at the Auditorium Hotel, Chicago.

Complimenting the 4-H club winners on their accomplishments, President Earl C. Smith expressed the interest of the I. A. A. in the boys and girls of the state, and referred to them as the future leaders in the Farm Bureau movement. He referred to the fact that the future of agriculture depends upon the boys and girls of today, and that the 4-H club work is helping to fit them for their coming responsibilities.

Prof. Smith Speaks

Prof W. H. Smith, state leader of farm advisers, spoke on the subject "4-H Club Members and the University of Illinois." Prof. Smith thanked the I. A. A. for its co-operation in promoting agricultural welfare and recognizing the value of 4-H club work. He called attention to the training for leadership, which agriculture so sorely needs, afforded by 4-H club work.

Miss Mary E. McKee and E. I. Pilchard, state club leaders, presented the championship medals.

Among the 4-H club speakers on the program were Arlene Scheidenhelm, poultry club member from LaSalle county; Clarence Ropp, corn club member from McLean county who represented Illinois at the 4-H club camp, Washington; Maribel Eldred, health project winner from Macoupin county; John Sullivan, livestock judging team member from Knox county; Vera Nofftz, style show member from Champaign county; and William Brown, sow and litter club member from Ogle county.

Among the guests were a number of farm advisers and leaders. Nearly 100, including members of the I. A. A. Executive Committee and staff, joined in honoring the club champions. Ray E. Miller acted as toastmaster.

Other state champions who were awarded medals are as follows: Ferdinand Basting, McLean county, dairy calf club; Edwin Hansen, Rock Island county, corn club; Carl Duis, Iroquois county, sheep club; Mary Louise Duke, Henderson county, clothing club; Alelia Siegrist, Hancock county, bread club; Mildred Read, Wayne county, meal planning club; Edwin Johnson, Christian county, dairy heifer club; Mary Switzer, Adams county, sheep club; Raymond Long, Rock Island county, fat barrow club; Kenneth Kinsinger, McLean county, beef club; Donald Kennel, Tazewell county, gilt club; Lucille Wilson, Macon county, baking club; Esther Hieland, Adams county, canning club; Mabel Newburn, Vermilion county, clothing club; Edith Metcalf, Edwards county, room improvement club; Sarah Snell, Sangamon county, clothing club; Pearl Reinking, Kane county, demonstration team club; Margaret Seilkopf, Kane county, demonstration team club; Alexander Colebrusco, Christian county, garden club; Clark Hewitt, McLean county, potato club; Homer Mendenhall, Sangamon county, livestock judging club; Selmar Lehmann, Sangamon county, livestock judging club; Paul Archer, Sangamon county; livestock judging club; James Hulmes, DeKalb county, dairy judging club; Stanley Jensen, DeKalb county, dairy judging club; Clifford Bemis, DeKalb county, dairy judging club; Arden Rains, Crawford county, demonstration club; Leslie Rutledge, Crawford county, demonstration club; Edith Lee Jones, Hamilton county, clothing judging club; Mary Boyer, Hamilton county, clothing judging club; and Sybil Herring, Fulton county, outfit club.

Argentina a Competitor

ARGENTINA is one of our chief competitors in the world's agricultural markets. In 1927 Argentina's agricultural exports were half as much again in value as in 1923. Although livestock raising is still the chief agricultural enterprise, the country is forging ahead rapidly in wheat and corn production.

During the last five years 96 per cent of the country's total exports consisted of agricultural products. Yet only a small part of the potential tillable land has been brought into cultivation. In a cereal region as large as the corn belt, only 16.2 per cent of the land is in crops. Only eight per cent of the country's total area is in cultivation.

A large proportion of the cultivated area is in the hands of comparatively few holders. In 1914 about 85 per cent of the farm land was held by about 13 per cent of the farm operators and was in holdings of 1,200 acres or more. In 1920 about 59 per cent of the country's farmers operated only 3½ per cent of its farm lands. In 1920, 59 per cent of our farmers in the United States operated 17 per cent of the farm land.

Co-op Shipments Gain 121%

Mercer county livestock growers increased their shipments to the Chicago Producers Commission Co., 121.6 per cent in 1927, compared with 1926, according to Ray E. Miller, livestock marketing director. Individual shipments increased from 44 to 83 cars, or 88.6 per cent while shipping association consignments jumped from 141 cars in 1926 to 327 cars in 1927.

"No, No, Maudie!"—A night club is not the stick a policeman carries."

PRODUCE MARKETING

By Frank Gougler

PRODUCE marketing units were completed recently at Oblong and Robinson in Crawford County. Directors have been elected for each of the units and bids have been received from leading creameries for their yearly output.

These two units added to the former list of marketing units brings the total up to twenty-eight, located in eighteen different counties. Some counties have as many as four of these units.

A dozen or more units are now being organized in various parts of the state. Crawford County has an organization committee at work at Hutsonville and Annapolis; Clark County at Martinsville and West Union; and Lawrence County will soon start membership campaigns at two or three points.

ASSOCIATIONS that were started earlier are carrying on extensive educational work. Champaign County has two new units—one started marketing early in October, the other in November. The Champaign County Farm Bureau is planning programs a year in advance for these units. Some of the problems to be studied will be feeding, herd improvement, cream improvement, causes of variations in cream tests, selling dairy products in the most profitable forms, etc.

The board of directors of the Farmer City Unit held a meeting the evening of November 30. Social features were combined with educational. The Sugar Creek Creamery, the purchaser of this cream, furnished an abundance of refreshments while the unit furnished coffee. A splendid address was made by Mr. Spencer, dairy specialist for Sugar Creek Creamery, on the subject of "Producing Good Cream." The leaders of this organization appreciate the importance of developing a community co-operative spirit. Harry Reed, President, says that the most important work confronting his association is to create a clear understanding on the part of his membership of the value of co-operative marketing.

Schuyler and McDonough Cut Melon

FARMERS, too, can cut melons if they will only co-operate. Their melons do not run up into nine figures, but perhaps eventually they will compare more favorably with those of big business.

December 17 is the day set for the Schuyler Association to hold its second get-together meeting. Several hundred dollars will be returned to producers in the form of patronage refunds. The board believes that just prior to the Christmas holidays is an appropriate time for declaring dividends.

The McDonough County Association held a meeting November 1 to declare patronage dividends. At this time the association had operated nine and one-half months. During this time 54,940 pounds of butterfat was sold and 11,057 dozens of eggs. Total trading income and expenses on these two commodities were as follows:

	Butterfat	*Eggs*
Trading Income	$2,752.53	$186.88
Expenses @ 2.7 per lb. and 1c per doz.	1,521.93	112.16
Net Income on each	$1,230.60	$74.72
	74.72	
	$1,305.32	
Patronage Refunds	800.00	
Surplus	$ 505.32	

The Brown County Association is planning a similar meeting for its members December 19. All three units were organized less than a year ago.

Cartoon of the Season

"Dairymen Not Organized"

O. E. REED, chief of the Bureau of Dairy Industry, U. S. D. A., urged members of the American Association of Creamery Butter Manufacturers, recently, to take a greater interest in the problems of dairymen.

"No part of the industry can be prosperous very long if the man who milks the cows does not get his fair share of profits," said Mr. Reed. "The farmers and dairymen upon whom you depend for your cream are not an organized body such as yours. They do not meet as you are meeting today to discuss their problems with one another. Farming is more of an individual matter. The producers need such organizations as yours to study their problems. I believe they have made much progress along this line, considering the many difficulties they have encountered, but there is still opportunity for greater advancement."

Mr. Reed reminded his audience that the average cow producing about 4,600 pounds of milk and 180 pounds of butterfat a year barely returns to her owner the total cost of production. He said the yearly average of cows in cow-testing associations is about 7,410 pounds of milk and nearly 300 pounds of butterfat. He also urged the manufacturers to pay premiums for quality cream.

First Public Statement

(Continued from page 3)

commodity as a whole. Governor Smith, upon the other hand, clearly and forcefully asserted the principle that the cost of handling the surplus should be borne by the entire commodity. This, in substance, was the substantial principle of the so-called equalization fee. Thus the issue was clearly drawn.

When, therefore, the American people preferred Mr. Hoover to Governor Smith, they in effect issued a mandate to Mr. Hoover to proceed with the program which he had advocated. All sincere friends of farm relief will now, in my opinion, cooperate wholeheartedly with him in giving effect to that program. In view of the fact that Mr. Hoover will have the responsibility of administering whatever legislation there may be enacted, the wise course it seems to me at the present time is to await the incoming of the new administration. Congress will no doubt wish freely to consult with the President as legislation is being shaped. I understand that a special session will be called. That would be the proper time I think for legislation upon this vastly important question. If such legislation shall not prove effective, the President no doubt will lend a ready ear to further suggestions. For he forcefully said, in his acceptance address, "the most urgent economic problem in our nation today is in agriculture."

In addition to Mr. Hoover's frank recognition of the gravity of the agricultural situation, there is a wider understanding of that situation than at any time in the past. Business men recognize as they have not recognized before that a larger measure of prosperity must be given to the farmers of America if we would avoid danger to the entire business structure.

I send my heartiest greetings to all the members of the Association, and with personal regards, am,

Very sincerely yours,
(Signed) Frank O. Lowden.

Mr. Earl C. Smith,
President, Illinois Agricultural Association,
608 South Dearborn Street,
Chicago, Illinois.

The Farmers Mutual Reinsurance Company reports that it now has on the books 4,000 direct and specific fire insurance policies representing $8,250,000.

The term "direct" refers to insurance on individual property placed directly with the state company by the owner. "Specific" insurance refers to reinsured risks placed with the state company through the local mutual which usually carries a portion of the risk.

The Reinsurance Company also had 275 direct and specific windstorm policies amounting to $783,000 on November 15, 1928.

At the 4-H Club Dinner to Illinois Champions

MORE than 80 4-H club boys and girls from Illinois, including the state champions in all kinds of club work, were entertained at dinner by the Illinois Agricultural Association on Wednesday evening, December 5, at the Auditorium Hotel, Chicago.

Complimenting the 4-H club winners on their accomplishments, President Earl C. Smith expressed the interest of the I. A. A. in the boys and girls of the state, and referred to them as the future leaders in the Farm Bureau movement. He referred to the fact that the future of agriculture depends upon the boys and girls of today, and that the 4-H club work is helping to fit them for their coming responsibilities.

Prof. Smith Speaks

Prof W. H. Smith, state leader of farm advisers, spoke on the subject "4-H Club Members and the University of Illinois." Prof. Smith thanked the I. A. A. for its co-operation in promoting agricultural welfare and recognizing the value of 4-H club work. He called attention to the training for leadership, which agriculture so sorely needs, afforded by 4-H club work.

Miss Mary E. McKee and E. I. Pilchard, state club leaders, presented the championship medals.

Among the 4-H club speakers on the program were Arlene Scheidenhelm, poultry club member from LaSalle county; Clarence Ropp, corn club member from McLean county who represented Illinois at the 4-H club camp, Washington; Maribel Eldred, health project winner from Macoupin county; John Sullivan, livestock judging team member from Knox county; Vera Nofftz, style show member from Champaign county; and William Brown, sow and litter club member from Ogle county.

Among the guests were a number of farm advisers and leaders. Nearly 100, including members of the I. A. A. Executive Committee and staff, joined in honoring the club champions. Ray E. Miller acted as toastmaster.

Other state champions who were awarded medals are as follows: Ferdinand Basting, McLean county, dairy calf club; Edwin Hansen, Rock Island county, corn club; Carl Duis, Iroquois county, sheep club; Mary Louise Duke, Henderson county, clothing club; Adelia Siegrist, Hancock county, bread club; Mildred Read, Wayne county, meal planning club; Edwin Johnson, Christian county, dairy heifer club; Mary Switzer, Adams county, sheep club; Raymond Long, Rock Island county, fat barrow club; Kenneth Kinsinger, McLean county, beef club; Donald Kennel, Tazewell county, gilt club; Lucille Wilson, Macon county, baking club; Esther Hieland, Adams county, canning club; Mabel Newburn, Vermilion county, clothing club; Edith Metcalf, Edwards county, room improvement club; Sarah Snell, Sangamon county, clothing club; Pearl Reinking, Kane county, demonstration team club; Margaret Seilkopf, Kane county, demonstration team club; Alexander Colebrusco, Christian county, garden club; Clark Hewitt, McLean county, potato club; Homer Mendenhall, Sangamon county, livestock judging club; Selmar Lehmann, Sangamon county, livestock judging club; Paul Archer, Sangamon county; livestock judging club; James Hulmes, DeKalb county, dairy judging club; Stanley Jensen, DeKalb county, dairy judging club; Clifford Bemis, DeKalb county, dairy judging club; Arden Rains, Crawford county, demonstration club; Leslie Rutledge, Crawford county, demonstration club; Edith Lee Jones, Hamilton county, clothing judging club; Mary Boyer, Hamilton county, clothing judging club; and Sybil Herring, Fulton county, outfit club.

Argentina a Competitor

ARGENTINA is one of our chief competitors in the world's agricultural markets. In 1927 Argentina's agricultural exports were half as much again in value as in 1923. Although livestock raising is still the chief agricultural enterprise, the country is forging ahead rapidly in wheat and corn production.

During the last five years 96 per cent of the country's total exports consisted of agricultural products. Yet only a small part of the potential tillable land has been brought into cultivation. Mercer county livestock growers increased their shipments to the Chicago Producers Commission Co., 121.6 per cent in 1927, compared with 1926, according to Ray E. Miller, livestock marketing director. Individual shipments increased from 44 to 83 cars, or 88.6 per cent while shipping association consignments jumped from 141 cars in 1926 to 327 cars in 1927.

"No, No, Maudie!—A night club is not the stick a policeman carries."

What You Should Know About Life Insurance Policies

By L. A. Williams

IN ALMOST every household life insurance is appreciated, but in the main is not understood. Many people can scarcely tell the name of the company they are insured in. Very few know what kind of a policy they have, and most everyone has questions about life insurance that he would like to have answered, either about his own policy, or about one which he intends to buy or was thinking of buying. Any of these questions will be answered if sent in to the Life Insurance Service, Illinois Agricultural Association, 608 So. Dearborn Street, Chicago.

What kind of life insurance should a person carry, and how much? These questions are always prominent in the minds of everyone affected by life insurance. There are two kinds of life insurance as far as this explanation need classify them. One is old line life insurance, and the other is not. The old line legal reserve life insurance is always secure, the rates can never be raised, the values are always guaranteed. The laws of the various states governing old line life insurance, protect the policyholder, regardless of the company's guarantee. The Mutual Companies, Fraternal and Assessment Organizations that do not have permanence of rate and assurance of the death claim, provide a very unstable sort of protection. It is therefore certain that the kind of life insurance that will be carried by the discriminating buyer will be old line life insurance.

Needs Should Govern

Next, the kind of policy that it is advisable to carry is usually determined by the needs of the insured. Where protection is the most important issue, ordinary or straight life gives the maximum of protection for the minimum of cost, and has cash and loan values, making it possible to borrow on the policy after the second or third year, and in the event of surrender, if there is no loan against the policy, the cash value is available, so that the net cost of protection is very low over a period of years. This policy comes nearer fitting the needs of all people than any other.

Next in popularity is the 20-Payment Life Policy. This policy costs about $10 a thousand more than the straight life policy, at age 35 and pays up in 20 years, so that the insured has attained a paid-up estate of the face of his policy at the end of a period of years, or in case he desires, he may surrender the policy with a guaranteed cash value at that time.

20-Year Endowment

The 20-year endowment policy is perhaps the best known of all old line life insurance policies. The name has been misunderstood, the policy has

been abused and mis-quoted, but it is still a good policy, and only the misunderstanding individual has suffered a disillusionment when he discovered that the policy he called a 20-year endowment turned out to be a 20-payment life or a straight life policy instead. It is practically impossible to buy a 20-year endowment policy for very much under $40 a thousand. In some companies the net cost would run a little lower than $40, but any policy that pays $1,000 at the end of 20 years must of necessity cost very close to $800 in 20 years' time at the lower ages, I should say below age 40. At age 50 the policy would cost approximately $47 a thousand net. The 20 year endowment policy pays the face of the policy at maturity, at the end of 20 years, or at death. And for young people who have no one dependent upon them, and who are interested in leaving an estate, but are more interested in accumulating a saving over a period of years, this compulsory method of saving money in a life insurance company and creating an estate also combines itself nicely in a 20-year endowment policy.

What Is Double Indemnity?

There is a great deal of misunderstanding about the Double Indemnity and Total Disability Clauses. Double Indemnity means that if you are killed by accident, the policy carrying that clause will pay twice the face of the policy to the beneficiary named. Now, suppose that death resulted from poison. The question arises in your mind at once that such a death could be accidental, if it could be proven that the insured did not take the poison purposely. Now, this will be defined in the Double Indemnity clause, and in most cases is not covered and not considered accidental death.

Total and Permanent Disability means just what it says. Disability must be total and premanent within the definition described in the policy. The abuses of the disability clause more frequently arises from unmerited claims than from misunderstanding. It is true that many agents sell this policy for an accident policy. But the 60-day clause most always prevents it from being of any value for ordinary accidents. More common cases of disability claims arise from tuberculosis, diabetes, and other diseases that render the individual totally incompetent to carry on his business such as paralysis and insanity. It is quite certain that the rates on disability insurance will have to be increased because most companies selling this sort of insurance have found themselves in the red after a brief experience.

Help To Policy Holders

You have an old policy that has a lot of coupons on it, and a lot of in-between clauses and frills that you have never fully understood. If you would like an explanation of the policy, we will mail you an analysis, if you will go to the trouble of registering the policy and mailing it to us with a letter asking us to give you this analysis. Address your letter to the Life Insurance Service of the Illinois Agricultural Association, 608 So. Dearborn Street, Chicago.

The right amount of Life Insurance for the head of a family to carry is easiest arrived at by figuring all cash needs that must be met immediately at death such as funeral, doctor bills, debts, etc.

Then add an amount of insurance to this which at a fair rate of interest would provide an income from the principal invested to permit the family, to carry on after the bread winner is gone. The principal sum may be left with the insurance company at interest.

The principal may then be distributed, after the family is raised, in a monthly income to wife and daughters or in any manner the insured may stipulate in the insurance provision.

Driving in Front of Car Entitled to Right of Way

UNDER evidence that the automobile in which plaintiff was riding reached an intersection first, moving about 12 miles an hour; that defendant approached from the left at 30 to 35 miles an hour, ran in front of plaintiff's machine, skidded and stopped, and was, in consequence, then run into by plaintiff's machine, which caused the plaintiff to be injured; and that plaintiff's machine was entitled to the right of way, a verdict for the plaintiff was sustained.

A regular auto insurance policy includes protection against fire, theft, windstorm, public liability and property damage, collision. Write the Illinois Agricultural Mutual Insurance Co., 608 So. Dearborn St., Chicago or see your County Farm Bureau.

Changes in Women's Clothing Hits Business

REPLIES from more than a thousand men and women representing all sections of the United States as to the textile fibers in use in their houses and wardrobes in 1927 as compared with 1922, indicates that families and individuals with larger incomes more frequently chose silk and rayon in preference to cotton for many garments. Women gave as their chief reasons for this change that silk and rayon are more attractive and easier to handle then cotton. Men based their preference for silk and rayon socks to cotton on style and comfort.

In household articles, however, cotton is more than holding its own, according to a report of 646 families. The survey was conducted by the Bureau of Home Economics, U. S. Department of Agriculture.

The shift from the use of silk and rayon instead of cotton and wool, particularly in women's clothes, is largely responsible for the depressed condition of the textile industries in the New England States.

Abolish Toll Bridges

"THERE is no place on the public highway today for a privately-owned toll bridge," said Thomas H. MacDonald, chief of the Bureau of Public Roads, U. S. D. A., before the annual meeting of the American Association of State Highway Officials in Chicago.

"The public can finance and build at lower costs, and the largest bridge undertakings in the country today are being financed on the basis of their earnings," he said.

"The building of bridges is a field from which the 'shoestring' promoter should be excluded, and he will be if a thorough investigation is made," continued MacDonald.

Every time a careless smoker throws a burning cigarette into the dry grass or needles of a forest floor he is giving the fire demon odds of one to nine that it won't start a fire, says the United States Forest Service. These odds, coupled with the fact that there is smoked and discarded in the United States the amazing total of 171,000 cigarettes per minute, day and night, during the entire year, are believed to account for the large percentage of man-caused forest and brush fires that are started by smokers. Even if only one-third of the cigarettes consumed throughout the country were smoked out-of-doors, there would still be over 50,000 chances a minute of a fire starting from a burning cigarette butt, foresters point out.

Thrift Note—It is estimated that two per cent of national energy could be saved if all salary checks were sent direct to the installment people.

Rules of the Road—No. 1. The best way to handle a traffic cop is to move your head up and down as he finishes each sentence.

The long winter nights are never too long for the man who wants to improve himself by study.

Uncle Ab says don't slight the job you are on now; for the time being it's the most important job there is.

A successful sailor studies his compass and a successful farmer studies market conditions.

During four years in a typical dairy region in New York it cost an average $2.42 to produce 100 pounds of milk; in the same period the average price received was $2.11 a hundred.

Unlighted Car Standing at Night

IT IS NEGLIGENCE to leave an automobile standing unlighted in a public highway at night, in violation of a statute.

The fact that a truck standing in the highway at night, and with which another vehicle collided, had no lights, as required by law, was properly considered on the issue of defendant's negligence.

Leaving a truck standing near the middle of a street at night without lights, for two and a half hours, after the engine had stopped and the driver was unable to move the truck with its own power, was negligence, but did not constitute a wilful obstruction of the highway, in violation of a statute. A driver colliding with such truck was guilty of contributory negligence, where it appeared that he would have avoided the collision had his lights met the requirements of the law and he had exercised ordinary care.

If no tail light was left burning on an automobile standing at the side of a road, and the conditions were such that because of the absence of such tail light the driver of another car did not see it in time to avoid a collision, the negligence in not leaving such light burning has been held to be concurrent with the negligence of the driver of the other car and contributory in causing the collision.

Air Travel Creates New Fire Hazard

THE National Board of Fire Underwriters has called the attention of the U. S. Department of Commerce to the added hazard of fire resulting from air traffic and has asked for some regulatory measure which will bring home in a forceful manner to air travellers the absolute necessity of guarding against fire damage resulting from carelessness.

FIGURES compiled by the National Board show that careless smokers cause an annual fire loss of millions of dollars, but one would expect smokers to exercise more care when riding in a plane. Apparently this is not the case, as it has been found necessary to place "No Smoking" signs in the cabins of air passenger machines operating on the Pacific Coast, between Los Angeles, San Francisco, Portland and Seattle.

THE danger of fire resulting from carelessness of air passengers is not so great now, since comparatively few machines are in operation. However, it will be only a few years until air travel becomes common, and when that time comes no one's property will be safe unless restrictions are provided and strictly enforced, says the Board.

THE Farmers Mutual Reinsurance Co. provides a way for farmers to secure all their *FIRE, LIGHTNING, TORNADO* and *HAIL* insurance on a mutual basis. It will insure your entire risk direct, or reinsure a local mutual for any part of a risk which it does not desire to carry itself—all *at cost* which means at least 25 per cent less than going rates in stock companies.

For particulars write

FARMERS MUTUAL REINSURANCE CO.,

—A legal reserve mutual—

Pays All Hospital Bills and Court Costs

A FULL coverage auto insurance policy in YOUR OWN COMPANY not only reimburses you for property damage to your car and that of the other party, but it **relieves you of all worries** and responsibilities for doctor and hospital bills, and possible court expenses resulting from injuries to third person.

FARM BUREAU auto insurance AT COST is the least expensive, yet the best you can buy. When you insure in YOUR OWN COMPANY you don't pay a large agent's commission, nor any profit to the management and stockholders. You pay only actual cost. You get the benefit of these savings. YOUR COMPANY operates with a low overhead, and we believe Farm Bureau members are preferred risks. A full coverage policy insures your car against fire, theft, tornado, collision, property damage, and public liability for injury to others.

You can get full particulars at your County Farm Bureau office or by writing the

The
Illinois Agricultural Association RECORD

Volume 7 JANUARY, 1929 Number 1

Annual Banquet to Bring Back Leaders of Early I. A. A. Days

Frank L. Mulholland, of Toledo, Scheduled for Address of Evening

THE reunion of former leaders and friends of the Illinois Agricultural Association in the early days of its existence is expected to bring back many familiar faces of ten years ago when delegates and visitors gather in Danville's large armory for the annual banquet on Wednesday night, Jan. 30, during the coming I. A. A. meeting.

Invitations have gone out to these former leaders requesting their presence on this night. Former presidents of the State Association including Herman Danforth, St. Louis; J. W. Kirkton, Normal; Harvey Sconce, Sidell; Howard Leonard, Eureka; and Sam H. Thompson, Quincy, are expected to attend.

Reserve Tickets Now

While the detailed program for the banquet has not been definitely arranged at this writing, the only set speech scheduled is that of Frank L. Mulholland, Toledo, Ohio, who has won nation-wide reputation as an inspirational speaker on organization. Short talks from representative former leaders of the various periods in the early history of the I. A. A. will be given during the early part of the evening. The banquet promises to draw an unprecedented number and all delegates and visitors are being asked to reserve tickets early.

"The benefit I received from the efforts of the Farm Bureau and Illinois Agricultural Association in equalizing land valuations in Stephenson county amounted to $19.76 on my 77.54 acres," writes Eric A. Carlson of Lena, Ill.

Last Call

If you have not already made your reservations for accommodations and luncheon and banquet tickets at the annual I. A. A. meeting do so at once by writing Otis Kercher, Farm Adviser, Danville, Ill. Send check to cover, Luncheon $1.00, Banquet $1.50.

WHERE BANQUET AND LUNCHEON WILL BE HELD
Danville's Armory will provide ample room for the banquet, luncheon and group conference

SENATOR GLENN IS LUNCHEON SPEAKER

U. S. Senator Otis Glenn of Illinois will address the annual luncheon scheduled for Thursday, January 31, in the armory at Danville. The subject of Senator Glenn's address will be announced later but it is expected that he will discuss the farm legislative situation at Washington.

Hon. Otis Glenn

Mr. Glenn was born at Mattoon in Coles County in 1875 where his father was a prominent farmer and stock raiser. He graduated in law from the University of Illinois after which he set up law offices at Murphysboro in Jackson county. About four years ago Glenn became a mem-

(Continued on page 2)

President's Address to Feature Opening of I. A. A. Convention

Annual Report of I. A. A. Activities and Treasurer's Report to Be Released Jan. 30

THE record of accomplishments of the Illinois Agricultural Association in 1928, together with recommendations for the future will be covered in the president's address to be delivered by Earl C. Smith on Wednesday morning, January 30, following the opening of the 14th Annual Convention.

Mr. Smith will outline the trend of the Association's development in the past year and will give the high points covering this stage of the organization's growth and progress. The president's address will feature the morning session to be held in the Terrace Theatre.

Following the president's address will come the treasurer's report by Robt. A. Cowles, which is expected to reflect a favorable financial situation for the Association and all its subsidiaries.

Annual Report Coming

The Annual Report together with the Treasurer's Report, now in process of preparation, will be released to the membership and the public that morning. Appointment of committees for the Convention will be made before adjournment for lunch.

The five sectional conferences scheduled for Wednesday afternoon follow closely the program of last year. Outside speakers will appear before at least three of these conferences, although the bulk of the time from 1:00 to 4:30 p. m. will be devoted to shop talk and discussion. These sectional conferences are primarily designed to give the delegates and members an opportunity to discuss the activities and policies of the Association. It is the time for con-

(Continued on page 5)

I. A. A. MEETING DANVILLE JANUARY 30-31

Auto Insurance Co. Looks Forward To Good Year In 1929

Policy Holders to Meet in Annual Session Jan. 29, Danville

SHOP talk, including questions and problems of interest to policy-holders in the Illinois Agricultural Mutual Insurance Company, will have a prominent place on the program at the organization's annual meeting to be held on the afternoon of Tuesday, January 29, at Danville. Questions pertaining to liability, various forms of coverage, insurance costs, and methods of figuring losses will be up for discussion.

The annual reports of the officers are expected to reveal a very satisfactory condition in the development of the company in 1928. Organized only a year and a half ago, the auto insurance project now serves more than 11,000 policyholders located in nearly every county of the state. The service has met with general satisfaction and the company is looking forward to another good year in 1929.

Employers' Liability

A new question which may be injected into the meeting this year is employer's liability insurance. Under the common law rule of negligence, farm operators are liable for injury to employees while on duty. Experiences have been numerous in which hired men and other employees have secured judgments in injury cases. Farmers are not subject to the Workmen's Compensation Act, but they are none the less liable for damages arising out of injuries to hired help. Even where the employer has not been especially guilty of negligence, judgments in favor of the employee have been awarded.

Senator Glenn

(Continued from page 1)

ber of a Chicago law firm and he now maintains offices both in Murphysboro and Chicago. In 1916 he was elected States Attorney in Jackson county and four years later Glenn went to the State Senate from the 44th senatorial district.

Following his father's death in 1912 the Senator has given considerable time to supervising farming and fruit growing on 2000 acres of land, most of which lies in Jackson county on the Mississippi river.

Mr. Glenn is a vigorous and forceful speaker. He has pledged his aid as the down-state Senator from Illinois to work for the interests of agriculture in the upper house of Congress. Illinois farmers will welcome the opportunity to meet and hear their new representative. It will be the Senator's first public appearance since his election.

WOMEN'S CONFERENCE

MRS. HOMER R. JOHNSON

Mrs. Johnson of McLean county, president of the Illinois Home Bureau Federation, will preside at the coming Women's Conference scheduled for Wednesday afternoon, January 30, at the I. A. A. annual meeting, Danville.

ADVISER L. W. WISE OF IROQUOIS CO. RESIGNS

L. W. Wise of Iroquois county, one of the oldest farm advisers in point of service in Illinois, tendered his resignation recently.

Mr. Wise came to Iroquois county in 1912 when the Farm Bureau movement was young, and continued there as adviser for the past 14 years. He will undertake farm management work and superintend farms for non-resident landowners.

Fifty pairs of Bob White quail were imported from the United States by the Calgary Fish and Game Association, Canada. The experiment is being made in the hope that this choice game bird will flourish in Alberta.

Get Your Ticket!

"When you buy your round-trip ticket to and from the annual meeting of the I. A. A., Danville, January 30-31, make sure that you get fare and a half rates," states L. J. Quasey, director of transportation.

"No certificates are required," he says, "but if the agent refuses to sell tickets at a rate of fare and a half get a receipt from him for the fare paid, then take it up with a representative of the I. A. A. at the annual meeting in Danville."

Dates of sale are from January 24 to February 2 inclusive, with final return limit February 4.

Women's Conference To Consider Higher Standard Of Living

Running Water in Every Farm Home is Bureau Proposal for 1929

WAYS and means of improving living conditions on Illinois farms will be the chief topic for discussion at the Women's Conference scheduled for Wednesday afternoon, January 30, at Danville. Mrs. Homer R. Johnson of Covell, president of the Illinois Home Bureau Federation, who is formulating the program, states that there will be speakers to show what has been done to improve standards of living without expending a great deal of money. The speakers will be real farm women who will talk from experience. It is proposed to follow the talks with an hour of open discussion. An address on coming legislation of interest to Illinois farm men and women also has been scheduled, the speaker to be announced later.

"The Home Bureau Federation was formed to unite and strengthen the county Home Bureau organizations; to promote the welfare of the individual and the family; to adjust their relations with the home, school, church, community, state, and nation; and to further the various interests of the homemakers," states Mrs. Johnson.

Works Through Committees

"The Federation does most of its work through standing committees. The Better Practice Committee in the coming year proposes to work out a plan designed to bring running water into every farm home in Illinois. Specifications and approximate costs for both simple and more elaborate systems will be drawn up. It is hoped to interest landlords in the project so that the tenant will receive compensation for equipment he installs and leaves in the home when he moves. We find tenants unwilling to spend money in a house which they may leave in a year or two," declared Mrs. Johnson. "We believe that if landlords were more generous in this respect many a tenant's wife could have simple conveniences which would help wonderfully."

The fall pig crop in Illinois is about three per cent larger than that of a year ago, says the Federal and State Departments of Agriculture.

Iowa reports an increase of 12 per cent and Kansas a gain of six per cent. However, the fall pig crop is about 1.5 per cent smaller than a year ago for the corn belt as a whole and about five per cent less for the United States.

"The greatest good to the greatest number" is achieved when cooperation is scientifically and justly applied to production-distribution-consumption.

The Illinois Agricultural Association RECORD

Published monthly by the Illinois Agricultural Association at 404 North Wesley Ave., Mount Morris, Ill. Entered as second class matter at post-office at Mount Morris, Ill., Oct. 20, 1925, under the Act of Mar. 3, 1879. Acceptance for mailing at special rate of postage provided in Section 412, Act of Feb. 28, 1925, authorized Oct. 27, 1925.

Tax Reform Seen as Chief Farm Interest In Next Legislature

I. A. A. Legislative Committee Prepares To Submit a Constructive Program

AGRICULTURE'S chief interest in the coming sessions of the 56th Illinois General Assembly promises to be confined largely to tax legislation and an amendment to the revenue section of the constitution. While no definite legislative program has been adopted by the I. A. A. Executive Committee at this writing, the Public Relations Committee, charged with responsibility in formulating a program, has met and discussed thoroughly the reforms needed to bring about a more equitable distribution of the tax burden in the state.

Limitation of the county road and bridge tax, a gas tax that will provide for a better system of farm to market roads, a suitable income tax that will take a portion of the burden off of land and home owners, and an amendment to the antiquated revenue clause of the constitution are specific legislative proposals about which a program will be built, states Frank D. Barton, chairman of the committee.

Ice Cream Measure

Other legislation of minor importance also will receive at-

(Turn to page 7)

Get up a party in your community and drive to the annual meeting of the I. A. A., Danville. Paved roads all the way. There will be ample accommodations at moderate rates.

Practical Problems To Feature I. A. C. A. Convention, Danville

Representatives from 212 Co-op Members To Gather

A DISCUSSION of practical problems of business administration in farm co-operative enterprises will be featured at the coming annual meeting of the Illinois Agricultural Co-operatives Association on Jan. 29 at Danville. Delegates from the 212 member organizations are expected to attend.

E. D. Lawrence, president of the McLean County Service Company, is scheduled to speak on the subject "Accounting Records as a Guide to Business Administration." W. D. Mobley, president of the Mt. Sterling Farmers' Elevator Company which has had a rapid rise from near failure to comparative success, will speak on the subject "Overcoming a Deficit." Earl C. Smith, president of the I. A. A., is expected to address the meeting following the early business session.

Officers of the Association are: George L. Potter, Pontiac, president; H. J. Shaefer, Illiopolis, vice-president; A. R. Wright, Varna, secretary; and R. A. Cowles, Chicago, treasurer.

The meeting will be held at 1 p. m., January 29, in the dining room, 9th floor, Hotel Wolford.

TENTATIVE PROGRAM

Annual Meetings of Affiliated Organizations

Tuesday, Jan. 29, 1929

Danville

Headquarters—Wolford Hotel

ANNUAL MEETING, ILLINOIS FARM BUREAU BASEBALL LEAGUE

Dining Room, 9th Floor, Wolford Hotel

9:00 A. M. Call to Order—Pres. L. R. Welk
Business Session
Address "What It Takes To Make A Good Baseball Team"—Coach Carl Lundgren, University of Illinois.
Business Session

ANNUAL MEETING, ILLINOIS FARM BUREAU SERUM ASSOCIATION

Ballroom, 9th Floor, Wolford Hotel

10:00 A. M. Call to Order—Pres. O. B. Goble
Business Session
Address "Recent Development In Manufacturing Serum And Virus"—D. O. Skidmore, Chief Division of Virus-Serum Control, U. S. D. A.
Address—Dr. Robt. Graham, University of Illinois.
Discussion and Business Session

ANNUAL MEETING, ILLINOIS AGRICULTURAL MUTUAL INSURANCE COMPANY

Elks Club—Assembly Room—2nd Floor

1:00 P. M. **BUSINESS SESSION**
(Adjourned meeting, to follow, Thursday, Jan. 31, at 8:30 A. M., Terrace Theatre)

ANNUAL MEETING, ILLINOIS AGRICULTURAL CO-OPERATIVES ASSOCIATION

Dining Room, 9th Floor, Hotel Wolford

1:00 P. M. Call to Order.—Pres. George L. Potter
Business Session

FOURTEENTH ANNUAL CONVENTION ILLINOIS AGRICULTURAL ASSOCIATION

Jan. 30-31, 1929
Danville

WEDNESDAY, JAN. 30, TERRACE THEATRE

9:00 A. M. Invocation
Group Singing
9:30 A. M. Address of Welcome
Music
10:00 A. M. President's Address—Earl C. Smith
11:00 A. M. Treasurer's Report—Robt. A. Cowles

Leading Economist To Discuss Tariff At I. A. A. Meeting

Harvard University Man Recognized as One of Best On Subject

ONE of America's outstanding farm economists and students of farm relief, particularly in its relation to the tariff, will speak at the annual meeting of the I. A. A. at Danville, Jan. 30-31.

John D. Black, professor of economics at Harvard University and formerly agricultural economist at the University of Minnesota, is this man. He will speak on the tariff and its relation to the American farmer.

Native of Wisconsin

Mr. Black is a native of Wisconsin. He graduated from the State University, Madison, where he secured his Master's and Doctor's degrees successively in 1910 and 1918. He served as consulting specialist in the Bureau of Agricultural Economics, Washington, in 1922. He is author of the book "Introduction to Production Economics" and also of a number of bulletins on economic subjects.

Mr. Black will speak on the luncheon program on the last day of the convention.

EDITOR TO SPEAK

S. J. Duncan-Clark, editor of the Chicago Evening Post, will address the Organization-Information conference in the Hotel Wolford on Wednesday afternoon. Mr. Duncan-Clark is a close observer of social movements and reforms. He has been much interested in the farmers' efforts to gain economic equality and protective legislation. He is expected to emphasize the importance of farmers informing the American public about their problems.

CONFERENCE SPEAKER

LACHLAN MACLEAY

L. Macleay To Speak Before Conference On Publ. Relations

To Discuss National Transportation System and Importance To Farmers

LACHLAN Macleay, secretary of the Mississippi Valley Association, will address the Public Relations Conference on Wednesday afternoon, Jan. 30. He will discuss our national transportation system and the importance of waterways as a part of that system.

Mr. Macleay has appeared several times during the past year on I. A. A. radio programs from Station WJJD, Mooseheart. He is one of the best informed and most able speakers in the country on the subject of waterways.

Macleay was born in Olympia, Washington. He was publicist, speaker, and Executive Commissioner of the Alaska-Yukon-Pacific Exposition, Seattle, 1908-1909. In 1914 he became secretary of the Chamber of Commerce in Syracuse, New York. Three years later when the United States entered the World War Macleay entered the service where he became a captain. From 1912 to 1920 he was a member of the executive committee of the New York State Waterways Association, and in 1922 he became secretary of the Mississippi Valley Association.

Macleay has made a life study of inland waterways economics and is recognized as a national authority on their history, improvement, and use for navigation purposes.

DELEGATES REGISTER

All official delegates to the I. A. A. Annual Meeting should register at once on arrival at headquarters in the Hotel Wolford, Danville. The Resolutions Committee will be in session between 1 and 4 p. m., Wednesday, Jan. 30. The Committee's report will be made Thursday. Ample time must be allowed for its preparation.

PROGRAM—(*Continued from page 3*)

11:30 A. M. Appointment of Committees

1:00 to 4:30 P. M. Sectional Conferences

ORGANIZATION AND INFORMATION—Ballroom, 9th Floor, Hotel Wolford
C. E. Bamborough, Presiding
Speaker, S. J. Duncan-Clark, Editor, Chicago Evening Post

PUBLIC RELATIONS—Armory, Assembly Room, 2nd Floor
F. D. Barton, Presiding
Speaker—Lachlan Macleay, Secretary, Mississippi Valley Association

MARKETING—Y. W. C. A. Gymnasium, Assembly Room, 2nd Floor
Samuel Sorrells, Presiding
Speaker—Chris. L. Christensen, Chief Division of Cooperative Marketing, U. S. D. A.

FINANCIAL BUSINESS SERVICE—Elks Club, Assembly Room, 2nd Floor
Geo. F. Tullock, Presiding

WOMEN'S CONFERENCE—Dining Room, 9th Floor, Hotel Wolford
Mrs. Homer R. Johnson, President Illinois Home Bureau Federation, Presiding
Subjects for Discussion: **"Improving The Standard of Living for Farm Homes"** by Speakers to be Selected
"Forward Looking Legislation of Interest to Illinois Farm Men and Women"—(speaker to be selected)

4:30 P. M. District Caucuses, and Business Sessions
Nominations of Executive Committeemen to Succeed—
Harold C. Vial, Downers Grove
C. E. Bamborough, Polo
A. N. Skinner, Yates City
George J. Stoll, Chestnut
J. L. Whisnand, Charleston
Samuel Sorrells, Raymond
W. L. Cope, Salem
Fred Dietz, De Soto

WEDNESDAY EVENING, JAN. 30, ANNUAL BANQUET
Armory, Danville, Pres. Earl C. Smith, Presiding

6:30 P. M. Music
Old Timers' Reunion—Short Talks, etc.
Address—Frank L. Mulholland, Toledo, Ohio

THURSDAY, JAN. 31, TERRACE THEATRE

9:30 A. M. BUSINESS SESSION

12:30 P. M. ANNUAL LUNCHEON—Armory

1:00 P. M. Music
Introduction of the Guests
Addresses, Sen. Otis Glenn, Gov. L. L. Emmerson, Prof. John D. Black

3:00 P. M. BUSINESS SESSION

Baseball Fans Get Ready for Mid-Year Pow-Wow at Danville

State League Shows Much Growth in Five Years

FARM baseball leaders and managers will hold their annual mid-winter conference when the State Farm Bureau League meets for its annual session at Danville on Tuesday, January 29. This will be the fifth annual meeting of the League. During the past five years Farm Bureau baseball has spread from county to county until in 1928 twenty-two county teams competed for the state title which was finally won by Tazewell. Heated discussion regarding rules, practices and eligibility questions has been the order at previous meetings of the League, and this year promises to be no exception to the rule.

Two schools of thought have developed among the League leaders and followers over the question of who shall be eligible to play. Under the present by-laws players are restricted to Farm Bureau members and members of their immediate families whose principal occupation is farming. Under this rule nearly all Farm Bureau members living in town have been barred. As a result several teams have lost valuable players. One or two teams were forced out of the running completely say leaders because they could not muster enough farm boys to round out a good nine.

Wants Lenient Rule

Letters received at headquarters of the State League, Chicago, indicate that the eligibility question has not been settled. One team manager sizes up the situation like this: "A more lenient eligibility rule is the main objective, as I see it, to better Farm Bureau baseball. Last year you remember there were only two organized teams in our district. That caused us to have a very limited playing schedule which in turn caused a lack of interest. People are not going to attend games to see the same teams compete, especially if one team happens to be stronger than the other. This happened in our district last season for we had considerable interest for the first game or two. A wider eligibility rule will remedy all this for it will permit more counties to organize teams which will make a more complete playing schedule to last the entire season. This will tend to create more interest in Farm Bureau baseball.

Keep Out Pro's

"As to the leniency of the rule why not make any player who signs a three-year contract and pays his own money, and any player who is a member of a Farm Bureau member's family regardless of occupation, eligible to play? I am strictly opposed to anyone having his membership fee paid or receiving money for playing."

The baseball convention is called for 9:00 a. m., Tuesday, January 29. The meeting will be held in the dining room on the ninth floor of the Wolford Hotel.

Following the early business session Coach Carl Lundgren of the University of Illinois will speak on the subject "What It Takes To Make a Good Baseball Team."

Officers of the State League are: L. R. Welk, Morton, president; Wayne Snyder, Versailles, vice-president; and E. G. Thiem, Chicago, secretary-treasurer.

BASEBALL SPEAKER

COACH CARL LUNDGREN

Coach Lundgren, who will address the annual meeting of the Illinois Farm Bureau Baseball League, was a former star hurler for the University of Illinois in 1899, 1900, 1901, and 1902. He pitched for the Chicago Cubs for seven years, in two of which they were world's champions and for three years leaders of the National League.

Coach Lundgren came to Illinois in 1921 and under his leadership the Illini teams have won most of their games. Last summer Lundgren led his players to Japan where they made a great record playing the championship teams on the Isle of Nippon.

President's Address

(Continued from page 1)

structive criticism and suggestions. The program for the most part will be impromptu, although the directors of departments will be present to answer questions and discuss details of their work if called upon.

The odd-numbered districts will hold their caucuses to nominate executive committeemen at 4:30 p. m., Wednesday afternoon. The places of meeting will be announced in the program. The present executive committeemen of these districts are: 1-11th district, Harold C. Vial, 13th C. E. Bamborough, 15th A. N. Skinner, 17th Geo. J. Stoll, 19th J. L. Whisnand, 21st Samuel Sorrells, 23rd W. L. Cope, and 25th Fred Dietz.

The even-numbered districts will hold business sessions during this period.

Serum Ass'n To Hear Authorities On Cholera Control

Meet on Jan. 29, In Annual Session

THE last word on hog cholera control and recent developments in manufacturing serum and virus will be presented to delegates and visitors attending the annual meeting of the Illinois Farm Bureau Serum Association scheduled for Tuesday, January 29, at Danville. The meeting is called for 10:00 a. m. in the ballroom on the ninth floor of the Wolford Hotel.

Following the business session D. O. Skidmore, chief of the Division of Virus and Serum Control of the U. S. D. A., is scheduled to disclose interesting details regarding the manufacture of serum and virus. Dr. Robert Graham of the University of Illinois is expected to discuss swine disease control from a pathological standpoint, and Dr. James McDonald, in charge of hog cholera control work in Illinois, has been invited to lead a discussion on control problems.

The State Serum Association handled more than 30,000,000 c. c. of serum and virus last year at a substantial saving to the Farm Bureau members of Illinois. The unified action of the County Farm Bureaus in this project not only has made possible the purchase of immunizing materials at decidedly lower prices, but also it has insured a safe and steady supply.

Farm Bureaus have been instrumental in driving cholera out of their counties by advocating consistent vaccination. Before the discovery of control methods early in the 20th Century hog cholera took an enormous toll in this country. Back in 1903-1904 approximately one hog in five died from cholera. But during the past two years the loss from this source in comparison has been negligible.

PROFESSOR HITS TARIFF DOCTRINE OF COOLIDGE

Prof. H. T. Collings of the Wharton School of Finance, Philadelphia, admitted that farmers for the most part are not getting the benefit of the protective tariff, in an address before the recent convention of the American Economic Association in Chicago.

Prof. Collings referred indirectly to President Coolidge's tariff pronouncements saying that they had been "weighed in the balance and found wanting." He further asserted that farmers and consumers are getting the worst of our tariff policy; that the United States is now manufacturing 20 per cent more goods than is needed at home; that it must find markets for these goods; and that modification of our high tariff policy must be made if our trade with foreign nations is to be increased.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Entered as second-class matter October 20, 1925, at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Accepted for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the ILLINOIS AGRICULTURAL ASSOCIATION RECORD. Postmaster: In returning an uncalled for or missent copy please indicate key number on address as is required by law.

Executive Committee Acts

AFTER a presentation of the milk situation in the Chicago District had been given by Harold C. Vial, of Downers Grove, who represents the dairy section on the I. A. A. Executive Board, the Committee authorized that the following statement be released:

"The Illinois Agricultural Association has for years supported and encouraged an aggressive and effective T. B. eradication program in Illinois, which particularly affected the dairy herds of our state.

"We have always believed such a program was the only way to perpetuate the dairy industry while at the same time insuring a pure milk supply to the public, especially the children of congested areas, such as Chicago.

"This clean-up campaign has cost the owners of present clean dairy herds large sums of money.

"It is appalling to note the inequitable portion of the consumers' cost that is finding its way to the producers of this pure product.

"We believe in and support the collective bargaining rights of such producers.

"While we are not apprised of all developments leading up to the present relations existing between the officials of the Pure Milk Association and the milk dealers of Chicago, we believe the consumers' interests as well as the producers' interests demand that proper representatives of all parties to this controversy, including representatives of the public interest get together in a spirit of fairness and settle the present dispute.

"The I. A. A. stands ready and willing to lend its support to such a program."

Consider Legislative Program

MAJOR projects of legislation for introduction in the coming session of the 56th General Assembly have been receiving careful consideration of the Public Relations Committee for some time. Their conclusions were reported to the meeting of the Executive Committee on January 10, and after careful study and consideration were adopted as their recommendations to the Board of Delegates at the Annual Meeting to be held in Danville, January 30 and 31.

Various proposals for constructive changes in our revenue system make up a large part of this program, among them being an amendment to the Revenue Article of the State Constitution designed to give the General Assembly the power to adopt an equitable taxing system; a tax on net income of natural persons with moderate exemptions and moderately progressive rates and with provision for payment of such a tax by any person only to the extent that the tax levied upon his income exceeds all taxes paid on property by said tax-payer; and provided further, that the proceeds of such a tax on net income be used to replace the present tax levied on property for the State Distributive School Fund, or some other tax now levied on property for state purposes; a tax on gasoline, provided that the funds derived therefrom be divided equitably and used for the early completion of the Hundred Million Dollar Bond issue road system and improvement of a secondary road system; some revision of the Co-operative Marketing Act of 1923 to meet requirements that have developed with the experience of recent years.

There will be ample opportunity for full discussion, consideration and final decision on all of these and other matters during the conference on Public Relations, and later when under consideration by the Convention meeting as a whole.

Black Strap Molasses

THE decision of the I. A. A. Executive Committee on Jan. 10 to give active support to an attempt to secure a 10 cents per gallon tariff on black strap molasses is of particular interest to Illinois corn growers.

According to our best information approximately 280,000,000 gallons of molasses are imported into the United States annually. This quantity is equivalent to 57,000,000 bushels of corn, which might replace the molasses used to a large extent in manufacturing industrial alcohol.

It is estimated that an increase in the present one-sixth to five-sixths of a cent per gallon tariff (depending upon sugar content) to 10 cents per gallon would increase the price of corn from three to four cents per bushel.

Illinois produces annually about 300,000,000 bushels of corn. Approximately 40 per cent, or a total of 120,000,000 bushels, is shipped out of the counties where grown. At 3.5 cents per bushel this would mean an increased revenue to farmers of the corn belt of $4,200,000.

The daily farm program of the I. A. A. from Station WJJD, Mooseheart (254 meters) is broadcast between 12:30-12:45 p. m. Monday to Friday inclusive. Hear the daily Chicago livestock market from the Producers, and each Friday the weekly market review. Outlook reports, reviews, and talks by I. A. A. staff members, officials, and leaders in farm thought are broadcast daily.

Negotiations are under way to broadcast several of the feature talks at the I. A. A. Convention, Danville, Jan. 30-31 over Station WLS. Raising of funds to pay the heavy charges imposed by the utility company for the use of its lines is the chief obstacle. The executive committee voted to appropriate a limited sum for this purpose provided the balance can be raised from other sources. If pending arrangements can be consummated, an announcement will be made over the radio and in the press so members may tune in and hear the program.

UNIVERSITY OF ILLINOIS GLEE CLUB TO ENTERTAIN

The University of Illinois Glee Club which normally includes around 100 voices will provide the entertainment on Jan. 30, the opening day of the I. A. A. Convention, Danville, announces Otis Kercher, chairman of the local committee on arrangements. The University singers will appear at the evening banquet in addition to providing music during the day's program.

Otis Kercher

The Schoenbech Orchestra has been engaged to play at the banquet on Wednesday night and at the luncheon the following day.

"We also intend to have a class of local dancing girls and a slight-of-hand performer as part of our entertainment features," writes Kercher.

Lawrence Farlow, secretary of the Illinois Farmers Grain Dealers' Association will speak on the I. A. A. radio program at 12:30 on Tuesday, Jan. 22. Mr. Farlow will discuss the high points of the Association's coming meeting at Joliet on February 5-6-7.

F. S. Betz, Chicago, editor of the Farmers' Elevator Guide, is scheduled for an address on "Farmers and Big Business," from Station WJJD, 12:30 p. m., Wednesday, Jan. 30. Ernest V. Maltby, manager of the Rural Grain Co., will discuss co-operative grain marketing the following day.

LUNCHEON SPEAKER

HON. LOUIS L. EMMERSON

LOUIS L. EMMERSON, governor of Illinois, has accepted an invitation to deliver a short address at the annual luncheon on Thursday, January 31.

Mr. Emmerson is well known to a host of I. A. A. members. He has had a long and successful career in public life. Mr. Emmerson was born at Albion, in Edwards county in 1863. He entered the mercantile business in Mt. Vernon at the age of 20. He served successfully in minor public offices and in 1916 was elected Secretary of State. He served most efficiently in that capacity until his recent election as governor.

Tax Reform

(Continued from page 3)

tention. The Pure Milk Association of Chicago, in a letter from its secretary, H. C. Vial, advises that the Association has officially recorded itself in favor of legislation forbidding the use of butter in making ice cream and of raising the minimum butterfat content of ice cream from eight to 12 per cent. Legislation embodying these ideas was bitterly contested in the 55th General Assembly with butter manufacturers objecting strenuously to any move that promises to curtail their outlet or source of cream supply. The I. A. A. will study this question thoroughly since its own constituents are not fully agreed on the advisability of such a measure.

Non-Party Approach

The state is so committed to a program of tuberculosis eradication that an appropriation providing for this work in the coming biennium should go through without opposition. The I. A. A. will resume its interest in all legislation, and opposition to any bills harmful to agriculture or designed to increase the tax burden on farms. The non-party approach in line with the Association's long-standing policy will be strictly adhered to as in the past.

Again The Farmer

By
Omar H. Wright, Belvidere, President, Illinois Bankers Association

TO those of us who have passed our active business lives in agricultural communities; who have had uninterrupted dealings with farmers during that period; who have made loans upon and who own farm lands; it seems evident that the farmers' financial problems at this time are more difficult than they have ever been.

O. H. Wright

We are now reaping the results of the shaking out process and there is upon us the real aftermath of extremely poor crop yields and partial crop failures during the years of '26 and '27.

It is yet too soon to receive any of the benefits of generally good crop yields this past season.

Dean Mumford summed up the situation at Champaign in November when he told the Bankers-farm-school that during the past five or six years the farmer who had accumulated a reserve for a rainy day had been drawing upon his surplus steadily and that unless conditions soon changed he would be unable to get back on his feet and be able to farm at a profit when the opportunity came to him.

The other day 80 acres of our black soil farm land in this garden spot of northern Illinois (all plow land—no buildings) sold for $40 per acre. It is doubtful if such a price has been equalled in this territory in 40 years.

Recently one of the Federal Land banks, which has loaned liberally in this section of the state, advised its loan agent that its loan limit was now $50 per acre on a farm upon which it offered to loan $75 per acre a year ago. In some instances previously it has gone as high as $90 per acre and numbers of our farmers have been increasing their mortgages when possible.

Fortunately for us all, however, the leadership of such intelligent, able and well posted men on agriculture as Former Governor Lowden has brought home to both political parties the real seriousness of the situation and our President-elect has pledged himself to do everything possible to aid in solving this problem.

It may well be questioned, however, if additional loans will not be detrimental rather than beneficial. Many of the present ills of the farmer can be traced to his former ability to too easily exercise his credit which once was AA+.

In any event it behooves every Banker in Illinois to get behind any constructive, carefully considered plan which may be proposed and help.

It will take Federal legislation to do it.—Illinois Bankers' Bulletin.

Supervised Farming Hailed as Next Step In Farm Production

"Chain Farms" Being Studied by Economists, Watched by Others

SUPERVISED farming, with managers in charge of chains of farms, was given a clean bill of health by C. L. Holmes of Iowa State College who told of his investigations regarding possible displacement of the independent family farm by large farms or chain farm management before the recent meeting of the American Farm Economic Association. Mr. Holmes predicted that there would be considerable further development in this direction.

He said that a good manager must have scientific knowledge, must know the art of farming, have a keen business sense and have financial knowledge of farm operations, know economic conditions, use price forecasts, and must know how to select good tenants and work with them.

Social Effects

He stated that the social effect of large-scale units need not be detrimental to the farm community but may bring about improvement and give greater stability to farm communities. He predicted that farming under large-scale units might even result in agriculture taking a more important part in the councils of the nation. "Lower costs of production and a greater output per farm and per man," he stated, "are necessary to make these other things possible."

Banks Lead Way

Banks and insurance companies holding large tracts of farm lands as a result of depression in the industry, are the principal experimenters in chain methods. The latest report on their experience involved 32 farms on a tract of 7,500 acres in central Illinois. Each farm was operated by a tenant under the direction of a general superintendent.

"We shall sooner or later have to face and answer the question whether the small independent farm is the size of productive unit and the form of productive organization best adapted to the new conditions of agriculture," Virgil Jordan, chief economist of the National Industrial Conference Board, recently declared.

Five former Illinois farm advisers are or will soon be engaged in managing "chain farms" for non-resident owners. These men are F. E. Fuller, Chas. Robinson, W. W. McLaughlin, J. E. Johnson, and L. W. Wise.

The Jersey County Farm Bureau went on record at its recent annual meeting recommending that the incoming Board of Directors appoint a woman's committee to work with them in the coming year.

R. F. Karr Addresses Iroquois County Meet

Executive Committeeman R. F. Karr of the 18th district addressed the annual meeting of the Iroquois County Farm Bureau recently. Mr. Karr reviewed the activities of the Illinois Agricultural Association and urged farmers from that county to attend the annual I. A. A. meeting at Danville the last two days of January. Professor W. H. Smith, state leader of agricultural extension, and W. T. Martindale of the Indiana Farm Bureau Federation, were other speakers.

R. F. Karr

Officers selected for the coming year are: President, R. F. Karr, Iroquois; Vice-President, Floyd Hare, Gilman; Secretary-Treasurer, A. J. Gillfillan, Watseka; Directors, H. G. Pendergast, G. C. Honeywell, John Leverenz, George Tascher, F. W. Schroeder, J. W. Lawrence, Herbert Benbow.

WE CAN all be angry with our neighbor; what we want is to be shown, not his defects of which we are conscious, but his merits, to which we are too blind.—*R. L. Stevenson.*

"IF THERE is one lesson greater than another to be gained from the experience of the past eight years, it is the lesson that agriculture can never hope to hold its own until it is definitely and thoroughly organized for collective action in all the matters that pertain to the welfare of agriculture.

"In connection with the strengthening of the co-operative movement, it should also be the purpose of farmers to build up their general farm organizations in order that agriculture may properly express the desire of farmers in conducting the affairs of the nation."—Editor Dan A. Wallace, in "The Farmer."

Fact Finders Would Place Milk Industry Under Gov't. Control

Recommendations of Committee Would Have Far-Reaching Effect

RECOMMENDATIONS made by the Fact Finding Commission appointed to investigate the Chicago milk marketing situation propose that the milk industry be placed under the regulation of the Illinois Commerce Commission as a public utility if the warring interests decline to accept voluntary arbitration.

This is a far reaching proposal and one that would attract nation-wide attention should it come to an issue before the State Legislature.

Here Are 5 Points

The five recommendations made by the Commission are as follows:

"That the milk producers' organization, called the Pure Milk Association, be fully recognized by the dealers, and that a system of arbitration be set up here within the industry that the rights of all elements, including the public, be protected.

"That the proposed milk strike be called off.

"That if the present price of milk in Chicago does not warrant an increase to the farmer, that the price to the consumer be increased one cent a quart, and that all of that increase be paid to the producers on a base and surplus price plan.

"That the Chicago milk-marketing committee hold itself intact until the present emergency is past.

"That in case the various elements in the milk industry decline to accept voluntary arbitration within the industry that the public be urged to proceed at once to Springfield and seek legislation to put the milk industry under the regulations of the Illinois commerce commission as a public utility."

Report Blames Both

The committee signing the report was composed of Newton Jenkins, former legal counsel for the Illinois Agricultural Association, who served as chairman; Mrs. W. E. Fribley, representing the Illinois Federation of Women's Clubs; and Dr. Arthur E. Holt of the Chicago Theological Seminary.

The report blamed the milk dealers for their unwillingness to co-operate and arbitrate differences with the producers, but it placed part of the blame for unsatisfactory conditions on the dairymen themselves for not joining their organization, the Pure Milk Ass'n., and paying their dues.

W. A. Herrington, farm adviser, in Stephenson county, it is reported, has resigned to accept a position in the Farm Management Department of the University of Illinois.

Eugene Davenport, dean-emeritus of the Illinois College of Agriculture, is back at the University assisting President Kinley in Public Relations work.

See Gas Engine As Partly Responsible For Farm Depression

Brings 41,000,000 Acres Under Plow To Produce Surplus Crops

"TRACTORS, automobiles, and other gasoline engines have destroyed the market for 20,000,000 acres of farm crops by displacing over six million horses during the past nine years," declared Willford I. King of New York University in a recent paper read before the American Farm Economic Association convention.

"Another 21,000,000 acres formerly used for hay and pasture for horses, have been plowed up to grow farm crops so as to aggravate the crop surplus problem," he continued. "Thus we have 41,000,000 more acres producing crops of which we have a surplus as a result of the influence of gas engines. This is approximately one-ninth of the total acreage in farm crops."

Outlook Favorable

According to Prof. King the gas engine is largely responsible for the present agricultural depression. He pointed out, however, that the outlook for the future is not so gloomy as appears on the surface since the population in this country is increasing 1,250,000 each year and that 5,000,000 more acres yearly are needed to care for this increase in population providing yields continue on the present level. The crop acreage per capita has decreased steadily in this country since 1918.

Gas Costs High

L. H. Bean of the Division of Agricultural Economics in commenting on Prof. King's paper asserted that the gas engine has made farm costs of production more inflexible. "Gas engine expense has increased from year to year," he said, "while other farm expenses have decreased." Prof. Bean stated that farmers' cash income for living expenditures is 20 per cent less now than it was in 1919 whereas the buying power of factory employees has increased 20 per cent since 1919 making a disparity of 40 per cent between buying power of farmers and factory workers.

Bean found that since 1920 the use of tractors and gas engines on farms has nearly doubled, although the acreage in crops has not expanded. In 1919 the cost of operating automobiles, tractors, and gas engines for farm production comprised one-third of the production costs. In 1927, costs of production on farms declined, but costs attributed to gas engines increased so that the latter constituted about half of the total farm operating costs. The gas engine is responsible for an annual depreciation of over a billion dollars. Bean is of the opinion that the present generation is paying the price for the revolution in agriculture, the benefits of which will be derived by succeeding generations.

"Farmers Have Brains"

"I have no patience with farmers and their self-pity. Farmers do not need to organize—that has been done. They do need to join their Farm Bureau and give it their most loyal support. We have only to look at the medical and legal professions to see what may be accomplished by cooperation. Farmers have brains. Let them use them if they would strengthen their position in the world. I expect my husband to have enough professional pride to belong to his own organization and cooperate to the best of his ability. Then I know he is working for the good of his home and community. And I have faith to believe that ultimately it will result in a standard of living for the farm home that he will be proud to pass on to his son."

Mrs D. H. Stevenson, a Hancock County Farm Bureau member's wife.

LARGE GAINS SHOWN BY FARM MUTUALS

Farmers' mutual fire insurance companies in the United States have in the last decade greatly increased the volume of their insurance in force, according to the department of agriculture, which compares figures for 1926 with figures for 1916.

The number of farmers' mutual fire insurance companies increased little in the period reviewed, because the formation of new organizations was largely offset by the consolidation of old ones. Their growth in business, however, was extremely large, as appears from the fact that 1,911 such companies on December 31, 1926, had nearly $10,000,000,000 of insurance in force, compared with less than $6,000,000,000 on the books of 1,883 similar companies at the close of 1916.

The business of 1926 was done at the average cost of about 26 cents per $100 of insurance in force. The average membership of 1,060 companies was 1,762, compared with an average of 1,532 members for 1,116 companies in 1916. Insurance per member in 1926, for companies reporting both membership and risks, was $3,144. No corresponding figure for the country as a whole is available for 1916.

Middlemen Fight Co-Op. Marketing and Government Activity

Would Move Bureau of Agr. Economics to Dept. of Commerce

WAR on co-operative marketing by organized middlemen determined to cripple the government's activity in this direction continues.

W. F. Jensen, professional organizer and business manager of the American Association of Creamery Butter Manufacturers, has written the members of the organization presenting an outline of proposed discussion on Co-operative Marketing and the Bureau of Agricultural Economics. The statement forwarded to the butter manufacturers follows:

Marketing No Place

"The present over-development of the marketing side of the U. S. Dept. of Agriculture is a product of the war control of industry; and as marketing, is a purely commercial operation and has no proper place in the agricultural department.

"The obstacle in the way of marketing studies by the Department of Agriculture is that it limits its activities to those marketing agencies in which farmers are members, while 95 per cent of the agricultural marketing is performed by middlemen, whose activities would come under the U. S. Department of Commerce, of which the President-elect was, until recently, the head.

"The Department of Commerce must necessarily maintain agencies at home and abroad to further the interests of our mining industry, our fisheries, our manufacturers and exporters. With the Bureau of Agriculture Economics transferred from the Department of Agriculture to the Department of Commerce much wasteful duplication of effort would be done away with.

"As at present conducted by the Department of Agriculture, there is never any comparison of the economy of marketing grain by the co-operative companies, the pools or the independent dealers, since the Agricultural Department invariably confines its research to the financial statements of co-operative companies, when the middlemen, handling 90 per cent of the crops are certainly entitled to whatever assistance the government can give."

A limited number of I. A. A. Annual Reports for 1928 will be available for general distribution. This book, handsomely illustrated, will tell what the I. A. A. is, and what it accomplished last year. If you want a copy, write to the Department of Information, I. A. A., 608 So. Dearborn St., Chicago, at once. Those who attend the Annual Meeting, Danville, can get copies at the Terrace Theatre, Wednesday morning.

BY FRANK GOUGLER

THE McLean County Produce Association held its first annual meeting at Bloomington on December 27. Seventy-five thousand pounds of butterfat were handled during the year. Refunds were made to Farm Bureau members out of the surplus earnings. This association is the only one in the state to confine its membership to Farm Bureau members.

It is doubtful if any other produce marketing association has furnished its creamery any finer cream than has this unit. The Freeport Dairy and Produce Company, which purchases the output of the association, recently made the following report on quality of cream received:

Month	10 Gal. Cans Rec'd	Cans Second Grade Cream
June	340	None
July	267	2
August	200	4
September	204	None

During September this creamery received a total of 1,063 ten gallon cans from five stations which contained only one can of second grade cream.

Does real sour cream test higher than cream not so sour? "No," says Dr. H. A. Ruehe, Chief of the Dairy Division at the University of Illinois who addressed several meetings on quality improvement. Ruehe says that 100 pounds of cream contains a given amount of fat whether sweet, slightly sour or extremely sour. Butterfat will not evaporate, so how can it get away? "What might happen," he says, "is that moisture from cream allowed to stand will evaporate and a subsequent test might show a higher percentage of fat. But nothing would be gained here by the producer for the higher test would be balanced by the loss in weight."

How much butter will 100 pounds of butterfat make is a question asked at many of our produce marketing meetings. This is a good question and is one that should be understood by every producer who sells butterfat. In a report from C. Bechtelheimer, Secretary, Iowa Co-operative Creameries, for 1928 he shows the average overrun for 113 creameries to be 23.23 per cent. In other words 100 pounds of butterfat will make 123 pounds of butter. This overrun is largely salt and water which costs practically nothing. It explains the reason why creameries can pay practically the butter price for butterfat. The overrun takes care of manufacturing costs and profits.

Another question that is often raised at these meetings is: What does it cost to manufacture a pound of butter? Bechtelheimer also answers this question in the same report as follows:

Influence of Volume of Butterfat upon the Price and Cost

Volume of Butterfat	Aver. Price Paid Per Pound Butterfat	Aver. Cost of Mfg. Per Pound Butter
Less than 100,000 lbs.	48.43	5.59
100,000 to 150,000 lbs.	50.15	4.19
150,000 to 200,000 lbs.	50.86	4.07
200,000 to 250,000 lbs.	51.03	3.50
250,000 to 300,000 lbs.	52.01	3.02
300,000 to 400,000 lbs.	51.77	2.94
400,000 to 500,000 lbs.	51.90	2.82
Over 500,000 lbs.	52.14	2.88

A vexing problem of our cream stations is the wide range of butterfat prices quoted during the late fall and winter months by direct shippers. Recent reports from producers show that Chicago direct shippers offered as high as 58 cents while the 90 score butter market held steadily at 48 cents per pound. Producers should act cautiously before accepting such bids. All is not gold that glitters. A. H. Liestman of Champaign County had been a direct shipper. He decided to sell through the cream pool at Fisher. After delivering two cans he remarked, "I don't get as much per pound butterfat through the pool as the direct shipper price, but I get more for my can of cream." This experience has been reported by many. It is self explanatory. Beware of the exceptionally high offers.

December is the month of greatest variation in egg prices at country points. From the following widely distributed points in Illinois the prices below are buying prices quoted December 24: Altamont (Effingham County) 35 cents; Clinton (DeWitt County) 44 cents; Walsh (Randolph County) 36 cents; Patoka (Marion County) 40 cents; Champaign (Champaign County) 46 cents. Such wide ranges are due to two factors, first, fresh eggs at country points are exceedingly scarce at this time of the year; second, it is the time of year that buyers at terminal markets are reducing prices low enough to purchase the spring crop at satisfactory figures.

As long as you leave your products in some other person's hand to market, you can expect nothing other than for them to handle it in a way that will net them the most profit. Farmers should quit cussing big business and get into it for themselves.—Land O' Lakes News.

These wide variations in prices create much dissatisfaction among producers and many are led to believe that markets are being manipulated. This is not the case. The buyer at this time is paying according to his market outlet. If the purchaser has a favorable local demand, he is in better position to pay higher prices than the dealer who must depend on shipping to terminal markets. On the date that these varied prices were being paid at country points the Chicago market ranged from as low as 20 cents for low grade eggs to 34 cents for the best eggs. The New York market ranged from 25 cents to 52 cents.

(Continued on page 11)

BY RAY E. MILLER

THE Chicago Producers' will hold its annual meeting at the Stock Yards Inn, Chicago, on Tuesday, January 22. Every man interested in livestock production is invited to attend. The year 1928 was the best year of the Association's history. The total number of cars handled by rail was 15,895 and 1,118 by truck, making a grand total of 17,013 cars.

The Producers Livestock Commission Association, National Stock Yards, Illinois, will hold its annual meeting at the National Hotel, East St. Louis, Tuesday, January 22. During the past year this co-operative handled approximately 25% of the total receipts on that market. The St. Louis house was the first of the 13 Producer agencies established and since its inauguration has made an enviable reputation in volume of business and quality of service. Every livestock grower is invited.

The Illinois Farm Bureau Serum Association will meet in Danville Tuesday, January 29. The meeting will begin at 10 a. m. in the ballroom of the Wolford Hotel. D. O. Skidmore, chief of the division of virus and serum control, U. S. D. A., has been invited to address the gathering. Dr. Robert Graham of the University of Illinois and Dr. James McDonald, in charge of Illinois hog cholera control work, also are expected to speak. The Association handled approximately 35,000,000 cc of hog cholera serum and virus during 1928.

Chris L. Christensen of the United States Department of Agriculture will be the headliner for the marketing conference on Wednesday afternoon, Jan. 30, Danville. Following Mr. Christensen's address the livestock marketing section will devote itself to a consideration of the livestock marketing program of the I. A. A. Suggestions are invited from delegates or others in attendance. Improved service from local livestock shipping associations, the relation which should exist between co-operative shipping associations and co-operative selling agencies, and the tendency toward the establishment of small local yards throughout the corn belt will be major topics for discussion.

The outlook for American pork products in Germany is still unfavorable and existing conditions do not offer much hope for any decided change that will work for an early increase in sales, says the Dept. of Commerce. The movement of home-grown hogs to market has increased considerably during the past month and the price of live pork has held fairly steady.

It is estimated that over 50 per cent of the hogs in Germany are fed on imported feeds.

Life Insurance

BY L. A. WILLIAMS

THE Country Life Insurance Company is now a fact. Reservations are in that will consume the entire allotment of the first participating ordinary life policy. Just as rapidly as the applications can be taken and the information obtained from each risk, the policies will be issued and protection for these Illinois Farm Bureau members will begin to be effective. Nothing like this has ever been enacted at the inauguration of any life insurance company.

The enthusiasm which the Country Life Insurance Company is meeting with assures a tremendous first year's business, which in turn assures prosperity for all time, since the first year is the expense year for any life insurance company. The work that is done now in starting a company will never have to be done again, and it only remains for each Farm Bureau member to participate in the benefits of this great protection organization, for us to be 100 per cent efficient in our department.

There will be some applicants who will not be able to get the first policy because they are not desirable risks. They in turn will be fair to the other members and feel that it is only fair that the better risks enjoy the better rates and superior benefits. Where medical examinations are made, it will be because the risk requires further investigation. Whenever that investigation is made, the applicant should feel that information will result which is worth much to him as well as to the Insurance Company. If anything is physically wrong with the applicant he would be the one to benefit from such information by attempting to correct the impairment as quickly as possible.

Life insurance prolongs life because the applicant is constantly advised of his physical fitness. He also is relieved of the great strain and worry which in time of sickness permits him to recuperate without worry of what would happen should he pass out of the picture. Life insurance is constantly increasing the wealth of our membership, leaving funds for adequate rearing of children, and more favorable living circumstances. It is a great cooperative move based upon group averages of life expectancy, averages of interest earnings, and averages in persistency of business.

Among the younger generation life insurance is welcomed as a definite savings contract, a definite way to guarantee an estate, a definite way to pay up an estate, and a definite way of guaranteeing a competence for a future date. We find the advice of the older people always ready, and always 100 per cent in favor of the younger people taking out life insurance at an early age, thereby establishing a lower rate, and also precluding the possibility of rejection at a later time when impairment may creep in making them undesirable risks for a life insurance company. Life insurance is an aid to greater stability of the American home. It has become an economic necessity in creating estates, in guaranteeing the necessities of life as well as home comforts, in providing for the education of children, and in making possible a higher plane of living.

Life insurance is the recognized institution for carrying out family plans and hopes by means of contract that protects against the unforseen catastrophe to the income earner and engineer of affairs of the family. We hope all Farm Bureau members will watch for and study each policy offer as it is made, and that many will use the opportunity presented that low-price protection may be maintained. By so doing the superior benefits will constantly and increasingly return to the policyholder to whom they rightfully belong. Economy in managing a life insurance company's affairs is the eternal watch word. Economy coupled with the mutual benefit plan makes for low-cost protection and high efficiency.

Our aim is not to pile up insurance money for the sake of accumulating large funds. Our aim is rather to spread the news of what Country Life is and what it will do. We want every member and his family to know what group bargaining and action will do for each one in protection and savings accounts insurance, lower rates, policies without frills, claims without contest, highest security, and in general old line life insurance minus unnecessary costs and charges.

Confidence and co-operation will result in cash savings; this you make possible by sending in the business at a lower cost, saving a large sales expense, and permitting us to exercise economy at the Home Office in all plans and overhead. Tell your neighbor about the Country Life Insurance Company and the benefits of Farm Bureau membership.

Produce Marketing

(Continued from page 10)

During November the Scott County (Winchester, Ill.) Produce Marketing Association handled 5,743.89 pounds of butterfat, 15,749 pounds of live poultry, and 1,119 dozen eggs. The total trading income on the three commodities amounted to $636.05 and the total expenses amounted to $303.02, leaving a surplus of $333.03. Operating costs were as follows for each commodity: Butterfat $143.96 or 2.49c per pound; poultry $149 or 1c per pound; and eggs $10.46 or 1c per dozen.

A Company for Insurance Companies

THE Farmers Mutual Reinsurance Company is a service institution for fire and tornado insurance companies. Its work begins where that of the county or township mutual ends. It provides:

DIRECT INSURANCE to cover risks such as large residences, buildings, community school buildings and churches which the local company cannot handle with safety;

SPECIFIC REINSURANCE to enable local companies to spread their larger risks and so prevent heavy assessments in case of unusually large losses.

BLANKET REINSURANCE to assist local companies when they have excessive losses for any year.

And all on the mutual, AT COST basis.

It Will Pay You to Investigate.

Smith and Barton Succeed Selves, A New Director Named

Many Early Leaders Return for Banquet and 10th Anniversary Celebration

PRESIDENT Earl C. Smith and Vice-President Frank D. Barton were unanimously re-elected at the business session following the annual banquet held on Wednesday night, Jan. 30, at the 14th Annual I. A. A. Convention, at Danville. Mr. Smith's name was placed in nomination by E. E. Stevenson, president of the LaSalle County Farm Bureau and a charter member of the organization. He paid a glowing tribute to Pres. Smith for his energetic devotion to the work of the Association. Col. George B. Seaman of Christian county seconded the nomination, and E. C. Coulter of Sangamon county moved that the nominations be closed. The Secretary was instructed to cast a unanimous ballot for the president.

C. J. Gross

"Uncle Joe" Fulkerson of Jersey county, in a brief complimentary speech, nominated Frank Barton. J. C. Sailor of Iroquois county seconded the nomination. Charles Meis of Livingston county moved that the nominations be closed, and a unanimous ballot was ordered cast for the vice-president.

Gross From Piatt

President Smith and Vice-President Barton both responded with appropriate remarks in which they pledged their best abilities to the cause of organized agriculture and the future of the Association.

Only one change was made in the Executive Committee. C. J. Gross of Piatt county succeeded J. L. Whisnand of Coles county in the 19th congressional district. All other directors from the odd-numbered districts were re-elected.

RE-ELECTED

Earl C. Smith Frank D. Barton

President Sam H. Thompson of the American Farm Bureau Federation praised President Smith for his leadership and energy in carrying on the administrative work of the Association. He stated that he had witnessed the re-election of 20 presidents of State Farm Bureau Federations during the past few months.

Former Officers Back

Among the "old-timers" who attended the birthday party held in connection with the annual banquet on Wednesday night were Ex-Presidents J. W. Kirkton, Howard Leonard, Harvey Sconce, Sam H. Thompson, and former Executive Committeemen C. V. Gregory, Stanley Castle, N. F. Elder, D. G. Reder, H. T. Marshall, John C. Gummersheimer, J. C. Sailor, H. E. Goembel, A. O. Eckert, Jacob Olbrich, and Joe Fulkerson. Other officers present were George A. Fox, former secretary and treasurer, and Dean H. W. Mumford, who was the first director of livestock marketing for the Association. All responded with short talks. Members of the I. A. A. Executive Committee participated by introducing their nearest neighbors seated at the speakers' table.

Frank L. Mulholland of Toledo, the speaker of the evening, came on late in the program and accomplished the difficult task of holding and interesting his audience though many speakers had preceded him.

Entertainment was provided by the University of Illinois Glee Club. The boys from Urbana made the Armory ring with a variety of college songs. After the singing came brief "wise-cracking" which provided much merriment.

"The banquet was an inspiration from beginning to end," said many a first-time delegate.

It Was Another Great I. A. A. Meeting, Every One Went Home Happy

Danville Was the Ideal Hostess, Enthusiasm, Harmony Prevail

ANOTHER great annual I. A. A. meeting is history. This assembly at Danville the last two days of January did not reveal any marked departure from previous conventions. But harmony, hopefulness, self-confidence, determination, enthusiasm, pride was in the air. There was a general feeling of satisfaction in the realization that 14 years after its birth, 10 years after the renaissance of 1919, the Illinois Agricultural Association was a potent going concern, the pride of its founders—the largest trade organization in the state.

Adviser Otis Kercher, President Lenhardt, Lieutenant Sandusky, Vermilion County Farm Bureau folks, the Danville Chamber of Commerce, H. C. Horneman, the amiable, friendly president of the Sugar Creek Creamery Company had done their work and done it well. Never has an I. A. A. convention been better handled. There was room for every session, assembly halls conveniently located, splendid accommodations for all.

Tuesday Night Dinner

The Farm Bureau presidents', farm advisers', I. A. A. committee, officers and staff members' "closed session" dinner on Tuesday night was a high point in the week. The food was excellent, the service unexcelled, the entertainment unsurpassed. It was all provided by the Danville Chamber of Commerce and the Sugar Creek Creamery Co. Danville was a considerate and kindly host.

The resolutions presented elsewhere in this issue reveal no particular change in organization policy. The old principles are all there. There are additions, revisions, modifications, but the problems today are little different from those of last year, the year before, five years ago—and there is recognition of this fact.

Journalists Get Mention

There were 194 official delegates, every county represented. For con-

millionaire and the pauper can get along without automobile insurance. The wealthy man can afford to carry his own risk—the pauper has nothing to lose. But most of us are in neither class. Few people can afford to pay a $10,000 or $15,000 judgment for injuring another. A car destroyed or lost by fire, theft, or collision would be felt keenly by the majority of owners. Frank L. Mulholland of Toledo, the speaker of the evening, came on late in the program and accomplished the difficult task of holding and interesting his audience though many speakers had preceded him.

Entertainment was provided by the University of Illinois Glee Club. The boys from Urbana made the Armory ring with a variety of college songs. After the singing came brief "wise-cracking" which provided much merriment.

"The banquet was an inspiration from beginning to end," said many a first-time delegate.

It Was Another Great I. A. A. Meeting, Every One Went Home Happy

Danville Was the Ideal Hostess, Enthusiasm, Harmony Prevail

ANOTHER great annual I. A. A. meeting is history. This assembly at Danville the last two days of January did not reveal any marked departure from previous conventions. But harmony, hopefulness, self-confidence, determination, enthusiasm, pride was in the air. There was a general feeling of satisfaction in the realization that 14 years after its birth, 10 years after the renaissance of 1919, the Illinois Agricultural Association was a potent going concern, the pride of its founders—the largest trade organization in the state.

Adviser Otis Kercher, President Lenhardt, Lieutenant Sandusky, Vermilion County Farm Bureau folks, the Danville Chamber of Commerce, H. C. Horneman, the amiable, friendly president of the Sugar Creek Creamery Company had done their work and done it well. Never has an I. A. A. convention been better handled. There was room for every session, assembly halls conveniently located, splendid accommodations for all.

Tuesday Night Dinner

The Farm Bureau presidents', farm advisers', I. A. A. committee, officers and staff members' "closed session" dinner on Tuesday night was a high point in the week. The food was excellent, the service unexcelled, the entertainment unsurpassed. It was all provided by the Danville Chamber of Commerce and the Sugar Creek Creamery Co. Danville was a considerate and kindly host.

The resolutions presented elsewhere in this issue reveal no particular change in organization policy. The old principles are all there. There are additions, revisions, modifications, but the problems today are little different from those of last year, the year before, five years ago—and there is recognition of this fact.

Journalists Get Mention

There were 194 official delegates, every county represented. For con-

venience the press men called the crowd 2000. Since the newspaper men and women seldom get mentioned they are presented as follows: Allen R. Dalrymple, Chicago, Associated Press; Frank Ridgway, Chicago Tribune; E. J. Beckman, Chicago Journal of Commerce; Gifford Ernest, Chicago Daily News; Frank Bill, Bloomington Pantagraph; Agricultural Editor Kercher of the Decatur Herald; Jack Williams, Danville Commercial News. The farm journalists, all from Prairie Farmer's staff, were Floyd Keepers, John Lacey, Miss Lois Schenk. Editor C. V. Gregory is mentioned among the "old-timers." He was "in" at the birth of the I. A. A. S. J. Duncan-Clark, editor of the Chicago Evening Post, was the principal speaker before the Organization-Publicity conference.

Zero Weather Arrives

Lack of space forbids printing in this issue all the interesting speeches. Most of the news you already have seen in the press dispatches and in Prairie Farmer. The reporters handled the news of the convention most ably. The Associated Press stories found their way into newspapers throughout the United States.

Every official delegate to the meeting "checked in." Every one stayed to be in on the final session Thursday afternoon. Snow and zero weather blew in the last day of the meeting but apparently everyone went home happy.

AS OTHERS SEE US

Earl C. Smith on Farm Relief

That Earl C. Smith of Pittsfield has been reelected president of the Illinois Agricultural association with a membership of 60,000 is an honor of which he may well be proud. His has been a delicate and difficult task during the past year of bitter controversy over agricultural relief. As a delegate to the republican national convention at Kansas City, he championed the Lowden farm relief plan, based largely upon the principle of the equalization fee, but the agricultural group which President Smith represented went down to defeat. The division of agricultural forces on other issues during the election campaign made collective farm action at the polls impossible, but all of the various groups, although voicing conflicting opinions, agreed that great good had been accomplished through agitation of the question of farm relief which brought from Mr. Hoover, the successful candidate for the presidency, a pledge that he would call a special session of congress and that farm relief would be made a paramount issue in his administration. In this agitation President Smith took an active part. He now advises that President-elect Hoover "should have the opportunity to direct the preparation and enactment of legislation embodying the necessary principles to carry out promises made by him during the campaign." No other position could be taken logically and with any promise of desirable and practical results. As Mr. Smith suggests, farmers must not be too reliant upon others, but must develop the "self-help" plan. The State Register believes in the power of organization and sees in the gradual coordination of farm groups the greatest promise of practical legislative results. Certainly, the practical program for all concerned at this time should be one of cooperation regardless of conflicting views and prejudices created during the campaign. They will thus expedite the passage of farm relief legislation by the Hoover administration and aid in making it effective.

The State Register favored the equalization fee farm relief plan and agreed whole-heartedly with the Lowden forces in the republican national convention, but as President Smith of the I. A. A. said yesterday in Danville, the Hoover plan must now be tried and to make it successful there must be self-help and agricultural cooperation. There can be no denial of the fact that agriculture has suffered from economic injustice, and has not enjoyed a fair share of national prosperity. As it is the basic industry such an injustice is indefensible. Prosperity for the farmers means a more general spread of prosperity for the entire human family.—Springfield, Ill., Register.

What Busy Farm Organization Can Do

Newspaper readers who do not ordinarily scan the pages devoted to agricultural interests, would do well to look over the annual report of Earl C. Smith, president of the Illinois Agricultural Association, as published in The Pantagraph of Friday. Without here attempting even to refer to the many forms of activity for the benefit of farmers in which that organization has engaged the past year, it can be said that the President's annual report served to open the eyes of the average layman as to the possibilities of organized effort for agriculture. One wonders how the business of the farm was carried on in the old days before there were organizations of farmers and the many forms of advice and information which they are now dispensing.—Bloomington Pantagraph.

The Price of Unequal Representatior

The Illinois Agricultural Association has renewed its demand for a state income tax. The farmers represented by the Association contend that the present taxes bear too severely upon land, and therefore upon agriculture. They wish an income tax because it would relieve farmers and transfer a part of their burden to salary and wage earners.

As long as the legislature of Illinois deprives the cities of an honest apportionment, based on the census, the merits of the farmers' argument are not likely to be given serious consideration. The city members can block a state income tax law, and they must do so at least until the taxpayers who will bear the burden of the new tax are given a fair share in the legislature which levies it.—Chicago Tribune.

Prejudice Is Bar To Understanding

"Develop your genius for communication from among your own young people. Modern writers are needed to tell the story of farm success and achievement," said S. J. Duncan-Clark, editor of the Chicago Evening Post, addressing the Organization-Information Conference during the I. A. A. convention at Danville. "You have a story," said Mr. Duncan-Clark. "Tell it. Call on the young people who have writing ability from among your own ranks."

Mr. Duncan-Clark spoke of the prejudices which exist between the city and country.

"The comment and criticism of the farmer you hear in the city," said the speaker, "is that he is always grumbling. Somehow we have gotten that impression and somehow you have given it to us. You know more about us than we know about you. You read about our scandals in the newspapers and may judge us accordingly. We read about you only when you throw our milk into the ditches and have a grievance. Thus, both of us have the wrong impressions of each other."

During the course of the speaker's address a delegate in the audience shouted "Put it in the Chicago papers," referring to Duncan-Clark's suggestion that farmers tell their story of achievement. "That's a good suggestion," returned the speaker. "Maybe it will bear fruit."

The Illinois Agricultural Association RECORD

Published monthly by the Illinois Agricultural Association at 404 North Wesley Ave., Mount Morris, Ill. Entered as second class matter at post-office at Mount Morris, Ill., Oct. 20, 1925, under the Act of Mar. 3, 1879. Acceptance for mailing at special rate of postage provided in Section 412, Act of Feb. 28, 1925, authorized Oct. 27, 1928.

Annual Luncheon Is High Light Among Convention Events

Guests Represent Many State-Wide Organizations

NEARLY a thousand delegates and visitors attended the annual I. A. A. luncheon held in Danville's armory on Thursday, January 31. President Earl C. Smith presided. About noon John H. Harrison, publisher of the Danville Commercial News, arrived from Washington bringing a special message from Senator Otis Glenn who was detained in the Capital. Mr. Harrison took Senator Glenn's place on the program and read a personal message from him, and greetings from Senators Arthur Capper of Kansas and C. L. McNary of Oregon. Due to the illness of Senator Deneen, Mr. Glenn decided to remain in Washington so Illinois would be represented in the fight for the passage of the Cruiser bill.

Many Guests

Among the luncheon guests were Wm. H. Malone, chairman of the Illinois Tax Commission; C. G. Ferris, secretary of the Illinois Chamber of Commerce; John H. Walker, president of the Illinois State Federation of Labor; Representative Hugh M. Luckey of the Illinois Legislature; Dr. R. E. Hieronymus, University of Illinois; James L. Donnelly, secretary, Illinois Manufacturers' Association; State Senator Ray Paddock; H. E. Young, secretary of the Illinois Farmers' Institute; Professor John D. Black, Harvard University; Dean H. W. Mumford, University of Illinois; Dean-Emeritus Eugene Davenport, who is back at Urbana assisting President Kinley; President Sam H. Thompson; State Senators Harold C. Kessinger of Aurora and Simon Lantz of Congerville; C. E. Bruer, Chairman of the House Agricultural Committee, 56th General Assembly; Senator A. S. Cuthbertson of Bunker Hill; Howard Leonard, Eureka; and Harvey J. Sconce of Sidell.

Speakers Varied

Each guest responded, on being presented, with short talks. Chairman Malone vigorously outlined the developments in the fight for obtaining a fair assessment of property for tax purposes in Cook county. The Tax Commission had declared invalid the valuations of 1927 after which it was revealed that Chicago bankers had loaned $140,000,000 to the city taking tax warrants as security. When the 1927 assessment was declared invalid they were left holding the sack. The bankers, subsequently, assisted in raising funds to reassess Cook county property on an equitable basis and to publish the assessments by street and number.

Annual Report Shows What I. A. A. Did For Members During 1928

Indicates Active Service In All Departments for Year

A SURVEY of activities and accomplishments of the Illinois Agricultural Association for 1928 reveals that fifty County Farm Bureaus sponsored membership campaigns since the first of January; that fourteen of these had increased their membership over that of three years ago; and that twenty other counties signed up approximately the same number. Six other counties were expected to show a loss in membership. Thus, the standing in the fifty counties on the average will be little different than that of three years ago, according to George Metzger, director of organization. Ten counties launched membership drives late in the year. Four of these were expected to hold their own while the other six were expected to show an increase. The membership in the I. A. A. is close to 60,000. McLean and Knox counties are the two leaders in number of members. Both are large counties.

PUBLICITY

THE Department of Information reported that news of I. A. A. activities had appeared in the press in practically every state in the Union; that 357 written news stories had been released in addition to other short news items telephoned to the three press associations in Chicago; that the Association had broadcast a total of 101 hours over radio Station WJJD, Mooseheart, and in addition its representatives broadcast twice on nation-wide chains of radio stations. In addition to staff members, more than 40 prominent outside radio

speakers appeared on the I. A. A. daily programs.

It is estimated that approximately 100,000 people attended the 14 district picnics sponsored jointly by the Farm Bureaus and the Illinois Agricultural Association during the year.

TAXATION

DURING 1928 tests of valuations by the Department of Taxation were completed in 12 counties. Substantial deductions in valuations were made particularly in Stephenson, Crawford, Richland, and Johnson counties, and a somewhat smaller reduction in St. Clair county. Following the long struggle for equalization in Champaign county, the 1928 Board of Review reduced land valuations from 10 to as high as 20 per cent. Earlier in 1928, the State Tax Commission reduced valuations of land and improvements in 10 counties all in southern Illinois, the reductions varying from 10 to 20 per cent.

The Department estimates that taxes for all purposes on farm lands, payable early in 1928, were $4,400,000 less than they would have been if the high valuations current in 1920-22 had remained, and $1,800,000 less than they would have been if the 1926 valuations had remained unchanged.

Much of the time of Mr. Watson, director of taxation, was spent in studying the entire revenue system of the state as a member of the Joint Legislative Revenue Committee appointed by the Governor of Illinois. The report of the committee was scheduled for completion February 1, 1929. Mr. Watson was the only member representing agriculture on the committee. The report will point out some of the fundamental weaknesses of the present taxing system and will suggest statutory and probably constitutional changes necessary to remedy such weaknesses.

GRAIN MARKETING

HARRISON FAHRNKOPF, former farm advisor in McLean county, became grain marketing director on Oct. 1.

The new grain marketing program is being developed in close co-operation with the State Farmers Grain Dealers' Association. The ultimate goal is greater service and more satisfactory prices and marketing conditions for the man on the farm.

The Association recognizes the importance of the farmers' elevator as a basic unit in a grain marketing system. It is hoped to stimulate greater interest and participation on the part of farmer stockholders and patrons in these co-operative agencies.

The memorandum of agreement adopted by the I. A. A. and I. F. G. D. A. joint committee on relations states that: 1. The Farm Bureaus of Illinois recognize the farmers' elevators of Illinois as the medium through which any constructive grain marketing program should go forward.

2. The announced purpose of said farmers' elevators is to operate so as to return the largest possible ultimate price to the producers of grain.

3. Both the Farm Bureaus and the farmers' elevators recognize that to carry out most effectively paragraph 2, it is essential to control the marketing of the maximum volume of grain produced within a given area.

4. Therefore, the Illinois Agricultural Association is willing and desirous of rendering such constructive service as may be deemed advisable and feasible to increase the volume of business now being handled by farmers' elevators, and stimulating the moral support of the farmers behind said elevators. We, the representatives of said Association, submit to the representatives of the Illinois Farmers Grain Dealers' Association our willingness to employ and maintain a grain marketing director to carry out a program which may be agreed upon by both the Farmers Grain Dealers' Association of Illinois and the Illinois Agricultural Association.

LIVESTOCK MARKETING

ON DECEMBER 1, 79 of the 94 organized Illinois County Farm Bureaus were emphasizing livestock marketing as one of their important projects. The major activity of the Association was to co-operate with these Farm Bureaus in carrying out an aggressive educational campaign in co-operative livestock marketing. County-wide meetings of directors and managers, trips to central markets, conferences with livestock shippers and officials, etc., were held. Thousands of livestock growers in Illinois attended the 48 tours to the Chicago, Peoria, Indianapolis, and East St. Louis terminal markets.

Considerable work was done with shipping associations in matters relating to better methods of accounting, use of trucks in assembling livestock, and annual meetings.

The co-operative Producer livestock marketing agencies on the four markets in and adjacent to Illinois registered increases in receipts of Illinois livestock of approximately 17 per cent during the first six months of 1928 over a similar period in 1927.

The Illinois Farm Bureau Serum Association purchased co-operatively 36,100,000 c. c. of serum and virus for farmers during the year at an estimated saving of $80,000 to $100,000 compared with going prices to individuals not receiving the benefit of the pool buying. The advantages to hog growers through the promotion of early vaccination have been of even greater importance than the savings on serum and virus.

DAIRY MARKETING

THE farm value of dairy products in Illinois is $101,000,000 each year. Of this amount $78,000,000 represents the sale of fluid milk. Business-like co-operation in the sale of fluid milk will increase the net returns ten per cent. This makes co-operative marketing worth $10,000,000 or $50 per dairy farmer.

It is being done in community after community through the introduction and administration of the following balanced program:

1. Quality improvement.
2. Use of collective bargaining power in selling.
3. Stabilization of markets through surplus control with sound local selling plans.
4. Checking of weights and tests.
5. Watching credit rating of buyers.
6. Getting out truthful market information.
7. Advertising to increase the use of dairy products.

The Peoria group has just closed its second successful year of marketing through their pool with sales approaching the million dollar mark for the year. Prices at Peoria now are about thirty cents per hundred weight more than in the days of individual selling, which makes an aggregate return to the thousand members who sell their milk co-operatively an extra $120,000 annually. This has come about not in increasing the price to the consumer, but in effecting savings in transportation to the market, delivery and overhead costs on the market and in increased sales through better quality.

Programs very similar to the Peoria plan have been inaugurated and are functioning at Bloomington, Champaign-Urbana, Rockford, DeKalb, Springfield, Waukegan, Mattoon and Quincy.

While co-operation in Illinois is only beginning, its results at this stage of the game are easily worth one and a half million dollars to the dairymen of Illinois, annually.

In both the Chicago and St. Louis districts organization work is going on which when completed should produce organizations that, with good business management, will give a majority of Illinois farmers effective milk marketing service.

Active plans now underway point to the early federation of the organized markets into a state sales association which will give added benefits to the dairy industry in the state.

PRODUCE MARKETING

TWENTY-SIX co-operative produce marketing units handling cream, poultry, and eggs are now operating in Illinois. The oldest one started business June 1, 1924. Twelve additional units are now being organized. Organization work was recently

started in Clark, Crawford and Lawrence counties.

The prevailing station price in these counties has been 46 cents per pound for butterfat. Assuming that the centralized creameries will bid as much for pool cream at these points as they are now paying for pool cream in organized localities, dairymen will receive at these new stations five cents above the present Chicago quotation for 90 score butter, or 53 cents per pound butterfat. Out of this, operating costs must be paid. This will not exceed three cents per pound, which will leave a net profit of four cents. This represents very closely what takes place from time to time as new stations are opened.

Illinois produces around 60,000,000 pounds of butterfat, annually. Thus, the bargaining power gained through co-operative produce marketing associations means a potential gain in income to Illinois cream producers of from $1,500,000 to $2,500,000 annually.

Producers are selling their butterfat on their own weights and tests through their 26 operating units. A plan is being developed for paying the producer on a graded basis, and an effective plan for cream improvement is underway.

The estimated volume of 26 co-operative units for 1928, at this writing, is 1,980,000 pounds of butterfat. The net gain to producers marketing through these associations is estimated at $79,200.

FRUIT AND VEGETABLE MARKETING

THE general level of fruits and vegetables was lower in 1928 than for many years. All commodities suffered. The low prices were to a certain degree anticipated by the Department early in the season and steps were taken to increase local demand and the consumption of Illinois grown fruits from the nearby markets. A campaign of advertising was launched with the aid of sister organizations in the state seeking greater use of Illinois grown products. The demand for peaches particularly was decidedly increased over that of any previous year. Credit is due the University of Illinois, the Illinois Chamber of Commerce, the Illinois State Horticultural Society, the Illinois Department of Agriculture, and Prairie Farmer for their helpful co-operation.

This local demand resulted in a higher general level of prices in Illinois than in other producing sections. Growers who were not connected with marketing organizations and who were forced to depend upon speculators, or to consign their products often failed to receive net returns large enough to pay the cost of harvesting and packing.

A material reduction in freight rates on peaches shipped to southeastern points was received during the year. This is the first year Illinois peaches have moved into southeastern territory at the same freight rate as peaches from Georgia, the Carolinas, etc., move into Illinois.

INSURANCE

APPROXIMATELY 11,000 auto insurance policies have been issued by the Illinois Agricultural Mutual Insurance Company to Farm Bureau members in Illinois. It is estimated that these members saved more than $150,000 in the cost of insurance and initial investment compared with the cost of similar protection in any other company.

An accident prevention campaign, carried on among members during the year, is tending to reduce the number of accidents and also the cost of insurance.

By the end of the year the assets of the company will be close to $225,000.

THE Farmers Mutual Reinsurance Company, with headquarters in the I. A. A. office has $13,000,000 worth of insurance in force. This is fire and tornado insurance. In addition, $4,600,000 worth of farm crop hail insurance was provided during 1928 at a saving of $9 per thousand, or more than $36,000 compared with the cost of similar insurance in a stock company.

The savings on direct fire insurance will total at least $6,000 since the company renders this service at a cost of approximately 80 per cent of the stock company rate. The total savings, including fire insurance, field crop, and fruit and vegetable hail insurance will approximate $49,640 for the year.

In addition to the financial savings, farmers benefited through the improvement in insurance facilities due to the co-operation of the state reinsurance company with the local mutuals. The local mutuals are enabled to avoid heavy net losses and to obtain a more stable assessment. This company is the only mutual writing hail insurance in Illinois.

AT THIS writing $125,000 worth of capital stock has been subscribed in the new proposed life insurance company and more than $14,000,000 worth of insurance has been pledged for the first special participating policy.

The company's charter has been applied for and operations are expected to begin at an early date.

WHY take life too seriously? You'll never get out of it alive!

ACCOUNTING AND BUSINESS SERVICE

THE Illinois Agricultural Co-operatives Association audited the books and gave financial advisory service to its 212 members during the year. Current membership in the Association is classified as follows:

Farmers Elevators	81
Farm Bureaus	54
Home Bureaus	2
Farm Supply Companies (Oil)	23
Mutual Insurance Companies	11
Livestock Terminal Comm. Assns.	5
County Livestock Shipping Assns.	7
Local Livestock Shippings Ass'ns.	7
Dairy & Produce Marketing Assns.	9
Mercantile Companies	5
Seed Companies	4
Miscellaneous	3
Total	212

The Association has a staff of six experienced accountants who have special training in the co-operative field.

The Association filed 125 applications for income tax exemptions with the Internal Revenue Department. Thousands of dollars in refunds covering income taxes previously paid were secured for clients in addition to securing exemptions during the year.

LIMESTONE PHOSPHATE

TWENTY-TWO limestone companies and two rock phosphate companies are handling limestone and phosphate in Illinois under signed agreement with the Illinois Agricultural Association. Ninety County Farm Bureaus made use of this Department's limestone project during the year. Sixty-four counties co-operated in handling rock phosphate.

The I. A. A. maintains an office in the phosphate fields at Columbia, Tenn., where it superintends the sampling and testing of ground rock phosphate sold to Illinois Farm Bureau members.

Approximately 400,000 tons of limestone were sold and used in Illinois in the nine months ending September 30, 1928. It is estimated that Illinois farmers secure their limestone as a result of collective bargaining at a 25 cent per ton discount making a saving of approximately $100,000.

Up to October 1 the two major phosphate companies had sold 29,000 tons of phosphate in Illinois on which Illinois farmers saved approximately $43,500 compared with going prices in other states.

(Continued on page 12)

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Entered as second-class matter October 20, 1925, at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Accepted for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the ILLINOIS AGRICULTURAL ASSOCIATION RECORD. Postmaster: In returning an uncalled for or missent copy please indicate key number on address as is required by law.

Resolutions Adopted at 14th Annual I. A. A. Meeting, Danville, Jan. 30-31, 1929

I

APPRECIATION OF DANVILLE

The visitors and delegates to the 14th Annual Meeting of the Illinois Agricultural Association held in Danville, January 30 and 31, 1929, hereby express their hearty appreciation for the cordial welcome and the uniform courtesy and co-operation shown to them by the Vermilion County Farm and Home Bureaus, the Mayor and Chamber of Commerce of the City of Danville, the industries and all organizations, and the citizens of the City and County who have so efficiently contributed to the success of this Annual Meeting.

II

ENDORSEMENT OF A. F. B. F.

We desire to express anew our pleasure in the manifestation of the spirit of harmony and co-operation shown at the last Annual Meeting of the American Farm Bureau Federation, and we hereby pledge our hearty support to any program thereof that has for its purpose the general betterment of agriculture.

III

TAXATION

Estimates by economists, if applied to the State of Illinois, indicate that of the net income of the entire population of this State, only about ten per cent is derived from the ownership of real estate and tangible personal property, not including the labor and management of owner-operators of such property; that about ten per cent is derived from the ownership of approximately twelve or fourteen billions of dollars of intangible property; and that the remaining eighty per cent of the net income of the entire population is derived from personal industry—wages, salaries, fees, commissions, and the labor and management of persons owning and operating their own property.

The gross unfairness of the present taxing system is shown by the fact that of all general property taxes in this State, about ninety per cent is levied on real estate and tangible personal property, about ten per cent on intangible property, while no direct tax whatever is levied on the eighty per cent of net income derived from personal industry.

There can be little doubt that the gross unfairness indicated by the figures given above is gradually becoming worse and will become still worse until the present taxing system is changed.

1. Income Tax

For the purpose of securing direct contribution to the support of State and local government by large numbers of people who, though abundantly able, are now paying little or no direct taxes for such purposes, we favor enactment of a tax on net income of persons, with moderate exemptions and moderately progressive rates, and with provision for the payment of such a tax by any person only to the extent that the tax levied on his net income exceeds all taxes paid by him on property in this State, provided that the proceeds of the tax on net income shall be used to replace or reduce the present tax levied on property for the State Distributive School Fund, or some other tax now levied on property for State purposes.

2. Resistance to Tax Increases

Until the people of the State of Illinois amend the Constitution and set up an equitable taxing system, we recommend that owners of farm property resist every attempt to increase taxes on such property, whether such increase in taxes is sought by increase of statutory tax rates, by submission of any bond issues, except in the most urgent emergencies, by measures permitting the inclusion of rural property in predominantly urban local taxing districts, by measures adding to the cost of county and local government, or by increased appropriations for any present purpose, or appropriations for any new purposes.

3. Constitutional Amendment

For the purpose of giving the General Assembly the power to set up an equitable taxing system, we favor the adoption of a joint resolution by the two houses of the General Assembly submitting to the people of the State an amendment of the revenue article of the Constitution in substantially the same terms as were contained in the amendment submitted in 1926.

ROAD IMPROVEMENT

Since the approval of the Sixty Million Dollar bond issue in 1918 and the One Hundred Million Dollar bond issue in 1924, the farmers of Illinois have been paying their portion of motor license fees for the construction of the State hard road system. They will continue to pay their proportion of the costs for this purpose until the last of the hard road bonds are retired about 1958 or 1960. It now appears that the two bond issues will be exhausted during the present year, leaving about 2,500 miles of the hard road system unconstructed. Without additional funds from some source, it does not seem probable that the remainder of the system can be paved except at a very slow rate.

On January 1st, 1925, as disclosed by the Federal Census of Agriculture, less than six per cent of the farms in the State were located upon concrete or brick roads. On the completion of the State system of hard roads, it does not seem probable that more than twelve per cent of the farms of the State will be located upon such roads. The great majority of the farmers will still be located from one mile to as much as ten miles from the hard roads which their motor license fees have helped to con-

struct. Unless the secondary roads are improved so as to give easier access to the hard road system, it will continue to be impossible as at present for large numbers of farmers to use the hard roads at certain seasons of the year.

4. Gasoline Tax

For the reasons stated, we favor the enactment of a tax on gasoline, provided that such part of the proceeds as is necessary for the completion, within a reasonable time, of the State bond issue system of hard roads shall be used for this purpose, and provided that the remainder of the proceeds shall be used for the improvement of the secondary or State-Aid road system of the counties under the supervision of the State Division of Highways. Provided, further, that in the improvement of the State-Aid roads—

a. The distribution of the funds to be used in the counties shall be made on the basis of the motor license fees.
b. The State-Aid roads to be improved shall be selected by the County Boards on the basis of traffic needs.
c. The type of improvement shall be gravel, unless a county board shall request and the State Division of Highways shall approve a more permanent type of construction.

5. Limitation of the County Highway Tax Rate

When the so-called Chicago Bonding Bills were before the General Assembly in June 1927, their advocates sought down state support on the promise that, coincident with the doubling of the basis of valuations, all tax rates would be cut to one-half of the statutory limitations at that time. After the adjournment of the General Assembly it was found that the clause specifically including the county highway tax in the reduction of rates had been stricken out, leaving the constitutional restriction on county taxes as the only limitation on the county highway tax rate. The failure to limit the county highway tax rate made it possible for any county board, if it so desired, to quadruple its levy of taxes for county highway purposes. Because of the increased power thus given them, many county boards have greatly increased their levy for this purpose.

For the reasons stated, we ask the General Assembly, including the supporters of the Chicago Bonding Bills, to carry out their promise, so amending the Act providing for a county highway tax that the maximum tax rate which can be imposed for this purpose, without a referendum vote, will be limited to twelve and one-half cents (12½c) on each one hundred dollars of assessed valuations instead of fifty cents (50c), as now permitted.

IV
AMENDMENT OF COOPERATIVE MARKETING ACT OF 1923

It appears from the experience of many Cooperative Marketing Associations, which have been organized under the provisions of the Cooperative Marketing Act of 1923, that certain amendments can be made to this Act that would further increase the usefulness of such organizations and make their operations more consistent with sound business practice and also clarify the apparent intent of the Legislature as to certain provisions.

For this purpose we ask the General Assembly to amend the Cooperative Marketing Act of 1923 so that the phraseology of certain provisions may be clarified, and sound business practices may be obtained, thereby increasing the efficiency and service of cooperative associations organized thereunder.

V
COOPERATIVE ACTIVITIES

(a)—We recognize that if the Farm Bureau movement of Illinois is to increase and maintain its rightful influence on the public and political conscience, all efforts of the County Farm Bureaus and the Illinois Agricultural Association in the County and State should be so mutually understood and co-ordinated as to make our programs most effective.

We, therefore, recommend that the State organization in no case interest itself in any county affairs, except by and with the consent and approval of the County Farm Bureau of said County; also, where matters of public interest are statewide, that the County Farm Bureaus function only through and with their State organization.

(b) We approve of the Illinois Agricultural Association's efforts to enlarge and extend cooperative marketing activities. Recognizing that the success of these efforts largely depends upon the volume of interest taken therein by the producers of the various commodities, we urge our membership to cooperate in every particular in the development of these efforts that the benefits to be derived therefrom may be enjoyed to the fullest extent.

(c) We believe that the various cooperative service organizations sponsored by the Illinois Agricultural Association provide some of the best means by which the Farm Bureau members may acquire the benefits of their organization.

We, therefore, recommend the continued and increasing use of these facilities by our members.

(d) We express our appreciation of the cooperation given this Association by many state-wide organizations, in striving for the solution of certain civic problems and particularly the problems of taxation, and urge a continuation of that policy.

VI
PURE MILK ASSOCIATION

The marketing of whole milk in the Chicago milk district has for some years constituted a most important and serious problem confronting dairymen of Illinois and adjoining states.

The Pure Milk Association was organized in Illinois largely through the efforts of the Illinois Agricultural Association and the County Farm Bureaus, as an agency for the solution of this problem.

We reaffirm the position repeatedly expressed relative to the necessity of applying the principle of collective bargaining in the disposal of farm commodities. In line with that policy, we congratulate the Pure Milk Association upon their spirit of fairness in submitting to arbitration the dispute between dealers and producers in the Chicago milk area and through such action their progress toward the attainment of a satisfactory price for their product.

VII
RURAL ELECTRIFICATION

Schedules of electric rates charged rural users over the state are of a large variety. The terms and conditions under which electric service is extended in rural districts differ widely.

Obviously all these rates and practices cannot be just and equitable and are not conducive to the encouragement of the use of electricity on farms.

In view of this we request that the Illinois Commerce Commission give special consideration to the subject of rural electrification, and in cooperation with all interested parties determine rates that shall be just and reasonable, and a basis for the extension of rural service that is equitable and fair.

VIII
BOVINE INFECTIONS

We urge the continuation of the effort to eradicate the menace of bovine tuberculosis with adequate appropriation therefor to the end that the curse be removed from our state at the earliest possible date.

We recommend a study of contageous abortion and the adoption of a program to prevent its further spread.

IX
GRAIN INSPECTION

We insist upon such administration of the grain inspection service, both state and federal, as will secure to the producers of grain in Illinois a fair grade on their product.

X
DESTRUCTION OF TAXABLE VALUES BY MINING

In behalf of farmers in taxing districts in which taxable values in large amounts are likely to be destroyed by strip coal mining or other mining, we ask the General Assembly to authorize an investigation for the purpose of recommending such legislation as will prevent the destruction of taxable values without adequate adjustment of existing bonded or other indebtedness in any taxing districts so affected.

COUNTRY LIFE INSURANCE

LOWEST RATES — HIGHEST SECURITY — FARM BURE

FE POLICY WILL PROVIDE An Education for Your Boy and Girl

AS a father or mother you want to give your son or daughter the best chance to succeed in life. Trained minds and developed talent are essential to success in this highly competitive age. The parent who sends his child out into the world without educational training and equipment is neglecting a duty. But how difficult it often is to spare the money required for a high school and college education unless provision has been made in advance.

You Can Start an Education Fund Today with a Twenty Pay Life Insurance Policy

A SMALL first payment of approximately ten dollars will do it. Yearly guaranteed rates are of the very lowest for a participating policy. The educational feature is only one of many adaptations.

The 20 Pay policy also means protection, a savings account, a low established life insurance rate, and relief from worry about the future.

Mail the coupon for full particulars, and learn about the *special advantages for Farm Bureau members*

Resolutions

(Continued from page 7)

XI

DIRECT MARKETING OF LIVESTOCK

The Illinois Agricultural Association favors that system of marketing which will give to the producer the highest net returns for his labor and investment consistent with fairness to the producer, the consumer and the distributor. Such returns to the producer cannot be developed or maintained in the absence of centralized selling control exercised by the producer through his own cooperative marketing facilities. The purchase of livestock by processors through country concentration points under their control or by country packer-buyers tends to eliminate competition between buyers, permits division of territory, promotes decentralization of producer selling control and is, therefore, in direct opposition to the development of such cooperative marketing facilities.

The Association recognizes the fact that constant change in marketing methods necessitates continued research work under producer control to assist in determining policies and developing selling methods. In the meantime the Association advocates support of the farmers' selling facilities as they are now established, namely, local shipping associations and the cooperative commission associations operating on the terminal markets in order that these sales agencies may develop to the point where they can make effective whatever system or systems serve the best interests of the livestock industry.

XII

RADIO

We approve of the position taken by the Illinois Agricultural Association whereby it respectfully requested and urged that the Federal Radio Commission in its final allotment of air rights adequately recognize agriculture by setting apart at least one exclusive wave length under the direction and control of agricultural interests.

XIII

AMENDMENT OF MEMBERSHIP ACT

In the present era of the development of various kinds of cooperative effort, it appears that membership organizations are limited to the development and organization phases of such cooperative enterprises, and it is at least a question as to their right to use membership funds for the purpose of meeting capital requirements of cooperative or mutual service organizations.

We, therefore, favor the amendment of some present law or the enactment of a new law making possible this added practical support and direction of cooperative and mutual effort.

XIV

AGRICULTURAL LEGISLATION

In seeking the adoption of a national policy for agriculture by the Congress and needed readjustments in the laws of our State, it has been clearly disclosed that all matters of this character are economic in far greater degree than political.

We, therefore, urge our members to carefully study all questions initiated by agriculture before Congress and the State Legislature; also the attitude and support given such measures by representatives of the people in these two bodies, and that with this information, our members, regardless of party, put forth every effort to retain in public office all those who consistently support the just requests and demands of organized agriculture.

XV

FLOOD CONTROL

We approve the progress being made in the construction of flood control works on the main channels of the Mississippi River under the authority of the Flood Control Act passed by Congress in 1928. And, we urge the prompt completion of the surveys authorized in the Act of 1928, which will provide the basis for additional federal legislation for completed flood prevention and control on the Illinois and Wabash rivers and throughout the entire Mississippi Valley.

XVI

WATERWAYS

The improvement of our inland waterway channels and the establishment of dependable common-carrier transportation upon them, coordinated with connecting railway lines by joint rates and through routes to interior points, will do much to bring prosperity back to the farmer and manufacturer of the Middle West.

In order to secure the immediate construction of adequate channels, the building of proper terminals at principal rail and river crossings and the development of common-carrier transportation services, it is necessary that all interests in the Mississippi Valley, Agricultural, Commercial and Industrial coordinate their influence and work together.

We, therefore, urge upon Congress (1) The immediate completion of the Lakes to the Gulf waterway with an adequate diversion from Lake Michigan to permit open channel navigation on the Illinois River below Utica. (2) The standardization of the channels of the Mississippi river system to a nine foot depth with sufficient width to permit the navigation of large tows such as now use the Ohio and lower Mississippi. (3) The upbuilding of the Mississippi-Warrior service and its coordination with and extension to the Illinois River and Hennepin Canal.

We urge upon the legislature of the State of Illinois the passage of such legislation as is necessary to provide for the completion of the Illinois waterway between Lockport and Utica by the opening of the navigation season in 1931.

We further urge upon the Governor of Illinois and the legislature the consideration and adoption of some plan that will provide adequate terminual facilities for rail and river services at the principal ports and rail river crossings in Illinois.

XVII

TARIFF

We favor the adoption of such policy in any program of tariff revision as will assist in the attainment of agricultural equality. Where tariff duties on agricultural products are not sufficient to prevent depression of the price thereof below a reasonable cost of production, we urge such revision as will secure a reasonable price therefor. In instances where the tariff contributes to the establishing of an unreasonable price on any of the products of industry, we urge such revision as will tend to reduce such prices, so as to give only reasonable protection.

XVIII

NATIONAL POLICY FOR AGRICULTURE

The Illinois Agricultural Association has for years urged and supported a national agricultural policy that would recognize and offer American agriculture equal opportunity with other industry to enjoy the privileges and benefits of the American protective system.

We have assisted in the development of a solution to this problem that recognized co-operative marketing organizations as the mediums through which farmers might exercise control of surplus production above domestic requirements and whereby the cost of such control should be borne by the commodity benefited.

We still believe the principles as set forth in such proposal offer the best solution that has yet been proposed to restore agriculture to its proper position in our economic life.

Recognizing, however, that the newly elected administration is definitely committed to find another solution that would restore equal rights, privileges and income to the farmers with that of other industry, we hereby pledge our support and cooperation in the development of any program that adequately recognizes the agricultural problem and seems to offer a solution that is workable, sound and permanent.

Respectfully submitted,

Resolutions Committee,

A. N. SKINNER,
Chairman.
M. G. LAMBERT,
R. F. KARR,
CHAS. BLACK,
CHAS. MARSHALL.

Save these resolutions for future reference. They embody the aims of your organization.

Observations

SOMETHING of a prophet is our banker-farmer friend John A. Carroll, president of several outlying Chicago banks, landowner, and member of the Cook County Farm Bureau.

Said he more than two months ago while speaking of the Chicago milk controversy, "The milk distributors have refused to deal with the organization of the farmers up to now. But they will move toward bargaining with the farmers whether they want to or not. When the public has the facts in the milk producing situation before it, there will be nothing left for the parties in the dispute to do but agree to arbitrate such questions as can't be settled between them in conference." All this has happened.

Ownership of farm land by city business men has an ameliorating influence on their attitude toward the problems of the farmer. Great good might result if more influential capitalists would invest larger portions of their funds in the business of agriculture. Self-interest is a powerful factor in influencing one's point of view. That the majority of Chicago daily newspapers have supported farmers' demands for legislation may be due in part to the fact that most of their publishers own farms. These men have learned first hand about farm profits, or rather losses. When there is a clash of interests, however, such as is embodied in a proposed state income tax, it is natural for the individual to take the side which profits him most, or hurts his pocket-book the least.

The farmer has more friends in the cities than he may suspect. Many Chicagoans were born and reared on farms, countless others have relatives on farms, or investments in land. These contacts have their influence. City people are human and approachable for the most part when you come to know them. Many do go about with a cloak of reserve and often a cold exterior—perhaps in self-protection made necessary by their environment. But under the crust, people are pretty much alike whether in city or country.

The editor of the Chicago Evening Post tells us that the average city man looks upon the farmer as a chronic grumbler. "Somehow we have got that impression; somehow you have given it to us," he says. That comes from reading the newspapers, rather than farm papers. The only time the farmer makes the front page is when he puts on a milk strike, fights tax increases, or appears in Washington to ask for helpful legislation. Most city newspapers play up the spectacular. It's just as absurd for city people to base their judgment of farmers on the news that appears in the headlines, as it is for farm folks to judge Chicago people by the prolific stories of gang murders, bootleggers, and grasping politicians.

One newspaper writer asks, "Why is a farmer?" Because he is an optimist, loves the life, and believes in his job. Thousands could say as much truthfully. Scores of farmers in Illinois, Indiana, Iowa, Minnesota, Wisconsin have told this writer that they prefer the farm as a place to live and work in spite of its handicaps.

In similar vein, a Chicago columnist, Herbert Kaufman, calls the farmer "The Chronic Bear . . . habitually selling his own market short . . . begins with a morning grouch and ends with an evening growl . . . persistently discounts the future of agriculture, etc." The injustice and inaccuracy of the accusation is self-evident. It comes from placing all farmers in the same category. There are bulls and bears in all professions, farming is no exception. But the man who plants in the spring, not knowing what he will reap surely displays some degree of optimism. When he continues to produce food year after year through periods of distress but hopeful for better days that's real fortitude, not pessimism.—E. G. T.

CHAMPAIGN COUNTY FARM BUREAU TAX COMMITTEE WINS FIGHT
Seated Left to Right: E. J. Tabaka, E. A. Smith, C. C. Burns, Roy Douglas, Chr. Standing: A. R. Grindley, John C. Watson, I. A. A. Tax Director, James T. Wise. An additional 10 per cent reduction in farm land valuations ordered by the Illinois Tax Commission, ends the long drawn out controversy in Champaign county. This will mean a reduction of three and one-half million dollars in valuations and will result in a saving estimated at $24,500.

Must Signal

IT IS proper to show a custom among automobile drivers, of holding out an arm as a signal that he is going to stop, or slow down, or change his course, and evidence showing the failure of the defendant to follow the custom, in a case in which it is material, is permissible as such evidence tends to show a want of ordinary care.

Farm Baseball League Amends By-Laws

THE eligibility clause defining who shall be eligible to play in the Illinois Farm Bureau Baseball League was amended as usual at the annual meeting of the League in Danville, Tuesday Jan. 29.

Hereafter "any Farm Bureau member whose principal interest and investment is in farming" regardless of residence will be eligible. So always will be dependent members of his family. It is thought that this modification in the rule will allow many players heretofore excluded to participate. It was designed also to exclude professional players who have killed interest in many town and city teams. The sport will be maintained, it is hoped, as one primarily for farm boys, although sons of farmers attending college or residing in town will not be barred. Further clarification of the rule will be outlined by the Executive Committee of the League prior to the opening of the 1929 season. Players must be members of the Bureau in the county in which they play.

It was decided to place responsibility for making decisions and arbitrating disputes not settled locally, on a committee of three composed of the president, vice-president, and one other member to be selected.

Approximately 200 players, farm advisers, and visitors attended the meeting held in the Wolford Hotel. Carl Lundgren, baseball coach at the University of Illinois, and famed pitcher for the Chicago Cubs in 1905-06-07 talked interestingly about his experiences in the Big League, told what's necessary to build a good baseball team, answered innumerable questions about plays, his trip to Japan with the Illini last summer.

L. R. Welk of Morton was re-elected president, Paul Meharry of Champaign county was chosen vice-president. It was agreed to hold a meeting in the spring well in advance of the baseball season to make schedules and oil the League machinery preparatory to another successful season. Several new counties expressed their desire to enter teams.

By ART LYNCH

SPREAD your butter thicker.

This country produces milk enough to supply us with all we can consume 363 out of the 365 days of the year. We import net only two days' worth from other countries.

No time now for overproduction. If we had enough for 366 days in the United States we'd have an exportable surplus and ruinous prices on the entire production.

Wise dairymen will not add cows to their herds. They will milk the best bred young cows and make boloney out of the old ones. Such efficiency will help stand a set-back in the industry if it must come.

The smart alecs will buy more cows, increase their herds, get into debt and, if trouble should come because of a national surplus will sure be out of luck.

* * *

Orderly marketing of fluid milk can do much to stabilize the industry. A dairymen's bargaining association helps the individual to sell his milk for what it is worth. Organization is the way to learn the facts, improve quality, stabilize the market, check up on the tests, get paid on time and advertise to sell more.

Talk it up.

* * *

Officials from the 28 produce associations met recently in Bloomington to compare notes on how to do a better job of selling cream, poultry and eggs.

Heard Frank (Barney) Gougler speak a piece. He's good. When he ran out of breath, Swaim would carry on.

* * *

Lee Quasey of the Transportation Department was handling a claim concerning a cow hit by a train. The engineer said, "I saw the cow come out of the alfalfa. A crash! Then I saw the alfalfa come out of the cow."

* * *

Auto suggestion: Why don't cows honk their horns?

* * *

The three "C's" on quality milk—Clean, Cold and Covered.

The daily farm program of the I. A. A. from Station WJJD, Mooseheart (254 meters) is broadcast between 12:30-12:45 p. m. Monday to Friday inclusive. Hear the daily Chicago livestock market from the Producers, and each Friday the weekly market review. Outlook reports, reviews, and talks by I. A. A. staff members, officials, and leaders in farm thought are broadcast daily.

I. A. A. Accomplishments

(Continued from page 5)

TRANSPORTATION

THE major activities of the Transportation Department during 1928 consisted of putting in evidence and actively opposing a proposed advance in livestock rates which would add $750,000 annually to the freight bills of livestock growers in Illinois. A reduction of $70 a carload on peaches shipped from Illinois to points in the southeastern part of the United States, was secured. Twenty-five requests for information and service concerning telephone rates and service were handled. Most of these affected groups rather than single individuals.

Under light and power service there were 26 propositions concerning easements for high tension, communication and pipe lines over farm lands, and 28 complaints having to do with light and power service and rates. In the majority of these cases the interests of whole communities were involved.

There were 1,034 railroad claims collected in the amount of $25,480.73 during the first 11 months of 1928.

More than 85 per cent of the 94 County Farm Bureaus in the state were given service. Special traffic service was given the Chicago Producers' Commission Association, the National Livestock Producers' Association, the Illinois Fruit Growers' Exchange, the Illinois Farm Supply Company, and the Illinois Milk Producers' Association.

By LAWRENCE A. WILLIAMS

DID you hear the discussion at the Danville meeting? Wasn't it great! Everyone boosting 1000% for Country Life, and all rejoicing in its accomplishment. Naturally we were all pleased. Nothing like it in recent insurance history, and we believe imitators will not approach it in the days to come. Ninety-five counties put over that job. Not trained life insurance men—just Farm Bureau members, who believed that by working together you could do things and do mighty big things.

You did more than you dreamed of doing, and it means more in low cost legal reserve protection than you ever thought it meant.

Here are reasons:

The two chief contributing factors in the net cost of life insurance are mortality (death rate), and acquisition (cost of getting business).

There is no argument, in fact it is readily admitted that no other company has ever attempted or succeeded in putting on its books a volume of business such as we have paid for at anything like the low cost involved.

Let's take a look at this cost. Not one cent is to be paid out in renewal commissions for business that has been sold. Most new companies are obligated for a second year renewal cost of 15% and some as high as 25% for all their business. All the companies are obligated by renewal contracts, none under 10% the second year, and from 7½% to 10% for eight more years after that second year. This alone is a savings that in nine years runs into hundreds of thousands of dollars.

You are already aware of the low first cost which on the second and third policies to be announced is still more attractive in their low gross cost. Considering these facts and then going into overhead cost, we find:

1. No stockholder friends are to be put on pay rolls to eat up profits—no loafers or hangers-on.
2. Not one dollar is spent for salary that is not earned.
3. The volume of business done by an established overhead makes for a low overhead second to none in the business under 25 years of age.
4. No selfish interests of stock control intervene to bleed the company.
5. Supervision by means of I. A. A.'s established organization is more alert and more interested than that of any mutual life insurance company where the voice of proxies is seldom if ever heard.

Now, let's take a look at possible mortality.

We are insuring practically one class of risks, farmers. Farmers are medium risks. We are at the start assured of medium death rate—but look again. Competition in life insurance brought on what was known and is known as double indemnity. Each company vied with the rest to try to outdo in catch clauses and selling talk. They got into deep water and unsound practices. They added total disability clauses and what was the result! Tremendous losses, lawsuits, contested claims, and companies today are facing higher rate problems or the abandonment of double indemnity and total disability clauses. We wanted our people to be protected, and not fooled. Catch clauses of this kind mean higher death rates and expenses which rob the policyholder of his rightful dividend and hence his rightful low net cost.

It is patent that no company with one man, or stock control, selfish interests and axes to grind, is going to be able to compete with Country Life in its net cost of protection based upon a profit return plan to policy-

holder, and its economical management and acquisition costs.

It is further patent that anything more than can be offered in life insurance than Country Life is offering smacks of "selling points" more than protection, and must involve a higher cost.

And finally, the conservative risk selection and well-grouped class of insured under its policy assures a mortality lower than companies taking mechanics and tradesmen, electrical workers, quarrymen, factory workers, trainmen, and builders, and the like in large numbers.

We have a spirit in our membership that money can't buy. There never was a more open opportunity for policyholders to directly reduce their insurance costs than Country Life policyholders have before them constantly.

Every time you get a new member to take life insurance you are increasing volume on a fixed overhead which means savings and greater dividends.

Every time you talk Country Life and its policies, you help increase the momentum of the greatest movement that the farmers of the state ever started, and the net result of such boosting means a company and a cost always so far beyond competition that the entire world must say, "Well, the farmers did succeed."

Spring will soon be here. The birds will be twittering in the tree tops and the livestock headed for green pastures.

Many of you have farms adjoining the railroad right of way. The Legislature of the state enacted a law some years ago requiring railroads to build suitable fences adjoining farm lands and to maintain them in good repair.

Like the rest of us they have their failings and forget or neglect to do what is required of them. The result is that fences break down from age, and livestock gets on the right of way and is killed.

We need not say how difficult it is to get the top on the market on livestock through a claim department of the railroad. So the best thing for us to do is to try to prevent these losses, and this takes us back to the old saying "An ounce of prevention is worth a pound of cure."

First of all check over your fences. See that the crossing gates are in good repair, and if not, put it down in writing and send it in to your local agent or to the division superintendent, but do not give it to the section foreman.

This is the day of specialists. The section foreman has other duties than handling correspondence. About the only file he has is his hip pocket and that is where your communication will go, and the chances are that it will stay there, at least until it loses its identity and the contents can no longer be ascertained. The best thing of all is to tell us your story. We are here to serve you. We can see to it that your problems are presented to the proper railroad officials.

Remember that an oral notice to the railroad to repair fences is **not sufficient.** For your legal protection, notice must be in writing, giving legal description of your farm by township and section, also the approximate distance from the nearest station so that your place can be readily located.

Do not send your notice to the general offices of a railroad unless you know what officer or department your communication should be sent to. We know of a case where a letter was addressed like this: "——— Railroad Company, Chicago, Illinois." The man never received a reply. It is safe to speculate that the letter got to Chicago all right, but where it went after that is a strain upon the imagination. So unless you know the name of the official to whom you should write, send your troubles to us and do it just as soon as you can. Remember, it is the early bird that catches the worm and the sooner you make your fence needs known the quicker you will be taken care of.

Annual Luncheon

(Continued from page 3)

ative Governor Louis L. Emmerson, who was detained at Springfield. Senator Kessinger's address was replete with stories which were widely applauded.

During the program President Smith read a congratulatory cablegram from the Hon. Frank O. Lowden of Oregon sent from Cairo, Egypt. Mr. Lowden expressed his regrets at being unable to attend the meeting of his Association.

The Pawnee Four sang many a rousing song written on the spur of the moment and adapted to the remarks of the speakers. They were applauded frequently for their witticisms and harmony.

President Sam H. Thompson closed the speaking program with discussion of the aims and ideals of organized agriculture. "Our Sam" was given a rousing cheer before and after his address.

A. N. Skinner of Yates City, chairman of the Resolutions Committee, presented the Committee's report. The resolutions were adopted as read with little discussion. Minor revisions were made in the Constitution and By-Laws following the reading of the resolutions. The meeting adjourned about 5:00 p. m.

By Harrison Fahrnkopf

Farmer Grain Dealers Meet

DIRECTORS, managers, grain growers, visitors—600 strong—gathered for the 26th annual convention of the Illinois Farmers Grain Dealers Association at Joliet, Feb. 5-7. Only two county farm advisers were there. They were J. H. Checkley, Logan County, who led the singing at the Annual Banquet, and Leonard Braham, in whose county the convention was held. Why not more? If a larger number of farm advisers would attend this annual meeting and more farmer elevator managers went to the I. A. A. meeting we would make more rapid progress towards a better understanding of each other's problems. Then, if a few of the directors of each organization would attend the annual meeting of the other, so much the better.

Officers elected for the coming year are: C. H. Bonnell, Rosemond, president; T. R. Cain, Jacksonville, first vice-president; E. E. Stevenson, Streator, second vice-president; W. H. Hindahl, San Jose, treasurer; Lawrence Farlow, Bloomington, secretary.

Directors are: Henry Brown, Woodhull; Chas. Fairfield, Fisher; J. F. Freitag, Normal; H. J. Greive, Edinburg; J. A. Henebry, Plainfield; F. W. McLaughlin, Ashland; V. A. Wertsch, Delavan.

President D. H. Allen retired after many years' faithful service.

Secretry Farlow stated that during 1928 farmers' elevators operated under more favorable conditions than in any year since the war—that 93% of all elevators showed a net profit for 1928. An excellent record.

E. V. Maltby, Manager of the Rural Grain Company, pointed out that there were eight co-operative grain commission companies on the various exchanges and that 525 farmers' elevators hold stock in these eight companies. Six hundred and twenty-eight elevators which were not shareholders have patronized the terminal co-ops.

Paul Thielen, Manager of the Farmers Elevator Co-operative Supply Company, outlined last year's business activities and told of the formation of a new national purchasing organization of which the Illinois unit is a member.

C. V. Gregory, editor of Prairie Farmer, read an interesting paper on the history of agriculture.

Mr. Gregory stated that a new nation invariably exploits its resources—

that agriculture thrives on stability. The speculator, he said, thrives on instability, has no thought for the future. Farmers suffered in the past because no one knew or cared of their difficulties. An encouraging development is that the public is taking an interest in farmers and their problems. Things are looking up in co-operative marketing, he said.

S. S. Tanner of Minier said that if the Farm Bureaus and the elevators would co-operate a fair price could be set on farm products, and that price secured. "Perpetuating the Farm Home" was the subject of an address by Mrs. A. R. Sabin, Delavan.

A. J. Surratt, State Agricultural Statistician, gave a much needed talk on government crop reports. Many have a very hazy idea of the value of these reports. Mr. Surratt impressed his audience that crop reports are helpful, the work is done fairly and impartially.

Dr. L. J. Norton, College of Agriculture, Urbana, ably discussed "Effects of the Tariff on Prices of Farm Products." Dr. Norton recently appeared before the House Ways and Means Committee, Washington. He gave a report on the hearings relative to the tariff on agricultural commodities. Other speakers who made interesting talks were W. W. Martin, Federal Land Bank, St. Louis; F. S. Betz, editor of the Farmers Elevator Guide; President, D. H. Allen.

Farmers Can Do Much To Help Themselves Says James C. Stone

Can't Legislate A Poor Business Man To Prosperity He Declares

THE farmer must put his own house in order first before asking for help, James C. Stone of the Burley Tobacco Growers Cooperative Association, Lexington, Ky., told delegates to the annual meeting of the American Farm Bureau Federation.

"You can't legislate a poor business man to prosperity," said Mr. Stone, "neither can you pass laws that will be beneficial to the farmer until he does certain things himself in order to be able to take advantage of the legislation."

"Before we farmers are entitled to help we should demonstrate to those we want help from that we have done everything we could ourselves consistent with good business to put our house in order."

More Ardent Than Ever

Mr. Stone related the story of the Kentucky tobacco raisers' disastrous experiment in cooperative marketing but declared that today he is a more ardent believer in farmer cooperative marketing associations that he was seven years ago.

"The Burley Tobacco Growers has demonstrated," he said, "that cooperative associations properly organized and properly managed are sound both economically and financially and will produce beneficial results both to the grower and to the community as a whole.

"They are not miracle workers and will not accomplish the impossible. They are not price fixing organizations and if operated as such will fail and should.

"The principal thing farm organizations do for the farmer is to give him more trading power through unity of action, thereby putting him more an on equality with the buyer and enables him to feed his commodity to the market in an orderly way without congestion and in quantities that the market can consume at a fair price.

Only Seasonal Surpluses

"We have heard much in the past few years about farm surpluses. To some extent this is a misnomer. We have seasonal surpluses, due largely to the weather, but no surpluses over a period of years.

"Cooperative marketing would solve this if the farmer would organize and stay organized. I am convinced that if the farmers of this country today would organize commodity cooperative marketing associations for all their crops and live stock, select honest and competent men to run them and then stand behind them through thick and thin, fair weather and foul and boost their own organization instead of knocking it, they wouldn't be asking for aid, they would be giving it to the other fellow.

"Should seasonal surpluses develop, and they will, they can only be handled through marketing associations, financed, if needs be, by some agency of the government, so that the farmer can get his money promptly. The necessity of this character of financing would diminish from year to year in relation to the better understanding and cooperative action on the part of seller and buyer."

Co-ops Must Improve Service To Succeed

FINANCIAL standing of farmer-owned cotton cooperative marketing associations is so favorable that in many instances the cooperatives are able to obtain from big banks lower interest rates on loans than can be obtained by directors of these same institutions, says C. O. Moser, president of the American Cotton Growers Exchange.

"There is no mysterious virtue or superiority in cooperative marketing as such compared with private marketing, that renders it a panacea or cure-all for farmers' troubles," declared Mr. Moser, "but it does offer the vehicle by which farmers may effectively organize the marketing operations of their business on the basis of equality with industry. The growth or decay, success or failure of cooperative marketing will be determined by whether the cooperatives are able to do the task of marketing in a better way than private handlers."

"In all the essential phases of the cotton industry there is a complete utility of genuine interest between the cotton grower and the spinner, but this is not always true between the private handler and the consumer," Mr. Moser claimed. As an instance he asserted that the speculative system of marketing cotton discourages quality production.

He stated that both according to the opinion of mills and the studies of scientists, the quality of American cotton has been steadily deteriorating.

"This," he said, "is only the fruit of our speculative marketing system which puts the premium on the lowest quality, by buying on the basis of a community's average quality."

"The cooperatives, contrary to this method, employ their own expert classers, assemble the cotton into pools according to its commercial value and return to each member the full benefit of the consumer price, obtained according to the quality with each member ships."

He related how the farmers in the interest of reducing operation costs have established cotton gins, tackled the problem of obtaining fair and reasonable freight rates, erected modernly constructed warehouses, at strategic points, that save millions of dollars annually in distribution and in addition, by reducing the fire hazard, have lowered insurance costs to a minimum.

"Since we have adopted the policy of concentrating in modern warehouses," he stated, "our fire loss has been negligible, and insurance rates reduced until they also are neglible, as compared with the rates paid during the first year of our experience. The difference is that our rates on our best warehouses are only about ten to twenty per cent of the less desirable structures generally used by the cotton trade."

Regarding the financial phase of cotton marketing, he pointed out that the cotton crop represents huge sums of money values and that large financial facilities are required in financing the crop movement.

"Where cooperation touches finance," he said, "it has been properly said that the result is a miracle. Generally speaking, cotton farmers are people in relatively poor financial circumstances, yet collectively they are able to finance their marketing operations at lower rates of interest and the most favorable terms accorded the oldest and best established business concerns or corporations of the country.

"It is no uncommon thing for a cooperative, having thousands of farmer-members to borrow money from local banks or banks in the large financial centers, at a lower rate of interest than are the directors of the

banks who may be in the cotton business. This is simply because the relative risk and security are such as to make the cooperative the preferred customer.

"Cooperative merchandising of cotton is an established institution in America that will continue to thrive and grow as long as existing policies are continued, because the policies of the cotton cooperatives are sound, progressive and mutually advantageous to grower and consumer. Under our present set-up we have all the flexibility of operation enjoyed by private concerns, and in addition have all the advantages enjoyed by the cooperatives, together with virtually unlimited financial backing, and the moral and interested cooperation and support of the government.

With these substantial assets and advantages, we are confident of the continued growth and prosperity of the cooperatives in the future, and are ready to meet the test of comparative efficiency with the private merchants according to any recognized standard based on merit and service."

Women's Conference Hears Speakers Tell of Future Policies

I. A. A., Farm Bureau, Home Bureau and Extension Service to Work Together

PRESIDENT SAM H. THOMPSON of the American Farm Bureau Federation, President Earl C. Smith, Dean H. W. Mumford of the State College of Agriculture, and A. C. Everingham, Hutsonville, addressed the Women's Conference held at Danville on Wednesday, Jan. 30.

Mr. Thompson spoke briefly of the program of the Federation and of the importance of women in the work of organized agriculture. President Smith and Dean Mumford each discussed briefly the relationship which exists in the state between the I. A. A., the Extension Service, and the Illinois Home Bureau Federation.

Mrs. Johnson Presides

Among the women speakers were Mrs. Homer Johnson, president of the Illinois Home Bureau Federation, who presided, and Mrs. Kathryn Van Aken Burns, home extension leader at Urbana. Mrs. Burns told how plans were to be developed toward bringing running water and modern improvements into more farm homes. Landlords will be interested in the project that tenant farm homes may become more habitable. Other Home Bureau members talked impromptu about the work of their organization.

The understanding or agreement existing between the I. A. A., Farm Bureau, Home Bureau, and State Extension Service as explained by the speakers covers the following points:

Here is Agreement

"1. The Illinois Agricultural Association recognizes the Home Bureau movement in this state as the organization that can best serve rural women. It is recognized that this organization is already in the field with an established program and that its efforts should not be duplicated.

"2. The Illinois Agricultural Association encourages closer co-operation between Home Bureaus and Farm Bureaus in counties now so organized. It is believed that closer co-operation can be realized through a better understanding of the problems and programs of the two organizations.

"3. In counties having no Home Bureaus and where at the present time it does not seem advisable to attempt the organization of a Home Bureau, the Illinois Agricultural Association believes in and will support the development and recognition of a women's committee within the County Farm Bureau. Some aims and purposes of such a committee, it is believed, should be: (a) To promote, in co-operation with the Farm Bureau and such other committees as the Farm Bureau may appoint, 4-H Club work and assist in carrying it out. (b) Assist in carrying to rural women some idea of the problems confronting agriculture in general and problems confronting rural women, together with the advantages that may be obtained in the solution of these problems through organized effort.

"4. To assist in the promotion and maintenance of community organizations, always looking toward the organization and the maintenance of a Home Bureau organization in these counties.

"5. The Illinois Agricultural Association agrees to provide capable speakers to present the above program, where interest within a County Farm Bureau is such as to justify the same. Speakers will be chosen who not only are capable but who hold convictions in support of all phases of the women's program. It is recommended further that all such speakers should be scheduled through the offices of the Illinois Agricultural Association, that the I. A. A. pay their per diem, and that the county using such speakers pay their transportation and sustenance expenses.

Whisnand Retires

J. L. Whisnand

J. L. WHISNAND of Charleston, Coles county, the retiring Executive Committeeman from the 19th District served ably and conscientiously for the past five years. During the past two years Mr. Whisnand was a member of the Public Relations Committee where he specialized in the study of tax problems. Whisnand never missed a meeting, was always on hand when there was work to be done. He is active in Farm Bureau affairs in his home county.

Serum Ass'n Elects

The Illinois Farm Bureau Serum Association annual meeting in the Wolford Hotel, Jan. 29, was attended by more than 100 farm advisers and delegates from all sections of the state. Representatives of many serum companies were present. New developments in hog cholera control were outlined and discussed by various speakers including among others Dr. Robt. Graham, University of Illinois, Urbana, and representatives of the U. S. Dept. of Agriculture.

O. B. Goble of Charleston was re-elected president, Sam Sorrells of Raymond vice-president, and Ray E. Miller secretary-treasurer. The Association will purchase serum and virus to vaccinate hogs in more than 60 Illinois counties. Farm Bureau members only will receive the benefit of the organized buying power.

Macleay Addresses Relations Conference

Legislative Proposals and Tax Revision are Endorsed

THE Public Relations Conference was called to order in the Armory at Danville, Illinois, January 30, at 1:00 p. m. by Frank D. Barton, chairman.

Lachlan Macleay, Secretary of the Mississippi Valley Association, gave many examples of the cost of shipment over the barge service on the Ohio, Missouri, and Mississippi rivers, and of comparative costs of rail and water shipments from producing centers and districts in this country and from other countries to the coast cities. His address was very interesting. It was voted to send copies to the Farm Bureaus over the State.

L. J. Quasey discussed the high points of Transportation, Electric Light and Power, Telephone Rates and Service, and Public Utility easements over farm lands. The beneficial effect of the development of waterway transportation on rail rates in Illinois and the central west was emphasized.

The Conference voted unanimously that public utility problems be handled through local committees appointed by the Farm Bureaus.

Because land owners have no rights at the present time in the determination of routes of high tension or signal lines, which are built by Public Utilities, the conference went on record in favor of legislation to give the Illinois Commerce Commission jurisdiction in determining the routes of public utility lines over private lands.

President Smith discussed the present situation relative to national legislation designed to give equality to agriculture. It was voted unanimously to ask that this address be published.

Mr. Smith also presented briefly the problem of completing the State bond issue hard road system and the necessity of improving the secondary or State Aid Road System of the counties. After some discussion the conference went on record in favor of a tax on gasoline to be equitably divided.

A. C. Everingham and John C. Watson outlined the various tax measures heretofore advocated by the Association. The conference voted unanimously to endorse the proposed state income tax, the revenue amendment, and limitation of the county highway tax rate in line with that in effect before 1927.

F. A. Fisher of Morgan county, president; F. E. Longmire, Grundy county, vice-president; C. W. Simpson, White county, treasurer; and W. P. Miller, Brown county, secretary, are the new officers of the Illinois Association of Farm Advisors.

MISS E. ... RIPWASH, LIBR'N
... CITY OF ILL.
... INDIANA, ILL. NL

Stranded in South Dakota

TO BE WRECKED a thousand miles from home and no money to pay the garage bill might be a sorry predicament. It need not be if you insure your car in the Farm Bureau company. The Home office is always in reach, ready to help—ready to serve—prepared for any emergency. Wherever you go, the strength and protection of YOUR OWN COMPANY backed by your COUNTY FARM BUREAU and the ILLINOIS AGRICULTURAL ASSOCIATION goes with you. Insure among friends and you will get sympathetic treatment when in trouble.

A full coverage policy includes protection against Fire, Theft, Collision, Property Damage, Public Liability—*All at cost. Claims paid promptly.*

"WHEN one of our policyholders collided with an irresponsible party while touring through South Dakota last summer," says Manager A. E. Richardson, "he was faced with a repair bill of $150 rendered by a local garage. Our member happened to be short of funds, and appreciating the fact that the loss was covered by his policy, he called the office over long distance telephone and asked for advice. We told him to take affidavits from the witnesses and forward them to this office. Within one hour after his message, a check for $125 was on the way.

"This is a service offered Farm Bureau members which they cannot obtain elsewhere. It is one of the many advantages of having an insurance policy in the Farm Bureau owned and controlled company."

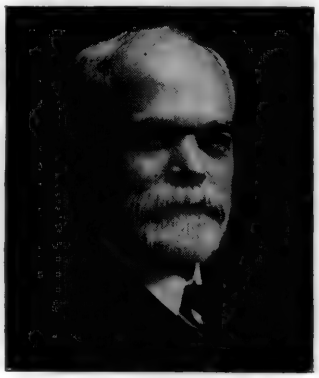
Changing Habits Hurt Farmer Says Davenport

Dean Would Have Co-operatives Quote, Not Fix, Prices Fair to Producer and Consumer Alike

DEAN-EMERITUS EUGENE DAVENPORT who retired as head of the Illinois College of Agriculture in 1922 hearkened back to lessons from the past in an interesting radio address to Illinois farmers on the I. A. A. Forum from Station WLS Wednesday night, March 6. The Dean who was born at Woodland, Michigan, in 1856, his present home, explained the farm surplus problem in part by referring to changes in eating habits and dress in late years.

"When we look the facts in the face," he said, "the real wonder is that conditions are not worse than they are. For there are many reasons for such surpluses as do exist. During the war we learned to speed up in everything. We were forced to substitute machinery for hand labor at many points. Pastures were plowed up to increase the acreage of grain production. We have had a long series of good seasons, with practically no crop failures anywhere. It all meant more production. Only Russia has gone bad.



Europe Poor

"But on the consumption side there has been an amazing falling off. Europe has been poor and it has affected her buying power and cut our markets. Our farms are cleared, our timber lands are stripped and lumbering has disappeared. All this means a vast reduction in hand labor on the land. It is still further reduced by machinery for mowing, harvesting and the pitching done by our fathers. In factories and warehouses freight is hauled about by gasoline engines instead of by man power. Iron is handled in the yards by great magnets working on cranes or carriers, and not by men with wheel-barrows.

"The result has been a vast reduction in man labor and that means reduction in the amount of food consumed per man. For men eat as we stoke the boiler, in proportion to the work they do. The 4,000 calorie ration therefore, is almost a thing of the past. In a surprising number of cases, the noon meal, even of the laborer, consists mainly of a beef sandwich or two. While that of his wife or working daughter may be a vegetable salad, all instead of the meat and potatoes, or the pork and beans of our hard-working fathers and mothers. This means less food consumption and it cuts into the farmers' markets amazingly. As if this were not enough, fashion has decreed the slim figure for ladies. This, too, has reduced food consumption, especially in the young, and the farmer's pocketbook has suffered accordingly.

Less Food Eaten

"Besides all this, our houses are better warmed than they used to be and a larger proportion of men work in offices or heated factories. This too, means less food consumption, for in the cold we eat for warmth as well as for body repairs. All these reductions go far toward offsetting any effect of increased population.

Dean Davenport

"Even this is not all. We no longer put on heavy woolen underclothing at the first sign of winter, but wear the lighter garments the year round. Nor do we wear so many thicknesses, by half, as did our fathers and mothers. The ordinary suit in men's clothing made ten years ago, would out-weigh, almost two to one, the suits men wear today. As to the ladies, all we can say is that skirts are fewer and shorter than ever before. What the changes in living conditions and in fashion have left undone, the invention of rayon has finished. It has meant little difference to the manufacturer, but it has meant much to the grower of wool and cotton.

Poverty in Europe

"Put into a few words, it all means that we have vastly reduced consumption in recent years, both in food and clothing, and it has affected the farmers markets even less than would have seemed inevitable. The saving element of the situation has been the increase in population. This increase, except for the change in living habits and the poverty of Europe would, by this time, have almost put food and clothing in the luxury class. For the speaker has seen the population of the United States doubled twice within his own recollection, and men are still living who have seen it doubled three times. When it doubles once or twice more, we shall hear very little about the surplus in food and textiles. . . .

"The farmer's marketing problem lies largely in products subject to great variability in quality or grade. I cannot see how organization can help much in the marketing of a perfectly standard article like wheat, produced the world around. It may help in regional production, and the raising of the general grade of the product, but it is subject to world competition and the amount the world will take (that is the amount of bread the world will consume) is not subject to a very great increase. If automobiles were to be had at $10 apiece, we should all own a half dozen or so but we would not double our consumption of flour, even if bread were given away.

Quality Important

"Even so, there remains a vast range of food products in which quality bulks large. The principal of high grade or low grade products applies to all fruits and vegetables, to meats, and to dairy and poultry products. Here then, it seems to me, is the farmer's opportunity to enter the field of high grade marketing; first, by standardizing the product, second by legitimate advertising that will advise the world of what it may secure, and third, by quoting a price which the producer and consumer alike will consider fair.

"At all three of these points organization can exert its influence. By advice and by grading it can either assist or coerce the producer by high standards. By co-operative effort it can place judicious advertising where it will count in opening up new markets. And it can, if it takes the pains sufficiently to inform itself, quote a price which would be considered fair.

Hard Nut To Crack

"This last is the hardest nut of all to crack. Any farmer can fix a price upon his own product at any time but he cannot compel the public to pay it. Neither can an organization, however powerful. But if the organization will sufficiently inform itself as to available markets, the quality which they will demand and accept, the available supply, and the possibility of substitutes, then the organization can, in the not distant future and for many commodities, quote (not fix) a price which will be attractive both to the purchaser and the producer.

"This last is an important point. Because if the price be too low, the farmer will not produce and the consuming public will be compelled to look about for a substitute, shifting its patronage to something else and the force of advertising would be lost. If, on the other hand, the price quoted be too high, it will either unduly attract producers or it will drive the purchaser away and force him to try a substitute. The final result, therefore, of a wrong price, whether too high or too low, is pretty much the same. This all means a series of regional commodity organizations, each dealing with a particular output as produced under special conditions prevailing in that particular region and seeking to cater to a well-known and well-developed market."

I. A. A. Pledges Aid To New Secretary

Ex-Governor Hyde is Well Liked by Farmers in "Show-Me" State

COMMENTING upon the selection of the Hon. Arthur M. Hyde of Missouri as Secretary of Agriculture, President Earl C. Smith said:

"I have the highest respect and regard for Mr. Hyde. I have had a personal acquaintance and association with him for 12 to 14 years before he entered political life, and served with him on the Resolutions Committee at the National Republican Convention in Kansas City."

The following telegram was dispatched to the new Secretary of Agriculture following his announcement by President Smith:

"I EXTEND CONGRATULATIONS ON YOUR APPOINTMENT AS SECRETARY OF AGRICULTURE AND BEST WISHES FOR YOUR SUCCESS IN THE DISCHARGE OF THE TREMENDOUS RESPONSIBILITIES AND DUTIES OF THAT OFFICE STOP TO THAT END THE ILLINOIS AGRICULTURAL ASSOCIATION ASSURES YOU OF ITS FULL SUPPORT AND CO-OPERATION.
EARL C. SMITH, PRESIDENT."

Dairymen Meet

Secretary Geo. E. Metzger and Dairy Marketing Director A. D. Lynch met recently with leaders in the St. Louis milk district to review and discuss co-operative marketing experience and possibilities in that territory. More than 60 representatives from counties in the St. Louis milk shed attended the meeting.

It was decided that the dairymen in each of the 17 interested counties of Illinois and Missouri meet at the call of their respective Farm Bureaus for the purpose of selecting one official representative to attend a central meeting in St. Louis on March 8 when a dairy marketing program will be constructed.

LOOK out for Oregon red clover seed. Experimental results show that it doesn't stand corn-belt winters, is the advice Farm Adviser Tom Roberts of DeKalb county is giving Farm Bureau members.

Hon. Arthur M. Hyde.

THE new Secretary of Agriculture, Arthur M. Hyde, was born in Princeton, Mo., July 12, 1877. He received his A. B. degree at the University of Michigan in 1899, and graduated in law the year following at the University of Iowa. Secretary Hyde practiced law at Princeton, Mo., from 1900 to 1915 where he served as mayor from 1908 to 1910. In 1915 he moved to Trenton, the former home of Mrs. Hyde. He was governor of Missouri from 1921 to 1925, is a trustee of Missouri Wesleyan College, a Republican, Methodist, Mason, and Odd Fellow.

Secretary Hyde is an extensive landowner and this fact is said to have influenced his choice as a member of President Hoover's cabinet.

Mr. Hyde, as a member of the Missouri delegation, voted for Frank O. Lowden for President at the Kansas City Convention until Mr. Lowden's withdrawal when he supported Mr. Hoover.

"Arthur M. Hyde is an intensively active man inclined a bit to nervousness," writes W. J. Kennedy in the Whiteside County Farmer. "He has few hobbies. He smokes cigars considerably but is a teetotaler on hard liquor. Homely expressions always won his audiences. He has a rare vein of humor blended with biting sarcasm. Missouri Republicans regard him as equal to Jim Reed on the stump and his campaigns with various Missouri Senior Senators long will be remembered in the future. In Trenton, Missouri, Mr. Hyde conducted the Men's Bible Class of the Methodist Church which grew from a few members to include a large proportion of the masculine population of the town. Reports of his personality and the earnestness of his pleadings stamped him as an outstanding moral leader."

Chicago Milk Price Announced by Pure Milk Ass'n, April 1

Base and Surplus New Plan for Figuring Price

The Pure Milk Association announces that begining April 1 a base and surplus plan of payment will be initiated on the Chicago market. The net price to dairymen for base milk will be $2.64 per 100 pounds for 3.5 per cent milk with an allowance of four cents per point butterfat. (Base amount for each producer will be the average of his September, October, and November production. During April the dairyman can produce 120 per cent of base.) All milk in excess of base amount, or surplus, will be figured at the rate of 3.5 times the price of 92 score butter at Chicago, plus 20 per cent, plus 25 per cent of the difference between the above price and the base price of $2.64.

The new price plan and the program for the future was to be carefully explained at the annual meeting of the Association scheduled for March 12 in Chicago. Dr. Clyde King of Philadelphia was scheduled to address the meeting.

A POWERFUL organization more than 10,000 strong, amply financed, and recognized as the voice of the dairymen in the great Chicago milk shed, describes the Pure Milk Association six weeks after the culmination of one of the most effective embargoes ever laid down by a producer's organization.

The Association headed by W. E. McQueen, president, and Don Geyer, manager, is proceeding conservatively in building an efficient organization to deal and speak for its members. Headquarters have been established in a suite of rooms on the fifth floor of the Transportation Building, Chicago, and work is progressing toward getting records up to date and preparing for future duties.

Changed Over Night

Almost over night the Association was changed from a struggling group of producers bent on establishing a

Before the General Assembly

By Earl C. Smith

THE Illinois Agricultural Association was necessarily delayed in introducing its legislative program in the 56th General Assembly because it was first necessary to have the policies of those major things in which it was interested, outlined and directed by the board of delegates at its recent annual meeting. It then became necessary to have its executive committee interpret those policies and its public relations committee get same into shape for introduction in the legislature. At the time of this writing, all legislative matters endorsed at that meeting with the exception of a gasoline tax measure, have been prepared by the Association, introduced by friends within the legislature and are now before various committees of the two houses for their consideration.

THESE include a State Income Tax with reasonable exemptions and low rates and providing that any general property tax paid shall be recognized as a credit on computed income tax; amendments to the Membership Act and the Cooperative Marketing Act of 1923 which remove limitations as now contained therein and intended to make possible the further development of cooperative effort; restoration of former limits to the county highway tax and such amendments to the present dog tax as will make possible adequate funds to take care of losses sustained.

AS REGARDS the gasoline tax, the State administration introduced a bill early in February and the Association recognized that it was neither necessary nor advisable to introduce another measure of this character. This bill provides for tax of three (3c) cents per gallon on gasoline and that the revenue derived therefrom shall be divided, two-thirds going to the Department of Public Works and Buildings and one-third to the various counties of Illinois, the latter to be divided among the counties on the basis of automobile license fees paid from within the counties. It further provides special appropriations of $7,500,000 and $2,000,000 for bond issue road widening and building of grade intersections respectively from the State fund, and that the county funds may be used for the improvement of secondary state-aid roads, the type of improvement to be determined by the county boards subject to the approval of the state highway department.

REPRESENTATIVES of the Association appeared before the senate revenue committee and the house, meeting as a committee of the whole, and clearly set forth such changes or amendments to this measure as were necessary to bring its provisions in line with the best thought of our institution.

While making known that we were ready and willing to support a three-cent tax on gasoline, we suggested and urged necessary amendments to provide that the total revenue derived from such a tax be divided equally between the State and counties and further providing that that portion received by the State should be used exclusively for the completion of the One Hundred Million Dollar Bond Issue system and the building of necessary grade intersections; and that portion distributed among the several counties be used for either secondary road improvement or bond issue road widening as determined by resolution of the county boards.

THESE suggested amendments entirely remove the special appropriations contained in the administration bill as special inducement to the larger populated areas, believing that in the

TUNE in on WLS every Wednesday night at 6:30 P. M. and hear the weekly I. A. A. FORUM. C. V. Gregory, editor of Prairie Farmer, will speak on the night of Wednesday, March 20, on the subject "What Farmers Can Learn From Big Business."

Our daily 15-minute program from Station WJJD, Mooseheart, comes during the noon hour at 12:30 p. m. Hear the livestock market as seen by the Chicago Producers, and valuable talks on important topics of the day.

Address all communications to Department of Information, Illinois Agricultural Association, 608 So. Dearborn St., Chicago.

Editorials

(Continued from page 4)

building of a state-wide system of highways, only the boundary lines of Illinois should be considered and second, that any division of county funds among the several counties of the State should be made only on the basis of amounts paid in by the motor vehicle owners of the counties.

WITHOUT exception, many members of the general assembly have stated to representatives of the Association that they believe our position was fair and equitable and would improve the bill under consideration, but at the same time hesitating to support these changes, expressing the fear that opening the bill to any amendments might endanger its final passage. Amendments of all sorts and descriptions have been offered from various sources which give some color and support to such expressions as have been made.

AT THE time of going to press, the gasoline tax measure in practically its original form, has passed the senate with the prospect of extended debate and consideration before passage in the house.

The Association has been represented continually throughout the session thus far by President Smith, Vice-President Barton, Treasurer Cowles, General Counsel Kirkpatrick and its director of taxation and statistics, John Watson. They shall continue to be in attendance to the full extent necessary to see that the legislature fully understands the Association's program and its merit.

The Farmer and the Gas Tax

GOVERNOR EMMERSON's gasoline tax bill, from all indications, will become a law within the next week. To date it has withstood the barrage of attacks upon it, and now it is advanced to third reading without a material change being made in its original draft. The bill provides a tax of three cents on each gallon of gasoline sold. Two cents of this money will go to the state but it still appears doubtful just when and how the other one cent will be returned to the county from which it was collected.

McLean county's share of this tax will be about $100,000 annually, it is estimated. This money may be spent only on state aid roads, and with the approval of the state highway department, if interpretations of the bill are correct. Viewing this in the light of present specifications and the demonstrated policy of the highway department, it means that the annual mileage would be almost negligible. Thus, not only the side roads that lead past most of the farms, but many of the principal county highways as well, would go begging for improvement for many years, except for the help of strictly county or township levies or bond issues. With greater discretion as to type and location given the county authorities, even though supervised to some extent by the state, a more practical and equitable distribution of improvements would result.

A secondary road system is wanted and sadly needed. It has been clearly demonstrated that such roads are practical at a cost per mile representing only a fraction of that which under present provisions would be required by the state. Mileage is needed, not luxurious quality. The large majority of farmers now mired hub-deep in mud and thereby prevented from bringing their crops to market under favorable conditions, cannot afford to wait several years for the completion of an expensive highway system.

The farmer does not need, nor care to pay heavily for a few miles of concrete or gravel roads built to 15-D specifications, that he cannot use. But he does need sufficient roads that can be used in all seasons.

The legislature would do well to consider that in putting a three-cent tax upon gasoline it should appropriate this money to help the farmer as well as the urbanite.—Bloomington Pantagraph.

The Gasoline Tax

BEFORE the legislature now as the matter of supreme importance is the question of a gasoline tax.

Both houses of the assembly have reported the bill favorably—this in the committee rooms, however. Now comes the best test of strength—on the floor.

There have been many substitutions offered for Gov. Louis L. Emmerson's three-cent gasoline tax. The larger cities of the state are strongly protesting the administration's tax.

Gov. Emmerson proposed a three-cent tax—two cents for the state and one cent for the county. This is the cause for all the howl.

Since then, there have been a number of others proposed. One by Earl C. Smith, president of the Illinois Agricultural Association, would have the tax evenly divided with the county to develop the system of secondary roads.

To our minds, this is the best plan yet proposed. No state can ever hope for prosperity, especially in the middle west, unless its rural section is considered. The even split with the county would develop this secondary system and would greatly better marketing conditions.—Paris (Ill.) Gazette.

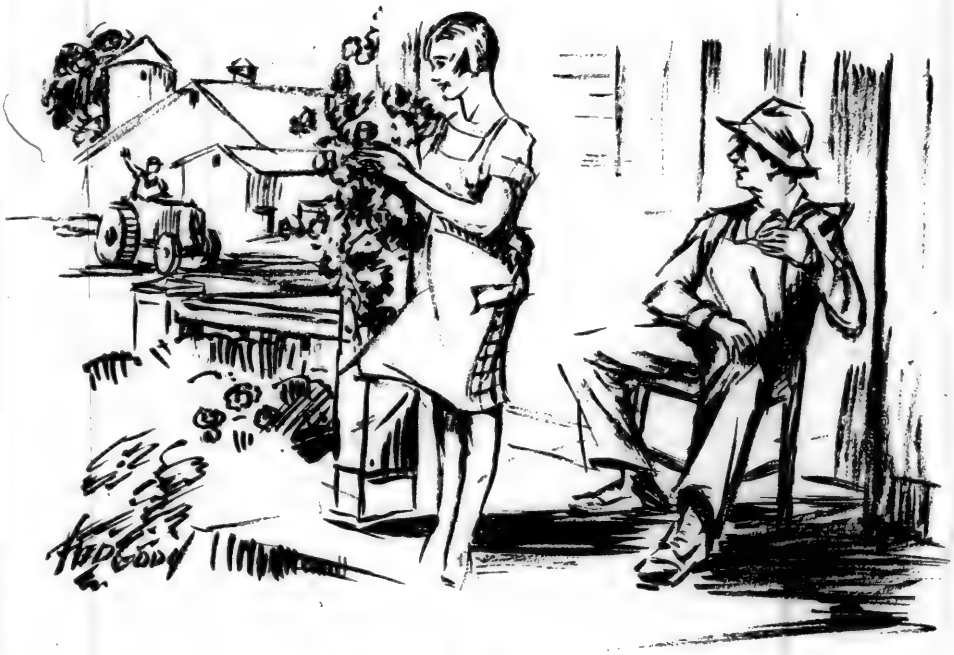
Pure Milk Association

(Continued from page 3)

foothold and a voice in the market which they supply, to a powerfully welded and representative organization embracing the great bulk of the whole milk shippers in northern Indiana, northern Illinois, and southern Wisconsin. The association now finds its chief problem is to limit its membership to those producers most strategically located to supply the Chicago whole milk market. It is the popular thing throughout the great milk shed to join the Pure Milk Association; and the organization is faced with the difficulty of safeguarding the market for those whose milk is needed.

Eyes on Market

Widespread publicity growing out of the strike focused the eyes of dairymen all over the middle west on the Chicago market. Membership in Indiana alone has grown from a few hundred to approximately 3,000 within a few weeks. Dairymen from remote sections like Greene and Rock counties, Wisconsin, and Stephenson county, Illinois, have joined the association. For convenience the milk district has been zoned. Dairymen within a radius of 70 miles from Chicago have been placed in zone one, from 70 to 80 miles, zone two, from 80 to 90, zone three, and from 90 to 100, zone four.



Applications for membership, according to President McQueen, are still coming in at the rate of 400 and 500 every day. I. W. Heaps, manager of the milk producers' organization at Baltimore assisted in the establishment of an up-to-date record system in the Association office.

The Accomplishments

While the decision of the arbitrator, Dr. Clyde King of Philadelphia, disappointed some members of the Association, officials point to the accomplishments resulting from the settlement, as follows:

1. The dealers recognize the Association and agree to deal with it as the recognized agency of the milk producers.
2. A price of $2.64 per 100 lbs. for

COUNTRY LIFE INSURANCE

OLD LINE **INSURANCE AT COST**

Guarantee Happiness

HAPPINESS and contentment, the goal toward which every person ives, are for those who have e necessities and some of the nforts of life. To live in fear the future—fear that you or ur family may some day be want—robs one of that ecious feeling of security and ell being. Records of life inrance companies show that e average person lives longer when relieved of all worries regarding his future and that of those near and dear to him. Ninety-three out of every 100 people reaching 65 years of age are in want simply because they have not made provision for their declining years. Protection coupled with regular, systematic savings in a company stronger than a bank guarantee future independence.

A 20-Pay Life Insurance Policy Will Do It

A PAID-UP policy in 20 years at *minimum cost* in *Your Own Company* underites the future, safeguards your ate and the welfare of your nily. Life insurance creates a d not subject to inheritance es, nor probate costs. It will arantee your family the necesies and some of the comforts of when you are gone. It will ieve you of worry and fear, bring ppiness and contentment, the s of living, and lengthen your ys on earth.

HIGHEST SECURITY

Baseball Dope

John F. Case, editor of the Missouri Ruralist addressed the St. Louis Optimist's club a short time ago. Among other things, he comments on his meeting there with Branch Rickey, manager of the St. Louis Cardinals. His statement which follows should be of interest to our evergrowing army of Farm Bureau baseball players and fans:

"Among the active members of the Optimist's Club I met Branch Rickey, vice-president and general manager of the St. Louis National League Baseball Club. Rickey, a man in his forties, is a dynamic personality. Born on an Ohio farm where he lived until 16 years of age, this remarkable man worked his way through Ohio Wesleyan University where he studied law. A star catcher on the college team, Rickey was signed by the New York American League team management and has been in baseball ever since. Yet true to family tradition and environment Rickey never would play ball on Sunday. Even when manager of the St. Louis team he took the day off to attend church and teach a Sunday school class of boys. Burt Shotton, his 'Sunday manager,' now directs the Philadelphia team.

"Branch Rickey still is a 'farmer.' He it was who originated the idea of purchase and control of a number of minor league baseball teams where promising recruits, many of them farm lads, are developed into baseball stars. Rickey is partial to the sinewy, toil-hardened youth from the farm with a heritage of faith and courage whose health has not been undermined by dissipation. It is said that he keeps a fatherly eye on these lads on his 'baseball farms' and woe be unto the man who leads them into temptation. Never able to develop a winning big league team as manager because it is said that he is too idealistic and 'soft-boiled,' Branch Rickey still is admittedly the directing force behind the Cardinal team which in three years has won two championships and one world's championship. It is generally conceded that he has done more to place professional baseball upon a high plane than any other man."

COMMENTING ON THE FACT (that some shareholders) blindly injure their own organization in selling to their competitor, one man at an elevator meeting remarked that "when he saw his grocer or butcher crossing the street to his competitors place of business to buy his provisions for dinner, then he would try to see some merit in a stockholder of a farmers' elevator selling his grain to the other fellow."—Grain Marketing.

Girl Wins Essay Contest

Wilma I. Birdzell

WILMA I. BIRDZELL of Cumberland county won the $50 watch awarded by the Illinois Agricultural Association for the best essay on the subject "Why Club Members Should Market Their Livestock Co-operatively."

In the contest the state was divided into three districts. The winners in the various districts were as follows:

Northern District—Herman B. Rupp, Leland (DeKalb Co.) $25 Gold Watch—1st prize. Clara Haun, McNabb (Putnam Co.) $10—2nd prize.

Central District—Wilma I. Birdzell, Jewett (Cumberland Co.) 1st prize and State prize winner, $50 Gold Watch. Georgia Jones, Cathage (Hancock Co.) $10—2nd prize.

Southern District—Martain Garbe, (Effingham Co.) $25 Gold Watch—1st prize.

The essays were judged by J. D. Harper, editor of the National Livestock Producers; Frank Ridgway, agricultural editor of the Chicago Tribune; and E. G. Thiem, director of information, Illinois Agricultural Association.

On receiving the news of her victory, the winner wrote Ray E. Miller, director of livestock marketing who conducted the contest, as follows:

"I certainly was glad to learn that I had won first place in the contest.

"I have no picture at present, but will send one in a few days. I am 13 years old, in first year high school, live on a farm, have had one year in club work—first year sewing project—and won the county championship.

Sincerely yours,
Wilma I. Birdzell."

Twenty counties submitted the winning essays in their county contests to the state committee for final judgment. The winners in the county contests were as follows:

Kermit Kline, Blandinsville (McDonough Co.) Central Dist.
Orval Stiegman, Thawville (Iroquois Co.) Northern Dist.
Edith Wolf, Canton (Fulton Co.) Central Dist.
Clara Haun, McNabb (Marshall-Putnam) Northern Dist.
Wilma I. Birdzell, Jewett (Cumberland Co.) Central Dist.
Merle L. Hall, Princeville (Peoria Co.) Northern Dist.
James W. Wallace, Assumption (Christian Co.) Central Dist.
John R. Spear, Mason City, Route No. 4, (Mason Co.) Central Dist.
Morrill Fraley, Naperville, Route No. 1, (DuPage Co.) Northern Dist.
Scott County—Central Dist.
Iva Mitchell, Greenfield, (Macoupin Co.) Central Dist.
Herman B. Rupp, Leland (DeKalb Co.) Northern Dist.
Mildred V. Crouse, Farmersville (Montgomery Co.) Central Dist.
Martin Garbe (Effingham Co.) Southern Dist.
Clifford Wertsch (Tazewell Co.) Central Dist.
William F. Whiteman, Biggsville (Henderson Co.) Northern Dist.
Fay M. Sims, Adams (Adams Co.) Central Dist.
Hobert Canady (Clark Co.) Central Dist.
Georgia Jones, Carthage (Hancock Co.) Central Dist.
Homer Mendenhall (Sangamon Co.) Central Dist.

Knox County Wins Cup in Publicity Contest

KNOX county won the Farm Bureau Publicity Contest and the Sam Thompson Trophy for the second time when county publicity exhibits were reviewed by a committee of judges on March 1. The exhibits which consisted of clippings from newspapers and journals, copies of releases forwarded to the press, Farm Bureau official organs, letters, posters, etc., were judged for effectiveness, originality, volume of publicity secured, completeness, variety, and results in building a strong Farm Bureau membership. The Knox county entry was complete in every detail and attractively presented.

The Vermilion county entry of farm adviser Otis Kercher placed second. Kercher has one of the best official Farm Bureau publications in the state, and during the past year the organization secured splendid support from the Danville Commercial-News and other county newspapers.

Exhibits from Marshall-Putnam, Sangamon, and Boone counties received special mention. County Adviser R. J. Laible in Marshall-Putnam is carrying on very creditably the effective publicity project initiated by former adviser F. E. Fuller. A weekly release is forwarded to all the newspapers in the county regularly, and letters, cards, and posters are used to keep the members in touch with Farm Bureau activities. The Farm Bureau in Sangamon county, Edwin Bay, adviser, has received splendid support from Springfield's two leading dailies and the strength of the organization there is due in no small part to the attention given publicity.

Farm adviser Foley in Boone county uses the Rockford dailies as well as local newspapers and a mimeographed letter to tell about the Farm Bureau and its work. He is doing effective work in building a strong organization in that county.

Among other excellent exhibits were those from Shelby, Madison and Woodford counties.

Judges were as follows: C. V. Gregory, editor, Prairie Farmer, H. B. Clemmons, Illinois Press Association, C. H. Keltner, Illinois Farm Advisers Association, D. C. Waterman, associate editor, Illinois Farmer, F. J. Keilholz, extension editor, Illinois College of Agriculture, and E. G. Thiem, Illinois Agricultural Association.

News in Brief

The Missouri Farmers Association reports that co-operatives in that state returned more than $1,000,000 to their farmer patrons in dividends during 1928. Reports from eighty-three co-operatives alone show net earnings of $608,861.52.

The Peoria County Farm Bureau directors voted recently to organize the Peoria County Service Co. to handle petroleum products and supplies. The company will not be incorporated until $16,0000 of preferred stock has been subscribed.

The Illinois Milk Producers Association, Peoria, recently consummated a new agreement with dealers for 1929. The dealers are to pay $2.77 for Class I fluid milk, and Chicago 92 score butter price plus 4c per pound butterfat and 30c per cwt. for skim-milk for all Class II or manufactured milk. The Association has 1260 members, and 86 per cent of all milk coming to the five Peoria dealers. The new agreement will add $28,000 to the producers' income for 1929.

Clarence Ramshaw was recently elected president and manager, and Max Wyman secretary-treasurer of the Peoria County Farm Bureau Baseball nine.

Average shrink per head in February 1929 was only 1.5 lbs. on hogs handled by the Chicago Producers Commission Ass'n—a new low record.

The Chicago Producers are handling close to 10 per cent of all livestock receipts excluding shipments direct to packers.

V. J. Banter, JoDaviess County farm adviser will succeed W. A. Herrington, adviser in Stephenson county who will assist M. L. Mosher in farm management work in Livingston and Woodford counties.

Local solicitors in LaSalle County signed 873 members in the Farm Bureau on Tuesday, Feb. 26.

7,000 carloads more of fresh vegetables from the south moved to northern cities in February 1929 than in the same month last year. City people are eating more fresh foods, less canned goods.

Taxes took on an average more than 28 per cent of the net rent before deducting taxes, of cash-rented farms in Iowa in 1926 and 1927.

A calf buyer was responsible for spreading foot and mouth disease in Los Angeles county, California, says the U. S. Dept. of Agriculture.

The first real ice-cream plant to be built in France is about to be erected. Comparatively little ice-cream is consumed there. Experts of the new company will study ice-cream making and marketing in the United States.

The Lake County Farm Bureau "helped put over 90 per cent membership in Lake County for the Pure Milk Association," says the DIVERSIFIED FARMER.

Wicker to Leave I. A. A. Organizes Company

Has Had Lifetime Experience in Co-operative Work

GEO. R. WICKER director of business service and manager of the Illinois Agricultural Co-operatives Association and the Illinois Farm Supply Company, who leaves the Association April 1 to take up new duties, was born at Neillsville, Wis., in 1877. He left the farm at age 20 to join the United States regular army when the Spanish-American War broke out. After a little less than a year in the service, Wicker returned to Minnesota where he began publishing the Dodge County Transcript, a weekly newspaper. Through his editorial work he became interested in farmers' co-operative enterprises and in 1899 organized the first of these, a co-operative rural telephone company. Beginning in 1905 he assisted in organizing a string of 16 co-operative lumber companies of which he was manager of two over a period of 15 years.

Geo. R. Wicker

Elected to the state legislature in 1918, he introduced the general co-operative law and a number of other marketing bills which laid the groundwork for the widespread development of co-operatives in that state. In 1921 he was appointed chairman of the committee on tax laws in the House. This committee prepared the tonnage tax bill on mineral ore which contributes heavily toward Minnesota's fine educational system.

Wicker served as a deputy commissioner of agriculture in Minnesota from 1922 to 1925 where he developed a business and accounting service for farmers' co-operatives, and was in charge of co-operative activities in that state.

Came In 1925

He came from that work to the Illinois Agricultural Association in 1925 to take charge of and develop the Illinois Agricultural Co-operatives Association, which today is a going concern with more than 200 co-operative organizations.

When the Illinois Farm Supply Co. was organized two years ago, Wicker was placed in charge as active manager. Last year it did a business of $677,818.07 and earned a net profit of $16,299.85.

Wicker recently organized the Wicker Corporation to deal in farm supplies throughout Wisconsin, Iowa, and Minnesota. The company will deal in petroleum products direct to the consumer and later will build a chain of bulk stations in southern Wisconsin. Headquarters of the new company already have been established in Chicago.

28 Years In Work

Mr. Wicker's resignation becomes effective April 1. In an interview regarding the matter he stated, "I have spent 28 years in the service of farmers' co-operative organizations in one capacity or another. My resignation is prompted entirely by a desire to promote my own interests. I am leaving the work with considerable regret as nearly a lifetime of experience has convinced me that the co-operative method of conducting business enterprises among farm people is at the beginning of its greatest development."

"I have enjoyed my associations with the officers and staff of the Illinois Agricultural Association and also with Farm Advisers and Farm Bureau people throughout the State of Illinois. I shall continue to be interested in the Farm Bureau movement and in order to retain a permanent connection I have become a member of the Lake County Farm Bureau.

"I wish to take advantage of this opportunity to thank my many friends throughout the state for their fine co-operation in developing the work in which I have been engaged."

Pure Milk Association

(Continued from page 5)

3.5 per cent milk f. o. b. country points with no surplus, is an advance of 14 cents for the dairymen above the former price of $2.50.

3. Dealers will pay the Association one cents per cwt. checkoff for all milk received.
4. No new patrons whatsoever will be taken on by any dealer unless they are members of the Association.
5. The one-cent checkoff for non-members will be used for advertising milk and dairy products on the Chicago market.
6. To stop losses resulting from dealers going bankrupt a cash bond of $2500 will be required from each distributor.
7. No additional contracts will be made in violation of the arbitrator's decision, and present agreements will be kept. The dealers agreed to submit to checking of weights and tests to be worked out by a joint committee of dealers and producers.
8. Dealers are to turn over all records to the arbitrator when called for.

Observations

THE desire to influence, dominate, control, often purely for the sake of satisfying one's ego leads to many a man's downfall. Free-born Americans are lovers of independence. No less are the people of other nations except where they have been ground down by centuries of tyranny into hopeless despair and subjection. More battles both bloody and bloodless have been fought in the interest of freedom and self-determination than for all other reasons combined.

Such a battle is being waged now in the state legislature of New York. Organized farmers are at Albany, the state capitol, determined to regain home rule, the right to say whether or not their rural school districts shall be consolidated into larger districts, the privilege of accepting or rejecting consolidation by a majority vote of farmers in the district.

Power to force consolidation now rests in the State Education Department. Farmers have had to take what was handed them, pay increased tax burdens, submit to "bossing" and dictation from an autocratic bureau, and like it. It was taxation without representation that led to the Revolutionary War. Human nature has not changed since 1776.

Commenting upon the school fight at Albany, Dewitt C. Wing says in the Rural New Yorker, "Farmers now realize more vividly than they have realized for several generations that unabating organized, militant vigilance is the price that they must pay for such measures of legal justice, in school, business, and political affairs as it is possible to extract from the common stock controlled by our local, state, and federal governments."

New York farmers are going over much the same ground traversed by farmers in Illinois although in our case bureaucratic control ever has rested in a state department. Six years ago the Community Consolidated School Act was modified so that a majority vote outside the corporate limits of towns and cities is necessary to effect consolidation. As a result the extravagant in school building has been largely medicated.

The cost of government would probably be considerably less if the people who voted the taxes paid them. One of the outstanding arguments in favor of a state income tax is that a far greater proportion of our people would contribute directly and be conscious of burden of government. As it is, nearly everyone pays some tax indirectly. Better would it be if they paid a direct tax and thereby were brought to a complete realization of the source of governmental expenditure.

Marchant of Knox Co. To Ill. Farm Supply

Will Take Up New Work in Chicago April 1

L. R. MARCHANT, county farm adviser in Knox county since 1920, will succeed Geo. R. Wicker, as manager of the Illinois Farm Supply Company. Mr. Marchant will take up his new duties April 1. His success in conducting Farm Bureau activities, particularly those of a business nature, in Knox county led to his choice for the new work.

Born and raised on a farm in Greene county, Iowa, Marchant graduated in animal husbandry from Iowa State College in 1914. He spent four years prior to the World War in farm management work, three years with the firm of Carpenter and Ross, prominent breeders of Shorthorn cattle, in Richland county, Ohio, where he had charge of farm operations on more than 1000 acres; one year managing the Mark Morton 500 acre farm in DuPage county.

L. R. Marchant

After being discharged from the army he returned to a 1100 acre farm in Portage county, Ohio, and in October, 1920, came to Knox county as assistant farm adviser. In 1922 he became farm adviser which position he has held since that time.

Over 1300 Members

During Marchant's term as farm adviser Knox county has maintained a membership of more than 1300, and a reserve fund has been added to each year. A large membership was signed up for the new three-year period only last year.

Prior to the organization of the Knox County Oil Company Marchant made a study of the Minnesota cooperatives and spent considerable time with specialists in that field of work. He served as secretary of the Knox county unit for the past two years, director of the Illinois Farm Supply Company, and chairman of the Specifications Committee. Mr. Marchant was president of the Illinois State Association of Farm Advisers in 1928. He is recognized as one of the ablest men in the state.

A. R. Kemp, assistant, will succeed Marchant as farm adviser in Knox county.

Livestock Marketing

Scott County Meets Trucking Problem

"OUR county livestock shipping association has done a bigger business since we started trucking than ever before during the same time of the year," writes Alfred Tate, farm adviser in Scott County, Illinois. "This increase in business leads us to believe that the investigational work which we did and which was followed up by publicity, has taught livestock producers in our county many facts regarding the marketing of their animals which they did not know before. They are now content to let the shipping association handle their stock. When we began trucking, our shipping association was losing business. Since we have facilities for trucking there has been very little demand for trucking to the terminal market. Practically all shippers employ our truck men to haul their livestock from the farm to the local shipping point.

Trucks Increasing

"The number of farmers and regular truck drivers who were trucking livestock to the market has been increasing for some time and during the last year, the increase in livestock trucked to the market was very pronounced," continued Tate. "This trucking of livestock to the market by farmers and truck drivers increased to the point where it was undermining the shipping association.

"Most live stock producers do not take the time to figure out which is the best way, everything considered, to get their livestock to the market. Truckmen led them to believe that there will be less shrink if they send their stock by truck, that it will be more convenient for them and that the returns will be greater. We found also that in practically every case where livestock was trucked to the market, it did not go to the Producers.

"We decided that the shipping association would either have to discontinue operation or else meet successfully the competition of truckmen. After getting all the information available, the shipping association decided to contract with a reliable truck driver to do all its trucking business.

Local Trucker Hired

"We felt that one of the main needs of the association was to have facilities for getting stock from the farm to the local shipping point. We contracted with a truck driver to do this local trucking for 20c per mile, that is, 20c one way and no charge for return trip and 35c handling charge up to 600 pounds. Over 600 pounds and up to 1200 pounds, 50c handling charge. Over 1200 pounds and up to 3,000

pounds, 75c handling charge. We consider this a very reasonable charge. In fact, we do not think farmers can afford to haul their own livestock for this price.

"In such cases as a rapidly falling price, hog cholera outbreak, or where people are anxious to get their livestock on the market and we can't secure enough for a carload, the truck driver agrees to haul to the terminal market for 40c per hundred.

"Our investigation revealed that shipping by rail is much the most economical means of transportation. We found also that commission and yardage is higher on trucked-in stuff than stock shipped by rail. We found also that the shrink is just as great, if not greater, on trucked-in stock compared with that shipped by rail."

Dairymen Help Milk Distributors Pay Up

WHEN two dealers on the Champaign-Urbana milk market refused to abide by the terms of their contract with the Champaign County Milk Producers, the dairymen retaliated by withholding their milk with the result that in 24 hours legal counsel for the truant distributors approached the Producers' organization with the advice that his clients would co-operate.

The break came following a night session on February 26 when two of the six dealers under contract refused to pay the 25 cent per 100 lbs. premium for milk testing Grade "A." The next morning the dealers received less than 20 per cent of their usual milk supply.

The contract had been entered into January 1, 1929, and provided for a price of $2.70 per 100 lbs. for four per cent milk with an additional premium as noted. Under the contract milk was to be tested five times during the month by the methylene blue test. Each time it tested Grade "A," a premium of five cents per 100 lbs. was to be added to the net price. Three-fifths of all the milk sold through the Producers made the Grade "A" test. Settlement was made on this basis.

Oppose Rate Increase

Opposition to a proposed increase in freight rates on fruits and vegetables in southern Illinois was filed in an answer submitted to the Interstate Commerce Commission recently by the Illinois Agricultural Association. The railroads are seeking to cancel out the present rates in effect in southwestern Indiana and Illinois and to substitute for them higher rates.

Joined with the I. A. A. in the statement submitted to the rate-making body were the Illinois Fruit Growers' Exchange and the Illinois Horticultural Society.

Two new safes have been added to the I. A. A. office equipment for protecting valuable records of the Association and its subsidiaries.

Life Insurance

By L. A. Williams

ANY undertaking is doubly secured if it is underwritten. Life insurance means insuring life's financial program by underwriting it. It guarantees a sum of money to take the place of earning power cut off prematurely. Some have said that life insurance is a misnomer. They believe it should be called death insurance. Not so. Life insurance is, in some degree, the substitute earning power guaranteed to the beneficiaries. It is life insurance, again, because no insured who survives, has lost. Rather is he far ahead in savings shown in his cash value; far ahead in prolonged life which freedom from worry has given him. Life insurance is again the correct name, for it affects the life of the beneficiary. Welfare, physical, moral and spiritual depends much upon the estate left to provide education, church and school training, and opportunity for a comfortable plane of living. All this points to the exact fitness of the name life insurance.

Do you remember back in the dark ages when certain religious groups refused life insurance under the delusion that it was blood money; money taken on the life of a loved one? Day by day they came to understand that an estate was a matter of providing for old age—for loved ones, and for posterity. They came gradually to know that the difference between farms or other real property, and the scientific estate of life insurance really showed in favor of the life insurance. The science of guaranteeing a portion of the unlived earning power has blossomed, and in full bloom is embraced by every sane thinking man provident enough to care.

The banker's advice is "first get a life insurance policy." The investor's advice is, "make no investment until you have assured through life insurance that your losses will not ruin family chances, should you pass out of the picture."

No man would consider a load of debt until he had provided for the possibility of death, and the care of that debt should he depart prematurely with his job unfinished. Each father's fondest hopes are reborn, and live again, in his son. Life is like that; we plan to carry on and on, and life is worth the prize only as we do so plan.

So, the institution of life insurance fits the needs of our civilization as no other plan can do.

Soy Bean Growers to Form Co-operative

Plan to Meet Buyers on Equal Footing in Business-Like Way

REPRESENTATIVES from Champaign, Moultrie, Piatt, and Douglass counties met in Champaign on March 7 to consider plans for a bargaining organization of soy-bean growers in central Illinois.

The meeting grew out of buyers' activities in entering into contract with individual growers for the direct purchase of soy-beans. Contracts were sent to growers many of whom were Farm Bureau members. They appealed to the Farm Bureau for advice and the question at once came up of improving farmers' bargaining power and placing them on an equal footing with the buyers through the organization of a growers' association.

At Monticello Mar. 14

At the Champaign meeting temporary officers were appointed and plans made for a meeting at Monticello on March 14 when steps were to be taken to organize a co-operative soy-bean growers' association. Three representatives from each of the four counties were selected to attend the meeting. Other central Illinois counties where soy-beans are grown were invited to send delegates. John Armstrong of Champaign was elected as chairman and C. V. Swanson of Ludlow, secretary.

The purpose of the organization will be to maintain the bargaining power of the growers, improve quality of their product, disseminate market information among members, advertise soy-beans, and develop new markets.

Illinois grows more soy-beans than any other two states, and the central Illinois counties produce a large proportion of the beans grown in the state.

GRAIN MARKETING

By Harrison Farhnkopf

WE ARE GLAD TO ANNOUNCE THAT J. F. Booth of the United States Department of Agriculture will spend the week of June 1-8 in Illinois. At that time a series of meetings will be held in the interest of co-operative marketing. The Farmers Grain Dealers Association of Illinois is co-operating. One meeting will be held in each of the seven districts of the state association. Definite dates and places will be announced later.

THE SOFT WHEAT MILLERS (of Southern Illinois) recently held a meeting in St. Louis. The principal topics of discussion at this meeting were ways and means of increasing yield per acre, also the quality of soft wheat grown throughout that section. The millers indicated their earnest desire to work closely with the College of Agriculture and the Farm Bureaus.

ST. LOUIS DAIRYMEN ADOPT PLAN

Producers from 19 Counties Vote Unanimously to Form a Comprehensive Co-operative Selling Organization

DAIRYMEN representing producers for the fluid market from 19 counties in the St. Louis milk shed voted unanimously to organize a comprehensive co-operative milk bargaining association in a meeting at E. St. Louis April 8. More than 150 men including the cream of the leadership in that territory attended the meeting. The vote to adopt the plan presented by the special committee was unanimous.

The new organization which is expected to adopt the name, "Sanitary Milk Producers" will be modeled after the Pure Milk Association at Chicago and similar organizations operating on the Philadelphia and Baltimore markets.

The gathering at the Broadview Hotel was harmonious. There was little difference of opinion about the essential features of the plan. In general the work of the association will include:

1. Standardization and improvement of milk and dairy products.

2. Collective bargaining in selling.

3. Control of surplus and supplying milk as the market demands.

4. Checking weights and tests.

5. Watching credit rating of buyers.

6. Issuing truthful market information.

7. Advertising milk and dairy products to broaden the outlet.

Macoupin County delegates offered a friendly amendment to the checkoff feature which provides for a deduction not to exceed 5c per cwt. on milk delivered by members. This was included in article 5 in the proposed members' agreement which is as follows:

"The member agrees to pay an entrance fee of $5. The member further agrees that the Association shall authorize the buyer to remit all money due the member for dairy products delivered by him, directly to the member, less a commission not to exceed five cents per hundred weight, which commission the member authorizes the Association to collect and receive."

The proposed Macoupin amendment would have a checkoff of 2c per cwt. with the provision that the board of directors might increase such checkoff to 3c by a majority vote, to 4c by a two-thirds vote, and to 5c by a unanimous vote.

There was considerable discussion of this amendment. Don Geyer, manager of the Pure Milk Association, Chicago, cautioned the dairymen against providing too little money to carry out an effective program. He asserted that the producers' association at Baltimore collected a 15c checkoff and that the source of its strength was the reserve fund of $700,000 to $800,000 invested in high grade securities which is always available for fighting the dairyman's battles for him.

WHEN DAIRYMEN OF ST. LOUIS DISTRICT LAUNCHED NEW COOPERATIVE SELLING ORGANIZATION

Ringham Reports On Progress of I. A. C. A.

225 Members Now Secure Audits On Co-operative Basis At Cost

"SIXTY out of 95 County Farm Bureaus are now members of the Illinois Agricultural Co-operatives Association, and total membership in the Association is now 225," states Manager Fred E. Ringham.

Fred E. Ringham

Six new Farm Bureaus subscribed for the service within the past few months. "We are recommending that each Farm Bureau adopt a budget, stick to it, and provide each year a reserve," stated Ringham.

The Wallace Grain and Supply Company of Ottawa recently used the audit service of the Co-operatives Association. It appointed an auditing committee to investigate various audit services. It interviewed Farmers' Elevators at McNabb and Serena, and the LaSalle County Farm Bureau, and all recommended the I. A. C. A.

The Company secured a complete and detailed audit. The preliminary report indicated that the Company did more than $629,000 worth of business in 1928. The gross income amounted to over $90,000 and the net income was more than $15,000. It has capital stock of $27,100 and surplus and undivided profits of $150,000. This Company is one of the strongest in Illinois. Henry A. Bonges is its able manager.

During the first three months in 1929 the Illinois Agricultural Co-operatives Association audited 104 accounts as compared with 96 during the first three months of 1928. There was an appreciable decrease in the cost of auditing Farmers' Elevator accounts this year compared with last. This was also true of the County Oil and Supply Companies. The reason for this increase in efficiency, according to Ringham, is first, that better records are being kept, and second, that repeat audits are invariably cheaper than original audits.

Eighty-five out of 88 audits taken in January and February were as of December 31 closing. December and January are the heaviest months for audits. Many Farmers' Elevators dislike to change their present fiscal year because they like to close their books a short time before the annual meeting, and annual meetings are usually held in the late winter months when it is possible to get out a larger crowd. The natural fiscal year for a grain elevator is from April 30 to June 30. According to Ringham, if the same number of audits were made each month throughout the year, the cost per audit would be less because it would be possible to carry a smaller staff both in the field and in the office. Members of the Co-operatives Association must pay extra for the convenience of getting an audit when they want it. An organization like the I. A. C. A. must have a permanent staff if its work is to be efficient and administered by capable, qualified men.

Pipe Line Proposed Thru Central Ill.

Farm Bureaus and I. A. A. Transp. Dept. Represent Constituents

THE Texas Empire Pipe Line Company, an Illinois corporation, proposes to build a new pipe line to carry crude oil from the southwest oil fields through Illinois. The proposed line will extend from a point on the Mississippi river northeast to a point in Dewitt County. From Dewitt County, a branch is to extend northeast to Lockport in Will County. A second branch is to go from Dewitt County to Lawrenceville, near the Wabash river.

The Company already has applied for a certificate of convenience and necessity from the Illinois Commerce Commission for building the line. Land owners in Piatt County appealed to the Farm Bureau for advice when they objected to the route proposed through that section and also to certain provisions in the Company's contract. The Company has not been arbitrary however, but has indicated its willingness to do whatever is reasonable. The Transportation Department of the Illinois Agricultural Association is investigating the situation and representing Farm Bureau members along the proposed route.

Farmers in the affected counties are being requested to submit propositions for changing and modifying the route where such action seems advisable. It is understood that the Company's contract offers farmers fifty cents a rod for perpetual easement to the land. The pipe line will be laid below the frost line. The company agrees to stand for any and all damage to tile, etc. resulting from the construction of the line. Farmers, of course, are interested in securing proper protection for their lines of tile. Much of the land to be traversed is tiled land and owners are concerned about the tile being properly protected where it is overlaid by a pipe line. Farmers feel that the price offer for giving the pipe line right of way through their land is not just and have appointed committees to make an investigation as to the adequacy of such an offer. The Illinois Agricultural Association is preparing suggestions and changes in the contract to protect the interests and rights of Farm Bureau member land owners.

Chicago Milk Station

W. C. McQUEEN, president, and D. N. Geyer, manager of the Pure Milk Association, are meeting with a committee of five Chicago milk distributors each Tuesday to discuss their problems and cooperate in working out the plan and program outlined by Arbitrator Clyde L. King of Philadelphia some time ago.

Prices for April and succeeding months have been negotiated with distributors and are announced as follows:

"The base price of $2.64 net to the farmer will continue until changed in conference, or by the arbitrator, and will apply to basic milk under the following base and surplus arrangement:

Base Plan Used

"Base months will be September, October, and November of 1928 and the average production of each producer during those months will be used as a base during April, May, June and July. One hundred and twenty per cent of base will be allowed for April, 110 per cent for May, 105 per cent for June, and 120 per cent for July. All milk delivered during August will be taken at the base price.

"Surplus milk will be paid for under the following plan, using the average monthly quotations in the Chicago market for 92 score butter and to be figured in the following manner: 3½ times the 92 score butter price plus 20 per cent plus ¼ the difference between that price and the basic price. Illustration: Presuming butter quotations to be 50 cents—3½ times 50 equals $1.75, plus 20 per cent '35 cents' equals $2.10, plus ¼ the difference between $2.10 and $2.65 equals '55 cents divided by four' which gives you 13¾ cents to add to the $2.10 price, which makes the price of surplus on a 50 cent butter market bring $2.23¾ per cwt.

New Patrons

"New patrons taken on since February 1 to receive payment on a basis of 50 per cent of their production as basic and 50 per cent as surplus.

"This price for the next few months carries the producers through the surplus season and has been worked out with the hope that the surplus situation can be greatly corrected by the dairyman himself working toward the end of making a more even production throughout the year and thereby taking advantage of the more even basic price which continues through the surplus months. The basic months of September, October, and November should be looked forward to by the dairymen with a view to correcting any inequalities that may now exist in the way of monthly production."

The farmers' elevator at Cerro Gordo, Piatt County, has been in operation a little more than 25 years. T. J. Shambaugh has been a director of the company since it opened for business.

The Illinois Agricultural Association RECORD

Number 4 APRIL, 1929 Volume 7

DAIRY Marketing

By Art Lynch

QUALITY MILK is the basis of a good sale. So much can be said about the appeal of a cold bottle of sparkling, clean flavored milk that it is no wonder that folks today are drinking 27 per cent **more milk** than they did five years ago.

This is due largely to the fact that dairymen are appealing to consumers' demands with a standard high quality article. Chicago dairymen produce a quality of milk that sets the **pace** for large cities throughout the world. Bloomington, Illinois, producers market more of their product as Grade A than **anywhere** in the state.

Why? Well, **first** of all, a real dairyman won't sell any milk he wouldn't want his own family to consume. **Secondly,** he knows the better the milk the more they will buy. **Thirdly,** the higher the standards he creates on his own market the less the danger of competing dairymen from other sections coming in to share his market. **Fourth,** modern sales plans provide for cash premiums for the higher quality milk.

Organized producers at Peoria get 25 cents per cwt. extra in hot weather and 15 cents per cwt. in cold weather extra over the pool price if they make Grade A milk. In unorganized days if these men took pride in their work and made extra good milk they got no more than the fellow who didn't care. Now some are getting **premiums** that run $50 to $75 in just one month.

Organized dairymen at Champaign get a 25 cent per cwt. premium and none of them turn down any premium **checks.** Organized dairymen at Bloomington get a premium for Grade A, the amount depending upon how many are in Grade C who are docked. The money accruing through these discounts is divided into a premium for the Grade A producers. The Bloomington producer who grades B is neither docked nor premiumized.

Farmers sell steers on grade, corn according to grade, wheat according to grade—now they sell milk according to grade. Nothing strange about grading milk with the quick and easily verified tests now in use in the dairy industry.

HE'S LEARNING *Courtesy Chicago Daily News*

Organized farmers will not think of selling their dairy products on a "mine run" basis. They will set up standard grades that take brains and effort to attain and **collect** for this effort the cash premium to which they are justly entitled. The employees who check weights and tests can just as well see that the grading is **done right.**

Illinois will be a grade A state before we know it.

Grain Marketing

By Harrison Fahrnkopf

THE Bureau of Agricultural Economics, Washington, reports that for the United States as a whole, there were 74,411,000 bu. of wheat stocks in country mills and elevators March 1, 1929, as compared to 75,428,000 bu. March 1, 1928, and 85,928,000 bu. the same date 1927.

The farmers' elevator at Cerro Gordo, Piatt County, has been in operation a little more than 25 years. T. J. Shambaugh has been a director of the company since it opened for business. In commenting on the support given the elevator, Mr. Shambaugh recently remarked that—"One of the things which makes it hard is that so many men don't know what it means to have the advantages offered by a farmers' elevator. When our elevator opened for business," he continued, "corn went up three cents per bushel within three days at our station; although the Chicago market was steady."

Wm. A. Komnick, manager of the Emden Farmers Grain Company, assumed the role of a playwright long enough to prepare a short play which was presented by local people at the annual meeting of the Emden Company.

It depicted scenes that might transpire during an hour or two in any farmers' elevator office—with the usual loafer present to help make them realistic. The play went over big and contributed immeasurably to the success of the program.

A number of County Grain Market-

(Continued on page 4, column 2)

Legislation and Insurance at 19th

Congressman Adkins Brings Latest News to I. A. A. Dist. Conference

FIFTY representatives from Piatt, Champaign, Douglas, Moultrie, Shelby and Macon counties attended the 19th District Meeting of the Illinois Agricultural Association, held March 20 in Decatur.

L. A. Williams, manager of the Country Life Insurance Company, gave the principal talk. He stated that the company had accomplished something that had never been done before in the history of any life insurance company under 25 years old, i. e., the securing of $13,000,000 in life insurance, with annual premiums paid in advance, in the short time of one month. His address was very interesting.

C. J. Gross

Other Insurance

V. Vaniman discussed the various forms of insurance service offered by the I. A. A., which include Fire and Lightning, Windstorm, Cyclone and Tornado, Farm Crop, Hail, Automobile, and Employers' Liability insurance for farmers.

The Illinois Agricultural Mutual, which provides auto insurance, has more than 12,000 policy holders and assets of more than $200,000. Savings to members in initial investment and cost of insurance has been over $175,000; besides, it provides the kind of automobile protection for its members that they should have.

Under Employers' Liability Insurance, it was pointed out that the farmer employer is exempt from coming under the compensation act; however, he is not released from the common law liability in case the employee can show that the injury was due to the neglect or careless act of the employer.

This form of insurance would protect the employer against any liability imposed by law for neglect or careless act on his part. The initial payment, based on the minimum payroll of $1000 would be $25. The costs of the insurance is estimated at about $10 a year.

If the Farm Bureau members desire this form of insurance protection, it will be furnished through the Illinois Agricultural Mutual, provided at least 1400 farmers are interested in this protection.

Gross Speaks

C. J. Gross, executive committeeman from the 19th district, discussed House Bill 285, which provides for the limiting of county highway taxes to twelve

(Continued on page 5)

Grain Marketing

(Continued from page 3)

ing Committees are having good programs discussing various topics of interest in the grain marketing field. Here are a few suggestions for topics:

1. Obstacles to successful co-operative grain marketing in my community and how to overcome them.
2. Why farmers elevator shareholders and boards of directors should be members of the Farm Bureau.
3. Facts concerning my elevator.
4. Why the farmers elevator should be a member of the Farmers Grain Dealers' Association of Illinois.
5. Does the statement "competition is the life of trade" apply to the farmers elevator?
6. Is there need for more farmers elevators in this county? If so, where?
7. How a Farm Bureau organization can co-operate with the local farmers elevators.
8. History of the farmers elevator movement in Illinois.
9. Why the farmers elevator and its patrons should take an interest in the Rural Grain Company, the co-operative commission company operating at Chicago.

The farmers elevator at Cerro Gordo, Piatt County, has handled seven and one-half million bushels of grain in 22 years. This elevator pays a patronage dividend to all but credits the non-shareholder on a share of stock. The elevator at Bement, in the same county, has handled ten million bushels of grain in 26 years. During that period of time it has paid 161 per cent on the capital stock.

Reports to the Department of Agriculture from about 1,500 farmers' elevator associations indicate that more than 97 per cent are farmer-owned and farmer-controlled. The officers of about 71 per cent of the organizations consider the associations co-operative enterprises. The organization set-up of 69 per cent of the associations provide that stockholders shall have but one vote each. In the case of 77 per cent there are limitations to the amount of stock that can be held by an individual and for 62 per cent there are limitations as to the per cent of dividends payable on capital stock. Nearly 73 per cent of the associations pay patronage dividends to stockholders and 22 per cent pay some patronage dividends to non-stockholders. But 15 per cent pay full patronage dividends to non-stockholders.

Characteristics of Success

TO BE able to carry money without spending it.

To be able to bear an injustice without retaliating.

To be able to do one's duty even when one is not watched.

To be able to keep at the job until it is finished.

To be able to make use of criticism without letting it whip you.

PRODUCE MARKETING

By Frank Gougler

EIGHT counties contracted to sell pooled cream for another year beginning March 1. Ford county renewed its contract with Sherman-White & Company, Fort Wayne, Indiana. McLean county cream goes to the Pioneer Company; Logan and Mason Counties sold to Producers' Dairy Association, Springfield; Schuyler County renewed its contract with the local creamery, Prince & Company; Brown county's highest bidder was Ernster Brothers, Chicago, and McDonough county received its best bid from Swift & Company at Bushnell.

All bids accepted are as good or better than the contracts in effect last year. Some additional progress was made in that two counties have contracts on a graded basis so that sweet cream producers will receive a premium.

Twenty-eight associations are now marketing while the following counties have organizations underway: White, Edwards, Lawrence, Clark, Effingham, Shelby, Douglas, McLean, Mason, Cass, Pike, Hancock, Adams, Henderson, Stark and Bureau.

Nothing like a feed to make a meeting. The Liberty unit of the Adams County Produce Association met a short time ago. The good women served eats to a packed house. School children entertained with singing, dancing, etc.

President Albert Wilkey says that this marketing project is the best Farm Bureau project that has yet been undertaken in his community. "Not only do we have a better market for our cream, but through the organization we can develop a better community spirit," he declared.

Guy Husted, Cass county farm adviser writes, "have practically completed organization at Arenzville. You may call for bids so we can let contract to highest bidder not later than March 16."

Farm Adviser H. N. Myers, Edwards County, also reports, "Marketing agreements turned in up to date indicate over 400 cows listed. Should have the necessary 500 within a few days. Shall wire or phone when we are ready for bids."

Land O'Lakes Creameries,
Minneapolis, Minnesota.
Gentlemen:

My wife and I consider your Land O'Lakes butter the best salted butter we have ever used. We are moving to Washington, D. C., and should like to know where we can obtain it there. Can you give me the name of a dealer?

Very truly yours,
Wm. R. Osgood.

Fairness and Justice Our Aim—Wm. H. Malone

Discusses Duties of Tax Commission and Cook County Revaluation on I. A. A.—WLS Forum

THE duties and powers of the Illinois Tax Commission and the scientific revaluation now in progress in Cook county were explained by Wm. H. Malone, chairman of the Commission, in a recent radio address on the I. A. A. Forum from WLS.

"One of the principal powers of the Tax Commission," said Mr. Malone, "is granted in the statute which says 'whenever it shall appear to the Tax Commission that property in any county has not been assessed in substantial compliance with the law or has been unequally or improperly assessed, the Tax Commission may in its discretion, in any year, order a reassessment for such year of all or any class of taxable property.'

Commission's Authority

"The Commission has no power to change individual assessments," continued Chairman Malone. "We cannot step in and lower the taxes of the man who is paying more than his just share of the tax burden. We cannot raise the assessment of the other man who is escaping his responsibilities. The law does not give us that power. We can only order a reassessment when the facts reveal that property has been unequally or improperly assessed. I want to drive home this point because there has been much misinformation broadcast as a result of our past efforts in carrying out the law which we have sworn to uphold."

Mr. Malone gave a graphic account of the graft, corruption, and inequalities which had crept into tax valuations and assessments in Cook county. He traced the history of the case, which culminated in the adoption of enabling legislation in a special session of the 55th General Assembly, and later the order of reassessment to bring back honesty and decency into Cook county tax administration.

Must Obey Law

"Our only interest is to see that justice is done," he said, "that inequalities are wiped out, and that taxes are assessed on a uniform basis in compliance with law."

In closing Mr. Malone congratulated Illinois farmers on their organization, the County Farm Bureau and the Illinois Agricultural Association, and the able manner in which they have been represented in tax hearings before the Commission by John C. Watson, director of taxation, Donald Kirkpatrick, legal counsel, and others.

Much Work Ahead

Possibilities of a long drawn out inquiry into the percentage valuation factor for tax assessment purposes in downstate counties looms ahead as a result of the scientific revaluation now being made in Cook county. Downstate counties may be expected to insist that Cook county property be assessed for state purposes on the same relative value as downstate property. Thus, if Cook county property should be assessed at only 36 per cent or less of its actual value, as was true in 1927, those counties in which a factor of more than 36 per cent is used will be getting the worst of it. Out of it all may come scientific valuations in all the counties and substantial equality and uniformity in levying assessments throughout Illinois. The Tax Commissions responsibility is a great one, and its work promises to be complex and of long duration.

Wm. H. Malone, Chr., Illinois Tax Commission

Tax Hearing at Springfield, Apr. 4

A TAX hearing was held before the Illinois Tax Commission in Springfield on April 4. The hearing was called at the instance of the Farm Bureaus in Williamson, Franklin, and St. Clair counties, with which the Illinois Agricultural Association is cooperating.

Investigations by the Farm Bureaus of the three counties in 1928 revealed that there were serious inequalities in valuations as between different classes of property.

A. O. Eckert of Belleville, representing the St. Clair County Farm Bureau, and a representative of St. Clair county tax officials were appointed as a committee of two to investigate and agree on the facts relative to valuations between farm and city property in that county. A somewhat similar arrangement was made in Franklin County. Williamson county officials, who failed to show up at the hearing, were given 15 days to show cause why there should not be an order of reassessment in that county.

Chairman Malone of the Commission asked for a further showing of facts and continued the hearing to a future date to allow all interested parties to present their cases.

Agree on Joint Rail Water Carrier Rates

Tentative joint rate agreements between the Inland Waterways Corporation, a government agency, and the railroads of the country, have been arranged.

The agreements, described as the most important event in 100 years of waterway history in the nation, will coordinate the service of railroad systems with the water routes of the country.

Davis Makes Announcement

The agreements were announced by former Secretary Davis in a statement transmitted to the war department from Fort Benning, Ga. The statement follows:

"I have been informed by Major General T. Q. Ashburn, chairman of the Inland Waterways Corporation, that a tentative joint rate agreement subject to approval, has been reached by officials of the railroads and water ways corporation, as a result of the conferences on joint rates, recently held in Washington. I appreciate the spirit in which both sides carried on the conferences. If the agreement is approved by the railroad executives and by me, I regard it as the most important development for the whole waterways movement in co-ordination and co-operation with the railroads that has ever been accomplished."

The agreement embraces a complete system of joint tariffs which will affect every railroad connecting with a water route in the United States.

"The agreement," General Ashburn said, "is the most important one that has been reached in 100 years of inland water ways history. It provides for private operation of water ways the same guarantees that were made for public operation. A complete statement of the division of traffic, routes and rates is included in it."

Legislation and Insurance at 19th

(Continued from page 4)

and one-half cents on each $100 full assessed valuation. The representatives from the different counties went on record unanimously approving the passage of this bill.

Congressman Chas. Adkins discussed the farm legislative situation in which he pointed out the probable action of congress on the tariff on farm products. Also the situation as to the so-called farm relief legislation, upon which the senate committee began hearings March 25, and the house committee March 27. It was expected to have the farm relief bill ready to introduce April 15 when Congress convenes for special consideration of the tariff and farm relief with a fair prospect of having an adequate tariff on farm products and a farm relief bill along the lines outlined by President Hoover.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Entered as second-class matter October 20, 1925, at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Accepted for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the ILLINOIS AGRICULTURAL ASSOCIATION RECORD. Postmaster: In returning an uncalled for or missent copy please indicate key number on address as is required by law.

According to Ability to Pay

THE general practice in raising revenue for public purposes has been and is to pluck the goose with the least amount of squawking. This practice has been followed for ages not only in this state but everywhere. It was easy, therefore natural, for the farmers of the state constitution of 1870 to tax visible or tangible property, for it comprised the bulk of our wealth at that time. Thus, our taxing system is a heritage from the past. We still have it because reform is difficult. Public inertia and apathy are hard to overcome. The powerful opposition of countless numbers who pay no taxes and profit by the existing order is another factor.

OUT of approximately $375,000,000 of revenue raised in 1927 for state, county, and municipal purposes in Illinois, nearly $340,000,000 was derived as taxes from real and tangible personal property. Approximately $300,000,000 of this represents taxes levied against real estate. This in spite of the fact that tangible property produces only about 10 per cent of the total income of the state.

The modern theory of taxation is to levy according to ability to pay. No one denies the fairness and justice of such a system. Yet, when an effort is made to partially substitute the income basis for the present iniquitous property tax all sorts of specious arguments and reasons are brought forth to block such a program.

THE state income tax now pending in the Legislature, which is sponsored by the Illinois Agricultural Association, endorsed by the Illinois Bankers' Association, and supported by home owners and real estate people, is designed to replace a portion of the heavy tax burden now resting on the shoulders of property owners. It will secure some contribution from those who are now escaping their just share of the cost of government. The proposed tax will raise, it is estimated, approximately $8,000,000 of net revenue. Two million dollars of this will replace a like amount now levied on farm property in Illinois; $4,000,000 will replace a like amount now levied against Cook County real estate; and $2,000,000 will replace a like amount now levied against property owners in down-state cities and villages.

THE state income tax is the only measure now pending in the Legislature that will lessen the taxes of property owners. The rates are modest, exemptions reasonable, and the property tax credit is fair and equitable.

Many tax reformers like to deal with our tax problem in the abstract. They contend that a constitutional amendment is necessary if we are to have a fair taxing system. We contend that a state income tax is now possible by virtue of authority granted in ARTICLE 9, Section 2 of the Illinois Constitution which provides as follows:

"The specification of the objects and subjects of taxation shall not deprive the General Assembly of the power to require other subjects or objects to be taxed in such manner as may be consistent with the principles of taxation fixed in this Constitution."

THE state income tax is a "lieu" or replacement tax. Here is how it would operate in the case of an owner of a 160 acre farm:

Let us assume that the farm and personal property of the operator is assessed a total tax of $180. Many in Illinois pay more. Let us assume that the operator has a wife and three dependent children. Under the proposed state income tax the exemption for him and his wife would be $2000, and $500 each for the children, making a total exemption of $3500. The proposed tax levies one per cent for the first $5000 of income, or $50. The next $5000 of income is assessed two per cent, or $100. The income beyond $10,000 is assessed three per cent. Thus, to pay an income tax of $180 the head of a family with three children would have to receive a net income of $14,500 annually to pay as much as a farmer now pays on a 160 acre farm on which $180 in taxes is levied.

The feature of the bill which allows people who pay a property tax to deduct such tax from their computed net income tax, would result in few home or land owners paying any state income tax. On the other hand, those obliged to pay an income tax because they pay no property tax would be amply able to do so.

ONE might well ask opponents of such a measure to what extent they are now dodging taxes. Our present property tax system comes near to being a single tax. The burden increases each year with the rising tide of public expenditures. Until the burden is more equitably distributed, therefore, the Illinois Agricultural Association has declared its opposition to increases in tax rates and to additional projects, the cost of which now comes out of the general property tax. We believe this is a sound policy and the only one which we can follow if we are to secure a better system of taxation and one based on the recognized and accepted theory of ability to pay.

The daily farm program of the I. A. A. from Station WJJD, Mooseheart (285 meters) is broadcast between 12:30-12:45 p. m. Monday to Friday inclusive. Hear the daily Chicago livestock market from the Producers, and each Friday the weekly market review. Outlook reports, reviews, and talks by I. A. A. staff members, officials, and leaders in farm thought are broadcast daily.

THE I. A. A. Forum from Station WLS, Chicago, will be held at 6:30 to 7:00 p. m. on Thursday nights instead of Wednesdays, beginning May 2. The change was made necessary because of the inauguration of so-called daylight savings time in Chicago, May 1. The programs will be broadcast at 6:30 central standard time, which will be 7:30 Chicago time.

The proposed dairymen's co-operative bargaining association on the St. Louis milk market was outlined in a radio talk by E. G. Thiem, director of information, from Station KWK, St. Louis, on Monday, April 8, at 6:00 p. m.

A history of co-operative live-stock marketing development in Warren county was scheduled to be broadcast on the I. A. A. Forum from WLS Wednesday 6:30 April 17, by the Warren County Farm Bureau.

Knute Espe, secretary of the Iowa Co-operative Live Stock Shippers of Des Moines, declined an invitation to take the negative side of the question "Resolved that Direct Shipping of Live Stock is Against the Farmers' Interests" in a debate proposed for the I. A. A. Forum from Station WLS.

Lee Highlen, director of live-stock marketing in Indiana, stated that he could not accept the invitation to debate the affirmative side of the question. "There is a serious question in my mind about this whole problem," said Espe. "I question whether it would do much good and I fear it might do considerable harm. I feel that I should not debate this question over the radio."

"Mr. Wm. H. Malone,
Chicago, Illinois.

"I am writing to express our appreciation of your fine talk from WLS on the I. A. A. program Wednesday evening, March 27. You have many friends in Champaign county who remember with pleasure the fine address you gave us down here last spring. We hope to hear you again in some of the radio programs and also wish you the greatest success in helping work out the tax problems.

ROY MITCHELL, Sec'y.,
Champaign County Farm Bureau."

Regulate Strip Mines Is Plea At Hearing

Fulton County Farm Bureau and I. A. A. Represent Landowners

A HEARING before the Senate Committee on Mines and Mining held at Springfield on April 10 resulted in a sharp clash between land owners, farmers, and their representatives from Fulton county, and representatives of the United Electric Coal Company, strip mine operators.

Donald Kirkpatrick

Senate Bill No. 295, introduced by Senator Jewell of Fulton county, was responsible for the hearing. This bill provides that whenever any person engaged in "open cut" or "strip" mining removes the surface soil over or covering a vein of coal, then removes the coal, he shall within 90 days thereafter replace the surface soil so removed in the hole or hollow from which it and the coal were taken, and "shall spread such soil over the entire hole or hollow so that the surface thereof is level."

Around Cuba in Fulton county as well as in other sections, strip mines which leave the area in a devastated and unsightly condition are causing no end of complaint from people living in such communities. Thousands of acres are being laid waste and after the soil is piled up in hills and ridges varying from 10 to 30 feet high, the coal operators move out and the areas thus affected are made useless and untaxable.

Would Have Clause

The proposed bill would compel the insertion of a clause in all contracts providing for strip mining whereby the mining company agrees to replace or level off surface soil removed in uncovering veins of coal, into the depressions or hollows left after the mining operation is completed.

In defending the bill Senator Jewell stated that habitation in such areas is made undesirable, the value of adjoining property is depreciated in value, and the land forever after is made non-productive and a total loss to the community. Harry Leeper, a director in the Fulton County Farm Bureau, Farm Adviser John Watt, and John Lingenfelter all appeared in defense of the measure.

Mr. Lingenfelter's testimonial was especially effective. He described such mining operations as "wanton waste." "I have never seen anything so desolate in all my travels over the country as an area that has been laid waste by these strip mining operations," said Lingenfelter. "If we needed this coal there might be some reason for it. But we don't need it. There is plenty of coal without this strip mined coal. The strip operators are ruthlessly tearing up the country simply to make money. They destroy valuable agricultural land and are ruining the countryside. Community life is disrupted and destroyed and adjoining property loses its attractiveness and value because no one wants to live in a community where the land has been cut up by strip mine operations."

Study the Problem

Donald Kirkpatrick, legal counsel for the Illinois Agricultural Association, declared that a number of complaints of like nature had come to the I. A. A. from over the state. "It behooves the legislature to study this problem," said Mr. Kirkpatrick, "as a matter of public policy." Mr. Kirkpatrick stated that a report issued by the U. S. Bureau of Mines on the question of strip mining called attention to the menace created by such operations and of the advisability of strip operators to work out this problem in the interest of the public good or they might expect regulatory measures to compel them to level off the ground.

"The constitution grants and holds inviolate the property rights of its citizens," said Kirkpatrick, "but would it not be against the public interest if we allowed our state or great areas of it to be turned upside down and laid waste by a process such as that being carried out in Fulton county?"

10c a Ton Cost

It was brought out in the discussion that the cost of replacing the overburden would add only 10 cents a ton to the cost of coal so mined. Strip mining lands in Fulton county have returned 7000 to 8000 tons of coal to the acre. One mine operator digs out around 2000 tons of coal a day.

Representatives of the coal company and witnesses testified that reforestation is the solution to this problem. The Indiana State Forester testified that evergreen trees are being planted on the hills and ridges left by strip mining operations in southern Indiana. President Swallow of the coal company, asserted that it was more important to produce wood for future operations than to retain the agricultural nature of strip coal mines. Former Senator Thurlow Essington acted as counsel for the coal company.

The bill was voted down in committee although it was apparent that many senators present favored a study of the problem with the idea of passing regulatory measures later if necessary.

In Brief

New Illinois farm advisers are H. R. Brunnemeyer, former instructor in agriculture at Yorkville, who goes to Jo Daviess county, and S. F. Turner, vocational agricultural teacher at El Paso, who succeeds Mr. Allison in Livingston county. E. A. Bierbaum, former assistant adviser, returned recently as adviser in Union county.

R. J. Laible reported, April 3, that much of the wheat in Marshall and Putnam counties was in a critical condition. A number of fields showed only a 50 per cent stand.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Entered as second-class matter October 20, 1925, at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Accepted for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the ILLINOIS AGRICULTURAL ASSOCIATION RECORD. Postmaster: In returning an uncalled for or missent copy please indicate key number on address as is required by law.

According to Ability to Pay

THE general practice in raising revenue for public purposes has been and is to pluck the goose with the least amount of squawking. This practice has been followed for ages not only in this state but everywhere. It was easy, therefore natural, for the farmers of the state constitution of 1870 to tax visible or tangible property, for it comprised the bulk of our wealth at that time. Thus, our taxing system is a heritage from the past. We still have it because reform is difficult. Public inertia and apathy are hard to overcome. The powerful opposition of countless numbers who pay no taxes and profit by the existing order is another factor.

OUT of approximately $375,000,000 of revenue raised in 1927 for state, county, and municipal purposes in Illinois, nearly $340,000,000 was derived as taxes from real and tangible personal property. Approximately $300,000,000 of this represents taxes levied against real estate. This in spite of the fact that tangible property produces only about 10 per cent of the total income of the state.

The modern theory of taxation is to levy according to ability to pay. No one denies the fairness and justice of such a system. Yet, when an effort is made to partially substitute the income basis for the present iniquitous property tax all sorts of specious arguments and reasons are brought forth to block such a program.

THE state income tax now pending in the Legislature, which is sponsored by the Illinois Agricultural Association, endorsed by the Illinois Bankers' Association, and supported by home owners and real estate people, is designed to replace a portion of the heavy tax burden now resting on the shoulders of property owners. It will secure some contribution from those who are now escaping their just share of the cost of government. The proposed tax will raise, it is estimated, approximately $8,000,000 of net revenue. Two million dollars of this will replace a like amount now levied on farm property in Illinois; $4,000,000 will replace a like amount now levied against Cook County real estate; and $2,000,000 will replace a like amount now levied against property owners in down-state cities and villages.

THE state income tax is the only measure now pending in the Legislature that will lessen the taxes of property owners. The rates are modest, exemptions reasonable, and the property tax credit is fair and equitable.

Many tax reformers like to deal with our tax problem in the abstract. They contend that a constitutional amendment is necessary if we are to have a fair taxing system. We contend that a state income tax is now possible by virtue of authority granted in ARTICLE 9, Section 2 of the Illinois Constitution which provides as follows:

"The specification of the objects and subjects of taxation shall not deprive the General Assembly of the power to require other subjects or objects to be taxed in such manner as may be consistent with the principles of taxation fixed in this Constitution."

THE state income tax is a "lieu" or replacement tax. Here is how it would operate in the case of an owner of a 160 acre farm:

Let us assume that the farm and personal property of the operator is assessed a total tax of $180. Many in Illinois pay more. Let us assume that the operator has a wife and three dependent children. Under the proposed state income tax the exemption for him and his wife would be $2000, and $500 each for the children, making a total exemption of $3500. The proposed tax levies one per cent for the first $5000 of income, or $50. The next $5000 of income is assessed two per cent, or $100. The income beyond $10,000 is assessed three per cent. Thus, to pay an income tax of $180 the head of a family with three children would have to receive a net income of $14,500 annually to pay as much as a farmer now pays on a 160 acre farm on which $180 in taxes is levied.

The feature of the bill which allows people who pay a property tax to deduct such tax from their computed net income tax, would result in few home or land owners paying any state income tax. On the other hand, those obliged to pay an income tax because they pay no property tax would be amply able to do so.

ONE might well ask opponents of such a measure to what extent they are now dodging taxes. Our present property tax system comes near to being a single tax. The burden increases each year with the rising tide of public expenditures. Until the burden is more equitably distributed, therefore, the Illinois Agricultural Association has declared its opposition to increases in tax rates and to additional projects, the cost of which now comes out of the general property tax. We believe this is a sound policy and the only one which we can follow if we are to secure a better system of taxation and one based on the recognized and accepted theory of ability to pay.

The daily farm program of the I. A. A. from Station WJJD, Mooseheart (265 meters) is broadcast between 12:30-12:45 p. m. Monday to Friday inclusive. Hear the daily Chicago livestock market from the Producers, and each Friday the weekly market review. Outlook reports, reviews, and talks by I. A. A. staff members, officials, and leaders in farm thought are broadcast daily.

THE I. A. A. Forum from Station WLS, Chicago, will be held at 6:30 to 7:00 p. m. on Thursday nights instead of Wednesdays, beginning May 2. The change was made necessary because of the inauguration of so-called daylight savings time in Chicago, May 1. The programs will be broadcast at 6:30 central standard time, which will be 7:30 Chicago time.

The proposed dairymen's co-operative bargaining association on the St. Louis milk market was outlined in a radio talk by E. G. Thiem, director of information, from Station KWK, St. Louis, on Monday, April 8, at 6:00 p. m.

A history of co-operative live-stock marketing development in Warren county was scheduled to be broadcast on the I. A. A. Forum from WLS Wednesday 6:30 April 17, by the Warren County Farm Bureau.

Knute Espe, secretary of the Iowa Co-operative Live Stock Shippers of Des Moines, declined an invitation to take the negative side of the question "Resolved that Direct Shipping of Live Stock is Against the Farmers' Interests" in a debate proposed for the I. A. A. Forum from Station WLS.

Lee Highlen, director of live-stock marketing in Indiana, stated that he could not accept the invitation to debate the affirmative side of the question. "There is a serious question in my mind about this whole problem," said Espe. "I question whether it would do much good and I fear it might do considerable harm. I feel that I should not debate this question over the radio."

"Mr. Wm. H. Malone,
Chicago, Illinois.

"I am writing to express our appreciation of your fine talk from WLS on the I. A. A. program Wednesday evening, March 27. You have many friends in Champaign county who remember with pleasure the fine address you gave us down here last spring. We hope to hear you again in some of the radio programs and also wish you the greatest success in helping work out the tax problems.

ROY MITCHELL, Sec'y.,
Champaign County Farm Bureau."

Regulate Strip Mines Is Plea At Hearing

Fulton County Farm Bureau and I. A. A. Represent Landowners

A HEARING before the Senate Committee on Mines and Mining held at Springfield on April 10 resulted in a sharp clash between land owners, farmers, and their representatives from Fulton county, and representatives of the United Electric Coal Company, strip mine operators.

Donald Kirkpatrick

Senate Bill No. 295, introduced by Senator Jewell of Fulton county, was responsible for the hearing. This bill provides that whenever any person engaged in "open cut" or "strip" mining removes the surface soil over or covering a vein of coal, then removes the coal, he shall within 90 days thereafter replace the surface soil so removed in the hole or hollow from which it and the coal were taken, and "shall spread such soil over the entire hole or hollow so that the surface thereof is level."

Around Cuba in Fulton county as well as in other sections, strip mines which leave the area in a devastated and unsightly condition are causing no end of complaint from people living in such communities. Thousands of acres are being laid waste and after the soil is piled up in hills and ridges varying from 10 to 30 feet high, the coal operators move out and the areas thus affected are made useless and untaxable.

Would Have Clause

The proposed bill would compel the insertion of a clause in all contracts providing for strip mining whereby the mining company agrees to replace or level off surface soil removed in uncovering veins of coal, into the depressions or hollows left after the mining operation is completed.

In defending the bill Senator Jewell stated that habitation in such areas is made undesirable, the value of adjoining property is depreciated in value, and the land forever after is made non-productive and a total loss to the community. Harry Leeper, a director in the Fulton County Farm Bureau, Farm Adviser John Watt, and John Lingenfelter all appeared in defense of the measure.

Mr. Lingenfelter's testimonial was especially effective. He described such mining operations as "wanton waste." "I have never seen anything so desolate in all my travels over the country as an area that has been laid waste by these strip mining operations," said Lingenfelter. "If we needed this coal there might be some reason for it. But we don't need it. There is plenty of coal without this strip mined coal. The strip operators are ruthlessly tearing up the country simply to make money. They destroy valuable agricultural land and are ruining the countryside. Community life is disrupted and destroyed and adjoining property loses its attractiveness and value because no one wants to live in a community where the land has been cut up by strip mine operations."

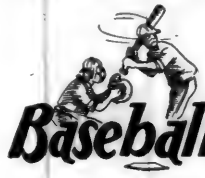
Study the Problem

Donald Kirkpatrick, legal counsel for the Illinois Agricultural Association, declared that a number of complaints of like nature had come to the I. A. A. from over the state. "It behooves the legislature to study this problem," said Mr. Kirkpatrick, "as a matter of public policy." Mr. Kirkpatrick stated that a report issued by the U. S. Bureau of Mines on the question of strip mining called attention to the menace created by such operations and of the advisability of strip operators to work out this problem in the interest of the public good or they might expect regulatory measures to compel them to level off the ground.

"The constitution grants and holds inviolate the property rights of its citizens," said Kirkpatrick, "but would it not be against the public interest if we allowed our state or great areas of it to be turned upside down and laid waste by a process such as that being carried out in Fulton county?"

10c a Ton Cost

It was brought out in the discussion that the cost of replacing the overburden would add only 10 cents a ton to the cost of coal so mined. Strip mining lands in Fulton county have returned 7000 to 8000 tons of coal to the acre. One mine operator digs out around 2000 tons of coal a day.



Representatives of the coal company and witnesses testified that reforestation is the solution to this problem. The Indiana State Forester testified that evergreen trees are being planted on the hills and ridges left by strip mining operations in southern Indiana. President Swallow of the coal company, asserted that it was more important to produce wood for future operations than to retain the agricultural nature of strip coal mines. Former Senator Thurlow Essington acted as counsel for the coal company.

The bill was voted down in committee although it was apparent that many senators present favored a study of the problem with the idea of passing regulatory measures later if necessary.

In Brief

New Illinois farm advisers are H. R. Brunnemeyer, former instructor in agriculture at Yorkville, who goes to Jo Daviess county, and S. F. Turner, vocational agricultural teacher at El Paso, who succeeds Mr. Allison in Livingston county. E. A. Bierbaum, former assistant adviser, returned recently as adviser in Union county.

R. J. Laible reported, April 3, that much of the wheat in Marshall and Putnam counties was in a critical condition. A number of fields showed only a 50 per cent stand.

Baseball Dope

"AT OUR recent baseball meetings," says County Adviser C. E. Burns of Champaign, "it was generally agreed that a farmer will do more work in a week if he takes Saturday afternoon off to play baseball, or watch a game."

Ten men joined the Champaign County Farm Bureau last year because they became interested in Farm Bureau baseball.

George Huff, director of athletics at the University of Illinois, writes that a player or athlete does not lose his amateur standing unless he accepts pay for participating in games. If he plays in a game where admission is charged, or if he accepts expense money to and from games, his amateur standing is not impaired.

Donald Kirkpatrick, I. A. A. legal counsel, says that neither the team nor the Farm Bureau can be held liable for injury to a player in a Farm Bureau baseball game unless such player receives pay and hence may be construed as an employee.

Approximately 50 directors, officers, farm advisers, team managers, and players attended the regular spring baseball meeting at Peoria, Mar. 29. Coach Lundgren left for the south with the Illini nine the day before, and could not attend the meeting. Assistant Coach Jordan acquired a wisdom tooth the day before and sent his regrets.

Nevertheless it was a lively, interesting meeting that lasted from 10 a. m. to 4:00 in the afternoon. Playing rules were tightened up and plans made for a more business-like administration in 1929. Nearly all the central and northern Illinois Farm Bureau baseball teams were represented. In addition, Hancock, Lee, and Ford counties—all entering teams for the first time—were there.

Following are the more important rules adopted, in brief:

1. Saturday, May 11, was suggested for the opening games. Saturday, Aug. 17, is the absolute deadline for all official preliminary games within districts.

2. Each district or division shall have a dictator who shall be the district chairman. It will be his duty to pass on eligibility of players, settle disputes and misunderstandings, interpret and apply rules, appoint umpires when contending teams can't agree. The district dictator's decision are subject to review and confirmation or reversal by the State Arbitration Committee.

3. Each team shall deposit a $25 certified check with the League treasurer as a forfeit for failure to report for a regularly scheduled game when satisfactory postponement arrangements have not been made. The district dictator has authority to declare when a game and the $25 is forfeited to the offended team.

4. All teams must file a list of eligible players with the State League secretary 10 days prior to the opening game. The secretary shall transmit copies of such lists to the district dictator and to county directors.

5. The Spaulding Rule Book shall be official guide.

6. All teams must pay their dues by May 1, although new teams may enter later, providing each team in the affected district agrees to such entry.

The State Arbitration Committee, empowered to render the final decision in all disputes is: President, L. R. Welk, Lincoln; vice-president, Paul Meharry, Tolono, and Geo. L. Clarke, Downs, McLean county.

Stephenson county expects to enter a Farm Bureau team in the State League. Macon, Vermilion, Wabash and several other counties are showing an interest in baseball.

Fifty-seven attended the recent baseball meetings in Champaign county. Of these 15 were new men, nine were on the county team last year, and 33 played on unit or community Farm Bureau teams.

The State League will handle pool orders for baseballs. Send cash with order to the secretary, 608 So. Dearborn St., Chicago. The League can buy all kinds of baseball and athletic equipment at special wholesale prices.

Liability

"Is the Farm Bureau liable for damage in case an onlooker at the game is injured by a broken bat or ball being used in a game where admission is charged or where collection or donation is taken at the game?

"Also in case bleachers are used and some one is injured from a fall from bleacher seats, is the Farm Bureau liable if admission has been charged or a collection has been taken?

"Wayne A. Gilbert,
"Tazewell County, Illinois."

Reply:

I AM of the opinion that there is a possibility of liability under the facts stated in the first paragraph above.

"I am also of the opinion that the County Farm Bureau would be liable when it charges admission to a baseball game, if through any negligence on its part a person who has paid admission receives injury through the crushing of the bleachers.

"Donald Kirkpatrick,
"Legal Counsel, Illinois Agricultural Association."

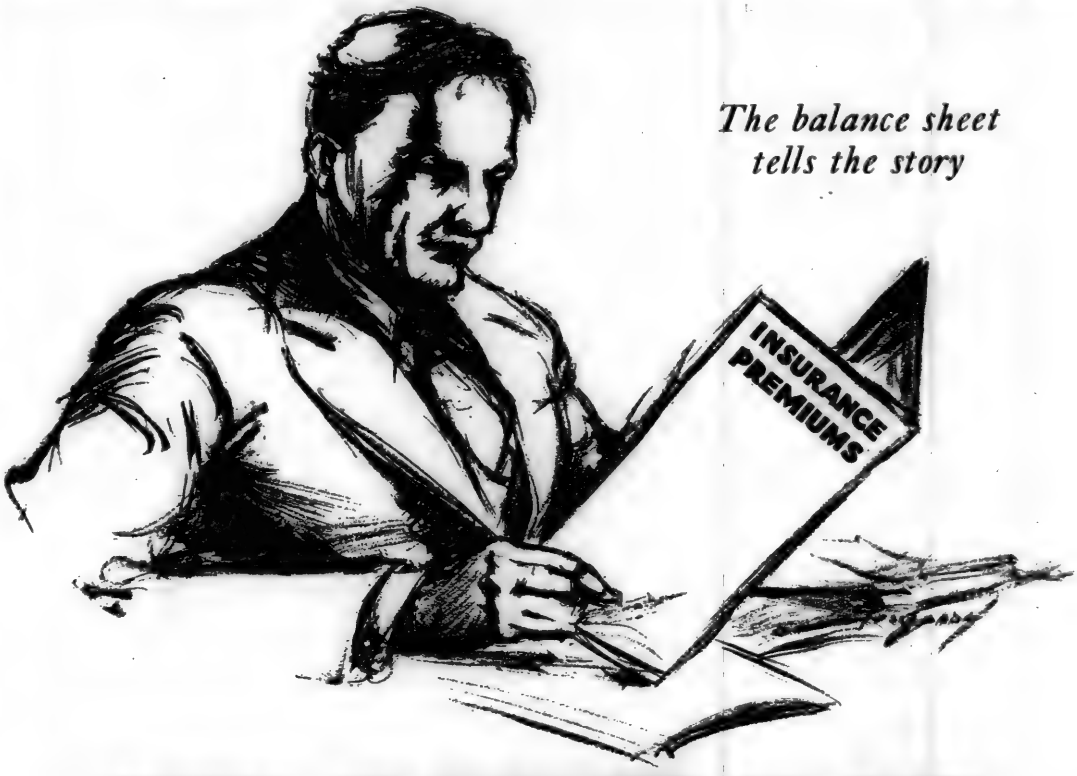
Why not organize a Farm Bureau baseball team in your county and have a little recreation along with work?

New T. B. Bill Before General Assembly

Will Bring About Compulsory Testing

COMPULSORY testing of all cattle in Illinois for tuberculosis to finish the job of cleaning up the state will be brought about with the passage of H. B. No. 157 introduced by Representative Homer J. Tice of Menard county.

An interesting hearing on the bill was held before the Agricultural Committee in the House on April 9. The bill is an administration measure and is designed primarily to institute testing in those counties which have not employed county veterinarians because of lack of funds. At the present time the state is more than 75 per cent cleaned up, but unless a measure of this kind is passed the job may never be finished. At least a dozen or more counties have failed to make local appropriations for tuberculosis eradication work.



H. B. No. 517 will place the direction of the work in the State Department of Agriculture and thus centralize authority. In this way it is thought the work will be expedited. The state may have a tuberculosis-free area within a relatively short time. S. J. Stanard, director of agriculture, is of the opinion an appropriation similar to those voted heretofore will be sufficient since the percentage of reactors has been decidedly reduced within the past two years.

Earl C. Smith, president of the Illinois Agricultural Association, stated that such legislation is necessary to clean up the state, but that if some of the northern Illinois counties wish to retain their county veterinarians a solution for this problem should be worked out.

Representative Homer Tice, Director S. J. Stanard, H. R. Smith, Don Geyer of the Pure Milk Association, and others spoke in behalf of the bill. Mr. Tice contends that the bill is necessary because many counties do not have the funds to carry on this work. Representative McCarty of Kane county asked for an amendment giving the counties the privilege of keeping their county veterinarians if they desired—the state to pay part of their salaries.

The bill was referred to a sub-committee of five which is to report back to the Agricultural Committee at a later date. The subcommittee will iron out minor differences of opinion and recommend certain changes in the original draft.

All interests were friendly to the measure and it is thought that no difficulty will be encountered in voting it out favorably. If it becomes law Illinois within the next few years will be one of the few states classed as a modified accredited area.

The balance sheet tells the story

COUNTRY LIFE GUARANTEES THIS PROFIT

IF you could insure your life for 20 years and at the end of that time the company would pay back more than you put in you would call it good business, would you not? If in addition, you received dividends during the 20-year period the proposition would look still more attractive.

COUNTRY LIFE guarantees to pay back the policyholder who at age 35 takes out three different policies for $1000 each, $40 more than the maximum total annual premiums during this period. Dividends paid while the insurance is in force would be additional. Here is how it would work out:

$1,000 Each	Annual Premium	Cash Value 20th Yr.
ORDINARY LIFE, Age 35	$20.63	$301
20-PAY LIFE, Age 35	29.01	566
20-YEAR ENDOWMENT, Age 35	41.73	1000
Total yearly premiums	$91.37	$1867
Total gross premiums paid in 20 years	$1827.40	$1827.40
Profit guaranteed on three policies at the end of 20 years		$39.60

IT IS difficult to estimate dividends, but if they aggregate only $15 annually on the three policies, net premiums during the 20-year period would be only $1,517. Thus, the cash value would be $340 more than the net paid premium. This is the profit that COUNTRY LIFE pays back to you because it offers old-line insurance AT COST. You share in the profits and secure the benefit of savings.

Baseball Dope

"AT OUR recent baseball meetings," says County Adviser C. E. Burns of Champaign, "it was generally agreed that a farmer will do more work in a week if he takes Saturday afternoon off to play baseball, or watch a game."

Ten men joined the Champaign County Farm Bureau last year because they became interested in Farm Bureau baseball.

George Huff, director of athletics at the University of Illinois, writes that a player or athlete does not lose his amateur standing unless he accepts pay for participating in games. If he plays in a game where admission is charged, or if he accepts expense money to and from games, his amateur standing is not impaired.

Donald Kirkpatrick, I. A. A. legal counsel, says that neither the team nor the Farm Bureau can be held liable for injury to a player in a Farm Bureau baseball game unless such player receives pay and hence may be construed as an employee.

Approximately 50 directors, officers, farm advisers, team managers, and players attended the regular spring baseball meeting at Peoria, Mar. 29. FARMERS WIN WABASH VALLEY TELEPHONE CASE

Canadian Co-ops Do Big Business

Local and Terminal Elevators Co-ordinate

CANADIAN farmers have gradually developed a group of co-operatives which co-ordinate local and terminal elevator facilities with centralized selling, according to a comprehensive bulletin by J. F. Booth, published recently by the United States Department of Agriculture.

The independent local unit has disappeared. Several large-scale co-operative associations market more than one-half of the grain crop of western Canada.

This large volume of grain is at present handled by the Canadian Co-operative Wheat Producers Ltd., known commonly as the Central Selling Agency, which handles the grain of the Manitoba, Saskatchewan, and Alberta wheat pools, also that of the United Grain Growers Ltd., which combines the activities formerly carried on by the Grain Growers Grain Company Ltd. and the Alberta Farmers Co-operative Elevator Company Ltd.

Handled 41,000,000 Bushels

The United Grain Growers Ltd. has 35,000 farmer shareholders. It operates more than 400 country elevators and several large terminal elevators. In 1926 it handled 41,000,000 bushels. Through the parent organization and several subsidiaries the company also handles livestock, farm supplies, and insurance. A farm journal with a circulation exceeding 100,000 is published. The company follows the general principles of operation followed by the trade. Itbuys from farmers or handles on consignment. It pays current prices and does not pool returns. Grain is handled for both members and non-members. The company is strong financially with reserves aggregating nearly $4,000,000.

140,000 In Pools

The western Canadian wheat pools were organized in 1923 and 1924 and combined to form their central selling agency in 1924. Their total membership is 140,000 and the volume of grain handled exceeds 200,000,000 bushels annually. The members are all signed on five-year contracts.

The Province of Ontario recently organized a grain pool which now has over 9,000 members. The Ontario pool, likewise, will sell through the central selling agency.

Operate 900 Elevators

The pools operate more than 900 country elevators and terminal elevators with capacity exceeding 20,000,000 bushels. The grain is sold direct to domestic and foreign mills and other users of grain both at home and abroad. They have branch offices in Canada and in Europe, with agency connections in most importing countries. Returns from grain sales are pooled among growers on the basis of grades of grain each member delivers.

Deduct 2 Cents Bushel

The pools are permitted, under their contracts, to deduct two cents per bushel for an elevator reserve and up to one per cent of the gross sales value for commercial reserves. These deductions run into millions of dollars.

The bulletin cites the differences in co-operative methods of selling grain in the United States and Canada and the reasons for the greater success of centralized efforts in the Dominion.

Lee County Farmers In Telephone Case

LEE County farmers who subscribed to the service of the Farmers Telephone Company of Franklin Grove were represented by their Farm Bureau and the Transportation Department of the Illinois Agricultural Association in a hearing before the Illinois Commerce Commission a short time ago.

The Company is seeking to eliminate free toll service. It operates five exchanges at Franklin Grove, Amboy, Sublette, Ashton, and Lee Center. The Company alleges that neighboring companies are bringing pressure to bear on it to charge toll to adjacent communities now securing free toll service. Some companies are reciprocating with the Farmers Telephone Company in giving long distance service without additional charge while others are not.

Subscribers take the position that the inter-relationship of communities is such that to abolish free toll service to nearby towns and communities would seriously diminish the value of the telephone service.

The Green River Farmers Club passed a resolution declaring that such charges as are proposed by the Company are uncalled for and against the practice of the last 25 years. It is contended that the farmers built their own lines to Amboy with the understanding that no toll charges would be added for connections with other points within the county. This case is still pending.

No, No, Maudie—It is not necessary to use soft water for soft boiled eggs or hard water for the hard boiled ones. A liberty bond is not a divorce decree.

* * *

Hard-Luck Harry Says—"If life was a bed of roses, I'd be picking thorns out of myself all day."

Commerce Commission Order Supports I. A. A. Rates to Edgar County Subscribers Remain at $24

EDGAR County farmers represented by the Transportation Department of the Illinois Agricultural Association and their Farm Bureau, won a signal victory when the Illinois Commerce Commission upheld the contention of over 500 rural subscribers that $24 a year is a high enough charge for 10-party line rural telephone service. The Commission's finding was recently transmitted to the Wabash Valley Telephone Co. at Paris.

L. J. Quasey

The Company had originally petitioned for an increase from the present rate of $24 per year to $33 a year for 10-party rural service with proportionate or even larger increases to subscribers in the city of Paris, seat of Edgar county.

The valuations, depreciation requirements, operating revenue and expense statements submitted to the Commerce Commission by the Company were checked by the Commission's engineering staff. It was found that the Company had set up an excessive amount for depreciation reserve; that the plant and equipment was in slightly less than 90 per cent condition while the present reserve on the books of the company is between 30 per cent and 40 per cent, showing a substantial margin for upkeep, repairs, etc.

I. A. A. Files Brief

In the brief and argument filed with the Commission by L. J. Quasey, director of transportation for the I. A. A., it was pointed out that "the item of $47,565 for going value is improper because it is a mere duplication of the items previously mentioned" . . . :

The brief stated further that "the company has set aside during the past year some $29,980 annual depreciation for the entire company and allocated to the Paris exchange, on the above basis, amounts to about $19,000. The fact that the Company has accrued a very substantial depreciation reserve by allowing about $19,000 annually for the Paris exchange, shows that it is not now entitled to any more. We contend that the depreciation could properly be less and still be sufficient to enable the company to perpetuate its property. . . .

Deny the Advance

"Should your honorable Commission," continued the brief, "consider that leaving the rural rate as it is would disturb the relationship of the rural residence rate to other classes of service it could reduce the compromise basis on all classes by $3, which would

(Continued on page 11, column 3)

St. Louis Dairymen Adopt Plan

(Continued from page 1)

"The interest from this reserve fund," said Geyer, "nearly pays the expenses of the organization." Geyer stated that farmers must revise their estimates of the requirements in money and men needed to operate successfully a business as large as that represented by the combined milk sales in the St. Louis milk shed. "Realize that you're going into big business," he said, "when you organize to sell nearly a million pounds of milk daily."

The status of producers who deliver to condenseries was considered. Disposition of the problem was left to the general committee which includes a representative from each of the 19 milk producing counties. It was generally agreed that the new association could not be successfully established on a condensery price and market basis.

A. D. Lynch, dairy marketing director, and Secretary Geo. E. Metzger of the I. A. A. explained the plan and members' agreement. Both Metzger and Geyer outlined the essentials of a successful organization campaign. Geyer suggested that a provision be made that members pay $5 into the organization annually until the check-off system is established. An amendment to this effect was voted down.

A survey of the St. Louis market made by the special committee revealed that the average production per dairyman is only 112 pounds of milk daily or less than half of the average production at Chicago. A 5c checkoff will cause such average dairyman to contribute $20.10 annually to the support of his organization and principal means of livelihood.

The high-lights in the proposed by-laws are as follows:

1. *Purpose.* To be a non-profit cooperative association without capital stock instituted for the mutual help and benefit of its members; to promote the general welfare of its members and the business of dairying in the St. Louis fluid milk district; to cooperate with other associations or individuals engaged in similar purposes; to have and exercise all the powers necessary and proper to carry into effect the purpose for which such corporation is formed, and to do any and all things incident to the above purpose.
2. A life membership fee of $5 payable in advance.
3. Membership a personal and not a property right and not transferable.
4. Equal voting power. —
5. Territory divided into fifteen districts, the division based on membership and one director democratically elected by the members of each district.
6. Directors to serve for one year.
7. The usual officers with the usual duties.
8. Responsible officers and employees to be bonded.
9. Association must make monthly financial reports to the districts.
10. Provides a penalty for non-performance and breach of contract.

Existing Organizations

The commitee found that there has been in the past and is today a number of existing organizations of one kind or another in the field. The most recent organization was established about two years ago. This organization was set up as a bargaining institution, signed a limited membership among the producers of the district, and is now operating at a few local milk receiving stations.

Due to cross currents of thought and probably some misinformation, which seems to exist in the district, the committee after careful consideration decided that for the best interests of all former organizations should be dropped from consideration insofar as their corporate setup is concerned and a new organization formed, recognizing the fact, however, that the St. Louis Milk Producers Cooperative Association has recently pioneered to a limited extent as a bargaining association in the field and that on some of the smaller markets tributary to St. Louis has rendered some valuable service to its membership and to the dairymen in general, and that these men who became members of the said organization have paid their membership fee and submitted to a checkoff for the financing of the operations of the association, it was felt by the committee that the new organization in recognition of this service and experience would be justified in admitting the present members of the St. Louis Milk Producers Cooperative Association into the new organization without payment of additional membership fee, providing the members will sign the new marketing agreement.

Organization Setup

There are several farmers' service organizations in existence in the St. Louis territory. After careful study and survey of the service organization situation the committee is of the opinion that the Farm Bureau could render most valuable assistance in launching the organization. In some sections of the district the cooperation of other existing service organizations should be invited. The committee proposes that if this meeting today accepts the report of the commitee and the proposed plan submited by the committee is to be carried into the field, that an attempt first be made to get the approval and the moral support of the executive committees of the Farm Bureaus in the district. Also that the Farm Bureaus of the district be asked to select from ten to twenty-five dairymen in their respective counties who will agree to meet at some central point in the county or in the district for schooling on this plan of organization, such as will enable them to carry the membership agreements into the field and secure the signatures of a goodly percentage of the dairymen delivering milk in their respective counties. In addition the County Farm Bureaus be asked to provide a meeting place and handle the local publicity.

It is the thought of the commtitee that a third to half of the membership of the proposed organization can be signed by voluntary effort. Following the voluntary effort other means of securing members should be provided, probably working down to individual solicitation by a paid solicitor.

Condenseries

The condensery situation existing in the district presents a real problem. After careful study and consideration your committee recommends that for the present time, at least, members be accepted into the organization who reside in such territory furnishing milk to plants that deliver to the St. Louis fluid market during all or a substantial part of the year.

Adjustment Satisfactory

Illinois Agr. Mutual Ins. Co.,
608 South Dearborn Street,
Chicago, Illinois.

Your letter and check in full settlement of my claim for collision in our recent accident on the Dixie Highway came yesterday.

I want you to know that I am very much pleased with your settlement and that it is such service as this that makes it worth while for us to have a company which we know deserves our full confidence. Your adjustment is satisfactory in all respects.

EDWARD KARR,
Ford County, Ill.

Mr. Karr is a member of the Ford County Farm Bureau. The accident occurred when Karr and his son, Robert, were driving on the pavement at night and smashed into a truck and trailer parked on the pavement. A bus was coming from the opposite direction and to avoid a head-on-collision Karr sideswiped the trailer attached to the truck causing considerable damage.

Wabash Valley Case

(Continued from page 10)

result in a reduction in the revenue under the proposed rates (making proper allowance for the Federal taxes) of about $6581. Even this would still enable the company to earn 7.01 per cent for 1927, 6.84 per cent for 1928, or an average of 6.92 per cent for the two years.

"WHEREFORE, we pray your honorable Commission to deny the advance on rural residence rates as proposed in the alleged compromise schedule of the petitioner.

(Signed) "ILLINOIS AGRICULTURAL ASSOCIATION,
"L. J. Quasey, Transp't. Department."

The Commission's Order

The Commission's order recognizes that the Company should have an increase in revenue to pay a fair return on the investment and allowed certain increases in rates "to provide a net annual increase in revenue of approximately $9,390 and will produce a net income of $25,237, which is approximately 6.15 per cent on the fair value of the property of the petitioner."

O'Hair and McClain of Paris, and L. C. Durham of Kansas City, lawyers, represented the Telephone Company. Wm. Dennis, of the Edgar County Farm Bureau, was appointed locally to work with the I. A. A.

FARMERS WIN WABASH VALLEY TELEPHONE CASE

Canadian Co-ops Do Big Business

Local and Terminal Elevators Co-ordinate

CANADIAN farmers have gradually developed a group of co-operatives which co-ordinate local and terminal elevator facilities with centralized selling, according to a comprehensive bulletin by J. F. Booth, published recently by the United States Department of Agriculture.

The independent local unit has disappeared. Several large-scale co-operative associations market more than one-half of the grain crop of western Canada.

This large volume of grain is at present handled by the Canadian Co-operative Wheat Producers Ltd., known commonly as the Central Selling Agency, which handles the grain of the Manitoba, Saskatchewan, and Alberta wheat pools, also that of the United Grain Growers Ltd., which combines the activities formerly carried on by the Grain Growers Grain Company Ltd. and the Alberta Farmers Co-operative Elevator Company Ltd.

Handled 41,000,000 Bushels

The United Grain Growers Ltd. has 35,000 farmer shareholders. It operates more than 400 country elevators and several large terminal elevators. In 1926 it handled 41,000,000 bushels. Through the parent organization and several subsidiaries the company also handles livestock, farm supplies, and insurance. A farm journal with a circulation exceeding 100,000 is published. The company follows the general principles of operation followed by the trade. Itbuys from farmers or handles on consignment. It pays current prices and does not pool returns. Grain is handled for both members and non-members. The company is strong financially with reserves aggregating nearly $4,000,000.

140,000 In Pools

The western Canadian wheat pools were organized in 1923 and 1924 and combined to form their central selling agency in 1924. Their total membership is 140,000 and the volume of grain handled exceeds 200,000,000 bushels annually. The members are all signed on five-year contracts.

The Province of Ontario recently organized a grain pool which now has over 9,000 members. The Ontario pool, likewise, will sell through the central selling agency.

Operate 900 Elevators

The pools operate more than 900 country elevators and terminal elevators with capacity exceeding 20,000,000 bushels. The grain is sold direct to domestic and foreign mills and other users of grain both at home and abroad. They have branch offices in Canada and in Europe, with agency connections in most importing countries. Returns from grain sales are pooled among growers on the basis of grades of grain each member delivers.

Deduct 2 Cents Bushel

The pools are permitted, under their contracts, to deduct two cents per bushel for an elevator reserve and up to one per cent of the gross sales value for commercial reserves. These deductions run into millions of dollars.

The bulletin cites the differences in co-operative methods of selling grain in the United States and Canada and the reasons for the greater success of centralized efforts in the Dominion.

Lee County Farmers In Telephone Case

LEE County farmers who subscribed to the service of the Farmers Telephone Company of Franklin Grove were represented by their Farm Bureau and the Transportation Department of the Illinois Agricultural Association in a hearing before the Illinois Commerce Commission a short time ago.

The Company is seeking to eliminate free toll service. It operates five exchanges at Franklin Grove, Amboy, Sublette, Ashton, and Lee Center. The Company alleges that neighboring companies are bringing pressure to bear on it to charge toll to adjacent communities now securing free toll service. Some companies are reciprocating with the Farmers Telephone Company in giving long distance service without additional charge while others are not.

Subscribers take the position that the inter-relationship of communities is such that to abolish free toll service to nearby towns and communities would seriously diminish the value of the telephone service.

The Green River Farmers Club passed a resolution declaring that such charges as are proposed by the Company are uncalled for and against the practice of the last 25 years. It is contended that the farmers built their own lines to Amboy with the understanding that no toll charges would be added for connections with other points within the county. This case is still pending.

No, No, Maudie—It is not necessary to use soft water for soft boiled eggs or hard water for the hard boiled ones. A liberty bond is not a divorce decree.

Hard-Luck Harry Says—"If life was a bed of roses, I'd be picking thorns out of myself all day."

Commerce Commission Order Supports I. A. A. Rates to Edgar County Subscribers Remain at $24

EDGAR County farmers represented by the Transportation Department of the Illinois Agricultural Association and their Farm Bureau, won a signal victory when the Illinois Commerce Commission upheld the contention of over 500 rural subscribers that $24 a year is a high enough charge for 10-party line rural telephone service. The Commission's finding was recently transmitted to the Wabash Valley Telephone Co. at Paris.

L. J. Quasey

The Company had originally petitioned for an increase from the present rate of $24 per year to $33 a year for 10-party rural service with proportionate or even larger increases to subscribers in the city of Paris, seat of Edgar county.

The valuations, depreciation requirements, operating revenue and expense statements submitted to the Commerce Commission by the Company were checked by the Commission's engineering staff. It was found that the Company had set up an excessive amount for depreciation reserve; that the plant and equipment was in slightly less than 90 per cent condition while the present reserve on the books of the company is between 30 per cent and 40 per cent, showing a substantial margin for upkeep, repairs, etc.

I. A. A. Files Brief

In the brief and argument filed with the Commission by L. J. Quasey, director of transportation for the I. A. A., it was pointed out that "the item of $47,565 for going value is improper because it is a mere duplication of the items previously mentioned" . . . :

The brief stated further that "the company has set aside during the past year some $29,980 annual depreciation for the entire company and allocated to the Paris exchange, on the above basis, amounts to about $19,000. The fact that the Company has accrued a very substantial depreciation reserve by allowing about $19,000 annually for the Paris exchange, shows that it is not now entitled to any more. We contend that the depreciation could properly be less and still be sufficient to enable the company to perpetuate its property. . . . .

Deny the Advance

"Should your honorable Commission," continued the brief, "consider that leaving the rural rate as it is would disturb the relationship of the rural residence rate to other classes of service it could reduce the compromise basis on all classes by $3, which would

(Continued on page 11, column 3)

St. Louis Dairymen Adopt Plan

(Continued from page 1)

"The interest from this reserve fund," said Geyer, "nearly pays the expenses of the organization." Geyer stated that farmers must revise their estimates of the requirements in money and men needed to operate successfully a business as large as that represented by the combined milk sales in the St. Louis milk shed. "Realize that you're going into big business," he said, "when you organize to sell nearly a million pounds of milk daily."

The status of producers who deliver to condenseries was considered. Disposition of the problem was left to the general committee which includes a representative from each of the 19 milk producing counties. It was generally agreed that the new association could not be successfully established on a condensery price and market basis.

A. D. Lynch, dairy marketing director, and Secretary Geo. E. Metzger of the I. A. A. explained the plan and members' agreement. Both Metzger and Geyer outlined the essentials of a successful organization campaign. Geyer suggested that a provision be made that members pay $5 into the organization annually until the check-off system is established. An amendment to this effect was voted down.

A survey of the St. Louis market made by the special committee revealed that the average production per dairyman is only 112 pounds of milk daily or less than half of the average production at Chicago. A 5c checkoff will cause such average dairyman to contribute $20.10 annually to the support of his organization and principal means of livelihood.

The high-lights in the proposed by-laws are as follows:

1. *Purpose.* To be a non-profit cooperative association without capital stock instituted for the mutual help and benefit of its members; to promote the general welfare of its members and the business of dairying in the St. Louis fluid milk district; to cooperate with other associations or individuals engaged in similar purposes; to have and exercise all the powers necessary and proper to carry into effect the purpose for which such corporation is formed, and to do any and all things incident to the above purpose.
2. A life membership fee of $5 payable in advance.
3. Membership a personal and not a property right and not transferable.
4. Equal voting power.
5. Territory divided into fifteen districts, the division based on membership and one director democratically elected by the members of each district.
6. Directors to serve for one year.
7. The usual officers with the usual duties.
8. Responsible officers and employees to be bonded.
9. Association must make monthly financial reports to the districts.
10. Provides a penalty for non-performance and breach of contract.

Existing Organizations

The commitee found that there has been in the past and is today a number of existing organizations of one kind or another in the field. The most recent organization was established about two years ago. This organization was set up as a bargaining institution, signed a limited membership among the producers of the district, and is now operating at a few local milk receiving stations.

Due to cross currents of thought and probably some misinformation, which seems to exist in the district, the committee after careful consideration decided that for the best interests of all former organizations should be dropped from consideration insofar as their corporate setup is concerned and a new organization formed, recognizing the fact, however, that the St. Louis Milk Producers Cooperative Association has recently pioneered to a limited extent as a bargaining association in the field and that on some of the smaller markets tributary to St. Louis has rendered some valuable service to its membership and to the dairymen in general, and that these men who became members of the said organization have paid their membership fee and submitted to a checkoff for the financing of the operations of the association, it was felt by the committee that the new organization in recognition of this service and experience would be justified in admitting the present members of the St. Louis Milk Producers Cooperative Association into the new organization without payment of additional membership fee, providing the members will sign the new marketing agreement.

Organization Setup

There are several farmers' service organizations in existence in the St. Louis territory. After careful study and survey of the service organization situation the committee is of the opinion that the Farm Bureau could render most valuable assistance in launching the organization. In some sections of the district the cooperation of other existing service organizations should be invited. The committee proposes that if this meeting today accepts the report of the commitee and the proposed plan submited by the committee is to be carried into the field, that an attempt first be made to get the approval and the moral support of the executive committees of the Farm Bureaus in the district. Also that the Farm Bureaus of the district be asked to select from ten to twenty-five dairymen in their respective counties who will agree to meet at some central point in the county or in the district for schooling on this plan of organization, such as will enable them to carry the membership agreements into the field and secure the signatures of a goodly percentage of the dairymen delivering milk in their respective counties. In addition the County Farm Bureaus be asked to provide a meeting place and handle the local publicity.

It is the thought of the commtitee that a third to half of the membership of the proposed organization can be signed by voluntary effort. Following the voluntary effort other means of securing members should be provided, probably working down to individual solicitation by a paid solicitor.

Condenseries

The condensery situation existing in the district presents a real problem. After careful study and consideration your committee recommends that for the present time, at least, members be accepted into the organization who reside in such territory furnishing milk to plants that deliver to the St. Louis fluid market during all or a substantial part of the year.

Adjustment Satisfactory

Illinois Agr. Mutual Ins. Co.,
608 South Dearborn Street,
Chicago, Illinois.

Your letter and check in full settlement of my claim for collision in our recent accident on the Dixie Highway came yesterday.

I want you to know that I am very much pleased with your settlement and that it is such service as this that makes it worth while for us to have a company which we know deserves our full confidence. Your adjustment is satisfactory in all respects.

EDWARD KARR.
Ford County, Ill.

Mr. Karr is a member of the Ford County Farm Bureau. The accident occurred when Karr and his son, Robert, were driving on the pavement at night and smashed into a truck and trailer parked on the pavement. A bus was coming from the opposite direction and to avoid a head-on-collision Karr side swiped the trailer attached to the truck causing considerable damage.

Wabash Valley Case

(Continued from page 10)

result in a reduction in the revenue under the proposed rates (making proper allowance for the Federal taxes) of about $6581. Even this would still enable the company to earn 7.01 per cent for 1927, 6.84 per cent for 1928, or an average of 6.92 per cent for the two years.

"WHEREFORE, we pray your honorable Commission to deny the advance on rural residence rates as proposed in the alleged compromise schedule of the petitioner.

(Signed) "ILLINOIS AGRICULTURAL ASSOCIATION.
"L. J. Quasey, Transp't. Department."

The Commission's Order

The Commission's order recognizes that the Company should have an increase in revenue to pay a fair return on the investment and allowed certain increases in rates "to provide a net annual increase in revenue of approximately $9,390 and will produce a net income of $25,237, which is approximately 6.15 per cent on the fair value of the property of the petitioner."

O'Hair and McClain of Paris, and L. C. Durham of Kansas City, lawyers, represented the Telephone Company. Wm. Dennis, of the Edgar County Farm Bureau, was appointed locally to work with the I. A. A.

The Illinois Agricultural Association RECORD

Number 5 MAY, 1929 V

MISS M... UNIV. OF ILL. LIBR'N
...SITY OF ILL.

An Open Letter To FARM AND HOME OWNERS OF ILLINOIS:

SENATE Bill No. 39, better-known as the State Income Tax Bill, is now pending before the Illinois State Legislature. The Illinois Agricultural Association believes it to be the most constructive tax bill under consideration by that body. It was introduced at the request of the I. A. A. and has the support of the Illinois Bankers Association, the Illinois State Federation of Labor, Prairie Farmer and most of the downstate newspapers. It is deserving of the active support of all thinking citizens who are interested in securing a more equitable distribution of the tax burden.

THIS bill is being actively opposed by the Chicago press, by certain wealthy industrial interests of the State, and by those who receive large incomes but pay little or no taxes. These people know that the real property owners are paying ninety per cent of the tax burden of Illinois. They also realize that so long as they can keep this heavy load, which in 1927 amounted to $370,000,000, saddled on you, they will ride free. They want to enjoy the privileges of citizenship and protection of government and let you pay for it. They have a selfish interest in putting off the day when taxes will be based on ability to pay, which means on net income.

MUCH unfair and insidious propaganda is beginning to flood your representatives at Springfield and states this is just another tax. They apparently realize the impossibility of constructively criticizing the merits of this bill and are resorting, in many cases, to misrepresentation. They do not mention the fact that this is a replacement tax; in other words, that the estimated eight million dollars which it will raise will replace a like amount now derived from the property tax.

THE bill is designed to help lower the taxes on your farm, on your homes, and on your personal property. The bill carries a provision to the effect that anyone who already pays a property tax can deduct the full amount of that tax from his computed state income tax. This provision, of course, will not help that large per cent of the personal property owners who now successfully dodge taxation. (The operation of this bill is explained fully on Page Three.)

SENATE Bill No. 39 has already passed the Senate. Coming over to the House it was referred to the Revenue Committee unfairly made up of nineteen Chicago legislators and eleven representatives from down state. When this bill came before the Committee the Chicago representatives refused to give a hearing to those who were present and insisted upon an immediate vote. No discussion was allowed, because the opponents of this bill knew they could not sustain their position. The vote showed Chicago representatives standing solidly against the bill and representatives from downstate for the bill with the exception of Mr. Crowley of Peoria who voted with the opposition. The opponents, being in strong majority, sent the bill out to the House with recommendations that it do not pass. They apparently felt they had killed the bill. Your representatives, however, kept right on fighting, and the second morning thereafter when the Committee report was considered, a motion to non-concur in the report of the Committee and place the bill on the calendar prevailed by a vote of seventy-two to fifty-nine.

IT WILL be under further consideration in the near future, and if you are interested in securing a more fair distribution of the tax burden, if you want some relief from present unjust taxes you are paying, you should immediately wire, write or see your representatives in the State Legislature and tell them of your interest in this legislation. You can address them in care of the House of Representatives, Springfield, Illinois.

Sincerely yours,

ILLINOIS AGRICULTURAL ASSOCIATION

Grain Marketing Authority Coming

J. F. Booth of U. S. D. A. Will Address Series of Important Meetings

GRAIN marketing and co-operative organization will be discussed at a series of meetings to be held throughout Illinois beginning Friday, May 31, in the soft wheat and red top belt of southeastern Illinois at Carmi.

Dr. J. F. Booth of the United States Bureau of Agricultural Economics, who recently completed an intensive study of the Canadian wheat pool, will be the speaker. Dr. Booth's studies were written up in Technical Bulletin No. 63 entitled "Co-operative Marketing of Grain in Western Canada." In addition to his Canadian studies he has investigated and studied co-operative grain marketing organizations throughout the United States.

Meetings will be held as follows:

Place	Date	Time
Carmi	May 31	10:00 A. M.
Belleville	June 1	10.00 A. M.
Springfield	June 1	6:00 P. M.
Peoria	June 3	2:00 P. M.
Bloomington	June 4	1:30 P. M.
Monticello	June 5	1:30 P. M.
Champaign	June 5	6:00 P. M.
Princeton	June 6	1:30 P. M.
Ottawa	June 7	2:00 P. M.
Watseka	June 8	1:00 P. M.

Harrison Fahrnkopf, grain marketing director who will be in charge of the meetings, reports that farm advisers and grain marketing committees throughout the grain belt are co-operating in this movement and have promised to bring out strong delegations.

Strictly Educational

Commenting upon the coming meetings, Chris L. Christensen, chief of the division of co-operative marketing at Washington who spoke at the annual I. A. A. meeting last winter in Danville, said, "These meetings are to be strictly educational and are not to be promotional in the sense that any specific plans are to be recommended. The objective will be to disseminate facts concerning economic conditions surrounding the handling of grain and also to afford a discussion of how farmers can improve grain marketing conditions through co-operative organization.

"It is our understanding that in these meetings Mr. Booth will discuss grain marketing and co-operative organization. Such a discussion will include a review of the farmers' elevator movement, its accomplishments and limitations, together with an analysis of the changing market conditions and problems."

Co-ordination Needed

The co-operative efforts of grain producers in the terminal markets, as expressed in both the Rural Grain Company now operating on the Chicago market, and in the wheat pools, will be discussed. Mr. Booth will also draw upon his knowledge of the co-operative experience and developments in western Canada. Such an analysis of co-operative efforts will lead up to the problems before farmers in the development of co-operative grain marketing machinery which will co-ordinate the country and terminal facilities, together with co-operative selling of grain in the terminal markets.

J. F. BOOTH

Livestock Marketing

By Ray E. Miller

EIGHTY farmers from Macoupin County gathered at National Stock Yards, Illinois, on April 22 and spent the day with the Producers Commission Association studying livestock marketing and the operation of a co-operative selling agency. The trip was a part of the marketing program of the Macoupin County Farm Bureau and was arranged and conducted by the County Livestock Marketing Committee. One man walked six miles to join the party. He was a shipper of many years experience who had been in the market many times but was anxious to learn more about the fundamentals of co-operative marketing. His attitude reflects the spirit of the group.

* * *

THE Livestock Marketing Department of the Illinois Agricultural Association co-operating with Producer Agencies at Peoria, St. Louis, and Chicago has arranged a series of marketing conferences to be held at those markets on May 23, 24 and 27 respectively. The purpose is to present up-to-date developments in the field of livestock marketing to chairmen of county marketing committees, Farm Bureau presidents and farm advisers. A similar meeting was held at Indianapolis on May 9.

* * *

DURING 1928 Illinois farmers sold 22,837 cars of livestock through Producer agencies at Chicago, St. Louis, Peoria and Indianapolis. Conservatively estimated the value of this stock would amount to approximately $40,000,000.

* * *

McDONOUGH COUNTY farmers are conducting a study of local livestock marketing methods. The purpose of the survey is to find out which methods are most popular with livestock farmers and why. Arrangements for the survey were completed at a meeting on April 19. Seventeen of eighteen townships in the county were represented.

B. & O. Must Continue Local Train Service

FARMERS and townspeople residing along the B. & O. railroad between Flora and Shawneetown in southern Illinois will not be deprived of daily local train service as a result of a recent decision of the Illinois Commerce Commission.

The B. & O. application for authority to discontinue operation of trains Nos. 46 and 49 between Flora and Shawneetown was denied on the grounds of public policy.

Said the commission:

"1. Public convenience and necessity required the continued operation by the Baltimore and Ohio Railroad Company of trains Nos. 46 and 49 between Flora and Shawneetown, Ill.

"2. The financial loss to the said railroad company caused by the operation of the trains here under consideration is not so large as to seriously affect the net earnings of its entire property in Illinois."

The B. & O. complained that the present operation of these two trains is causing a direct out of pocket loss of $281.11 per month, and that the annual loss considering all items of expense which might properly be charged to the operation of those trains is a very much larger amount of money.

The railroad complained that a hard surface road to be constructed paralelling the right-of-way when completed will tend to further decrease the gross earnings of these trains. The Transportation Department of the Illinois Agricultural Association intervened in behalf of farmers and shippers and showed that the communities between Flora and Shawneetown are dependent upon the operation of these trains for mail, express, passenger, and freight service, and that the communities along the right-of-way were built up as a result of the service offered by this road.

Truth About the State Income Tax

A Bill To Relieve Property Owners of a Portion of Their Unjust Tax Burden

SENATE Bill No. 39, introduced by Senator Lantz, and known as the proposed State Income Tax Bill, could properly be termed "a bill to relieve property owners of a portion of their heavy tax burden."

This measure which has passed the Senate and is now on first reading in the House, provides for a tax on personal incomes, after exemptions, of 1 per cent on the first $5,000; 2 per cent on the second $5,000; and 3 per cent on any amounts greater than $10,000.

Exemptions Liberal

Exemption of $1,000 is allowed single persons; $2,000 for married couples, and $500 for each child or other dependent person. It also provides that any property tax, real, personal, or both, shall be subtracted from the computed income tax. Anyone properly understanding this provision can not honestly take the position that this bill is just another tax.

Following is an explanation of how it works: Assume a married man with two children has an income of $10,000. He would be entitled to an exemption of $3,000, leaving $7,000 subject to tax. Take 1 per cent of the first $5,000, or $50; and 2 per cent on the remaining $2,000, or $40. The two figures added give a computed income tax of $90. Should he pay a property tax, on real estate and personal belongings amounting to $90, or more, this would be subtracted from the income tax of $90, resulting in no income tax to pay. The supporters of this measure maintain that any citizen enjoying the benefits and protection of government to the extent of $10,000 income should be willing and happy to contribute $90 for the maintenance of local and state government.

If you are interested in a more equitable distribution of the tax burden, write your representatives in the legislature and tell them to support the proposed state income tax now pending in the House at Springfield.

A Replacement Tax

"A study of the tax situation in Illinois immediately convinces one that very few citizens of the state paying property taxes of any kind will be called upon also to contribute under the provisions of this bill," declared President Earl C. Smith in a recent radio address from WLS. "But rather that great group of our citizens enjoying equal privileges and protection with the property taxpayers, and paying no property tax of any kind, will come under the provisions of this bill. It is estimated that this group will pay approximately eight million dollars per year toward the cost of government in the State of Illinois.

"Under the provisions of this bill, such revenue as is derived will be used in lieu of or replacement of the present State Distributive School Fund up to such an amount as is appropriated for that purpose by the legislature. We thus find it will be used as a replacement of at least part of the tax now levied on property and, therefore, to the full extent of its operation, will more equitably distribute present state taxes.

One Out of 1200

"Throughout the recent campaign, citizens of all parties, classes and creeds, agreed on two things: One was to resist further increase in tax on property, and the other was to seek more equitable means of distributing the present taxes.

"Out of some 1200 bills now under consideration by the legislature, this bill is the only one which even tends to put into practice the consensus of thought of all groups of our people on this question. This bill has been opposed especially by the metropolitan press. Nevertheless it passed the Senate April 24, and is now under consideration in the House.

Benefits Distributed

"While it offers some relief to farm owners, it could in no wise be called an agricultural relief measure. It is estimated that one-half of the relief offered by this legislation will be enjoyed by the property taxpayers of Chicago; approximately one-fourth by the property taxpayers of the cities and towns throughout Illinois, and the balance or approximately one-fourth by the farm and home owners in our rural territory.

Not An Added Tax

"We sincerely regret to see the attitude taken by some of the city press, attempting to stamp this bill as an effort to further tax the people of our cities. No one properly understanding the provisions of this bill could honestly maintain such a position. Our Association would be very glad to send to any interested citizen of Illinois a synopsis of this bill showing its constructive features and the manner of its operations.

"All those who believe that a more equitable distribution of the present cost of government should be provided, can render a great service and assistance to the proponents of this legislation by getting in touch with their representatives in the legislature and conveying to them their request for support of Senate Bill No. 39."

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Entered as second-class matter October 20, 1925, at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Accepted for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the ILLINOIS AGRICULTURAL ASSOCIATION RECORD. Postmaster: In returning an uncalled for or missent copy please indicate key number on address as is required by law.

Important That a Start Be Made

"AFTER the many years of effort put forth to solve the agricultural problem, resulting in divergence of thought and opinion on the question, President Hoover's administration is entitled to and should receive full co-operation and support of all sincere friends of agriculture," Earl C. Smith, president of the Illinois Agricultural Association declared in a radio address on the I. A. A. Forum from Station WLS, Chicago, on May 7. Mr. Smith returned from Washington only the day before, where he conferred with other farm representatives, officials, and members of Congress.

Referring to the administration farm relief measure now before Congress, Mr. Smith said, "With the passage of this legislation which centers responsibility for the development of a solution of the big problems in agriculture with the Federal Farm Board, the farmers of America can feel that at least a start has been made. With the correction of any weaknesses that may develop, or the removal of limitations that may exist, this initial effort should finally result in the formulation of a sound permanent policy for American agriculture.

"The position of our organization, both state and national," continued the speaker, "has been consistent with the position taken in our recent annual meetings. Our national president, Mr. Thompson, reflected that position in his testimony before the senate committee on agriculture, reported as follows:

"'The American Farm Bureau Federation has been unable to find a better plan to secure for agriculture the stability it needs, than that which includes the equalization fee. He (Mr. Thompson) made it definitely clear, however, that under orders from the Farm Bureau membership of more than a million and a quarter families in forty-five states, the Farm Bureau will not insist on this plan, but will co-operate wholeheartedly in developing any plan which will insure economic equality to the American farmer and recognition that the agricultural industry is entitled to the same preferences which have enabled other industrial groups to attain stability.'"

Commenting on the Haugen Bill which seems to carry the administration viewpoint, the speaker expressed the opinion that this bill "is a permissive piece of legislation, but in no way mandatory. Its declaration of principles is about all one could ask. While no specific machinery has been provided for carrying out the purpose and intent of the legislation, broad powers and authority are vested in the proposed Federal Farm Board, which gives the Board full opportunity to provide and put in operation such machinery as is necessary to carry out the provisions of the legislation.

Fanning the Old Fence Buster Is No Joke

"Boiled down—and in a word, one would say that the Haugen Bill sets forth very meritorious purposes, gives broad powers and authority to a Federal Farm Board, and provides same with ample funds to assist co-operative institutions in stabilizing the markets of this country."

Referring to the debenture plan, an optional provision in the McNary Bill in the senate, Smith said: "Neither the Illinois Agricultural Association nor our national organization, the American Farm Bureau Federation, has taken any position either for or against the debenture scheme. Regardless of any merit this proposal may carry, anyone informed on the situation at Washington at the present time knows that it has no opportunity of being included in a farm bill that will pass the present session of Congress. Even its foremost sponsors and supporters in previous sessions are at the present time giving no support to this provision."

Tune in on the I. A. A. Forum from Station WLS every Thursday night at 6:30 p. m., Central Standard Time.

The daily farm program of the I. A. A. from Station WJJD, Mooseheart (265 meters) is broadcast between 12:00 and 12:20 p. m., Monday to Friday inclusive. Hear the daily Chicago livestock market from the Producers, and each Friday the weekly market review. Outlook reports, reviews, and talks by I. A. A. staff members, officials, and leaders in farm thought are broadcast daily.

"LIVE News on Legislation of Interest to Farmers" will be discussed on the I. A. A. Forum program from Station WLS on Thursday night, May 23. The Forum program opens at 6:30 p. m. central standard time and continues until 7:00. Address all communications to Radio Director, Illinois Agricultural Association, 608 So. Dearborn St., Chicago. Comments, suggestions, and announcements will be gratefully received.

C. A. Donnel, weather forecaster at Chicago, was scheduled to speak on the subject "How Weather Forecasts Are Made" on the I. A. A. Forum program Thursday, May 16, at 6:30 p. m.

"For Sale or Trade" announcements will be broadcast daily on the I. A. A. noon hour program between 12 and 12:20 p. m. from station WJJD. Each announcement will be read once. State price and quality and other necessary details when submitting "for sale or trade" items for announcement.

"Old Molly" Must Stay

A STRONG delegation of farmers, townspeople, and their representatives from territory along the Illinois Central R. R. turned out at Springfield on May 9 where a hearing was held before the Illinois Commerce Commission on the petition of the railway to withdraw local trains No. 23, known as "Old Molly", and No. 34 which operate daily between Champaign and Centralia.

W. L. Cope

W. L. Cope, who lives near Tonti, and L. J. Quasey of the I. A. A., Chicago, represented farmers who are objecting to discontinuance of these trains.

The problem was taken under advisement by the Commission after the testimony was all in. The Commission's decision will be announced at a later date.

C. F. Buck, New State Director Agriculture

ANNOUNCEMENT of the appointment of Senator Clarence F. Buck, campaign manager for ex-governor Frank O. Lowden in the last presidential campaign, as the new state director of agriculture was received favorably at headquarters of the Illinois Agricultural Association.

Clarence F. Buck

While Mr. Buck is better known in political circles than to Illinois farmers, hope and confidence was expressed that the same spirit of helpful co-operation developed during Mr. Stanard's incumbency, would continue during the administration of Senator Buck.

Senator Buck's broad interests in farming, his association with Frank O. Lowden—great friend of American agriculture—and his knowledge and experience in state and legislative affairs fit him well for the office. Mr. Buck's new position is an important one, for in addition to having a large personnel under his direction, the director must administer many laws of far-reaching effect on both producers and consumers of the state.

Sen. Buck is an extensive landowner and actively manages his farms in Warren and Henderson counties where cattle feeding is the principal source of income. He also has a ranch in Montana. Sen. Buck recently came out of the Wesley Memorial Hospital, Chicago, after 14 weeks of illness.

Born at Monmouth, Illinois, in 1870, Mr. Buck received his bachelor's degree at Monmouth College in 1890. He married Lena Staat of Warren county in 1898 where he published the Monmouth Daily Atlas from 1892 to 1910. Mr. Buck occupied minor political offices in his home town between 1896 and 1905, and was elected a member of the Illinois State Senate in 1916 when Mr. Lowden was elected governor. He served in the Senate for eight years. Subsequently he was director of finance for the United States Shipping Board and collector of customs at Chicago.

Senator Buck has been prominent in Illinois Republican politics for many years. He was president of the Warren County Crop Improvement Association, vice-president of the Warren County Farmers' Institute, 1915 to 1916, served as trustee of Monmouth College, and president of the Monmouth hospital. Buck successfully managed Senator Medill McCormick's campaign for the United States Senate in 1920. He is a Presbyterian, Odd Fellow, K. P., Elk, Modern Woodman, and belongs to the Sangamo Club at Springfield and the Commercial and Rotary Clubs at Monmouth.

Farm Bureau Liable For Picnic Injuries

Must Use Reasonable Care in Protecting Picnickers

ARE County Farm Bureaus liable for injuries to visitors at Farm Bureau picnics? This question was propounded by the LaSalle County Farm Bureau when bankers who control the county fair grounds requested the Farm Bureau to indemnify them against possible damages arising out of an injury to anyone attending a Farm Bureau picnic.

"There is a possibility of liability against owners of the fair grounds in allowing a crowd to use same and also possible liability on a County Farm Bureau," is the opinion of Donald Kirkpatrick, legal counsel for the I. A. A. "Anyone who holds out to the public a place of assemblage," declares Kirkpatrick, "must use reasonable care to see that the property is in such shape that no injury will occur. This, of course, does not mean that if someone is injured there is liability, but if the injury might have been anticipated by the exercise of reasonable care such as proper inspection and control or policing of the grounds while the crowd is assembled, then the liability would arise."

Applies To All

This whole question applies with equal force to any County Farm Bureau or organization in Illinois sponsoring a picnic for its members. While no lawsuits have arisen out of injuries to visitors at County Farm Bureau picnics to date, it is apparent that the Farm Bureau should appoint suitable committees to inspect the grounds, police them the day of the picnic, and use all reasonable care to guard against possible injuries to picnickers. If such care is used it is doubtful if the Farm Bureau can be held liable for accidents.

Liability insurance to indemnify a group or organization against such losses costs approximately $150. This contemplates a crowd of about 3,000 and limits payment to $5,000 for injury to one person or $10,000 to two or more.

Publicity is one of the most effective methods used by agricultural extension agencies in "selling" new ideas on farming and homemaking, according to M. C. Wilson of the U. S. D. A.

Methods classified as publicity he found were the cause of adopting 30 per cent of the 27,032 improved practices introduced on 8,738 farms in 12 states.

An eastern buyer is reported to be scouting for horses in Marshall and Putnam counties where he offered as high as $750 for a team.

WILL "COUNTRY LIFE" COME IN WHEN YOU PASS OUT O

WILL your family have the benefit of your foresight in providing daily bread —freedom from want and poverty— freedom from the burden of your debts—a chance for education for your children, etc?

Will you be foresighted enough to allow Life Insurance to carry the burden when you are gone, or must the double burden fall on the mother whose time you really want spent with the character-building duties of home training for your children?

Must your wife hunt a job when you pass out of the picture just because you failed to provide funds through Life Insurance?

Here are the actual reasons of a policy holder who answers the question "Why I Bought Life Insurance."

"I wanted to protect my wife. She was independent when I found her. I made her dependent upon me. I became the trustee of her destiny. She became more helpless when the babies came, and would have been dependent on relatives or charity in event of my death.

"My span of life was, and is, uncertain. Therefore, my future earnings were just as uncertain. Our monthly bills were met from those earnings and as my wife could not earn in event of my death I insured a part of those earnings because I could not think of her, my wife, and our babies being dependent upon anyone.

"My self-respect could not accept the idea of deserting her and the kiddies and leaving them in want. Manhood counts above all else. My duty to my family was plain and but one possible road was open. It was life insurance. Life insurance made it possible for me to build an estate **at once** that it would ordinarily take years to build in the hard way."

ME IN TO TAKE YOUR PLACE UT OF THE PICTURE?

Security

THE same laws govern the operations of Country Life Insurance Company that govern any other old line company chartered in Illinois. We deposited $100,000 with the State of Illinois and keep on hand the required reserve for each policy. In addition to the carefully invested funds on hand to protect policy holders, there is the reputation of the Illinois Agricultural Association which fostered Country Life Insurance Company, and which is responsible for its operations.

Cost

We have set up the machinery for producing the lowest cost life insurance available on the old line life insurance plan. It is the one company that gives voice as well as benefits to its policy holders.

The Company belongs to the members by right of its set-up, and the profits go to the members of this great Life Insurance Company.

ADDRESS

COLD, wet weather and delayed farm work are interfering with the opening of the Illinois Farm Bureau Baseball League. Games scheduled for May 11 in most districts will probably not be played until the latter part of the month when it is hoped the corn will be in the ground and farmers generally will have recovered some of the lost time.

Twenty-two to 24 County Farm Bureau teams are expected to compete for honors in the State League this season. The teams which have definitely signed up to play are grouped into six districts as follows: Lee, Henry, Knox, Stark; Marshall-Putnam, Tazewell, Peoria, Woodford; Henderson, Hancock, Warren McDonough; McLean, Logan, Champaign, Ford; Cass, Morgan, Sangamon; Richland, Wayne, Wabash.

May Enter

Stephenson county on the north is contemplating entering a team and if so it will schedule games with such counties as Lee, Henry, and possibly Whiteside. The latter has not officially entered this year, but may bring out a team later in the season.

Teams which played a few games last year, such as Scott, Mason, and DeWitt, have shown little activity so far this season. The backward season seems to have put a damper on baseball enthusiasm. A similar situation was noted in 1927 when there was little farm baseball interest until the middle of June.

Warren In

Warren county finally secured a pitcher and decided to enter the competition with Henderson, Hancock, and McDonough counties. Hancock is playing its first season and is expected to show up well against its opponents. Ford county is another beginner and may be expected to give a good account of itself.

There has been a marked tendency in the State League for teams which fail to win to drop out. In some cases Farm Bureau executive committees have discouraged baseball because of the expense involved in providing equipment and expenses to and from games. Where Farm Bureau baseball has achieved considerable success, as in the central Illinois divisions, the teams have been largely self-supporting. Enough funds are derived from free-will offerings at the games to pay expenses. Such support, of course, indicates considerable backing from Farm Bureau members and others who take an interest in watching the progress of their favorite team.

Richland and Wabash counties have organized teams in the southeastern Illinois section where another three-cornered district is in prospect.

The first schedule of games is announced by Peoria county as follows:

May 25—Peoria vs. Marshall-Putnam, at Marshall-Putnam.
June 1—Peoria vs. Woodford, at Woodford.
June 8—Peoria vs. Tazewell, at Peoria.

FANNED OUT!

Courtesy Chicago Daily News

June 15—Peoria vs. Marshall-Putnam, at Peoria.
June 22—Peoria vs. Woodford, at Peoria.
June 29—Peoria vs. Tazewell, at Tazewell.

At a recent meeting in District V held at Bloomington it was decided that in case of rain the visiting team must be called by 10:00 a. m. preceding the game in order to postpone.

New Baseball League

The Plymouth County Farm Bureau Baseball League was organized at Lemars, Ia., early in April. Over 70 enthusiasts attended the meeting and standing room in the supervisors' hall at the court house was at a premium.

Two divisions, the American and the National, were created, and the townships allotted to these. The official opening was set for May 5 while the final county tournament will be played August 30 to Sept. 2, probably at the stock yards park in Sioux City, on invitation of the Stock Yards company. An official admission charge of 25 cents will be made for games, with women and children under 14 admitted free. The Lemars Globe-Post will publish the official scores on Mondays, and has arranged to keep its office open on Sundays until the last report is in.

Hail Loss Large In Williamson Co.

"I DO not think that the newspapers exaggerated the loss that our farmers suffered May 1," declared Dee Small, Williamson county farm adviser, in response to a request for information regarding the recent hailstorm which caused an estimated damage of half a million dollars to farm crops and property in that county.

"The hail started at Carterville," continued Small, "which is three to four miles west of the west border of our county. The hailstorm went completely across the county covering a strip three to four miles wide. It seems that the hail varied in different spots and the wind was much stronger in some parts of the county than in others. Hailstones were from the size of an ordinary hen egg on down, the majority of them being the size of quail eggs.

"Wheat was completely ruined, pastures were cut to pieces, and practically all orchards in the path of the storm were stripped of prospects for fruit. Most of the roofs of buildings were damaged considerably and many of them were absolutely ruined."

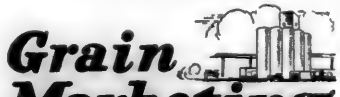
Want Better Price For Guernsey Milk

DAIRYMEN about Belvidere who supply the market with Guernsey milk at $3 per 100 lbs. recently organized to see what can be done toward getting a better price for their product. Farm Adviser E. C. Foley of Boone county was instrumental in bringing the producers together.

Guernsey producers supply the Belvidere market with approximately 3,450 lbs. of milk daily. Already they have received an offer of $3.45 per cwt. for 4½ per cent milk which is the approximate average test for the milk now being sold at $3. This offer secured through the Farm Bureau represents a gain of approximately 25 cents per 100 lbs. over what the dairymen are now being paid. A. D. Lynch, dairy marketing director, is assisting the Boone county Guernsey men with their marketing problems.

"HOW the failure of a $35,000,000 American business organization to keep in touch with modern chemistry has brought the establishment to the verge of bankruptcy was related by Dr. Ira Hilton Jones, international authority on business chemistry before the Executives club recently.

"The new German method of making industrial wood alcohol so cheaply that it can be brought into this country and delivered in New York at 16 cents a gallon, and the contention that cotton will soon be raised for its seeds and corn for its cobs were other features of Dr. Jones's talk."



There's a lesson in this insignificant looking item, plucked from the columns of a Chicago newspaper, that may be applied to farming, or any other business. Ignorance, lack of knowledge takes a heavy annual toll. Progress is so rapid, new methods and inventions so varied and numerous that "keeping up" with the latest offers a constant challenge to anyone engaged in production or manufacturing as is the man on the farm.

Farming is less subject to sudden changes in methods and practices than many other businesses, yet see what progress has been made, what new ideas and methods have been developed within the past 10 to 25 years. During that time the gas engine, the automobile, the combine, the corn binder, corn picker, silo, ensilage cutter, electricity, limestone, alfalfa, sweet clover, inoculation, soy beans, four-year rotations, hog cholera serum and virus, the T. B. test, corn root rot, semesan jr., soil acidity tests, market reports by radio, tractors, paved roads, agricultural agents, home bureau and a host of other machines, methods, devices, and things which the Illinois farmer has to do with everyday and of which his father knew little or nothing, have been developed.

The horse has well nigh vanished from the city, and oats, the old standby crop, is growing decidedly unpopular because it is unprofitable. To what extent are individual farmers losing money by not keeping up with modern discoveries and inventions that lower costs of production? If many more increased their efficiency, one may argue, the surplus problem would be further aggravated. True, but the efficient producers need not worry about surplus. The high cost producers farming marginal land, poor soil, or using high cost methods on good soil would be the losers. They eventually will be squeezed out anyway during hard times just as are operators of high cost copper mines when the price of the red metal goes below 10 cents a pound. They're all making money now with copper at 18 cents.

A lot of poppycock has been written lately about the farmers' Moses coming now in the form of industrial uses of farm wastes to lead agriculture out of the wilderness. We may be a doubting Thomas but our faith in bringing about the salvation of American agriculture through making paper and wall-board from cornstalks, alcohol from cobs, buttons from milk solids and the like, is lacking. Making use of farm wastes will help, of course, and in time several dollars an acre may be added to the farm income through such development. But let no one be deceived into believing that modern alchemy will come along and presently discover a gold mine for the farmer in his cornstalks and wheat straw. These cellulose roughages are attracting attention now because of their cheapness. This is their principal if not their only virtue.

Before the American Chemical Society at Columbus on April 30, Maj. T. P. Walker of the Commercial Solvents Co. told of the use already made by industry of farm products and by-products. "Corn, cotton, sugar, and milk are the American farm products most frequently used in industry," he said. "Chemistry is not, however," he continued, "a Messiah come to save the farmer." More than 50 products are made already from corn through chemical processes, and yet the papers have contained no recent accounts of anyone making a fortune growing corn.—E. G. T.

By Harrison Fahrnkopf

"One thing that is wrong with the farmer's elevator is that people that belong to it are trying to 'hook' it." These were the words of J. G. Adams, Atlanta, Ill., at a recent meeting in Logan county.

Mr. Adams points out that oftentimes the grain of a member is not as good as the member thinks it is. He may feel that inasmuch as he is a director or a shareholder that the manager should extend him some special privilege in credit, price, or otherwise. In the long run, any special concessions of this kind can react only to the detriment of the co-operative.

The present system of marketing grain on the terminal markets has grown up over a period of three-fourths of a century. The farmer has had little to do with the growth and development of that marketing machinery. Although he has made liberal contributions toward maintaining it, he has nothing to show that he is a stockholder in the concern. The farmer will not be encouraged to enter the terminal markets by those who are already there. He should therefore give his earnest and wholehearted support to his own organization.

The Rural Grain Company is such a concern. It is owned by farmers' elevators of Illinois and Iowa. For Illinois territory it has offices at Chicago, Peoria, and St. Louis. If you are in the St. Louis territory, bill car to East St. Louis and notify the Rural Grain Company at St. Louis.

Few farmers understand how grain is graded on the terminal markets. All grading in the regular channels is done by the state department of grain inspection. In cases of appeal for reinspection the federal government steps into the picture. The federal department is a supervising agency only.

Chris L. Christensen, chief, division of co-operative marketing, made this significant statement recently:

"When farmers enter into business through a co-operative organization they have to release a part of their individual right to make a decision here and there. If you are to carry out the job efficiently the responsibility must be delegated to a central party or board of directors, and they in turn delegate part of the job to the general manager.

"One of the big problems in American co-operation today is to find that proper balance, that proper poise between the degree of central control which is essential to efficient management and operation, and democratic government."

Farmers of Illinois and the middle west should have some money to represent them in their grain marketing efforts. They have their organizations which are performing a wonderful work, but money is needed.

The Land O'Lakes Co-operative creamery is a one and one-half million dollar corporation. The organized dairymen in the territory surrounding Baltimore have a cash surplus of $750,000. The Wisconsin Cheese federation has money as well as organization. It has put the props under the summer cheese market. In the old days, the price dropped. Not any more.

Organization and money—both are needed to promote the interests of co-operative grain marketing. The organizations are moving right along. Let us adopt some plan that is fair to all.

Why not the "check-off?" Other organizations are using it successfully. In Illinois, 200,000,000 bu. of grain are shipped annually out of the counties where grown. A check-off of 1c per bushel on half that amount or 100,000,000 bushels gives a sum of one million dollars. Think it over.

By Art Lynch

STABILIZED markets are the *reward* of organized dairy farmers.

STABILIZATION no longer means something connected with a *cow stable*. It means that if a heifer calf is dropped on your farm tonight you know whether to give her a *drink* of milk or *knock* her in the head.

It means that you can predict whether or not you can *make a profit* on her milk when she is no longer a gawky calf—thirty months from tonight.

STABILIZED markets have *sound sales* plans. Sound because the surplus milk is sold as *surplus*. Sound because the fluid needs of the market are sold at the *premium price* they should bring. Sound because you don't sell *both* the bottled milk and the surplus milk for the *price* of surplus. Let the unorganized boys sell theirs that way. Organized dairymen don't have to in this day of *business-like cooperation*.

ORGANIZED dairymen have stabilized their markets because they are able to *control surplus*. Stabilized because they are now producing milk when the city folks drink it. Doing this insures a steady, stable market.

IF YOU produce 2 cans in June and only 1 can in November you can't expect the housewives to take 2 quarts a day in June and only 1 in November. They want the 2 quarts *all the time*. If you don't produce it that way the dealer has to *scout around* for milk to take care of his shortage. Those emergency farmers who *helped* your market out in the short season will then want to share *your market* in the flush season.

Then the fur begins to fly.

STABILIZED markets absorb all the milk you produce *every day* at the best price possible. On stabilized markets the dairymen who produce *evenly get more* money.

Because of this, at Philadelphia the difference in production between the lowest month and the highest month *has been reduced* 80%. Those organized farmers did this in only five years.

SO—STABLES for cows; but stabilization for markets.

H. Paul Bestor, former president of the St. Louis Federal Land Bank who spoke at the I. A. A. Meeting in Rock Island in January, 1928, was recently appointed a member of the Federal Farm Loan Board.

"Mr. L. J. Quasey,
Director of Transportation,
Illinois Agricultural Ass'n.,
Chicago, Illinois.

"My wife and myself wish to thank you and the I. A. A. for your co-operation and successful efforts to secure electric service for us. The line has been completed and we have had service about a month. The Public Service Company did all work satisfactorily. We feel that you have given us a real service as electricity is a great help in the home and on the farm.

"Here's hoping that you can brighten many more farm homes in the future as you have done ours. We have plenty of praise for the I. A. A.

"E. D. TIMKE,
"Downers Grove, Ill.

"P. S. Have an electric range now. Well, ask my wife how she likes it."

Don't Like Country Life's Low Rates

Makes Apology for Ten Year Showing of Participating Companies

By L. A. Williams, Manager, Country Life Insurance Company

IN criticizing Country Life Insurance Company, the May issue of Best's Insurance News runs under a heading "More Misleading Advertising," an apology for the poor showing made by the better old line life insurance companies, by insisting that when dividends are referred to, only the last year or two of these companies' net costs be shown.

We have the figures to prove all our advertising to be true, but it is apparent that the very poor showing made by all participating old line companies in the past 10 years has need of a champion, and someone to do "the explaining." How does it happen, may we ask, that these companies can pay twice the dividend in 1927 that they were able to pay in a similar second year in 1917? Why should the participating old line companies fear a comparison with a young company's gross rate, which is not even projecting dividends? If a company can return $6 or $7 in the form of a dividend at age 35 in 1928 on an ordinary life policy, how can they explain to the public the need for taking away that excess charge?

Public Has Been Fooled

It is time that the public was let in on the practice of participating life insurance companies in charging almost a third more than is actually necessary to carry the risk over a period of 20 years, and then making a gesture in the form of a so-called "dividend" to try to make the public believe they are earning money for them.

The fact of the matter is that there has never been a true dividend paid to policyholders by a participating old line life insurance company. Nothing but arbitrary refunds of overcharges have ever come back to a policyholder. It is high time that Best's should apologize in their class publication for this sort of misrepresentation. And of course, it is logical that a class publication should champion those who have been fooling the public so long.

Keep 'Em Ignorant

"Keep the public ignorant" has been the slogan of participating companies. When a "little" company like Country Life issuing life insurance on a true cost basis, compelled by agreement to return all of the profit to its policyholders, I say, when a little company like that, with honesty of purpose, can make all the big old line companies squeal through a mouthpiece, it is very apparent that Sam Jones' old saying, "Every once in awhile a burnt sinner will squeal," is overwhelmingly true.

Participating companies cannot stand the searchlight. What of the dividend history for the past 20 years of participating companies? Many of these companies paying $6 and $7 dividends at age 35 today paid $2 and $3 dividends 20 years ago. It is apparent that not until competition forced the issue did these companies begin to give anywhere near an actual refund of excess payment to their policyholders.

The "Master's Voice"

The alibis made by Best's News are weak and apologetic. They champion the overcharge methods of their clientele as they recognize their "Master's voice." Fortunately, Country Life Insurance Company is not dependent upon other old line companies for its business. And the howl of the pinched hound doesn't scare Country Life a bit. We are in business to manufacture life insurance at cost for policyholders. We are proud of the fact that stock companies out to make fortunes for stockholders, and mutual companies interested in building up big agency machines in which policyholders have nothing to say and where distribution profits build general agency "kingdoms," are objecting to the dissemination of the true facts about life insurance costs. We are proud of the fact that we are forcing consideration of lower cost life insurance by these companies which for years have taken away tremendous unwarranted overcharges. We offer life insurance that recognizes an increased span of life, a lowered selling resistance, and a higher appreciation of true protection value. Security has never been questioned since 1907. The great howl goes up when you begin to cut into the cake formerly enjoyed by stockholders and jobholders using the public's money.

State To Build Docks Along Ill. Waterways

S. B. 339 Grants Authority to State Department for Terminals

A MOVE to establish docks and terminals adjoining cities located on the Illinois, Mississippi and Ohio rivers so as to make water transportation available to Illinois farmers and shippers is seen in the introduction of S. B. No. 339 in the 56th Illinois General Assembly.

R. A. Cowles

The deep waterway will be of no value to Illinois unless provision is made for docks so goods can be loaded and unloaded to and from barges that ply up and down the rivers. Such docks, in some cases, must also be equipped with loading and unloading machinery, with railroad tracks and spurs so freight can be loaded and unloaded from trains to and from the barges.

Illinois cities are handicapped in this regard. As a result waterways to date have been little used. They will not be used until proper equipment is made available.

Equip 'Em Also

Senate Bill No. 339 authorizes the State Department of Purchases and Construction to build and acquire terminals, and to equip such terminals with necessary machinery and facilities.

A hearing on the bill was held before the Senate Committee on April 15. Robt. A. Cowles of the I. A. A., a member of the Illinois Waterway Terminals Committee, represented the Association and appeared in behalf of the measure in accordance with authority granted in the waterway resolution passed at the last I. A. A. annual meeting. Theodore Brent, transportation adviser to the State of Illinois, and Wm. F. Mulvihill, State Superintendent of Waterway Construction, testified in behalf of this measure.

State Shall Help

"The legislation embodied in this act contemplates that the state shall do what is necessary to make possible a water revival of transportation on the rivers of the state," said Mr. Brent.

"The Mississippi, and the Ohio, and the Illinois are already navigable. The state is spending $20,000,000 and is prepared to add another $5,000,000 to it in order to give the people of Illinois and the Mississippi Valley at large access by cheap water transportation to the Chicago district, the greatest manufacturing and distributing center in the whole country. The expenditure will bring but a limited return in public benefits until there are terminals at the most important interchange points where goods may be cheaply transferred between land and water vehicles."

Joint Rates

"Washington, Apr. 21.—The Interstate Commerce Commission issued an order here today directing railroads connecting with the Inland Waterway Corporation barge lines on the Mississippi River to establish joint rail and water rates effective Aug. 27, over a large section of the country. Water transportation boosters considered the order an important victory for water transport.

"The water corporation, however, was denied a petition for through rates to provide for barge-rail-water rates between Atlantic seaboard points and the lower Mississippi Valley.

"The order directed the railroads to negotiate with the barge line to agree on a division of the joint rates. It is taken to indicate a reduction of 10 to 20 per cent from existing costs for transporting commodities between affected points under joint rail and water tariffs."

S. J. Stanard Retires From State Dep'tment

STILLMAN J. STANARD, retiring state director of agriculture, made a splendid record for his efficiency in administering the affairs of the department of agriculture. He displayed willingness and co-operation at all times in serving the agricultural interests of the state.

S. J. Stanard

Mr. Stanard's office was always open to officials and staff members of the Illinois Agricultural Association, and to representatives of other farm groups.

Pushed T. B. Work

During his administration, he gave personal attention to speeding up the bovine tuberculosis eradication program in Illinois. As a result the cattle of the state are more than three-fourths tested and the work can be completed within a comparatively short time. Hogs shipped out of more than 40 accredited counties receive a 10c per cwt. premium at the market.

The growth and development of the State Fair at Springfield during the past few years was due largely to Stanard's influence and enthusiasm. Dairy promotional work was improved, agricultural laws overhauled and amended, and the work of the various divisions co-ordinated. Stanard leaves office with the good will and gratitude of farmers over the state for having done a good job.

The American Farm Bureau Federation held a tax conference of state Farm Bureau officials in Chicago on May 15.

Seek Solution for High School Tangle

Would Allow Country Districts to Withdraw From Community High Territory

AN attempt to straighten out the community high school tangle is being made in the 56th General Assembly of Illinois now in session.

A. S. Cuthbertson

Senate Bills 458 and 467 already introduced would allow the withdrawal of contiguous areas from the high school districts of which they are now a part, when two thirds of the voters residing within such areas petition the county superintendent of schools to this effect.

These measures would allow country districts to withdraw from the community or township high school district to be placed in non-high school territory; to become part of another high school district; or to form a part or all of a new high school district to be created.

Cuthbertson Bill

S. B. 467 introduced by Senator Cuthbertson of Bunker Hill seems to have the most support. S. B. 458 by Senator Finn of Iuka it is understood will not be pushed.

The Cuthbertson bill provides that the county superintendent of schools shall give 10 days' notice of the proposed change of boundaries before he enters the order making such change. The county superintendent, likewise, shall not add any territory to an existing district pursuant to a petition of two-thirds of the legal voters residing within such territory, if before the 10 days five per cent of the legal voters residing within such existing district shall file a petition with the county superintendent of schools objecting to such addition of territory.

The Finn bill would prevent the withdrawal of territory located within five miles of the high school. The Cuthbertson bill imposes no such limitation.

The New York State Farm Bureau Federation has a membership of 33,000, an increase of 6,000 members in the past year. This is the largest membership since 1923.

Will Study Tax Situation

John C. Watson, I. A. A. tax director, will study the tax situation in Marshall and Putnam counties with a group of local Farm Bureau members representing each township in the two counties. The survey is not to be made until the latter part of May.

WHICH WILL BE YOURS?

A Bountiful Yield Assured

Destroyed By Hail In Midsummer

NO FARMER CAN AFFORD TO TAKE THIS RISK!

HAIL losses of staggering proportions occur annually in the Corn Belt. Hail has destroyed millions of dollars worth of farm crops and property in Illinois and Iowa in recent years. In 1928 the Farmers Mutual of Iowa alone reports $1,115,595.77 paid in net losses to policy holders.

YOU can protect your crops against hail damage by insuring in YOUR OWN COMPANY "AT COST."

Income Tax Bill Defeated by Narrow Margin

SENATE BILL No. 39, introduced by Senator Lantz, in the 56th General Assembly, which was authored and sponsored by the Illinois Agricultural Association, after passage in the Senate, went down to defeat when under consideration in the Lower House in the closing week of the Legislature. This was the only bill introduced or under consideration during this session of the Legislature that promised any relief from the ever-increasing property tax burden in Illinois. The final result was determined by 21 down-state members who lined up with the solid delegation from Cook County, who had from the beginning sought to emasculate this bill.

It is well to review what has transpired during the consideration of this particular piece of legislation, in order that our members may be fully informed so as to cast their future ballots in a manner that will more fully promise corrective and constructive legislation of this character.

The bill was introduced in the Senate on January 22nd, by Senator Lantz, and had very fair consideration before the Revenue Committee of the Senate and later by the full body. It was passed by the Upper House on April 24th, by a vote of 28 to 19.

Those voting for the bill were:

Abt	**Felts**	**Meyers**
Adair	**Finn**	**Mills**
Bailey	**Flagg**	**Paddock**
Baker	**Hamilton**	**Searcy**
Barr	**Hanna**	**Smith**
Bohrer	**Jewell**	**Thompson**
Boyd	**Lantz**	**Wilson**
Carlson	**Lee**	**Wright**
Cuthbertson	**McCauley**	**28 votes.**
Dunlap	**Meents**	

Those voting against the measure were: **Kessinger of the 14th District; Michel of the 18th District; and Miles of the 28th District.**

Senator Reynolds of the 49th District did not vote.

It should be stated in connection with this vote that Senator Kessinger has been a friend of the Association's program for tax reform, and it was well understood by the supporters of this bill, that while Senator Kessinger did not like all provisions of Senate Bill 39, he would give it his support should his vote be necessary to secure its final passage.

On coming over to the Lower House, the bill received entirely different treatment. It was referred to the House Committee on Revenue, made up of 19 Chicago representatives and 11 from down-state. When the Committee convened to consider the measure, Representative Schnackenberg of Chicago immediately moved to vote the bill out with recommendations that it **DO NOT PASS.** Representative David Hunter, who was sponsoring the bill on the floor, urged the Committee to give proper consideration to the provisions of the bill and his request was supported by Representative Green, Chairman of the Committee. Their pleadings were of no avail, however. The Chicago members supported by Representative Crowley of down-state being in a majority immediately adopted the motion of Representative Schnackenberg. When the Committee report came to the floor of the House, Representative Hunter moved that the House **DO NOT CONCUR** in the Committee report and that the bill be placed on the calendar. This motion prevailed by a vote of 72 to 59.

All efforts were then directed toward securing sufficient support to keep unfriendly amendments from being written into the bill when it came up for consideration on second reading. On several occasions it appeared there was sufficient support to carry this bill safely through this stage of its consideration. Three agreements were reached by the sponsors of the bill and the Speaker of the House as to the time when it would be considered. In each case, the supporters of the bill were disappointed and different reasons offered for delay. It was finally called by the Speaker on Tuesday afternoon, June 4th, and a spirited contest was immediately in evidence. The supporters of the bill were led in their fight by Representative David Hunter of Rockford, Floor Leader Roger Little of Champaign, and Representative Wood of Keenes. The opposition was led by Representatives Schnackenberg and Thon of Chicago, and Dixon of Dixon. The first roll call shows very

Over 10,000 Attend Victory Celebrations

McLean County Banquet Draws Crowd of 1,253

THE first Victory banquet celebrating Country Life's unprecedented success was held at Mt. Carmel, in Wabash County. County Adviser Lett and General Agent Glick put on a most remarkable program, and a delightful dinner. This county, as a result, will be among the first to make its quota.

Great enthusiasm has prevailed at all of our meetings. Following the Mt. Carmel Victory dinner, similar banquets were held in the following counties. The number of people attending each banquet is shown opposite the counties listed:

Adams	235	McLean	1253
Bond	175	Marion	235
Cass	110	Marshall-Putnam	215
Christian	200	Mercer	190
Carroll	150	Morgan	220
Clinton	425	Peoria	475
Crawford	350	Piatt	220
Edwards	135	Pike	115
Effingham	175	Randolph	75
Franklin	70	Richland	225
Gallatin	180	Rock Island	125
Greene	300	Scott	125
Grundy	225	Saline	240
Hancock	265	Stark	175
Henderson	200	Union	250
Jackson	200	Warren	250
Jefferson	250	Wabash	215
Jersey	115	Washington	190
JoDaviess	200	Wayne	75
Johnson	115	White	110
Lawrence	210	Williamson	300
Logan	500		
McDonough	110	Total	10,223

The victory celebration at Bloomington where 1253 sat down to a most delightful dinner was the largest held up to date. County Adviser Coultas, General Agent Wm. Hedgecock, and their active agency force, are entitled to great credit for this remarkable turn-out and great enthusiasm over the life insurance project.

More of these celebrations are to be held in the month of June. And it is noticeable that wherever these celebrations are held and the full facts concerning Country Life's plans and policies are made known, business in the form of applications sees an immediate pick-up. The purpose of these celebrations is to make known the facts regarding life insurance and its relation to the Farm Bureau movement. It is our purpose also to make Farm Bureau membership so desirable through all of the projects of the Farm Bureau, that no man can afford not to belong to this great organization. Our general agents are out seeing people every day, as a result of the demand on the part of the membership for more information.

Record Month

THE Champaign County Milk Producers reports the best month's volume of business and gross returns in May since the co-operative opened for business on Jan. 1. A total of 1,233,300 pounds of milk were sold for a gross return of $31,548.78. Farmers received $2.50 per 100 pounds net. Forty-seven per cent of the milk graded "A."

Good Peach Crop

WITH a much smaller peach crop in prospect in Georgia and a good crop of high quality fruit indicated from the peach belt of Illinois, fruit growers from the southern part of the state are optimistic over prospects for a good harvest in 1929.

The peach crop is estimated at slightly larger than that of last year and the quality promises to be unusually good. Illinois peaches are recognized in all the open markets as among the best and the Illini brand put out by the Illinois Fruit Growers Exchange has the high regard of buyers and commission men in all the markets.

Harvesting the crop will probably begin in the main peach belt around Centralia, the second week in August. Prices promise to be reasonable in spite of the fact that the crop from Georgia and other southern territory will be short.

Forty-four cats consume milk valued at $435.45 annually, or $9.90 worth of milk per cat, according to Tester Paul Church of the Tazewell County Dairy Herd Improvement Association.

Mr. Church observed the average amount of milk poured out by members of his association for the cats and projected the amount and cost on an annual basis. There were 44 cats on the 28 dairy farms whose herds were entered in the association.

WHEN "COUNTRY LIFE" POLICY HOLDERS MET IN VICTORY CELEBRATION AT BLOOMINGTON

Exactly 1,253 attended the victory celebration and banquet in Consistory Hall, Bloomington. The dinner was sponsored by the McLean County Farm Bureau and the Country Life Insurance Company. Manager L. A. Williams told many interesting details of the drive which led to placing $13,000,000 worth of insurance on the books within two months in his talk "Behind the Scenes in Life Insurance."

Forty-eight similar luncheons and dinners had been held up to and including June 7, and 22 more were scheduled.

The Illinois Agricultural Association RECORD

Published monthly by the Illinois Agricultural Association at 404 North Wesley Ave., Mount Morris, Ill. Entered as second-class matter at post-office at Mount Morris, Ill., Oct. 20, 1925, under the Act of Mar. 3, 1879. Acceptance for mailing at special rate of postage provided in Section 412, Act of Feb. 28, 1925, authorized Oct. 27, 1925.

"Our Sam" Hits Tariff Sees Hope In New Bill

Not What We Advocated But a Start At Least, He Says

SAM H. THOMPSON, president of the American Farm Bureau Federation, expressed disappointment over the new tariff schedule now pending in congress, but indicated his hope and faith that the pending farm relief measure will be the foundation for a helpful national policy for American agriculture, in his recent address on the I. A. A. Radio Forum from Station WLS.

S. H. Thompson

Speaking of the tariff bill President Thompson said: "While it is true that it has given consideration and higher rates to some agricultural commodities, it has at the same time increased the tariff on things the farmer has to buy so as to nullify the benefits that farmers might obtain by a higher tariff on their staple crops.

Doesn't Help Situation

"The attitude of congress on the tariff will have a tendency to continue the spread of inequality between agriculture and industry rather than to adjust agriculture upward to a place of equality," said Mr. Thompson. "This is unfortunate," he continued, "in the face of the many declarations to the effect that industry is now enjoying the greatest prosperity in the history of our nation."

Referring to the farm bill which recently passed the House, Mr. Thompson said: "While it is not the type of legislation that we have advocated, and I feel it does not go far enough towards getting the farmer an American price for his products, it does furnish a base or corner-stone on which to build a permanent policy for American agriculture."

Frank Recognition of Problem

Quoting rather freely from the preamble or declaration of principles in the bill Mr. Thompson saw in this feature a frank and commendable recognition on the part of our federal law makers of the previous weaknesses in the federal farm policy and of the need for the government now doing something for the farmer since it was partly responsible for his present predicament. The speaker condemned the federal government's previous activity in opening up new reclamation projects that have tended to aggravate the farm surplus problem.

"The greatest value that can be achieved from this new legislation," said President Thompson, "will come from the fact that we are going to adopt a national policy for agriculture, and that policy clearly sets forth economic equality as its chief cornerstone. A federal farm board is provided for in the bill; this board is to be given ample funds and charged with responsibility for achieving those things embodied in the declarations. The limiting details in this measure can and will be removed or amended from time to time as occasion requires.

Up To Board

"This will be particularly true if the members of the board consist of men who have a clear conception of the needs of agriculture and a determination to carry out the intents and purposes of this act."

Mr. Thompson declared that farmers are a long ways from being over the hill economically and that there was never a time when all interests in our national life should work together as at present to place agriculture on a par with other industries.

Don't Quit

When things go wrong as they sometimes will,
When the road you're trodding seems all up hill,
When the funds are low and the debts are high
And you want to smile, but you have to sigh;
When care is pressing you down a bit,
Rest, if you must—but don't you quit.
Success is failure turned inside out—
The silver tint of the clouds of doubt.
And you never can tell how close you are,
It may be near when it seems afar;
So stick to the fight when you're hardest hit—
It's when things seem worst that you must not quit.

Income Tax Bill Defeated

(Continued from page 1)

clearly and definitely the tightness of the lines drawn on this measure, which resulted in 70 supporters and 70 opponents. The second roll call was on Representative Schnackenberg's motion to strike the Enacting Clause, which, in effect, would kill the bill. On this motion there were 72 ayes and 69 nays—Representative Robert Wilson of Kewanee having switched his position from that of supporting the bill to the opposition and Representative Bingham of Galena, who had not voted on the first roll call, also lining up with the opposition.

Those supporting the bill were as follows:

Acker	Luckey
Allen	McAdams
Bandy	McCarthy
Bauer	McCaskrin
Baxter	McMackin
Beckman	Mester
Benson	O'Hair, H. Z.
Black	O'Hair, Karl R.

"The attitude of congress on the tariff will have a tendency to continue the spread of inequality between agriculture and industry rather than to adjust agriculture upward to a place of equality," said Mr. Thompson. "This is unfortunate," he continued, "in the face of the many declarations to the effect that industry is now enjoying the greatest prosperity in the history of our nation."

Referring to the farm bill which recently passed the House, Mr. Thompson said: "While it is not the type of legislation that we have advocated, and I feel it does not go far enough towards getting the farmer an American price for his products, it does furnish a base or corner-stone on which to build a permanent policy for American agriculture."

Frank Recognition of Problem

Quoting rather freely from the preamble or declaration of principles in the bill Mr. Thompson saw in this feature a frank and commendable recognition on the part of our federal law makers of the previous weaknesses in the federal farm policy and of the need for the government now doing something for the farmer since it was partly responsible for his present predicament. The speaker condemned the federal government's previous activity in opening up new reclamation projects that have tended to aggravate the farm surplus problem.

"The greatest value that can be achieved from this new legislation," said President Thompson, "will come from the fact that we are going to adopt a national policy for agriculture, and that policy clearly sets forth economic equality as its chief corner-stone. A federal farm board is provided for in the bill; this board is to be given ample funds and charged with responsibility for achieving those things embodied in the declarations. The limiting details in this measure can and will be removed or amended from time to time as occasion requires.

Up To Board

"This will be particularly true if the members of the board consist of men who have a clear conception of the needs of agriculture and a determination to carry out the intents and purposes of this act."

Mr. Thompson declared that farmers are a long ways from being over the hill economically and that there was never a time when all interests in our national life should work together as at present to place agriculture on a par with other industries.

Don't Quit

When things go wrong as they sometimes will,
When the road you're trodding seems all up hill,
When the funds are low and the debts are high
And you want to smile, but you have to sigh;
When care is pressing you down a bit,
Rest, if you must—but don't you quit.
Success is failure turned inside out—
The silver tint of the clouds of doubt.
And you never can tell how close you are,
It may be near when it seems afar;
So stick to the fight when you're hardest hit—
It's when things seem worst that you must not quit.

Income Tax Bill Defeated

(Continued from page 1)

clearly and definitely the tightness of the lines drawn on this measure, which resulted in 70 supporters and 70 opponents. The second roll call was on Representative Schnackenberg's motion to strike the Enacting Clause, which, in effect, would kill the bill. On this motion there were 72 ayes and 69 nays—Representative Robert Wilson of Kewanee having switched his position from that of supporting the bill to the opposition and Representative Bingham of Galena, who had not voted on the first roll call, also lining up with the opposition.

Those supporting the bill were as follows:

Acker	Luckey
Allen	McAdams
Bandy	McCarthy
Bauer	McCaskrin
Baxter	McMackin
Beckman	Mester
Benson	O'Hair, H. Z.
Black	O'Hair, Karl R.
Borders	O'Neill
Branson	Parker
Bruer	Porter
Burns	Rennick
Bush	Rew
Childers	Rice
Chynoweth	Robbins
Corzine	Robinson
Cutler	Roe
Ewing	Rush
Fahy	Ryan, Ed.
Foster	Scarborough
Gilmore	Smith
Hanley	Soderstrom
Hennebry	Sparks
Hoff	Sullivan
Hunter	Teel
Jackson, N. L.	Thompson
Jackson, W. H.	Tice
Johnson, G. J.	Turner, C. M.
Kane	Vaughan
Kimbro	Waller
Kribs	Whiteley
Lewis, F. W.	Wilson, A.
Lewis, J. W.	Wilson, E. C.
Little	Wood
Lohmann	69 votes.

The 21 down-state members who lined up with the solid Chicago delegation in their successful effort to kill this bill were:

Bingham	Malloy
Breen	Martin
Clark	McDonough
Connerton	Peffers
Crowley	Petit
Devine	Petri
Dixon	Searle

Franz, C. D.	**Sinnett**
Green	**Walker**
Holten	**Wilson, R. J.**
Lyons	

Representatives Charles Johnson and M. E. Bray—not present.

Thus ended another chapter in the efforts of the property tax-payers of Illinois to secure relief from the inequitable and unjust portion of taxes that the property of Illinois is and has been bearing.

The Illinois Agricultural Association enjoyed very able and effective cooperation from The Illinois Bankers Association, The Illinois State Federation of Labor, Prairie Farmer and much of the down-state press; while the opposition consisted of the Chicago press, The Illinois State Chamber of Commerce and the Illinois Manufacturers Association.

The supporters of the Income Tax Bill, while disappointed, are not discouraged. They recognize that the consideration of this bill made possible and has resulted in a much more intelligent understanding of the iniquitous, antique and unjust taxing system operating in this state.

As we go to press, it is reported that The State Administration is seriously considering calling a special session of the General Assembly for the purpose of submitting to the voters at the next general election an amendment to the Revenue Article of the Constitution, which would require a two-thirds vote of the General Assembly, and if that is found to be impossible, for the purpose of considering and enacting an equitable income tax measure, which only requires a majority vote. Friends of a fair taxing system will stand ready, willing and anxious to lend their support to a program of this character.

Consumer Co-ops. Blame Wheat Pool

High Price of Wheat Laid to Canadian Co-operation

THE anomaly of a co-operative organization of consumers in Scotland crying out against a co-operative organization of producers, namely, the Canadian Wheat Pool, for increasing the price of wheat is disclosed in a recent issue of "The Scoop Shovel," the official organ of the Manitoba Wheat Pool.

The consumers' organization known as the United Co-operative Baking Society of Glasgow, Scotland, blames the Canadian Wheat Pool for the high price of wheat in spite of the fact that "a surplus exceeding all previous records exists and yet the price of wheat has not come down." "Instead," related Mr. Buchanan, chairman of the Baking Society, "it has gone up. And the cause? The Canadian Wheat Pool."

Queer Contradictions

Commenting upon this situation a British publication called Broomhall's "Milling" said editorially in a recent issue: "The Canadian Wheat Pool has provided the world with a crop of queer contradictions. In the first place, it is a system of co-operation among producers, and because it has managed to keep prices up, it is criticized adversely by co-operators in this country. In other words, co-operators are actually hostile to co-operation. In the second place, there is an outcry for the stabilization of wheat prices, and an even greater outcry because the Canadian Pool has succeeded to some extent in that object! We have maintained, and still do so, that the public has no right to expect cheap bread at the expense of the producer. The man who has to face the first risk is entitled to the first, and a fair profit. He does not always get it, to wit, the British wheat grower, but in this particular case it is partly due to factors against which it is useless for him to fight. If he could grow wheat as cheaply as it is grown in North America or South America, the grain would still lack characteristics possessed by imported wheat and requisite to what is comprehensively known as 'bread grain.' We have no brief for the Canadian Wheat Pool, but we are bound to say they have done uncommonly well, and that their members have reason to feel satisfied with the organization. At the same time, it is queer that another co-operative movement should look on the Pool's methods as rough shod.

"We commend these remarks to the thoughtful consideration of Mr. Buchanan and the peculiar type of co-operator he represents, if indeed there is another like him among the whole five millions of British co-operators."

This is a powerful testimony in behalf of the effectiveness of co-operative marketing and discounts the statements of many buyers to the effect that little or nothing can be gained through the co-operative marketing of staple and non-perishable products.

Sanitary Milk Produc'rs Getting Under Way

REPRESENTATIVES of the 200 whole milk shippers in Jersey county met at Jerseyville Tuesday, June 4, to lay plans for organizing a unit of the Sanitary Milk Producers in that section. G. R. Pearce, who represents the county on the board of directors of the new co-operative, predicted that at least 90 per cent of the milk shippers in that section will join the sanitary milk producers to help themselves get control of their product and market it co-operatively.

E. W. TIEDEMAN of St. Clair county scheduled a meeting at Belleville for June 15 when St. Clair county whole milk producers will start their drive for perfecting an organization of the Sanitary Milk Producers in that area. Membership in the St. Louis territory is growing steadily. Excellent headway is reported among the milk shippers in Missouri.

By Art Lynch

ORGANIZED dairymen get their money from the buyers when it is due. Organized dairymen at such markets as Chicago, Peoria, Champaign, Bloomington and others collect without losses because they **watch the credit rating** of their buyers.

A. D. Lynch

* * *

UNORGANIZED dairymen selling as individuals do not know within a row of apple trees whether they will get their next month's milk check or not. In one northern Illinois county unorganized dairymen four years ago **lost on the average $62 per man** per year in bad milk accounts.

* * *

MILK is sold on credit. The dealer has some of your milk 45 days before he pays. The practice is to deliver milk a whole month and get paid for it the 15th of the next month.

* * *

WATCHING the credit standing of the buyer is an important function of a milk-selling organization.

* * *

HOW is it done? At Chicago every dealer has to put up a $2,500 bond. At Peoria, Bloomington and Champaign the organized dairymen have contracts with their dealers under which the association can demand a guarantor (certified check or cash) to make sure of the payment if the dealer's finances look "shaky."

* * *

IN the past some irresponsible dealers got lots of milk they never paid for. The going is tough for such dealers these days with a business-like farmers' organization looking after the interests of its members.

* * *

SOME patrons in the old days would threaten to stop shipping if the dealer gave them "bum" checks. The dealer had the nerve to tell his patrons in such cases that he had to have their next month's milk or he would be unable to pay for the previous month's milk.

* * *

ORGANIZED dairymen get their money because they know which dealers are safe. They let the nonmember take the chances.

Co-op. Marketing of Cream Has Cash Value

Farm Bureaus Make Money for Members Through Produce Associations

By Frank Gougler

PERHAPS the best yardstick for measuring the cash value of co-operative cream marketing is by comparing country butterfat prices to the Chicago 92 score butter market. Before the produce co-operatives entered the field country butterfat prices were from three to five cents under the Chicago butter market. Now they will average above the butter market for the year wherever co-operative produce associations are operating.

Frank Gougler

Another measure is the net saving above operating costs of a cream station. This has also been shown to be over three cents. Still a third yardstick is in the nature of bids received. These are better by at least three cents per pound than formerly.

Using this conservative figure, what does it mean to the average producer or county? Such a producer will sell at least 600 pounds fat. With a three-cent gain, he has an additional income of $18 more than enough to pay his annual Farm Bureau dues, besides selling his butterfat on his own weights and tests.

Richland County's Case

How much additional income to a county? Richland county, for example, sells annually 414,654 pounds of butterfat. Selling this fat for three cents more per pound (to be exact, the co-op's. net gain for the first two years was 3.2 cents not considering the increase obtained in local prices) means a greater income to the county by $12,440. Richland county would have to have over 800 Farm Bureau members to contribute this amount in dues. Very likely they have not more than half that number. Thus, the gain made on selling butterfat co-operatively nearly doubles that paid out in membership dues.

McLean county sells annually over 1,000,000 pounds fat and a three-cent gain on this amount is $30,000, or about twice the amount raised by Farm Bureau dues.

Increase of $1,800,000

Adams county on the west side of the state sells annually 456,181 pounds fat. At three cents additional income this amounts to $13,685.

For the state as a whole which sells annually 60,000,000 pounds butterfat, a net gain of three cents amounts to the tidy sum of $1,800,000, more money than is contributed to all the County Farm Bureaus of the state, the I. A. A., and the American Farm Bureau Federation.

These are the possibilities when this work is extended over the entire state. More than half of the state is already being influenced by this marketing project. It doesn't seem possible that the marketing of a single commodity could be so far reaching in its effect. Illinois now has 34 co-operative produce marketing units actively marketing and a dozen or more are in the process of organization. The work is going forward rapidly.

17th. District Conf. At Lincoln May 27

Pipe Line, Co-op. Marketing and Insurance Discussed

REPRESENTATIVES from Livingston, Woodford, Logan, McLean, and Ford counties attended an I. A. A. conference in the 17th district at Lincoln on Monday, May 27. The lateness of the season and the fact that farmers were in the field planting corn kept many at home. Nevertheless a representative group from every part of the district attended. Geo. J. Stoll of Chestnut presided.

Geo. J. Stoll

The chief topic of interest was the situation involving the Texas-Empire Pipe Line Company and landowners along the proposed right-of-way regarding settlements for damages. L. J. Quasey of the I. A. A. outlined the proposition, explained the rights of both parties involved, and recommended that farmers organize by communities and appoint a committee duly authorized to deal and speak for them.

Not Satisfied

Several members expressed dissatisfaction with the terms offered by the company. A desire to try a test case before a court of law to establish what is a fair payment for a perpetual easement and special damages was manifest.

Several testified that the proposed pipe line through the central Illinois counties would depreciate the value of land traversed and cause damages to crops, tile, and farm work far in excess of any compensation heretofore offered or paid by pipe line corporations. One man related how a similar pipe line in northern Illinois consistently leaked with the result that the crude oil rendered unfit for production the soil so affected.

May Patrol Line

The company contract indicates that the proposed pipe line will not be patrolled but the practice of similar companies heretofore has been that these lines are patrolled every week. In such cases the patrolmen tramp down growing crops and cause a general nuisance to landowners.

Frank Gougler, produce marketing director, and L. A. Williams, manager of the Country Life Insurance Company, spoke briefly, Mr. Gougler outlining the value of co-operative marketing to farmers who sell cream, poultry, and eggs, and Mr. Williams relating facts and information relative to Farm Bureau life insurance and the new Farm Bureau owned and controlled company.

Cream Shippers Profit

The Logan County Dairy Association's last year's records reveal that Logan county farmers obtained over $25,000 more for their cream and produce as a result of price increases following collective selling. "This increased income, from cream, poultry and eggs alone," said Gougler, "is far greater than the cost of maintaining the Logan County Farm Bureau. If we can do so well in marketing produce co-operatively how much more can we do by selling all of our farm products through the co-operative marketing system," he said.

Following a discussion of a proposed district picnic it was decided to place the question before each County Farm Bureau executive committee for a decision. Their action will be reported to Mr. Stoll at a later date. Opinion was expressed for and against the district picnic plan.

Get Ready for Deep Waterway at Peoria

THE Caterpillar Tractor Company of Peoria recently constructed an inland harbor covering 25 acres adjoining its plant to be used in shipping its products down the river on boats to the Ocean.

The Keystone Steel & Wire Company, likewise, has completed plans for excavating a huge slip and turning basin for Mississippi river barges and tow boats. A canal will connect this slip with the Illinois river, giving direct river facilities to the plant for the unloading of barges of ores, coal, and other heavy freight and the loading of its finished steel goods upon barges.

Peoria promises to make great use of the deep waterway to the Gulf of Mexico now being completed. The deep waterway will give ready access to the growing South American markets. It is estimated that at least 100 of the largest Caterpillar tractors, two of which fill an ordinary freight car, can be loaded upon a single barge and shipped to New Orleans for direct loading to cargo steamers bound for Central America, Brazil, the River Platte, west coast of South America, and to almost any other port reached by steamers from New Orleans.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Entered as second-class matter October 20, 1925, at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Accepted for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the ILLINOIS AGRICULTURAL ASSOCIATION RECORD. Postmaster: In returning an uncalled for or missent copy please indicate key number on address as is required by law.

I. A. A. Policy on Tariff

A CRITICAL analysis of the Hawley tariff bill made by John C. Watson, statistician for the I. A. A., declares that protection of American agriculture requires adequate duties on imported commodities regardless of their source, use, or lack of identity with our products. It takes issue with assumptions of the House Ways and Means Committee that there is no reason or necessity for imposing duties on imported commodities not produced in this country, and, secondly, that it is improper to impose adequate duties on Philippine Island products for the protection of American agriculture.

The Illinois Agricultural Association believes "that in revising tariff duties, congress should take fully into account the present endeavor to establish a stabilized marketing system which will ensure to efficient farmers a profitable level of prices. In any such marketing system proper tariff duties must be an indispensable factor. It would defeat any marketing system if it should be found that higher domestic prices are not protected by tariff duties sufficiently high to prevent a flood of imports. It should not be assumed, therefore, that any duties which may be imposed on agricultural products, will, as so often has been true in the past, be ineffective or only partly effective. The only safe assumption is that a marketing system will be set up which will make them effective."

Think It Over

THE following editorial reprinted from the Chicago Tribune is representative of the tactics used to defeat the proposed state income tax measure in the General Assembly just closed.

The fact that your organization led the fight to initiate a fair and equitable taxing system based upon ability to pay is given due credit by this Chicago daily. We will not stop to discuss the mis-statements and erroneous conclusions in this editorial. You can do that at your leisure. Suffice it to say that to bring about an equitable taxation system is not an easy task. Unorganized farmers are doing nothing to help this just cause. You as Farm Bureau members are helping to bring about much needed reforms. Organization and money are needed to get a square deal for the farmer.

MAKING THE CITY MAN PAY

"A bill to impose an income tax in Illinois despite present constitutional limitations has been defeated in the house at Springfield, but proposals to amend the state constitution with a view particularly to income taxation are still under consideration. Those resolutions deserve far more careful study than they have received or are likely to receive at this session of the legislature.

"The demand for a state income tax comes chiefly from the Illinois Agricultural Association, made up of farmers, while the tax itself will be paid almost in its entirety by city dwellers. City dwellers, however, can defeat any taxation proposal which comes to a referendum, as the proposed amendment must, for, though Cook county has only a third of the legislature, it has substantially half the popular voting strength of the state. It follows that there can be little, if any, honest expectation of adopting an income tax amendment in Illinois until a vast majority of urban dwellers have been convinced that the tax item in their budgets will not be markedly increased by the new levy.

"It is not easy to see how this end can be achieved. If the income tax is substituted for the personal property tax, as farmers' organizations demand, the farmers will benefit because their personal property taxes constitute a considerable part of their total tax bills. On the other hand, the repeal of the personal property tax will give relatively little relief to the city man, while he will face the imposition of an income tax which at anything like the rates now being discussed must come close to doubling the total tax yield from Cook county.

"The city dwellers have seen their right to representation at Springfield taken from them. Whatever confidence the city voter may have had at one time or another in the fairness of downstate members toward Chicago has vanished as the years have rolled by without a reapportionment. Under the circumstances, the mere fact that downstate organizations are supporting an income tax measure is enough to damn it in the eyes of countless city voters. The leaders of the farmers may take pleasure in the notoriety which their advocacy of the amendment affords them, but they must realize that they are wasting their time if they are seriously interested in amending our tax laws as long as they proceed on the present basis. Nothing they propose in their present vein has a ghost of a chance of adoption in a referendum, for the city man is convinced the only object of the proposals is to rob him.

"We do not for a moment believe that the present tax laws of Illinois are above improvement. We are certain, however, that they are not going to be changed as long as the substitute forms of taxation are predicated on the theory that Chicago pays vastly too little for the support of the state, and downstate pays vastly too much. There is no indication that any other view than this is animating the downstate bloc in its approach to the proposed amendments."—Chicago Tribune.

Tune in on the I. A. A. Forum from Station WLS every Thursday night at 6:30 p. m., Central Standard Time.

The daily farm program of the I. A. A. from Station WJJD, Mooseheart (285 meters) is broadcast between 12:00 and 12:20 p. m., Monday to Friday inclusive. Hear the daily Chicago livestock market from the Producers, and each Friday the weekly market review. Outlook reports, reviews, and talks by I. A. A. staff members, officials, and leaders in farm thought are broadcast daily.

The delegation of 4-H Club champions accompanied by Club Leaders J. Ross Baird and Miss Mary McKee will stop at I. A. A. headquarters on Monday, June 17, just before leaving for Washington on the Capitol Limited.

The club members and their leaders will broadcast on the noon I. A. A. farm program from station WJJD, Mooseheart, at 12 o'clock central standard time.

The Logan County Farm Bureau represented by Farm Adviser J. H. Checkley, and a member of the Logan county school for Farm Bureau leaders will broadcast on the I. A. A. Forum program from WLS the night of June 20. The program that evening will be broadcast at 7:30 p. m. central standard time instead of the usual hour, 6:30.

J. A. Connery, manager of the Quincy Co-operative Milk Producers Association, was the Forum speaker on June 13. Mr. Connery told how Adams county dairymen have succeeded in marketing milk direct to the consumer, gaining for themselves a better price than they ever have had before, and delivering milk at perhaps the lowest price (10 cents a quart) charged on any market of equal size.

McLean Co. Farmers Meet in Pipe Line Case

FARMERS in Piatt county have been offered damages of $2.50 per rod by the Texas-Empire Pipe Line Co., an Illinois corporation now engaged in laying a line through central and southwestern Illinois. It is understood that $2 per rod was offered as advance damages and 50 cents a rod for a perpetual easement to the land traversed.

Farm Bureau members in McLean county recently appointed a committee to represent them in conferring with company officials regarding a proper settlement for building the line through that territory.

L. J. Quasey, transportation director for the Illinois Agricultural Association, attended a meeting in Bloomington Tuesday, June 4, when plans for securing a settlement of the issues involved were adopted.

I. A. A. Tariff Study Sent Illinois Congressmen

President Smith Declares Hawley Bill Gives Cause for Grave Concern

"THE present ills of agriculture have been brought about by the disparity in the prices received for agricultural commodities and the costs of the many things farmers must buy," declared President Earl C. Smith in a recent letter to Illinois congressmen in which he enclosed copies of an analysis of the Hawley tariff bill recently prepared by the Department of Taxation and Statistics of the Association. "Agricultural stability can only be brought about by a proper relation of these two factors," he continued.

Increases Costs

"A study of the Hawley bill gives cause for grave concern to those whose interest is in agriculture, in that many upward revisions of the tariff are recommended on commodities that farmers must purchase, and which if adopted by congress will greatly increase costs of production on the farm. If agriculture is to receive any net benefits through tariff revision, it must be obvious that such revision upward as is made on agricultural commodities must not be offset by changes in those commodities that largely determine the costs of production."

Study Is Detailed

The tariff study covers in detail the most important agricultural products of Illinois and includes corn, blackstrap molasses, wheat, bran, shorts and milling by-products, lard and lard substitutes, live stock, butter, fats and oils, and fruits.

Copies of the I. A. A. tariff study may be secured by writing the Department of Taxation and Statistics, Illinois Agricultural Association, 608 So. Dearborn St., Chicago, Ill.

Ask the Farm Bureau First

THE name "Farm Bureau" is being used by people who have no right to use it, for their own selfish motives. Be on your guard against these impostors.

"Country Life" is the only Farm Bureau owned and controlled life insurance company in the United States. The "Illinois Agricultural Mutual" is the only state-wide Farm Bureau owned and controlled auto insurance company in Illinois. There are several privately owned life and auto insurance companies parading in Illinois under the Farm Bureau name attempting to "cash in" on its influence and standing. When in doubt call your County Farm Bureau office and get the facts.

Auto Insurance Co. Breaks All Records

Many Applications Ahead of April by Substantial Majority

THE Illinois Agricultural Mutual Insurance Co., the state-wide Farm Bureau auto insurance service set up by the I. A. A. two years ago had the largest month in point of business during May since it was organized. Exactly 873 applications for auto insurance were received during the month. The company now has more than 14,000 policyholders.

DuPage county leads all others with over 600 policyholders. Winnebago is next, and LaSalle third. Henry, Cook, Morgan, Champaign, Bureau, and Will all have more than 300.

During April, the previous high month, 817 applications were received at insurance headquarters in Chicago. Total applications for the two months aggregated 1,690.

The following solicitors and Farm Bureaus wrote five or more applications during the month of April and were presented with a silver watch fob bearing the emblem of the Company:

Name	County
Bureau Co. Farm Bureau	Bureau
Howard Jokisch	Cass
Roy Mitchell	Champaign
Clair E. Hay	Christian

Your Policy Your Company Your Success

THE united action of Illinois Farm Bureau members insured Country Life's success within a month after it opened for business. The result is that Country Life moved up ahead of nearly 100 other old line companies in total life insurance in force.

The three policies now offered are particularly designed for you—were approved by your representatives—the Executive Committee of the Illinois Agricultural Association. You have done well. You can and will do better.

Two Millions Of Life Insurance In June

THE Farm Bureau organization that represents Country Life Insurance Company has established a goal of two millions of life insurance before the close of this month. Every Farm Bureau member shares the responsibility of seeing that his county does its share in the June drive. A Country Life policy in every Farm Bureau member's home is our goal.

Following are the counties that have officially appointed general insurance agents to work in close harmony with the local Farm Bureaus. Where no general agent has been appointed, get in touch with your County Farm Bureau office.

County	General Agent
Adams,	J. C. McLean, Quincy
Bond,	Chas. A. Smith, Greenville
Brown,	H. C. Peters, Mt. Sterling
Cass,	H. Jokisch, Virginia
Christian,	Clair E. Hay, Taylorville
Clark,	Chas. Strohm, West Union
Clay,	Wm. Chambers, Clay City
Clinton,	Farm Bureau, Breese
Cook,	Geo. B. Johnson, Arlington Heights
Cumberland,	E. B. White, Neoga
Crawford-Jasper,	A. P. York, Robinson
DeWitt,	Farm Bureau, Clinton
Douglas,	Fred K. Steven, Tuscola

Insurance At Cost—Farm Bureau Owned—Highest Security

THE Illinois Farm Bureau Baseball League swung into action in two divisions on Saturday, May 25, when the first games of the 1929 season were played. Several upsets resulted. Woodford beat the state champions from Tazewell at Morton 5 to 4. On the same day Peoria defeated the 1927 champions from Marshall-Putnam 5 to 2. In Div. V Logan defeated McLean at Bloomington 4 to 2 while Champaign beat Ford at Tolono 8 to 4.

Ford county is a new entry in the League and showed up very well in its first game. Champaign made 13 hits and 7 errors, while Ford gathered 5 hits and made only 4 errors.

All games were postponed on account of rain on Saturday, June 1. Champaign and Logan played five innings at Lincoln when the two teams were tied 4 to 4, each team scoring 4 runs in the 5th inning. Buddemeier of Champaign allowed 9 bases on balls, 6 of which came during the rain in the 5th inning.

All teams in the League have been notified to refer eligibility questions to their district dictators. When there is an appeal from the decision of the dictator the dispute is referred up to the State Arbitration Committee for final settlement. The State Arbitration Committee so far has held to a strict interpretation of the rules and by-laws on all eligibility questions.

The eligibility clause provides that "Any Farm Bureau member, or dependent member of his family, whose principal financial interests are in farming, shall be eligible to play in this League. Said eligibility must be certified by the director or farm adviser from each county.

"Eligible players can play only on the Farm Bureau team of the county in which their Farm Bureau membership or connection is held."

Up-to-date four full-size divisions containing four teams each are organized. Div. VI, including Cass, Morgan, Sangamon, and possibly Greene had not played any games up to June 1, but the preliminary schedule called for games at Arenzville and Jacksonville on June 5. Wabash and Wayne counties in southeastern Illinois have definitely signed up to play. An effort is being made to organize additional teams in that section to round out the district.

Twenty-one teams are now organized and entered officially in the League. Several more will be added it is hoped before the season is well advanced.

The Lee-Stark county game postponed because of rain June 1 will be played either July 6 or July 20 according to Farm Adviser E. E. Brown.

The following games in the Illinois Farm Bureau Baseball League were scheduled for June 22: Knox vs. Stark at Stark, Lee vs. Henry at Henry, Woodford vs. Peoria at Eden, Henderson vs. Hancock at Biggsville, Warren vs. McDonough at Monmouth Park, McLean vs. Ford at Bloomington, Champaign vs. Logan at Tolono, Sangamon vs. Cass at Springfield, and Greene vs. Morgan at Greene.

Mid-West Training School, June 24-27

I. A. A. Officers and Farm Bureau Leaders to Attend

SPRING PARK, Minnesota, on Lake Minnetonka located about 25 miles out of St. Paul will be headquarters for the fourth annual Mid-West Training School sponsored by the middle west Farm Bureau federations. The conference will be held June 24-27.

G. E. Metzger

President Earl C. Smith and Secretary Geo. Metzger will head the delegation from Illinois. District organization managers, local leaders, county advisers and Farm Bureau members are invited to attend. Mr. Metzger will preside at the first day's session, and Sam H. Thompson will deliver the principal address that evening.

President Smith will speak at the banquet on Tuesday night. Among the speakers who will address the school during the week are Prof. Fred Russell of the University of Illinois; Dr. F. M. Rarig, University of Minnesota, M. S. Winder, Betty Eckhardt, University of W. Va., John Brandt, president, Land O' Lakes Creameries, Mrs. C. W. Sewell, and others.

Problems of organization will be the chief subject for discussion throughout the week.

---

200 at Conferences

More than 200 live stock marketing leaders and producers attended a series of four conferences held during May at Indianapolis, Peoria, St. Louis, and Chicago.

The meetings were arranged by the Livestock Marketing Department of the I. A. A., the Producer agencies, and the Illinois County Farm Bureaus.

New Books

"EIGHT years ago I was County agent of Jackson County, Missouri," says E. A. Ikenberry, in a new book on roadside marketing entitled "MAKING YOUR OWN MARKET" by Russell Lord and Thomas Delohery. "But I saw more money in raising apples myself and marketing them myself," continues Ikenberry, "so I quit.

"My average crop of apples now runs from 15,000 to 20,000 bushels a year. Also, I have 12 acres of pears, grapes, strawberries, and blackberries. All small fruit is sold fresh at the roadside. Apples at 75 cents to $2 a bushel, and cider at 25 to 40 cents a gallon net me 15 to 20 per cent more than I would get by shipping, some seasons."

Ikenberry operates a large roadside market adjoining his orchard and during the busy season which is from September to December he and his helpers often handle as many as 1,000 people a day.

This interesting story, together with 69 similar stories of actual experiences of farmers in roadside marketing are related in the book written by two associate editors of *Farm and Fireside*. The stories are all short and to the point. They present actual experiences of farmers in all parts of the United States and deal with every conceivable product, including fresh and canned vegetables, fruits, eggs, cream, butter, and cheese, meats, cut flowers, and dogs. The book is divided into five parts. The first deals with roadside markets; the second with other ways of selling near home; the third with retail routes; the fourth with sales specialties; and the fifth with mail order sales.

This little volume contains a wealth of practical, common-sense information and suggestions for those who are situated to sell farm produce at roadside markets, by mail, or by retail routes in neighboring towns. The book is published by MacMillan and sells for $1.25. Send your check to the Dept. of Information, Illinois Agricultural Association, 608 So. Dearborn St., Chicago, and we will order a copy sent to you.

Sued for $25,000

E. A. Extrand of Champaign county, a policyholder in the Illinois Agricultural Mutual Insurance Company, is defendant in a suit for $25,000 resulting from his automobile striking a pedestrian a short time ago. The accident happened in Georgetown, Vermillion county, Ill.

According to Extrand the injured person negligently left the sidewalk to cross the street and ran right into the side of the car. The handle of the door struck him and caused a fracture of the skull.

The Illinois Agricultural Mutual is defending its policyholder and is looking after his interests in court.

Your Policy Your Company Your Success

THE united action of Illinois Farm Bureau members insured Country Life's success within a month after it opened for business. The result is that Country Life moved up ahead of nearly 100 other old line companies in total life insurance in force.

The three policies now offered are particularly designed for you were approved by your representatives—the Executive Committee of the Illinois Agricultural Association. You have done well. You can and will do better.

Two Millions Of Life Insurance In June

THE Farm Bureau organization that represents Country Life Insurance Company has established a goal of two millions of life insurance before the close of this month. Every Farm Bureau member shares the responsibility of seeing that his county does its share in the June drive. A Country Life policy in every Farm Bureau member's home is our goal.

Following are the counties that have officially appointed general insurance agents to work in close harmony with the local Farm Bureaus. Where no general agent has been appointed, get in touch with your County Farm Bureau office.

The Illinois Agricultural Mutual is defending its policyholder and is looking after his interests in court.

By Frank Gougler

RICHLAND COUNTY producers were the pioneers in co-operative produce marketing in Southern Illinois. June 1, this county renewed its contract with Tip-Top Creamery, Vincennes, Indiana, for the fourth consecutive year. Three stations are included in this contract and their combined output of over 150,000 pounds of butterfat will be sold.

* * *

Adjoining counties seeing the value of this kind of marketing are now organizing similar associations. During April two units were started in Crawford County, one at Robinson, and the other at Oblong. This cream goes to the Schlosser Brothers Creamery at Indianapolis. In a recent letter Farm Adviser Frazier writes: "May 20 and 21 have been definitely set for cream improvement meetings at Oblong and Robinson and Schlosser Bros. will furnish refreshments. Stations are now handling a nice volume of cream."

* * *

The organization most recently established in Southern Illinois is located at Albion in Edwards County. Farm Adviser H. N. Myers reports that the following producers were elected directors for the first year: Harry Perkins, president; Allen Crome, vice-president; Geo. Works, sec'y-treas.; Smith Bunting and Ira Smith. The manager is Albert Michels. During years past Albion has had the lowest market for produce in that part of the state. Even the nearby towns would pay from one to two cents more for butterfat.

This condition has now changed as illustrated by a recent letter received from Farm Adviser C. W. Simpson of White County, located just south of Edwards. The White County Farm Bureau is organizing a unit at Norris City and on May 1, Simpson happened to be at both points—Albion and Norris City, and he writes: "Today they were paying 41c per pound for butterfat at Norris City while at Albion they are paying 44 cents." This is typical of what happens when a co-operative unit is established.

Scott County Women Sponsor F. B. Dinner

TWO hundred seventy-five men and women attended a dinner sponsored by the women's committee of the Scott County Farm Bureau, on Friday, May 31. The Scott County Farm Bureau orchestra and the official Farm Bureau song leader had a prominent part in the entertainment.

Mrs. W. C. Simmons, chairman of the women's committee, was toastmaster. Secretary Geo. E. Metzger represented the Illinois Agricultural Association and Mrs. Chas. W. Sewell, the American Farm Bureau Federation.

Every Farm Bureau member and his wife was invited to attend.

"The principal idea back of the meeting," said Sec'y. Metzger, "was to convey to the non-members first-hand information concerning the Farm Bureau, the Illinois Agricultural Association, and the American Farm Bureau Federation. This type of meeting is new to many sections of Illinois and I believe has a great deal of merit. Everyone who attended declared the meeting a great success."

High Court Upholds Farmers' Co-operative

Old Line Die-Hards Found Guilty of Unfair Practice

THE Supreme Court of the United States in the decision handed down on May 20 sustained the order of the Secretary of Agriculture in the so-called Oklahoma boycott case against old-line market agencies and live stock dealers operating on the Oklahoma National Stock Yards. The case, which dates back more than three years, has attracted large public interest by reason of the boycott by various market agencies of the Producers' Commission Association.

In an order of March 31, 1926, the Secretary directed the market agencies and dealers operating at the Oklahoma National Stockyards to cease from engaging in and using any unfair or discriminatory practices in connection with the purchase and sale of livestock by failing or refusing to buy livestock from or sell to the Producers' Commission Association, while at the same time carrying on business among themselves. The order also prohibited the respondents from agreeing among themselves to refrain from dealing with the Producers' Commission Association.

Grant Injunction

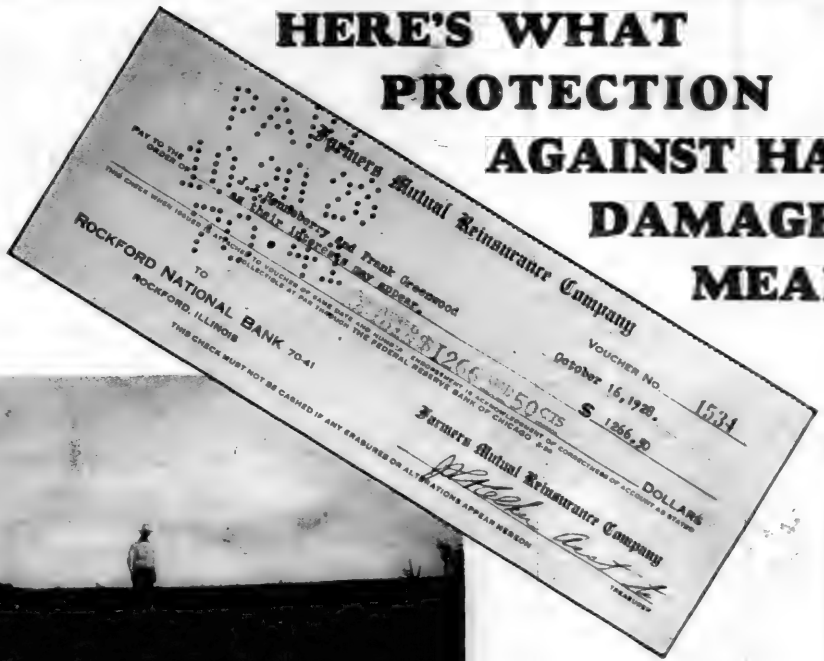
A District Court of three judges granted an injunction against the enforcement of this order, whereupon the Government appealed the case to the Supreme Court of the United States. The market agencies and dealers urged that there was nothing to prevent their dealing and refusing to deal with whom they chose. With respect to this claim the Supreme Court said, "But we think it does not need argument to show that a boycott of a dealer in a stockyard may be an unfair practice under the act as it is found to have been in this case."

The Producers' Commission Association was a cooperative organization formed under an Oklahoma statute which forbade the handling by such associations of the agricultural and horticultural products of nonmembers, except for storage. The market agencies and dealers contended that it did not appear at the hearing before the Secretary of Agriculture, that the Commission Association confined its handling of livestock to the products of its members and that, for this reason, the enforcement of the Secretary's order should be enjoined. The District Court agreed with this view and held that it was incumbent upon the Government to show that the livestock handled by the Producers' Commission Association belonged to members only.

Boycott Was General

The Government claimed that it would be absurd to suppose that a cooperative association organized for the special purpose of aiding its members should confine its business to the illegal sale of the products of nonmembers. With this contention of the Government the Supreme Court agreed. That court said, "If not all, we must assume that some, at least, of its business was legitimate and that to some extent it might sell livestock that its members produced. But the boycott was general, intended it would seem to drive the Producers' Commission Association out of business. The association was a competitor of the appellees and the suggestion that it was acting ultra vires (beyond its power) sounds like an after-thought and can not be supposed to have been the motive for the act. . . . But whatever the motive, nothing is shown or suggested by the evidence to justify the general boycott that the Secretary's order forbade."

Clarifies Act



The order of the Secretary was issued under the packers and stockyards act and the favorable decision of the Supreme Court is considered by officials of the Bureau of Animal Industry, which administers the act, to have an important bearing on the future marketing of livestock at public stockyards. The policy of the bureau is to test in the highest tribunal all cases in which the orders of the department are questioned, thereby clarifying the various provisions of the act and defining the scope of Federal authority.

Production Exceeds Population Growth

FARM production in the United States has increased a half more than population since the world war. This increase in production has been more rapid than at any time since 1900 and probably more rapid than at any time since 1890. Moreover, it has been accomplished despite a decrease in the number of farms and farm population, a decrease in the number of farm animals, and a slight decrease in crop acreage. Incomplete data for the years 1927 and 1928 indicate that agricultural production is still increasing at a more rapid rate than the rate of increase in our population.

These facts are cited by Dr. O. E. Baker, economist in the United States Department of Agriculture, in support of his belief that the welfare of agriculture necessitates careful consideration of any proposals involving an increase in crop acreage.

HERE'S WHAT PROTECTION AGAINST HAIL DAMAGE MEANS

A July 24th hail storm stripped this Missouri cornfield to the ground

These Will County, Ill., policyholders were saved from a heavy loss, when the above check reimbursed them for hail damage to crops last year

HAIL storms come when you least expect them. No part of Illinois and the corn belt is safe from their path. Hail already has destroyed thousands of dollars worth of field and orchard crops and farm property this year in Southern Illinois. Last year the northern and western parts of our state were visited by destructive hail storms in mid-summer. **It is better to have protection and not need it than to need insurance and not have it.** Protection against hail in the Farmers Mutual Reinsurance Company means a check to cover your loss following the appraised damage.

Write for our pamphlet describing this service.

FARMERS MUTUAL REINSURANCE COMPANY

608 So. Dearborn St.

CHICAGO

1075 Policy Holders and $1,400,000 of Hail Insurance Coverage up to June 10

Protect Your Buildings

PROTECTION to buildings against hail was recently added to our fire and windstorm policy at an additional cost of only five cents per $100 insurance. Windows were knocked out and shingles stripped from the roofs in the recent hail storm that hit Williamson County. Hail stones larger than hens' eggs not only stripped trees and field crops, but battered farm buildings and houses over a wide territory. Your own company offers hail, fire, windstorm and tornado insurance and reinsurance at a low cost and gives you highest security.

The case, which dates back more than three years, has attracted large public interest by reason of the boycott by various market agencies of the Producers' Commission Association.

In an order of March 31, 1926, the Secretary directed the market agencies and dealers operating at the Oklahoma National Stockyards to cease from engaging in and using any unfair or discriminatory practices in connection with the purchase and sale of livestock by failing or refusing to buy livestock from or sell to the Producers' Commission Association, while at the same time carrying on business among themselves. The order also prohibited the respondents from agreeing among themselves to refrain from dealing with the Producers' Commission Association.

Grant Injunction

A District Court of three judges granted an injunction against the enforcement of this order, whereupon the Government appealed the case to the Supreme Court of the United States. The market agencies and dealers urged that there was nothing to prevent their dealing and refusing to deal with whom they chose. With respect to this claim the Supreme Court said, "But we think it does not need argument to show that a boycott of a dealer in a stockyard may be an unfair practice under the act as it is found to have been in this case."

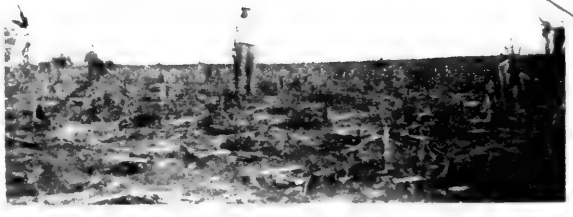
The Producers' Commission Association was a cooperative organization formed under an Oklahoma statute which forbade the handling by such associations of the agricultural and horticultural products of nonmembers, except for storage. The market agencies and dealers contended that it did not appear at the hearing before the Secretary of Agriculture, that the Commission Association confined its handling of livestock to the products of its members and that, for this reason, the enforcement of the Secretary's order should be enjoined. The District Court agreed with this view and held that it was incumbent upon the Government to show that the livestock handled by the Producers' Commission Association belonged to members only.

Boycott Was General

The Government claimed that it would be absurd to suppose that a cooperative association organized for the special purpose of aiding its members should confine its business to the illegal sale of the products of nonmembers. With this contention of the Government the Supreme Court agreed. That court said, "If not all, we must assume that some, at least, of its business was legitimate and that to some extent it might sell livestock that its members produced. But the boycott was general, intended it would seem to drive the Producers' Commission Association out of business. The association was a competitor of the appellees and the suggestion that it was acting ultra vires (beyond its power) sounds like an after-thought and can not be supposed to have been the motive for the act. . . . But whatever the motive, nothing is shown or suggested by the evidence to justify the general boycott that the Secretary's order forbade."

Clarifies Act

The order of the Secretary was issued under the packers and stockyards act and the favorable decision of the Supreme Court is considered by officials of the Bureau of Animal Industry, which administers the act, to have an important bearing on the future marketing of livestock at public stockyards. The policy of the bureau is to test in the highest tribunal all cases in which the orders of the department are questioned, thereby clarifying the various provisions of the act and defining the scope of Federal authority.



Production Exceeds Population Growth

FARM production in the United States has increased a half more than population since the world war. This increase in production has been more rapid than at any time since 1900 and probably more rapid than at any time since 1890. Moreover, it has been accomplished despite a decrease in the number of farms and farm population, a decrease in the number of farm animals, and a slight decrease in crop acreage. Incomplete data for the years 1927 and 1928 indicate that agricultural production is still increasing at a more rapid rate than the rate of increase in our population.

These facts are cited by Dr. O. E. Baker, economist in the United States Department of Agriculture, in support of his belief that the welfare of agriculture necessitates careful consideration of any proposals involving an increase in crop acreage.

These Will County, Ill.[illegible] policy-holders were saved from a heavy loss, when the above check reimbursed them for hail damage to crops last year

A July 24th hail storm stripped this Missouri cornfield to the ground

AIL storms come when you least expect them. No part of Illinois and the corn belt is safe from their path. Hail already has destroyed thousands of dollars worth of field and orchard crops and farm property this year in Southern Illinois. Last year the northern and western parts of our state were visited by destructive hail storms in mid-summer.

Protection against hail in the Farmers Mutual Reinsurance Company means a check to cover your loss following the appraised damage.

Write for our pamphlet describing this service.

FARMERS MUTUAL REINSURANCE COMPANY

608 So. Dearborn St.

CHICAGO

ROTECTION to buildings against hail was recently added to our fire and windstorm policy at an additional cost of only five cents per $100 insurance. Windows were knocked out and shingles stripped from the roofs in the recent hail storm that hit Williamson County. Hail stones larger than hens' eggs not only stripped trees and field crops, but battered farm buildings and houses over a wide territory. Your own company offers hail, fire, windstorm and tornado insurance and reinsurance at a low cost and gives you highest security.

IT'S BAD ENOUGH TO HAVE AN ACCIDENT

Whose fault it was is not so important as how these wrecks might have been avoided

IT'S WORSE IF YOU HAVE NOT PROTECTED YOURSELF FROM FINANCIAL LOSS AND WORRY

YOU may drive ever so carefully but you never know when the careless driver will cross your path. Every time you go out on the public highway without proper insurance protection you hazard not only your automobile but also your estate and your future happiness. This is the season for accidents. When the traffic lanes are crowded and travel is at its peak, why risk everything when you can avail yourself of this Farm Bureau service and secure full protection in *your own company* at cost? A full coverage policy brings you relief from all worry against hospital bills, court costs, personal injury, damage suits, collision and property damage, fire, windstorm, and theft. Friendly treatment, representation in court, and prompt settlement of claims are a part of the service.

URBANA, ILL.

"Organization"—the Answer

Secretary Hyde Expresses Views In Atlanta Speech

"ONE general answer to farm problems is organization. Organization to control marketing, to standardize output, to eliminate waste and duplication of a marketing and distributing system, which, generally speaking, absorbs two dollars for every one dollar it returns to the farmer. Thus the farmer can approximate the position of industry, or of other groups," declared Hon. Arthur M. Hyde, secretary of agriculture, before the annual convention of the National Educational Association, Atlanta, on July 4.

"By the long arm of his own organization," continued Mr. Hyde, **"the farmer can make himself felt beyond his line fences and in the markets of the world. Through his organization, the farmer can get information as to commodity supplies, can bring his production within the limits of demand, can control the surplus problem by preventing it. By organization the farmer can take control of his own industry; re-establish the independence of his calling; win his own place in the sun of economic equality, and having won it, hold it against all the changing vicissitudes of the future.**

Arthur M. Hyde

Purpose of Bill

"To assist in the organization of agriculture; to take the problems of the various farm commodities out of the realm of politics and partisan bickering, and to meet them in the realm of economics; to set up an authoritative tribunal which shall study each separate problem, and afford leadership for agriculture in all its phases; and to do this, not by subsidy nor by governmental dabbling in business, but by helping the farmer to help himself through his own organizations—this is the aim and purpose of the farm relief bill.

"In all the history of America, there has been no program and no legislation in aid of any industry comparable with it. Never has a President heretofore called a special session of congress to deal with the problems of one class or calling.

What The Board Does

"President Hoover not only called the session but he charged it in a specific message to deal primarily and almost exclusively with the needs of agriculture. In his campaign, he advocated almost precisely the bill which was passed. He has favored clothing the farm board with broader powers, defined with less limitation, than have been possessed by any board ever created in the government. He has backed his faith by authorizing the use of $500,000,000 to effect the purpose of equalizing the economic position of agriculture. He has acted promptly, generously, and wisely.

"The board does not buy or sell. It has no right to engage in business. Its job is to foster the organization of agriculture, to finance farmer-owned and farmer-controlled co-operatives, which may buy, sell, process or store farm commodities.

Like An Architect

"The board serves in exactly the same capacity as a supervising architect serves the builder of a skyscraper or a bridge. The builder must provide the necessary funds, and a proper plan. The supervising architect must find the answer to technical questions and see the job through. Precisely this plain, simple, practical scheme has been fostered and set up by the statesmanship of President Hoover. The plan is made; the funds provided; the board is ready to supervise the job.

"Rome was not built in a day, nor will agriculture be emancipated over night. Much depends upon the character and ability of the men who compose the board. But much depends, too, upon the co-operative associations which are already formed, or will hereafter be formed. The board cannot function on its own account. The initiative lies with the farm co-operative associations.

"It is not an evasion of responsibility, but a statement of fact to say that the success of the farm bill depends upon team work between the board and the farm co-operatives, in whose aid the legislation was designed and around whom it is built.

Never Attempted Before

"I know it will be said that it cannot be done; that agriculture is too far flung; composed of too many millions of units; is too individualistic; ever to stand organization. But is it? Has the attempt ever been seriously and persistently made? Has not the effort been rather to find a magic cure-all by legislation which will by some mysterious wizardry whisk the surplus out of the way, leaving agriculture the pleasing task of increasing the next surplus?

"Is not the stake great enough to justify the undertaking? Let us not forget that the sine qua non of successful agriculture is not merely farming, but profit. We seek prosperous farms able to maintain good schools and afford to present and future Americans an American standard of living.

"In one of his campaign speeches, President Hoover uttered this inspiring sentiment:

What Hoover Said

"'My conception of America,' he said, 'is a land where men and women may walk in ordered freedom in the independent conduct of their occupations; where they may enjoy the advantages of wealth, not concentrated in the hands of a few, but spread through the lives of all; where they may build and safeguard their homes, and give their children the fullest advantages and opportunities of American life; . . . where a contented and happy people, secure in their liberties, free from poverty and fear, shall have their leisure and the impulse to seek a higher life.'

"In this statement is the essence of our na-

One Advantage of Sleeping on the Floor Is That You Can't Be Kicked Out of Bed

This is just another way of saying if you are basically right on price you need never worry about being undersold.

Being able to buy life insurance in your own company AT COST is like that when costs are as low and quality as high as it is possible to get them.

What is cost? In some companies cost is one thing and in COUNTRY LIFE it is another.

COUNTRY LIFE'S cost is low because of:

1. Lower commission expense for selling through direct contracts with County Farm Bureaus.
2. Low rates based on modern mortality, which considers the increased span of life.
3. The elimination of job holders, who consume a substantial portion of the policyholders' money in many companies.
4. The advantage of 95 already organized counties or agencies with no additional expense for organization.
5. The Good Will of the Farm Bureaus whose members own the company. This Good Will is worth millions to Farm Bureau members.

Your help will place $50,000,000 of life insurance on the books the first year and put COUNTRY LIFE ahead of two-thirds of the old line companies in volume.

Your co-operation will demonstrate the ability of farmers to succeed in a great self-help undertaking.

Your aid will create a large volume of business to increase dividends and benefits beyond our fondest hopes and expectations.

The Illinois Agricultural Association RECORD

Published monthly by the Illinois Agricultural Association at 404 North Wesley Ave., Mount Morris, Ill. Entered as second-class matter at post-office at Mount Morris, Ill., Oct. 20, 1925, under the Act of Mar. 3, 1879. Acceptance for mailing at special rate of postage provided in Section 413, Act of Feb. 28, 1925, authorized Oct. 27, 1925.

Number 7 JULY, 1929 Volume 7

Many Farm Bureau Picnics Scheduled

August Will Be Big Month for Outdoor Gatherings

A HEAVY demand for fried chicken, pickles, potato salad, pie and all the other good things that come out of picnic baskets is in prospect for August and early September for the normal number of post-harvest Farm Bureau picnics that are being scheduled at this early date.

The "Home Rule" plan for district gatherings again is being followed. Farm Bureaus in each congressional district have been asked to declare whether or not they will help sponsor a district I. A. A. Farm Bureau picnic.

Arrangements in such cases will be left entirely with the local picnic committee but the I. A. A. will provide speakers and a public address system.

Five district picnics already have been scheduled. Arrangements for others are being made. Dates and places will be announced within the next two weeks.

Shelbyville on 16th

The 19th district picnic at Forest Park, Shelbyville, on Aug. 16 will open the season. At least this is the first joint event scheduled and members in the counties of Shelby, Coles, Moultrie, Piatt, Dewitt, Champaign, Macon, and Douglas are counting on having their alfalfa made, and the wheat and oats in the bin so nothing will stop a great district-wide jollification.

The 20th district chose to meet again on the state hospital grounds at Jacksonville. But this year the date is Aug. 17, two weeks earlier than the Labor Day gathering of last year when overcoats early in the day were comfortable.

Miller Park, Bloomington, where last year was held one of the largest of the 14 district picnics will entertain counties in the 17th again with the McLean County Farm Bureau and local business organizations acting as host. This picnic is scheduled for Wednesday, Aug. 28. The date was moved up a day to make room for the 25th district picnic at Sparta on the 29th.

Another at Sparta

The Randolph County Farm Bureau and Sparta business men will play host to the southwestern Illinois counties when they gather on the comfortable and commodious Sparta Country Club grounds.

The 24th district picnic at Olney last year was so overwhelmingly successful that the Farm Bureaus in that section voted to let Richland County have the honor and responsibility again. The Fair Grounds on Aug. 30, Olney, are the time and place for southeastern Illinois members to mark on the calendar.

While no dates have been scheduled for picnics in the 12th, 13th, 14th, and 22nd districts committees are at work and announcements may be expected shortly.

Alexander Legge

Morrison in Whiteside county will probably be the scene of the district gathering for northwestern Illinois farmers. Monmouth has been named tentatively as the gathering place for the 14th district picnic, and DeKalb county seems a likely place for the proposed joint picnic between the 11th and 12th district Farm Bureaus.

The field is being combed for a new roster of speakers. All interest now centers around the Federal Farm Board scheduled to hold its first meeting at Washington July 15 and discussions of the new Marketing Act and future activities of the Farm Board may be expected at the district gatherings. Thus while recreation will be the chief drawing card, the picnics will have greater significance as they bring a greater realization and understanding of the part organized farmers will play in the movement toward agricultural stability and prosperity.

Mark 'Em On Your Calendar

Aug. 16—19th Dist. I. A. A. Farm Bureau Picnic, Forest Park, Shelbyville.
Aug. 17—20th Dist. Picnic, Jacksonville.
Aug. 28—17th Dist. Picnic, Miller Park, Bloomington.
Aug. 29—25th Dist. Picnic, Country Club, Sparta.
Aug. 30—23rd Dist. Picnic, Fair Grounds, Olney.
Others To Be Announced Later.

Members of Federal Farm Board Chosen

President Hoover Selects Able Executive As Chairman

ALEXANDER LEGGE of Chicago, president of the International Harvester Company, who has accepted the chairmanship of the Federal Farm Board on the invitation of President Hoover, is an outstanding business man who expressed friendliness to an effective farm relief program years ago. He is well known to leaders in the Farm Bureau movement.

Mr. Legge was born on a farm in Dane County, Wisconsin, in 1866 and lived on a farm until 1891 when he entered the employment of the McCormick Reaper Company. Mr. Legge worked his way up in the harvester business at Omaha. He became general manager of the International Harvester Company in 1913 and president in 1922. Legge was a dollar-a-year man during the war, working with Bernard Baruch, chairman, George N. Peek, and others on the War Industries Board.

Stone Vice-Chairman

James C. Stone of Lexington, Kentucky, vice-chairman of the Federal Farm Board, was one of the founders of the Burley Tobacco Growers' Association which is reported to have done an annual business of $50,000,000. Stone is recognized in the tobacco growing regions as an able, capable, business-type farm leader who has been identified with the cause of co-operative marketing for many years.

C. B. Denman of Farmington, Mo., president of the National Live Stock Producers' Association, will represent the live stock industry on the Board. He is perhaps better known to Illinois farmers than any other member.

Denman is known as a keen, level-headed, aggressive leader in the live stock marketing field. His energy and devotion to the Producer movement has helped make it a successful co-operative which last year did a business in excess of $130,000,000.

All Co-op. Leaders

Carl Williams of Oklahoma City is editor of the Oklahoma Stockman and Farmer. He had much to do with the organization of the American Cotton Growers' Exchange which he served at one time as president. He has been an advocate of co-operative marketing as one of the tools for helping farmers gain economic equality.

Charles C. Teague of Los Angeles, born on a farm in Maine, migrated to California as a young man where he engaged in fruit farming. He 'rose through the ranks during the organization of the California Fruit Growers' Exchange which he now serves as president. He is also president of several other co-operative commodity marketing associations, is a member of the farm legislative committee of California,

THE CHICAGO DAILY NEWS, TUESDAY, JUNE 4, 1929.

LIFE INSURANCE RATES TOO HIGH, EXPERTS ADMIT

Chicagoans Discuss Effort Being Made for Readjustment.

BY GIFFORD ERNEST.

Life insurance rates in force today were computed on mortality tables now considered antiquated by actuaries and are admittedly too high, according to insurance experts seeking readjustment of premium rates.

The average rate for a straight life policy in a participating company is about $26.50 annually for a person 35 years old. This is approximately 30 per cent too high, say some actuaries and executives.

Admission that the rate is excessive is made when at the end of one or two years the company starts an annual refund or dividend of about $6.50 in the better companies and approximately $4 in other companies, Lawrence A. Williams, insurance expert and general executive of the Country Life Insurance Company of Illinois, pointed out today.

Terms It Indefensible.

"Insurance companies admit by this customary refunding procedure that they charge too much," he said. "In a scientific business like insurance, a guess on rate fixing that is almost 30 per cent out of the way is indefensible.

"Life insurance rates required by law are mostly based on the American experience mortality tables, now more than fifty years old. These tables are antiquated now that the life span has increased, but rates haven't been lowered.

"If the premium rate is so high that 30 per cent of it can be paid back in annual dividends or refunds, why not take it off the first cost of insurance?"

Insurance circles are agog with the controversy over high premium rates, according to Mr. Williams, who gave the points of contention that are set forth in conferences of insurance executives, experts, specialists and through their journals.

Paying for Promotion.

High rates, it is argued, provide a surplus over the percentage of profits allowed by law. This surplus makes available a huge fund for getting new business, and permits companies to pay as high as 75 per cent of the first annual premium to agents in commissions. If the premium rates were cut, commissions now paid would have to be reduced. The present rates enable the companies to pay high acquisition costs.

There is no monopoly in life insurance business. Approximately 250 companies do a competitive business in the United States and new ones are being formed all the time. America's insurance business has $100,000,000,000 in policies in force.

"The banking business, with assets totaling $90,000,000,000, is made to look like a kindergarten when compared to the insurance business," Donald F. Campbell of Chicago, well known insurance actuary, remarked.

"Life insurance is as near a public utility as any business can be," continued Mr. Williams. "The public's funds are contracted for to be paid in for life, or a set number of years, and the public is ignorant that of the amount taken, practically 30 per cent is in unwarranted premium charges."

Has Many Ramifications.

Involved in the administration of the insurance business, with its more than $100,000,000,000 are politics, building projects, tariffs, taxes and international policies, according to Mr. Williams, who maintains that the officialdom of the life insurance business constitutes the hierarchy keeping up the premium rates.

Opponents to reduction of the rates hold that the benefits of increased life expectancy obtain mainly in the younger ages and that corrections of premium tables are being made. Also that because of vigorous competition there is no call for a change.

"Confusion also results from the popular belief that premium rates are based on expectancy of life," said Mr. Campbell. "On account of interest and other factors this is not wholly the case. Rates of mortality in life tables are derived by the use of certain formulae applied to census statistics.

"The case is quite different in construction of mortality tables based on insured lives where the individuals do not come under observation until accepted as a risk by insurance companies.

Figuring Mortality Tables.

"The mortality tables used as a basis of figuring life insurance premium rates were built on an aggregate of selected persons, and therefore the life expectancy figures in insurance tables are approximately that of the latest findings in census tables."

Nevertheless, Mr. Williams points out, the refunding of a percentage of annual premiums goes on. He also thinks that the dividends are paid as a result of the tremendous competition in the business, and not because of business ethics.

"In other words," he said, "competition has done for policy holders what laws regulating premium rates have failed to do. But much more could be done if an investigation were made to ascertain scientifically what rate should be paid, and what the companies do with the interest on the excess premium collected before they return it in the form of so-called dividends."

Reprint from Chicago Daily News

Country Life Willing to Debate Ins. Rates

Seeks to be Fair at All Times

By L. A. Williams, Manager, Country Life Insurance Company

THROUGH the program of Country Life Insurance Company, we have been convinced beyond a doubt of the great service that can be rendered to members of Farm Bureaus and their families. The low, yet actuarially sound, guaranteed rates of Country Life have been compared with the rates of other companies. Such comparisons cannot be avoided in the future.

Alfred M. Best Company, Inc., has taken exception to certain references in an article by me in the May issue of the RECORD, which might be construed by some as reflecting upon the business integrity of the Best Company.

The statements in the article objected to are as follows:

"They champion the overcharge methods of their clientele as they recognize their 'Master's Voice'."

"And of course it is logical that a class publication shall champion those who have been fooling the public so long."

"When a little company like Country Life Insurance Company, with honesty of purpose can make all the big old line companies squeal through a mouthpiece, it is very apparent that Sam Jones' old saying, 'Every once in awhile a burnt sinner will squeal' is overwhelmingly true."

The article in the May issue followed an interchange of correspondence between A. Dexter Best of the Best Company and myself, copies of which were published by the Best Company in the May 1st issue of Best's Insurance News. The officers of the Best Company appear to think that these statements are a reflection upon the business integrity of their company. Inasmuch as the article was intended to set forth justification of the position and rates of Country Life Insurance Company and in no way as an attack upon the business integrity of Alfred M. Best Company, Inc., I desire at this time, and without further reviewing the controversy and to the end that no misunderstanding and prejudicial interpretation may arise from the above quoted statements, to recall them and suggest, as is done in judicial proceedings, that same be stricken from the RECORD.

There can be no question but that the Best Company has rendered a valuable service to business through its insurance publications. Its criticisms and approvals have been very helpful and constructive in the advancement of life insurance.

Welcome Rate Discussion

The officers of the Best Company have indicated their readiness to debate with me any matter of life insurance. I solicit and will welcome a discussion on the subject "Rates on Life Insurance" made by old line companies which claim to be mutual and operate on the participating plan.

The progress of the Country Life Insurance Company to date justifies ever increasing enthusiasm and optimism for greater service to its policyholders than was anticipated at the time of its organization. We shall continue to put forth every additional constructive effort for its advancement in a manner that will accrue to the benefit of the policyholder and make every policyholder a booster for Country Life Insurance Company.

August 1 Last Call For Liability Insurance

AUGUST 1 is the closing date to get pledge cards and checks in the mail to help initiate Employers' Liability Insurance for farmers, announces V. Vaniman, director of insurance service.

This insurance will protect the farm employer against liability for injury or death to employes up to $5,000 and $10,000. The cost of the insurance will be about $10 per year according to present estimates.

Vaniman cites several recent accidents on the farm as follows: Arthur Brossman of Plainfield had a team of horses run away with his hired man on July 2. The hired man received a broken shoulder and left foot broken across the instep. He was taken to a hospital at Aurora.

Frederick W. Huston of Gibson City died on July 4 as a result of injuries received two days before when he accidentally fell out of the door in the hay mow.

With his two sons, Howard and Fred, Mr. Huston was putting hay in the barn when the rope broke. He went to the mow to fix it and fell from the doorway, striking the ground 20 feet below. It was found that his arms were paralyzed, one leg broken above the knee, and his back was seriously injured.

Members are asked to call at their Farm Bureau offices for further information about this new insurance service at cost.

Two hundred and twenty-five applications for auto insurance were received by the Illinois Agricultural Mutual the first week in July.

Roadside Markets Getting Under Way

Bert Leeper Tells Progress of Plan In Radio Talk

"TWO districts of markets will be started this year, one with Bloomington as a center and another west of Chicago," declared A. B. Leeper, director of fruit and vegetable marketing, in his recent radio address, June 27, on the I. A. A. Forum from Station WLS in discussing the chain of roadside markets.

A. B. Leeper

"Most of the markets in the Chicago district will be located in DuPage county," he said. "At present locations have been definitely decided upon and the markets are now being erected at the following points: One in Macon county just north of Decatur on Route No. 2; one in DeWitt county just north of Clinton at Wapella on Route No. 2; one in McLean county north of Bloomington on Route No. 2; one in McLean county northeast of Bloomington at Towanda on Route No. 4; one in McLean county nine miles east of Bloomington on Route No. 9; one in DuPage county near Naperville on Route No. 18; and one in DuPage county near Downers Grove on Route No. 18. It is planned to have these markets open for business early in July.

Not Competitive

"We do not expect these markets to interfere with the established channels of trade in the cities where peaches are handled through jobbers and retail stores. We believe these standardized roadside markets will render a real service to both growers and consumers by furnishing products of standardized grade and quality at prices fair to both.

"We would like to have every one within reasonable distance from these markets who is interested in the farm problem, and who wants to do something to aid the growers, to visit these markets. If you find the quality and prices of the products offered in line with those sold elsewhere, we would like to have you purchase your supplies through these markets. The further extension of this type of marketing service will depend entirely upon the patronage these markets receive this year. We have heard a great deal about the farmers doing something for themselves. Now I am telling you about a group of farmers who are trying to do something for themselves. We feel certain that the consumers will take kindly toward their efforts and we are really optimistic as to the future of this type of marketing.

To Distribute Peaches

"I also want to tell you about an effort the Illinois Fruit Growers' Exchange is making this year to extend the distribution of peaches to Illinois people. It is planned to send a representative to make arrangements with Farm Bureaus and local dealers in small communities to handle carlots of peaches. There are only 400 bushels of peaches in a carload and no community is too small, if the consumers cooperate, to use at least one car. I am going to suggest to all of the people in rural communities who are listening in, that you get in touch with your farm advisers or local dealers, if you are going to purchase peaches this year. This will give them some idea as to the demand and they will have more definite information as to your requirements. They in turn can get in touch with the distributors who will be glad to sell as many Illinois peaches as are needed. It is hoped by this plan to supply Illinois peaches at reasonable prices to the consumers in Illinois.

600 Carloads This Year

"The Illinois Fruit Growers' Exchange will handle fruits and vegetables in carlots the same as heretofore. It is estimated that at least 600 carloads will be handled through that organization."

Commenting upon recent trends in the marketing of fruits and vegetables, Leeper pointed out that the completion of the hard-road system and the increased use of automobiles and trucks have developed a type of distribution that was unheard of only a few years ago.

"It is estimated that in 1928 at least 600 carloads of peaches were sold by the growers to consumers who hauled them away in automobiles or to buyers who transported them by trucks to be sold at points outside the producing areas. As a result," he continued, "a group of enterprising Farm Bureau members who are growers of fruits have formed an association to establish and operate a number of roadside markets in Illinois this year. It is the belief of these growers that a real service can be rendered through these roadside markets to both producers and consumers. Buildings, signs, and equipment of the markets will be standardized as far as conditions will permit. It is planned to divide the state into districts and place each district under the supervision of one manager. Each market will have its attendant who is responsible to the manager of his district.

Handle All Kinds

"The plan contemplates that all kinds of fruits and vegetables grown in the state will

(Continued on page 8)

OLDEST POLICY-HOLDER

Clinton C. Caywood

Clinton C. Caywood, 70, of Oblong, Ill., is the oldest Country Life policyholder. He was born Feb. 2, 1859.

Board of Trade Deals Held To Be "Gambling"

THE legality of contracts between customers and Board of Trade members for the purchase and sale of grain and provision futures and bids and offers, subsequently resulting in speculative transactions is being rigidly tested in Illinois in the McCabe grain futures case now before the appellate court at Ottawa.

William McCabe, a Bureau county farmer, was sued nearly six years ago by James K. Riordon, a member of the Chicago Board of Trade, to foreclose a mortgage and recover on two notes at a total of $55,000, given in settlement of losses for alleged speculating on the Board of Trade.

In an answer and cross petition, McCabe held that the notes were given to satisfy gambling debts and he asked for their cancellation.

Before Higher Court

The decision of the lower court, should it be affirmed by the appellate court, places upon Board of Trade firms the duty of investigating the need of each customer for the grain and provisions he orders, his financial ability to accept and pay for all contracts, and his intention to make delivery or to receive shipment and not to close out before the expiration of the option or the maturing of the future contract.

J. L. Spaulding, attorney for McCabe, contended that it is just as easy to gamble on the Board of Trade contracts as it is to do a legitimate business. He held that the volume of transactions by McCabe in the three years before he withdrew from the market, involving a total of more than 27,000,000 bushels of grain, should have convinced the Chicago Board of Trade that McCabe was not engaged in legitimate business.

The whole question comes back to the point as to whether or not the higher court will construe McCabe's operations on the Board as gambling. Gambling debts are not recognized before the law.

The case has attracted wide attention and the decision of the appellate court due within 60 days will be watched with interest.

Want Electricity

The LaSalle County Farm Bureau sponsored a meeting in Otter Creek township recently to discuss arrangements for rural electrification in the vicinity of Kernan. L. J. Quasey, I. A. A. transportation director, and representatives of the Public Service Company attended the meeting.

Eleven farmers in this neighborhood are seeking electricity for their farms. Efforts are being made by the Farm Bureau and the I. A. A. Transportation Department to work out a plan whereby the wiring can be installed and the cost divided and added to the monthly electric bills over a period of several years.

E. A. Wilmot of Peoria County led all agents of Country Life Insurance Company in the month of June. He wrote $57,000 of personal business and his county produced a total of $67,000. The counties of Effingham and Peoria are in race for first place in attaining their reipective quotas. H. O. Henry, the general agent of Effingham County, now leads in highest per cent of quota.

ILLINOIS AGRICULTURAL ASSOCIATION RECORD

To advance the purpose for which the Farm Bureau was organized, namely to promote, protect and represent the business, economic, political, and educational interests of the farmers of Illinois and the nation, and to develop agriculture.

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Entered as second-class matter October 20, 1925, at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Accepted for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1925. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the ILLINOIS AGRICULTURAL ASSOCIATION RECORD. Postmaster: In returning an uncalled for or missent copy please indicate key number on address as is required by law.

I. A. A. Growth

THE growth of the Illinois Agricultural Association and its associated companies during the past ten years is revealed in the tremendous increase in office floor space occupied now compared with that comprising the first little office established in Room 1103, Edison Building, Clark and Adams St., back in 1919. Two rooms, one about 14 x 14 feet, the other 12 x 14 feet, a total of 364 square feet made up the first home of the I. A. A. in Chicago. Today the Association and associated companies occupy 7850 square feet of floor space or well over half the entire 12th floor of the Transportation Building.

Secretary D. O. Thompson, Publicity Director Edgar L. Bill, and Organization Director J. C. Sailor together with office help comprised the I. A. A. staff when the first office was established in the Edison Building.

Early in 1920 the Association had blossomed out with a membership of nearly 50,000. Several new departments were established and the cramped quarters of the Edison Building were deserted for more commodious offices in the Peoples Life Insurance Building at 130 North Wells Street.

The move to the Transportation Building at Harrison and Dearborn Sts., the present headquarters, was made about two years later. Nearly every year since then has seen expansion in service to members, and office space to contain all the new activities. Tenants whose offices once adjoined the I. A. A. have relinquished their rooms and taken other space to accommodate us.

How the Copper Producers Did It

COMMENTING upon the recent prosperity of copper producers Glenn Griswold in the Chicago Journal of Commerce says:

"All sorts of reasons are being given for the advance in the price of copper and for the fact that even now copper is abnormally high and profitable. Most of these reasons are fairly sound and yet it would seem that the most important reason is the one usually neglected; that is co-operative organization within the industry.

"No other industry is so soundly organized in its inter-company and competitive relations. After six years of depression and near bankruptcy the full effect of co-operation began to be felt, and despite its price inflation copper seems to be one of the strongest industries in the country today."

Organization and co-operation can do as much for agriculture although the farm problem is infinitely more complex. The "Agricultural Marketing Act" and the Federal Farm Board, it is hoped, will point the way to stabilization at a profitable level. Farmers recognize their responsibility in the work that lies ahead. We must learn first, however, that co-operation means the individual support of every farmer to his live stock shipping association, Producers' Commission Association, co-operative fruit and vegetable growers' association, seed growers' exchange, cream shipping association, co-operative farmers' elevator, co-operative farm supply company, and last but not least, the Farm Bureau.

Gratitude and Ingratitude

"I AM writing to inform you that they have built my fence along the railroad," writes Arthur Bestold, a member of the Marshall-Putnam Farm Bureau. "I thank you very much for taking care of this for me. I have a neighbor who says he has been trying to get a fence for three years and has not got it yet. Still he is always knocking the Farm Bureau and the I. A. A. I appreciate this service very much."

This little testimonial reveals one of the minor and less important services made possible by organization. Yet, because it was direct, tangible, and individual it was highly appreciated.

Of far more importance are other services rendered by the Farm Bureau and the Illinois Agricultural Association. Initiating co-operative marketing and bargaining associations and protecting farmers' interests before taxing bodies, commissions that fix freight rates, telephone rates, and light rates are of greater significance.

Yet because these services are less tangible, less evident they often go unnoticed and unappreciated. Non-members as well as members benefit from many of these activities. But too often they are taken for granted and evoke no such letters as the one quoted above.

It is perhaps too much to expect commendation and thanks for work well done. "Ingratitude is the world's reward," said a German philosopher with some truth. He who works for the sake of securing credit, recognition, and reward is usually disappointed. The personal joy and satisfaction that comes from work well done must suffice. If you get more than this, count yourself fortunate.

State Fair August 19

STATE Fair visitors at Springfield during the week August 19-24 will be greeted by a fifty by eighty Farm Bureau tent reserved as headquarters for I. A. A.-Farm Bureau members throughout Illinois. A portion of the space in the tent will be used as a checking booth where members may leave their wraps and parcels while they seek recreation and rest.

The State Fair is a great educational institution. Everyone can see the handiwork of superior live stock breeders, fruit, vegetable, and grain growers. There is inspiration for farm boys and girls in the 4-H Club exhibits. The art of home making is not forgotten in the educational displays and exhibits that interest thousands of Fair visitors.

The Illinois State Fair with its many new buildings, its spacious grounds and countless attractions is one of the best in the country. But go to the Fair with the idea of learning the lessons it teaches if you would make it a profitable trip.

Tune in on the I. A. A. Forum from Station WLS every Thursday night at 6:30 p. m., Central Standard Time.

The daily farm program of the I. A. A. from Station WJJD, Mooseheart (265 meters) is broadcast between 12:00 and 12:20 p. m., Monday to Friday inclusive. Hear the daily Chicago livestock market from the Producers, and each Friday the weekly market review. Outlook reports, reviews, and talks by I. A. A. staff members, officials, and leaders in farm thought are broadcast daily.

Forum Speakers

Pertinent facts regarding the development of grain marketing will be discussed on the I. A. A. Radio Forum from Station WLS by Harrison Fahrnkopf on Thursday, July 18, time 6:30 p. m.

V. Vaniman, director of insurance service, will be the Forum speaker on Thursday, July 25, when he will discuss "Accident Prevention" and what farmers can do to avoid unnecessary losses.

John C. Watson was the Forum speaker on July 11 when he reviewed the history of tax equalization of farm lands and property since 1920 and '21 when the Illinois Agricultural Association for the first time in history represented Illinois farmers before the State Tax Commission.

Broadcast From KMOX

"A Limestone, Legume, Livestock Tour Through Monroe County" was the subject of a 25-minute broadcast from Station KMOX, St. Louis on Saturday, June 29, during the noon-hour. The Monroe County Farm Bureau sponsored the radio program and a number of Farm Bureau members in that county, including "Limestone John" Gummershiemer, took part.

"Limestone John" was one of the early sponsors of the Limestone-Phosphate Department of the Illinois Agricultural Association.

During the program the radio listeners went for a ride on a limestone truck, saw fields of alfalfa and sweet clover, corn on sweet clover land, dairy herds, and hogs grazing on sweet clover. Farm Adviser C. A. Hughes was in charge.

Use Your Organization

When the home of a Marshall County farmer burned recently, the mortgagee of the farm—the Federal Land Bank—collected the insurance and remitted the same to the farmer to restore the home, requesting that he insure the building at once.

He bought a $2,000 policy of an old line fire insurance company, paying a premium of $23 per one year.

"When the Farm Bureau insurance director explained to him," says the Marshall-Putnam Farm Bureau News, "that the identical policy could have been secured from the Farmers Mutual Reinsurance Company for $7.60 he said: 'I did not know the Farm Bureau had such a service to offer.' His ignorance, which is not peculiar to him alone, cost him $15 in good money."

A Close Call

"THERE is some humor in this job of selling insurance," writes Delbert Saxe, general Farm Bureau insurance agent for Edwards county. "It never pays for a prospect to say that he will not die for a long time.

"Yesterday I wrote the wife of one of our charter policyholders and tried to write the husband for additional insurance," relates Saxe. "The man told me he thought he would not be apt to need insurance for 20 or 25 years yet, at least not until after harvest when he might have more money.

"I had to leave it that way. Tonight I heard that he, in less than an hour, was struck by lightning which burned all the hair off his legs from the knees down. We shall surely have to see him again and see if he is the kind of a man who can be gotten to change his mind."

It is important that the children of this generation learn the value of life insurance at an early age, that they may increase their estates through the medium of insurance as the years go by, in keeping with their knowledge of the value of insurance. If the boy or girl is old enough to earn money, he or she is taught responsibility by shouldering the premium payments of the policies started by the parents. Teaching children to shoulder responsibility is an education.

As an educational fund, 20 year endowment policies may be started for the baby, and when the child is ready for college the cash value of the policy may be taken in its fifteenth, sixteenth, seventeenth or eighteenth year, and used for educational purposes. It has been a compulsory savings plan that has provided the ready cash at the time that the child starts to college.

A nation-wide program in which wheat growers are being urged to increase their facilities for storing grain on farms so as to distribute marketings throughout the season to prevent gluts and to secure the premiums of high protein content is being launched by the Bureau of Agricultural Economics, U. S. D. A.

Thanks For Quick Service

Illinois Agricultural Mutual Insurance Co., Chicago, Ill.

"I am this day in receipt of your check in full for claim of $7 Re: Wayland Sears auto accident," wrote Charles H. Francis, Woodstock, Illinois, lawyer, on June 29.

"I did not write you in regard to this claim until June 25," continues Mr. Francis. "I just want to let you know that I highly appreciate the quick service and lack of red tape in the matter. That is the way to get favorable advertising and at the same time to give the best of satisfaction."

Progress Against T. B. in Whiteside

TEN thousand eight hundred and sixty-four cattle were tested for tuberculosis in Whiteside county, Ill., last year. Only 2.3 per cent reacted. Initial tests were made of 930 cattle with 167 reactors, or a percentage of 17.9. Retests were made of 9,934 cattle with only 102 reactors, a fraction over one per cent.

The year before the percentage of reactors on initial tests was 11.5 per cent, showing that in untested herds the infection is increasing. With one per cent reactors on retests in the year just closed against 2.1 per cent reactors the previous year, a reduction of more than 50 per cent of affected cattle in tested herds is revealed.

Need Both

THE following letter was received recently from W. B. Fitch of Lawrence county:

"I have been carrying a policy on my auto with the Illinois Agricultural Mutual Insurance Company for some time. When I came to the first meeting of the Company, I had never thought of auto insurance; but I refused to return home without a policy.

"Without Public Liability and Property Damage, any man can lose an entire life's earnings in one wreck, and should be the first insurance any man should buy.

"Complete coverage on any car will save anyone his Farm Bureau dues and you need both, as Agriculture is the foundation of all industry.

"W. B. FITCH,
"Executive Committeeman,
"Lawrence Co. Bureau."

Farm Bureau Members

FARM BUREAU MEMBERS are interested in the success and progress of the co-operative farmer elevator. In Ogle County of 45 men who are directors of five elevators, 36 are Farm Bureau members. In McLean County, of 20 farmer elevators with 148 men as directors, 96 are members of the Farm Bureau.

Mr. Gehring, president of the Knox County Farm Bureau, recently made the following significant statement:

"The Farm Bureau is not going to try to tell any farmer's elevator how to run its business. But if there are marketing problems that the Farm Bureau can help solve it stands ready to serve the community and the county."

We are in an age of spending that requires a lure and a bait to get people to save. The competitive age is competitive in making money only. It is not competitive from a savings standpoint. The ones who really advance in the long run are the people who are able to set aside funds in reserve. It is true that an estate is guaranteed the first minute a life insurance application is signed, paid-for, and approved, and that thousands of estates will be left as a result of COUNTRY LIFE INSURANCE COMPANY and its activities in Illinois, that would not be left had that Company not come into existence. These estates will benefit the beneficiaries.

Cream Improvement Plan Profitable To Producers

INDIANA dairymen and creamery men are co-operating in a cream improvement program. Their plan is known as the "four-day delivery plan" which means that a producer who delivers cream not over four days old gets a premium of three cents per lb. butterfat above the price paid for regular cream.

The plan has been in operation 21 months and in that time 5,222,205 lbs. of butterfat were handled. Of this amount more than half, or 2,872,677 lbs., was premium butterfat which netted the producers $86,180.31 more than they would have received had the "four-day plan" not been in operation.

"There are tremendous possibilities for improving the quality of butterfat in Illinois," says Frank Gougler, director of produce marketing. "We should extend our organized effort as rapidly as possible and develop field service for the co-operative produce units now marketing."

Cream Stations Grow

Co-operative cream stations in Illinois are handling more butterfat in 1929 than they handled in 1928. Twelve stations in April last year sold 72,028 lbs. of butterfat, says Frank Gougler. These same in April this year handled 84,960 lbs. or an increase in volume of 18 per cent.

The greatest gain in volume was made by the Bloomington station. In April, 1928, this station handled 4,567 lbs., while this year the volume was 7,719 lbs. which represents a 69 per cent gain.

This increase is voluntary on the part of producers and not a result of a campaign to drum up business, declares Gougler. It shows that producers are pleased to market through their own association.

Child Health Conference

The first national conference since the Roosevelt administration to consider the health of the children of the nation has been called by President Hoover to meet in the White House early next year.

The subjects to be covered embrace problems of dependent children, regular medical examination, school or public clinics for children, hospitalization, adequate milk supplies, community nurses, maternity instruction and nurses, teaching of health in the schools, facilities for playgrounds and recreation, voluntary organization of children, etc.

Federal Farm Board

(Continued from page 3)

and an officer in one of the large banks in Los Angeles.

William F. Schilling of Minnesota, president of the Twin City Milk Producers' Association, the latest addition to the Board, will represent the dairying interests. The selection of Mr. Schilling came after the place assigned the dairy interests had been offered W. S. Moscrip of Lake Elmo, Minnesota. Schilling has been closely identified with the development of co-operative dairy marketing in his home state.

Champion Ice Cream Eater

WILBUR LAWRENCE of Bloomington is McLean county's champion ice cream eater. He devoured a quart brick of frozen cream in six minutes and 10 seconds in a contest conducted by the McLean County Milk Producers' Association. He claims the championship of Illinois and will meet all comers.

Fred Shipley, manager of the Champaign County Milk Producers is reported to have challenged Manager Forrest Fairchild of the McLean County Producers' to an ice cream eating contest between teams of three men to be chosen from each county.

Lawrence defeated Charley Baker, McLean dairyman who consumed a quart brick in six minutes and 40 seconds.

How To Order Limestone

FARM Bureau members are entitled to a 10c per ton discount from the regular retail price of agricultural limestone if they comply with the conditions set forth in the contract which the I. A. A. has with some twenty different Limestone Producers. See your Farm Adviser for details. In general, however, these conditions are, as follows:

Order must be placed by the Farm Bureau member through a Farm Bureau (not direct or with a dealer);

Order must be on regular order form which the I. A. A. has provided the Bureaus and must be sent to one of the contract companies;

Member must pay his bill within 30 days from date the shipment was made by the Company.

If all of these features are complied with, the member may deduct 10c per ton (not 10%) from the face of his bill when he sends in his remittance.

If your land needs limestone, it is the best investment you can make. Consult your Farm Adviser for detailed advice on how, where, when and how much to apply. Last year Illinois farmers used 741,000 tons of agricultural limestone. Large as these figures are, in the future they will be much larger.

By Art Lynch

ORGANIZED dairymen do a better job of selling because they have information and facts concerning their markets.

* * *

EVERY month they know to a pound how much the market used. They know the intake. They know how much the folks drank. They know how these figures compare with the previous month and with previous seasons.

* * *

THIS information tells them whether to add a good cow or sell a "star boarder." It tells them whether to raise that heifer calf or make her into veal for restaurants to sell for "chicken sandwiches."

* * *

THE live milk selling cooperatives get out regular news bulletins to the members. They give a picture of the market as it is—not as it ought to be—but the "low down." The member is in a position to read and heed.

* * *

MARKET facts show when more milk is needed to supply the consumers. The dairymen know when to give the cows a little extra salad of silage with bran and cottonseed dressing.

* * *

IF THERE'S too much milk the market facts will tell us to fool the cows by putting shavings in front of them and let them wear green goggles. They'll think it's silage, will partake and be merry—but won't milk such a surplus.

* * *

AND another thing. Facts will tell us when to give these old-fashioned cows some birth control pamphlets to read.

Speed T. B. Program

In May, 1929 more tuberculin tests were applied to cattle throughout the United States than in any previous month, according to the Bureau of Animal Industry at Washington.

Slightly more than a million tuberculin tests per month have been applied eight times since the work began in 1917, but at no time was the number so great as during May of this year when 94,517 herds, containing 1,193,660 cattle were tuberculin tested.

Roadside Markets

(Continued from page 5)

be offered for sale through these roadside markets. Such products as are grown in the vicinity of the markets will be furnished by the local growers. Those products which are not grown locally, such as peaches, apples, pears, and melons, will be delivered to the markets by trucks or shipped in by rail.

"Prices charged at the roadside markets will be wholesale prices growers are receiving at shipping points plus cost of transportation and necessary operating expenses."

"At the circus there was a girl who rode beneath the horse, on the horse's neck, and almost on his tail."

"That's nothing. I did all that the first time I rode a horse."

CO-OPERATIVE marketing is a modern development of co-operative farming. Farmers have co-operated for years with great success in threshing, haying, corn shelling, butchering, etc. Now they are co-operating in merchandising and selling their produce.

You can measure the value of co-operative marketing in dollars and cents. Selling butterfat and eggs co-operatively in McLean county added an average of $24 to the patrons' income in 1928. Butterfat prices gained an average of three cents per pound throughout the entire county when produce marketing units were organized at Bloomington and Belleflower. A gain of three cents per pound applied to McLean county's average annual production of 1,023,091 pounds of fat, means an increase in income of $30,692.73 per year.

This Is Worth Having

This seems like only a drop in the bucket. Yet, if the price paid to farmers who produce the 60,000,000 pounds of butterfat sold annually in Illinois was increased by three cents per pound, it would total $1,800,000. That's worth having, is it not?

The 35 co-operative cream stations now operating in Illinois handle approximately 2,450,000 pounds of butterfat annually. These co-operatives have stabilized the butterfat price upward from three to five cents per pound wherever they operate.

Organization Paid Here

On April 3, 1928, the co-operative cream station at Albion in Edwards county, sold its year's output of butterfat under a contract for 8.5 cents per pound more than was being paid the same day at Ullin in Pulaski county. A preliminary meeting to organize a co-operative produce association at Ullin was held on April 5. The next day private cream stations increased their prices two cents per pound butterfat. Does organization pay?

The business-like way is to sell your farm produce on your own weights and tests. How much are you getting for cream and butterfat in your community? How does this price compare with the 90 score Chicago butter market?

TWENTY-ONE teams playing in five divisions of the Illinois Farm Bureau Baseball League are coming down the home stretch in the annual clash for divisional and state championships.

Henry county's victory over Knox at Cambridge on July 4, score 6 to 5, places this team in undisputed possession of the lead in Div. II with four games won and none lost. Knox and Stark are tied for second place having each won one game and lost two.

Marshall-Putnam and Tazewell are tied for first place in Div. III. McDonough has a clean slate with four won and none lost in Div. IV. McLean has the edge on Logan in Div. V, and Cass at this writing is on top in Div. VI.

Menard county played its first game against Sangamon on July 4 at Springfield. It was Sangamon's second victory, score 9 to 4. Henderson county is still in the race in Div. IV where it has a record of four games won and one lost. Henderson was nosed out by McDonough last year for the divisional championship.

The standing of teams according to reports received at headquarters of the League by July 10 follows:

OFFICIAL STANDING OF TEAMS IN THE ILLINOIS FARM BUREAU BASEBALL LEAGUE FOR WEEK ENDING JULY 6, 1929

DIVISION II	*Won*	*Lost*	*Pct.*

Divisional championships must be decided by August 17 according to rules adopted at Peoria last March. Arrangements will be made to play off some of the semi-final games at district I. A. A.-Farm Bureau picnics, five of which already are scheduled beginning August 16.

The State Arbitration Committee has been kept busy ironing out controversies and making decisions. A number of such disputes have arisen because of faulty umpiring. Most of the teams are evenly matched and extra inning games have been frequent.

The fifteen-inning contest between Sangamon and Greene counties on June 15 was the longest game of the season. District Dictator Charles S. Black ruled that this game, previously reported won by Greene, score 7 to 6, must be played over because the umpire failed to call a runner out when hit by a batted ball. Greene county has asked for a review of the evidence so the question will probably go on up to the Arbitration Committee.

The State Arbitration Committee ruled that a similar game between Champaign and McLean must be played over because the umpire improperly called time when a play was still in motion during which a runner was tagged out before crossing the home plate. This run paved the way for a short-lived McLean County victory.

T. E. BENTON

T. E. BENTON of Marion, Williamson county, sent in more applications for auto insurance—63 in number—than any other representative of the company during the month of April. Williamson county led all others in the state that month.

The agents in southern Illinois awarded a $70 watch to the man sending in the greatest number of applications during April. Mr. Benton won the watch. Williamson county now has more policyholders in the Illinois Agricultural Mutual—the Farm Bureau auto insurance company—than any other county in southern Illinois.

New Movie Film

A moving picture illustrating the development of harvesting methods from the most primitive to the modern combine harvester can be secured by writing the Office of Exhibits, Department of Agriculture, Washington, D. C.

This film will be of interest to producers of small grains in all sections of the country. It contains much valuable information regarding costs of operation and the precautions which should be taken to insure keeping quality in grain.

Largest Policy Holder

Ray P. Hoover, vice-president of the Ruhm Phosphate and Chemical Company, also an officer in the Hoover-Mason Chemical Company, is the largest single policyholder in Country Life Insurance Company. Mr. Hoover whose home is in Evanston, Ill., recently applied for $25,000 worth of life insurance through the Cook County Farm Bureau.

Exactly 754 applications for auto insurance were received by the Illinois Agricultural Mutual Insurance Company at I. A. A. headquarters during June. On June 29, the last business day of the month, total applications and policies in force aggregated 14,679.

CALCIUM CHLORATE KILLS WEEDS

Recommended by Experiment Stations and Farm Agencies for the control and eradication of all noxious weeds such as

Quack Grass — Canadian Thistle
Wild Morning Glory — Poison Ivy

ATLACIDE
CALCIUM CHLORATE KILLS WEEDS

CONTAINS 45.5% CHLORIC ACID (ClO_3)
CALCIUM CHLORATE EQUIVALENT 56.4%

Dissolves Easily. Crops may be grown on treated soil a few months after application. Apply as a spray for large areas. Apply as a dust for small areas.

Packed in 3¼ lb. sifter cans for dusting on small areas and in 200 lb. and 50 lb. drums for use in standard spray tanks.

Satisfactorily used on 15,000 miles of railroad track last year.

Non-poisonous to animals or people. No fire hazard.

ATLACIDE NON-POISONOUS DUSTER

Simply shake powdered weed killer from perforated container.

Organization Is Answer Says Secretary Hyde

(Continued from page 1)

tional aspiration. America believes that its hopes and its purposes will be soonest achieved through a guaranty of equal opportunity to every man, leaving it to each American to climb as high and achieve as greatly as his merits and his industry will permit. The sum of the achievements of our citizens is national accomplishment.

Have Been Blessed

"This nation, under God, has been blessed beyond the dreams of avarice. The smoke plumes of its factories write upon the sky a story of busy industry and of prosperity. The average man enjoys a higher standard of living than was ever enjoyed by any nation in history. The good things of life are more broadly and less unevenly distributed. The creative industry of the nation is more widely owned than ever before. Buyers and borrowers of other nations throng our markets and draw upon our stores of goods and of accumulated capital.

Can't Be Complacent

"In all of this, there is, there must be a place of economic equality and opportunity for the American farmer. His is the most creative, the most vital, and the most serviceable of all occupations. There are, happily, many thousands of prosperous farmers, but agriculture as a whole has had too small a share of national prosperity. This nation cannot afford to view with complacency any inequality among its own people.

"We have poured out our wealth with quick sympathy for the stricken among the other nations of the earth. We spent billions of money and oceans of blood and tears in a struggle across the sea, to defend our conception of political equality, and it is worth whatever expenditure of effort and national treasure may be required to guarantee equality of economic opportunity for all American citizens.

"There was a time in history when the cry, 'I am a Roman citizen', brought to the aid of the distressed citizen every other Roman within earshot. I appeal to this association in the exercise of its great nation-wide influence, to aid, by precept and example, in soundly and constructively answering the equally compelling cry, 'I am an American farmer'."

Saddest Story of the Month—A man put an ad. in a matrimonial bureau paper and received a reply from his fiancée.

What's Wrong Here?

Hail Storm Hits Jo Daviess County

A HAIL storm hit the northwestern part of Jo Daviess county on June 27 and demolished field crops, stripped trees, and damaged farm buildings over an area of several miles in width. In the neighborhood of East Dubuque and Galena, hailstones one inch in diameter were reported by local residents.

Growing corn in fields adjoining Route 5 was knocked flat, small grain was battered into the ground, and windows shattered in many farm houses, barns, and other buildings. The loss will run into thousands of dollars. Comparatively few fields were protected against loss by hail insurance.

Corn A Total Loss On This Whiteside County, Ill. Farm

WIPED OUT BY HAIL

HOW often have you heard the expression, "Wiped Out By Hail," Few Illinois farmers have missed seeing the terrible destruction wrought by a hail storm in mid-summer. The following report from a recent issue of a daily newspaper tells a story that is all too familiar:

FARMS DAMAGED BY HAIL AND TWISTER

While a heavy gale swept Columbus shortly after 7 o'clock last evening, and swirling greenish yellow clouds threatened ominously, many farms north of Humphrey and south of Creston were experiencing a destructive hail storm and a wind that attained the proportions of a small twister in several places.

The small grain on the Barney Lohaus farm, a mile north of Humphrey, was wiped out and the corn hurt considerably by the hail, and Louie Koech, living a mile north of the Lohaus place, reports a similar loss to his crops.

On the Mrs. Minnie Gorman place in the same neighborhood, tops of all the trees along the road were stripped, and the oats crop was destroyed. George Daniels, also in the same area, lost all his oats, and a large cow shed was blown from its foundation.

New House Damaged

Ernest Wurdeman's new large bungalow, nearing completion, was badly damaged when hail broke in all the windows, which had just been placed in position the day before.

The corn field at the Wurdeman farm has the appearance of freshly plowed ground this morning, and it is difficult to tell what variety of crops were planted in any of the fields, as they were all beaten into the ground or mowed off short by the hail.

SPECIAL LEGISLATIVE ISSUE

The Illinois Agricultural Association RECORD

Number 8 AUGUST, 1929 Volume 7

Our Legislative Program in the 56th General Assembly

By The I. A. A. Committee on Public Relations

FOLLOWING the precedent established two years ago, the Committee on Public Relations presents the following report on the legislative activities of the Association in the Fifty-sixth General Assembly. This report is made to inform our membership about the attitude of the Association toward various bills and resolutions of especial interest to farmers.

The legislative policy of the Illinois Agricultural Association in the recent session of the General Assembly was determined, at least in its major aspects, by the delegates in session at the annual meeting. The major legislative projects approved at Danville were the State Income Tax, the Limitation of the County Highway Tax Rate, the Amendment of the Revenue Article of the State Constitution, and the Gasoline Tax.

In addition the annual meeting took a strong position recommending resistance to tax increases until the people of the State amend the Constitution and set up a fair taxing system. The resolutions adopted at Danville also asked for the Amendment of the Co-operative Marketing Act of 1923, the Amendment of the Membership Act of 1872, and the continuance of efforts to eradicate bovine tuberculosis, with adequate appropriations for indemnities for reacting cattle.

All Subjects of Bills

All of the projects named above were the subjects of bills and resolutions introduced in the Fifty-sixth General Assembly. In some cases the bills were prepared by the Association. In other cases, for reasons stated in this report, no bills were prepared by us. It was found advisable to prepare bills on some matters which were not considered at Danville, these being the Amendment of the Dog License Act, the Amendment of the Insurance Acts, and the Amendment of the Fertilizer Act. In some cases it was necessary to oppose bills or resolutions or to ask for amendments there to protect farmers' interests.

All of the bills and resolutions in which the Illinois Agricultural Association had a particular interest, either in support or in opposition, are briefly described below.

Controversial Bills

Of the bills sponsored by the Illinois Agricultural Association, serious opposition developed against two, one of which was defeated. These two bills are most suitable for the purpose of presenting the voting records of members of the General Assembly. They are the bill for a State Income Tax and the bill limiting the County Highway Tax Rate. The voting record of every down state senator and representative on each of these bills is given, by districts, in the table on page 9 of this issue. Members of the Illinois Agricultural Association should study this table to see how their senators and representatives voted on these two important measures.

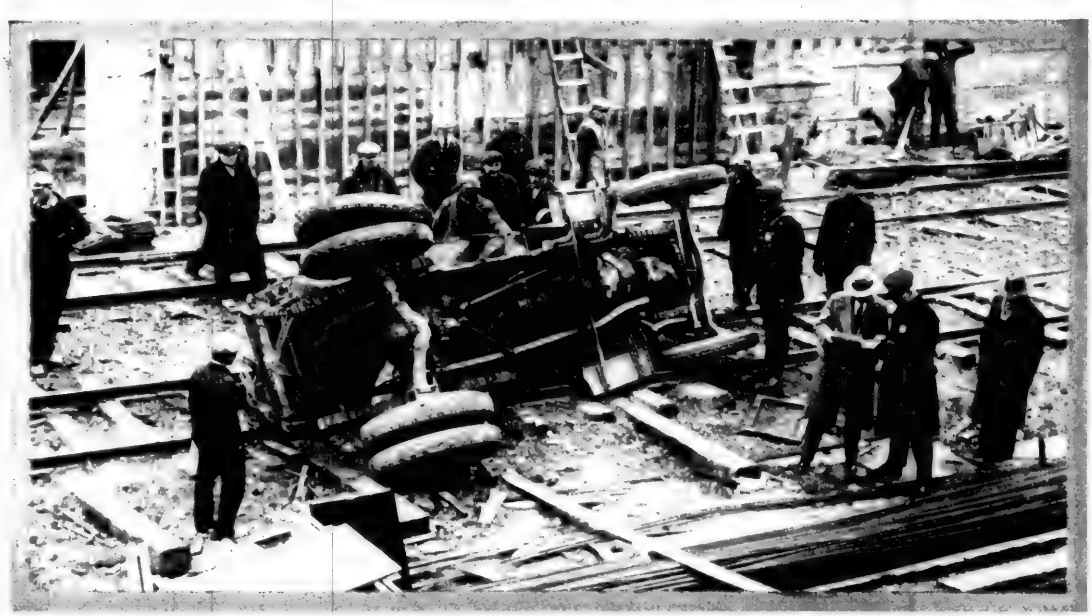
AN IMPORTANT service rendered Illinois farmers by the I. A. A. is to represent their interests where legislation affecting the welfare of agriculture is considered. Legislation invariably tends to move in the direction desired by powerful and active organizations, especially if those who may be injured thereby make no resistance. In former days many burdens were thus placed on farmers solely because they were not organized, and therefore, could make no effective resistance.

Representatives of the Association examined every bill and resolution offered in the 56th General Assembly. In many cases they suggested or asked for modifications. In a few cases active opposition was necessary.

The accomplishments of the Association in the recent legislative session are in large part due to the effective work of the County Farm Bureaus and their collective supporting membership. The continued prestige and influence of the I. A. A. in matters of this character in a very large measure depend upon the understanding, determination and activities of the membership throughout the state.

Farmers should study the records of their representatives and regardless of party affiliation, return their proven friends to the legislative halls. By following such a policy, farmers can render the most effective service in protecting their rightful future interests.

STATE INCOME TAX BILL



Early in the session Senator Lantz introduced this bill as Senate Bill 39. This was practically the same bill drawn by representatives of the Association two years ago and introduced in the 55th General Assembly by Senators Lantz, Deck and Sneed. In both sessions the bill provided for a direct deduction of any property taxes, which a taxpayer might pay in this State, from any income tax which might be levied against him, and for the use of the net funds derived from the income tax in reducing or replacing the already existing State school tax.

At the time of its introduction the bill was referred to the Senate Committee on Revenue and Finance. In a hearing before the Committee it was given very fair consideration and was recommended for passage. When it was called up for second reading, the Senate went into Committee of the Whole and again gave it very fair consideration. It was passed by the Senate on April 24 by a vote of 28 to 19.

House Committee Unfriendly

After its passage by the Senate, the Bill went to the House. It was referred to the Committee on Revenue, which was very unfairly composed of nineteen Cook county and eleven downstate representatives. When the bill was called up for a hearing before the Committee, Representative Schnackenberg of Chicago, opposed hearing its supporters and moved that it be reported with the recommendation that it "do not pass." Representatives Hunter, sponsor of the bill in the House, and Green, chairman of the Committee, urged proper consideration and that its supporters be heard. The Chicago majority, however, supported by Representative Crowley of Peoria, forced a vote and adopted Schnackenberg's motion.

When the Committee reported

The Illinois Agricultural Association RECORD

Number 8 AUGUST, 1929 Volume 7

Our Legislative Program in the 56th General Assembly

By The I. A. A. Committee on Public Relations

FOLLOWING the precedent established two years ago, the Committee on Public Relations presents the following report on the legislative activities of the Association in the Fifty-sixth General Assembly. This report is made to inform our membership about the attitude of the Association toward various bills and resolutions of especial interest to farmers.

The legislative policy of the Illinois Agricultural Association in the recent session of the General Assembly was determined, at least in its major aspects, by the delegates in session at the annual meeting. The major legislative projects approved at Danville were the State Income Tax, the Limitation of the County Highway Tax Rate, the Amendment of the Revenue Article of the State Constitution, and the Gasoline Tax.

In addition the annual meeting took a strong position recommending resistance to tax increases until the people of the State amend the Constitution and set up a fair taxing system. The resolutions adopted at Danville also asked for the Amendment of the Co-operative Marketing Act of 1923, the Amendment of the Membership Act of 1872, and the continuance of efforts to eradicate bovine tuberculosis, with adequate appropriations for indemnities for reacting cattle.

All Subjects of Bills

All of the projects named above were the subjects of bills and resolutions introduced in the Fifty-sixth General Assembly. In some cases the bills were prepared by the Association. In other cases, for reasons stated in this report, no bills were prepared by us. It was found advisable to prepare bills on some matters which were not considered at Danville, these being the Amendment of the Dog License Act, the Amendment of the Insurance Acts, and the Amendment of the Fertilizer Act. In some cases it was necessary to oppose bills or resolutions or to ask for amendments there to protect farmers' interests.

All of the bills and resolutions in which the Illinois Agricultural Association had a particular interest, either in support or in opposition, are briefly described below.

Controversial Bills

Of the bills sponsored by the Illinois Agricultural Association, serious opposition developed against two, one of which was defeated. These two bills are most suitable for the purpose of presenting the voting records of members of the General Assembly. They are the bill for a State Income Tax and the bill limiting the County Highway Tax Rate. The voting record of every down state senator and representative on each of these bills is given, by districts, in the table on page 9 of this issue. Members of the Illinois Agricultural Association should study this table to see how their senators and representatives voted on these two important measures.

AN IMPORTANT service rendered Illinois farmers by the I. A. A. is to represent their interests where legislation affecting the welfare of agriculture is considered. Legislation invariably tends to move in the direction desired by powerful and active organizations, especially if those who may be injured thereby make no resistance. In former days many burdens were thus placed on farmers solely because they were not organized, and therefore, could make no effective resistance.

Representatives of the Association examined every bill and resolution offered in the 56th General Assembly. In many cases they suggested or asked for modifications. In a few cases active opposition was necessary.

The accomplishments of the Association in the recent legislative session are in large part due to the effective work of the County Farm Bureaus and their collective supporting membership. The continued prestige and influence of the I. A. A. in matters of this character in a very large measure depend upon the understanding, determination and activities of the membership throughout the state.

Farmers should study the records of their representatives and regardless of party affiliation, return their proven friends to the legislative halls. By following such a policy, farmers can render the most effective service in protecting their rightful future interests.

STATE INCOME TAX BILL

Early in the session Senator Lantz introduced this bill as Senate Bill 39. This was practically the same bill drawn by representatives of the Association two years ago and introduced in the 55th General Assembly by Senators Lantz, Deck and Sneed. In both sessions the bill provided for a direct deduction of any property taxes, which a taxpayer might pay in this State, from any income tax which might be levied against him, and for the use of the net funds derived from the income tax in reducing or replacing the already existing State school tax.

At the time of its introduction the bill was referred to the Senate Committee on Revenue and Finance. In a hearing before the Committee it was given very fair consideration and was recommended for passage. When it was called up for second reading, the Senate went into Committee of the Whole and again gave it very fair consideration. It was passed by the Senate on April 24 by a vote of 28 to 19.

House Committee Unfriendly

After its passage by the Senate, the Bill went to the House. It was referred to the Committee on Revenue, which was very unfairly composed of nineteen Cook county and eleven downstate representatives. When the bill was called up for a hearing before the Committee, Representative Schnackenberg of Chicago, opposed hearing its supporters and moved that it be reported with the recommendation that it "do not pass." Representatives Hunter, sponsor of the bill in the House, and Green, chairman of the Committee, urged proper consideration and that its supporters be heard. The Chicago majority, however, supported by Representative Crowley of Peoria, forced a vote and adopted Schnackenberg's motion.

When the Committee reported

unfavorably to the House, Representative Hunter moved that the Committee report be not concurred in and that the bill be placed on the calendar. The motion was adopted by a vote of 72 to 59.

There was difficulty in getting the bill called up for second reading in the House. On three different occasions the sponsors of the bill, believing that they had sufficient votes to defeat any unfriendly amendments, secured an agreement by the speaker to call the bill. Each time they were disappointed in his failure to call the bill. It was finally called up for second reading on the afternoon of June 4, in the final week of the session, at a time when two of the friends of the bill were not present.

Friends Fight for Bill

When the first friendly amendment was offered, Representative Schnackenberg offered an amendment thereto striking the enactment clause of the bill, the usual way of killing bills on second reading.

Representative Hunter moved that Schnackenberg's amendment lie on the table. In the ensuing debate, those speaking against the Income Tax Bill were Representatives Schnackenberg and Thon of Chicago, Conerton of La Salle, and Dixon of Dixon. Those speaking in behalf of the bill were Representatives Hunter of Rockford, Little of Urbana, and Wood of Keenes.

Representative Hunter's motion to table Schnackenberg's amendment failed by a tie vote of 70 to 70. The vote on Schnackenberg's amendment carried by a vote of 72 to 69, thus killing the bill. The difference in the vote on the two motions is explained by the fact that Representative Robert J. Wilson, of Kewanee, first voted for Hunter's motion in defense of the bill, and later for Schnackenberg's amendment to kill the bill, and by the fact that on the first motion no vote was cast by Representative Bingham of Galena, who later voted with the opponents of the bill for Schnackenberg's amendment.

In the table on page 9 all down-state representatives are recorded as they showed themselve *for* or *against* the Income Tax Bill on the final and deciding vote to strike the enacting clause.

Down-Staters Responsible

The down-state representatives who voted against the Income Tax Bill must carry the responsibility for the defeat of this, the only bill out of 1366 introduced in the Fifty-sixth General Assembly, which aimed to distribute the burden of taxation more equitably and thereby to give some relief to real estate and to tangible personal property from the inequitable load they are now carrying.

The defeat of the Income Tax Bill is disappointing, but it should not discourage the members of the Association. Consideration of the bill has resulted in a much more intelligent understanding of the antiquated and unjust taxing system of the State. This must eventually and probably will soon result in the enactment of constructive legislation such as was proposed in the Income Tax Bill.

In its support of the Bill, the Illinois Agricultural Association had the very able and effective cooperation of the Illinois Bankers Association, the Illinois Federation of Labor, the Prairie Farmer, and a large proportion of the down state press. Real estate interests in the City of Chicago indicated, for the first time, their interest in the bill. It is hoped that this will lead to effective cooperation in the future.

Opposition to the bill came chiefly from the Illinois Chamber of Commerce, the Civic Federation of Chicago, the press of the City of Chicago, and to some extent from the Illinois Manufacturers' Association.

COUNTY HIGHWAY TAX RATE

When the so-called Chicago Bonding Bills were before the General Assembly in June, 1927, their advocates sought down-state support on the promise that, coincident with the doubling of the basis of valuations, all tax rates would be cut to one-half of the statutory limitations at that time. After the adjournment of the General Assembly it was found that the clause specifically including the county highway tax in the reduction of rates had been stricken out, leaving the constitutional restriction on county taxes as the only limitation on the county highway tax rate. The failure to limit the county highway tax rate made it possible for any county board, if it so desired, to quadruple its levy of taxes for county highway purposes. Because of the increased power thus given them, many county boards have greatly increased their levy for this purpose.

For the reasons stated, the delegates to the annual convention at Danville, adopted, on January 31, 1929, a resolution asking the General Assembly, including supporters of the Chicago Bonding Bills, to carry out their promise, so amending the Act providing for a county highway tax that the maximum tax rate which can be imposed for this purpose, without a referendum vote, will be limited to twelve and one-half cents (12½c) on each one hundred dollars of assessed valuations instead of fifty cents (50c), as now permitted.

The Association prepared a bill limiting the county highway tax rate as contemplated in the resolution. On February 27 it was introduced by Representative Ewing as House Bill 285. On April 4 it passed the House.

When the bill went over to the Senate, it was sponsored by Senator Carlson, who had introduced a bill for a similar purpose in the Senate. It passed the Senate on April 25.

In spite of the very large vote in both houses of the General Assembly in favor of the bill, there was a good deal of opposition to it at various times. The entire down-state vote on the bill in both houses is given in the table on page 9.

THE REVENUE AMENDMENT

The Fifty-sixth General Assembly had before it at various times at least six or seven joint resolutions of one House or the other proposing amendments to the Revenue Article of the Constitution. The first was introduced in the House on February 21. Being identical with the resolution adopted in 1925, submitting a proposed amendment, which was defeated in 1926, it contained the requirement of a two-thirds vote of the members elected to each House to enact any legislation under the amendment. The Association accepted with reluctance this provision four years ago. Experience has shown that if an amendment of this sort were adopted, such a requirement, which gives the veto power to a comparatively small minority in either House, would probably make impossible any revenue legislation of any value. Representatives of the Association, therefore, opposed the same limitation when proposed this year.

On March 14 another resolution was introduced in the House, identical with the resolution introduced February 21, except that the objectionable limitation was omitted. The Association approved this amendment, as it did also a draft prepared by the Legislative Reference Bureau, in which the provisions of the resolution of March 14 were incorporated into the sections of Article IX to make a unified and consistent whole.

Another resolution, submitted to the House on April 18 by Thon of Chicago, contained limitations and provisions which the Association could not accept. The whole subject was placed in the hands of a sub-committee, which on May 29 reported a resolution even more objectionable, since it limited to ten per cent the proceeds of any income tax which might be retained by the State, unless this percentage was increased by a two-thirds vote of the members elected to each House. This resolution was never brought to a vote.

Refuse To Concede All

In the meantime the Senate had appointed a special committee on constitutional amendments. On May 15, it reported, by a divided vote, the draft prepared for the House Committee by the Legislative Reference Bureau, which had been approved by the Association. On May 23, the same Committee reported another resolution, in most respects identical with the resolution of May 15, but providing that the State should not retain more than 25 per cent of the proceeds of an income tax except by a two-thirds vote of the members elected to each House. The representatives of the Association, approached on this proposal, at first had insisted that the portion to be retained by the State should be at least 50 per cent. On being asked to make further concessions, on the grounds that otherwise the two-thirds vote necessary for the submission of an amendment could not be secured, they reluctantly receded to 25 per cent. They were now, on the same grounds, asked to make further concessions, but refused to do so.

On June 4 the Senate, having voted to lower to 17 the maximum percentage to be retained by the State, except by a two-thirds vote of the members of each House, adopted the resolution by a narrow margin over the necessary two-thirds vote. This was after a joint letter, signed by the presidents of the Illinois Bankers Association, the Illinois State Federation of Labor, and the Illinois Agricultural Association, had been placed on the desk of every member of the General Assembly, giving notice that any reduction in the percentage below 25 to be retained by the State would prevent the signers of the letter from recommending to their respective organizations support of the amendment.

Published once a month at 404 North Wesley Ave., Mount Morris, Illinois, by the Illinois Agricultural Association. Entered as second-class matter October 20, 1925, at the post office at Mount Morris, Illinois, under the Act of March 3, 1879. Accepted for mailing at special rate of postage provided for in Section 412, Act of February 28, 1925, authorized October 27, 1929. The individual membership fee of the Illinois Agricultural Association is five dollars a year. The fee includes payment of fifty cents for subscription to the ILLINOIS AGRICULTURAL ASSOCIATION RECORD. Address communications for publication to George Thiem, director of information, Illinois Agricultural Association, 608 So. Dearborn St., Chicag.

Revenue Amendment Committee Provided

The final act of the regular session of the General Assembly on this subject was the passage of an Act providing for the appointment of a special committee to consider and to recommend a revenue amendment for consideration at a future session of the General Assembly, which is expected by many to be a special session called for this purpose.

This special committee is to consist of one member of the Senate appointed by the Lieutenant Governor, two members of the House appointed by the Speaker, and three citizens of the State appointed by the Governor.

The Illinois Agricultural Association in its annual convention has repeatedly declared in favor of revision of the revenue article of the State Constitution. It reiterated its position relative thereto at the annual meeting in Danville on January 31, 1929, but cannot support an amendment which by its very terms would impose new and insurmountable restrictions on the power of the General Assembly to set up a fair taxing system. Rather than support an amendment of this character, the Association favors using some of the untried and unrestricted powers granted the General Assembly by the present constitution.

THE GASOLINE TAX

Both in his inaugural address and in his message to the General Assembly, Governor Emmerson asked for the enactment of a tax of three cents per gallon on gasoline. For this reason the Association felt that it should not introduce any bill of its own, but should wait to see if it could not support the administration bill. On February 5, identical bills embodying the provisions desired by the administration were introduced into both Houses of the General Assembly.

The bills provided for certain deductions for expenses and for refunds of taxes to purchasers of gasoline not used on the public highways, and for distribution of the remaining proceeds in the following proportions: two-thirds to the State for completion of the State bond issue system of hard roads, for grade separation and for the widening of roads in congested areas; one-third among the counties on the basis of their proportion of the total motor license fees in the State, to be used for the benefit of the secondary or State Aid Roads or for payment of bonds issued for this purpose.

Except in its distribution of the proceeds of a gasoline tax in the proportion of two-thirds to the State instead of an equal division between the State and the counties, as favored by the Association, and except in some provisions relating to the type of improvement of State Aid Roads, the administration bill was in accord with the resolution adopted at Danville less than one week before. Representatives of the Association appeared before Committees of both Houses and clearly stated the position of the Association. They did not press for amendments because they realized that they could not do so without endangering the passage of any gasoline tax bill. The administration bill passed both Houses and was approved March 25.

TUBERCULOSIS ERADICATION

House Bill 517, sponsored by the State Department of Agriculture, and introduced by Representative Tice, repeals the Bovine Tuberculosis Act of 1925 and other acts, under which the so-called county area plan of bovine tuberculosis eradication has been administered. In lieu of the county area plan, the new act establishes the state area plan under which the state as a whole is to be the unit. It is provided, however, that any counties desiring to adopt the county area plan, as defined in the act, may, by and with the consent of the Department of Agriculture, employ a county veterinarian and such assistants as are desirable for the control and eradication of bovine tuberculosis. The veterinarian so employed shall be approved by the Department of Agriculture and shall work under the direction of and in conjunction with the Department.

The provisions of the new Act relating to the destruction of cattle found to be affected with tuberculosis, to branding and tagging of such cattle, to quarantine upon order of the Department, to appraisal of the value of diseased cattle and compensation for their destruction, to the establishment of rules by the Department for determining and certifying tuberculosis free herds, to the shipment of cattle into or out of the state, and to the 60-day retest are similar to the provisions of the act under which the county area plan was administered.

The new act for the first time provides for compulsory state-wide testing of cattle upon request of the Department of Agriculture and that any common carrier that delivers cattle from any other state to any resident of this state shall give the Department notice thereof within 24 hours.

Representatives of the Association favored this bill as the only method whereby the benefits of the county area plan could be extended to the less financially able counties of the state, and whereby tuberculosis eradication in the State as a whole could speedily be completed. Under any other plan centers of infection would remain in many counties, especially in Southern Illinois, with continued danger of infection in people, heavy loss to the owners of infected cattle, and heavy expense to the state. Under the state area plan, the expense of maintenance of a tuberculosis free state should soon be greatly reduced and the cost of indemnities should almost disappear.

The representatives of the Association secured the modification of the provision in the bill which required any person desiring to purchase cattle for shipment into the state to have the consent of the department of agriculture before such shipment was made. Since this requirement was only for the purpose of giving the department notice of the shipment, it was modified by requiring any railroad or other common carrier to give the department notice of its delivery of cattle to any person within the state. Persons desiring to purchase feeder cattle from outside the state can now make such purchases without the annoyance of consent from or even notice to the department.

AMEND COOPERATIVE ACT

Senate Bill 223, introduced by Senator Cuthbertson, amends the title of the cooperative marketing act of 1923 and certain sections therein by providing that any association engaged in any activity connected with the production of agricultural products may incorporate under this act. The amendments provide that the directors of any corporation under this act have power to sell no par value stock for such consideration as they may determine, and may establish and accumulate a reserve out of earnings, including a permanent surplus. The amendments also provide that any corporation organized under the laws of this state and doing business as a cooperative association may derive the benefits of this act by securing the written consent of two-thirds of the stockholders of such corporation.

This bill was prepared and sponsored by the Association for the specific purposes, first, of providing a more suitable Act for incorporation of the Association, the Farm Bureaus, and any other agricultural cooperative associations; second, of making it possible for the directors of any corporation organized under this act to set up, out of earnings, a reserve and a permanent surplus; and third, of making it possible for any corporation organized under the laws of this state and doing business as a cooperative association to reincorporate under this Act upon written consent thereto by two-thirds of its stockholders.

AMEND MEMBERSHIP ACT

House Bill 363, introduced by Representative Robinson, provides that any corporation organized to promote agriculture under the Act of 1872 may, when so authorized by its membership, acquire securities of corporations whose activities directly or indirectly promote agricultural interests.

This bill also was prepared and sponsored by the Illinois Agricultural Association for the specific purpose of enabling agricultural associations organized under this act to acquire and own the stock of other corporations which are organized primarily to promote and serve agricultural interests.

DOG LICENSE ACT

In the last few years some administrative difficulties have been found in the act providing for the licensing of dogs by counties and for the payment, from the dog license fund, of indemnities for domestic animals killed or injured by dogs. With increase in the kinds of domestic animals for losses of which indemnities are paid, the dog license fund was found inadequate in some counties. For this reason the General Assembly in 1927 increased from $2000 to $3000 the minimum amount which must be in the dog license fund before any excess over the minimum could be distributed on September 30 to townships or road districts. Even with this increase in the minimum, the dog license fund was still inadequate in some counties.

It was found also that the dog license act made it impossible for a person living in one county and having losses in another county to recover indemnities therefor.

In recent years there have been many losses of domestic animals from rabies, which has been prevalent in the state. There can be no doubt that either directly or indirectly the infection came from rabid dogs. There was no specific provision in the dog license act for the payment of indemnities for such losses.

Most of the difficulties mentioned above were corrected by the passage of House Bill 433, introduced by Mr. Luckey of Vermilion County, and sponsored in the senate by Senator Paddock. This bill amended the dog license act in three different sections: First, to prevent depletion of the dog license fund, by changing

the date of distributing any funds in excess of $3,000 from September 30 to March 31; second, by making it possible for a resident of any county of the state who has losses in any other county to file claims for indemnities; and third, by specifically making eligible to indemnities the death or the killing of any of the domestic animals named in the act which might be proved to have been infected with rabies.

AMEND INSURANCE ACTS

Senate Bills 375 and 376, introduced by Senator Flagg, and sponsored in the House by Representative G. J. Johnson, provide that any county fire insurance company may reinsure the whole or any part of its risks with other fire insurance companies, and that it may reinsure the whole or any part of the risk located in this state of other fire insurance companies organized under the laws of this state.

The representatives of the Association supported these amendments in their final form because they facilitate and regulate the practice of reinsurance.

FERTILIZER ACT

With the concurrence of the University of Illinois and the National Fertilizer Association, the Illinois Agricultural Association introduced a bill modifying the fertilizer law to eliminate the term "ammonia" and to require, instead, the term "nitrogen" as a means of reporting the nitrogen content of commercial fertilizers. The change, representing an improvement which the Illinois Agricultural Association has advocated for some time, was passed without opposition.

OTHER BILLS

Other bills favorably regarded by the Association and in some instances given some active support were:

Senate Bill 9, by Senator Lantz, amending the act of 1895 for the organization of park districts and providing that in the organization of such park districts where a portion of the proposed district is outside of a city, village, or incorporated town, such outside territory cannot be included in the proposed district unless a majority in such outside territory votes in favor of organization.

Senate Bills 126 and 127, companion bills, relating to boys' and girls' 4-H Club Work, by Senator Lantz, the first providing that agricultural extension clubs may participate in the distribution of the newly named state, county fair and agricultural extension premium fund; the second setting forth the requirements for participation in such premium fund by members of agricultural extension clubs.

House Bill 361, sponsored by the Farmers Grain Dealers Association of Illinois, and introduced by Representative Hunter, amending section 50a of the Act of 1874 regarding liens, and providing that a thresherman's lien shall not be valid and enforcible against a purchaser of crops from the owner or lawful possessor thereof unless the lien holder shall, previous to or at the time of making final settlement for such crops by such purchaser, serve upon such purchaser a notice in writing of the existence of such lien.

In determining the provisions of this bill and in its passage in the General Assembly, the Illinois Agricultural Association cooperated with the Farmers Grain Dealers Association of Illinois. This followed a meeting of representatives of the two organizations in which the legislative program of both organizations was reviewed.

RESIST TAX INCREASES

In every recent session, the General Assembly has had scores of bills to increase taxes either by making appropriations for new purposes, by increasing appropriations for present activities, by increasing maximum tax rates, or by removal of limitations on tax rates or on the power to issue bonds. In this respect the Fifty-sixth General Assembly was no exception. In spite of the general recognition of the gross injustice of the present general property tax, especially on real estate, many bills were enacted into law which cannot fail to increase the present burden of taxes. Apart from certain taxes for state purposes, most of the increases in taxes were sought by city representatives and will fall upon owners of urban property. Some of the increases, however, especially for state purposes, will fall in part upon owners of farm property.

The Conerton Bills

Representatives of the Association actively opposed a series of bills introduced in the House by Mr. Conerton, of La Salle county, and sponsored by the state associations of supervisors, county commissioners, county and probate clerks and county auditors. The purpose of these bills was to increase from 25 cents to 40 cents the maximum rate that can be used for county purposes without a referendum. This proposed increase of 60 per cent in the county tax rate would have permitted in the state as a whole, an increase of nearly $13,000,000 in county taxes. There can be little doubt that if these bills had been enacted into law, most of the possible increase would have been made in taxes to be paid next spring and that nearly all of the possible increase would have been made within a few years. In the state as a whole nearly one-fourth of the increase would have fallen on farm property. In many counties most of the increase would have been paid by farm property.

When the bills were before the Revenue Committee of the House and again later were before a sub-committee of the Revenue Committee, representatives of the Association pointed out that the proper remedy for a shortage of funds in many counties is either equalization upwards of low valuations of some classes of property, or a general increase of valuations to the level of valuations in the state as a whole. If either or both of these remedies are not applicable to some counties, any such county has the constitutional and statutory right to submit to a referendum vote of its people a temporary increase in its county tax rate.

Tax Increase Fails

Representatives of the state associations of supervisors, county commissioners, county and probate clerks, and county auditors, objecting to all of these remedies as politically inexpedient, urged a favorable report on the Conerton bills. However, neither the sub-committee of the Revenue Committee of the House, nor the Revenue Committee as a whole, was willing to assume the responsibility which the county officials were trying to shift to the General Assembly.

Until the present revenue system is so revised that taxes can be distributed equitably among all persons able to pay them, owners of some kinds of property, especially real estate, are compelled to resist further increases in taxes. The present inadequacy of funds for many purposes is due to such resistance. More serious inadequacy of funds, however undesirable, may prove to be the surest and speediest means of changing the taxing system.

The defeat of the Conerton bills is a striking example of one type of service which the Association can perform by having its representatives in Springfield. To prepare and sponsor constructive measures in the interest of agriculture is an important type of service. To be watchful for bills which would injure agriculture is an equally necessary duty. Legislation invariably tends to move in the direction desired by powerful and active organizations, especially if those who may be injured thereby make no resistance. In former days many burdens were thus placed on farmers solely because they were not organized, and therefore, could make no effective resistance.

Examine All Bills

Representatives of the Association have examined every bill and resolution offered in the 56th General Assembly. In many cases they suggested or asked for modifications. In a few cases active opposition was necessary.

The accomplishments of the Association in the recent legislative session are in large part due to the effective work of the County Farm Bureaus and their collective supporting membership. The continued prestige and influence of the Association in matters of this character in a very large measure depend upon the understanding, determination and activities of the membership throughout the state.

Farmers should study the records of their representatives and regardless of party affiliation, return their proven friends to the legislative halls. By following such a policy, farmers can render the most effective service in protecting their rightful future interests.

September Drive

A NATION-WIDE drive for Farm Bureau members is announced for September by the American Farm Bureau Federation.

"Success of the national farm program for the improvement of agriculture depends upon the majority of farm people acting in 'unison'," said President Sam H. Thompson in a recent statement. "This principle, which has been advocated as Farm Bureau gospel since the creation of the organization, was recently given governmental sanction by Secretary of Agriculture Hyde.

"Through organized effort agriculture can add from four to five billion dollars to its annual income. Translated in terms of individual farm families, this means $750 a year for every family now living on a farm in the United States.

"The national organization has set aside the month of September and has asked all state, county and community units to co-operate in building membership, to the end that we may more quickly reach the goal of organized effort. I hope every member during September will become an energetic volunteer recruiting officer."

PICNICS

AUGUST is the popular picnic month among Illinois farmers. Every section of Illinois and nearly every county will either take part in sponsoring a district Farm Bureau picnic or will hold a picnic of its own during this month or early September.

With the final selection of September 14 for the joint I. A. A. Farm Bureau picnic in the 13th congressional district and September 12 for the 18th district gathering at Kankakee, the schedule apparently is completed for the rest of the season. While the Kankakee County Farm Bureau will dedicate its new park at a county gathering on August 28, farmers from over the district will gather at the same place two weeks later.

Speakers at the district gatherings will be aided in getting their messages across through the use of a public address system provided by the I. A. A.

Cook-DuPage Picnic

More than a thousand gathered in Riede's Grove, south of Lisle on July 31 for the joint Cook-DuPage County Farm Bureau picnic. Local units of the Pure Milk Association in the two counties were invited. Speakers were President Sam H. Thompson of the A. F. B. F. and Don Geyer of the Pure Milk Association. A model T Ford won the auto driving contest. A Chevrolet placed second.

A baseball game between the two leading counties in the district and a horseshoe pitching tournament will feature the sporting events at the 20th district picnic, Jacksonville, on August 17. The picnic committee includes farm advisers and leaders from each county in the district.

District picnic speakers this year will all be from within the state, although W. H. "Bill" Settle from Indiana has been engaged to speak at several county picnics. Few, if any, gatherings will be held during State Fair week which begins on August 18.

Farm Bureau members will gather at Springfield for Farm Bureau day on Friday, August 23, where the I. A. A. and associated companies will hold forth in the Farm Bureau tent.

BASEBALL

SEMI-FINAL games in the Illinois Farm Bureau Baseball League will begin on or before Saturday, Aug. 24. Several of these games which attract statewide attention every year will be played at the district I. A. A.-Farm Bureau picnics. Others may be played at county picnics.

While divisional championships have not yet been decided in all of the five baseball districts embracing 21 Farm Bureau teams, a tentative schedule of semi-final contests has been drawn up with the first games booked for Aug. 24.

Henry county is expected to meet McDonough for the first intersectional game on Aug. 24. This will be followed by another game (or possibly a double header) at the 14th district picnic, Monmouth, on Aug. 27. Two out of three games will be the basis for elimination unless other arrangements are made between the two interested teams.

Another inter-sectional match between the leaders in division VI and division V is scheduled for the 17th district picnic at Bloomington on Aug. 28. Greene and Logan counties are the leaders in these two divisions, respectively, at this writing.

the date of distributing any funds in excess of $3,000 from September 30 to March 31; second, by making it possible for a resident of any county of the state who has losses in any other county to file claims for indemnities; and third, by specifically making eligible to indemnities the death or the killing of any of the domestic animals named in the act which might be proved to have been infected with rabies.

AMEND INSURANCE ACTS

Senate Bills 375 and 376, introduced by Senator Flagg, and sponsored in the House by Representative G. J. Johnson, provide that any county fire insurance company may reinsure the whole or any part of its risks with other fire insurance companies, and that it may reinsure the whole or any part of the risk located in this state of other fire insurance companies organized under the laws of this state.

The representatives of the Association supported these amendments in their final form because they facilitate and regulate the practice of reinsurance.

FERTILIZER ACT

With the concurrence of the University of Illinois and the National Fertilizer Association, the Illinois Agricultural Association introduced a bill modifying the fertilizer law to eliminate the term "ammonia" and to require, instead, the term "nitrogen" as a means of reporting the nitrogen content of commercial fertilizers. The change, representing an improvement which the Illinois Agricultural Association has advocated for some time, was passed without opposition.

OTHER BILLS

Other bills favorably regarded by the Association and in some instances given some active support were:

Senate Bill 9, by Senator Lantz, amending the act of 1895 for the organization of park districts and providing that in the organization of such park districts where a portion of the proposed district is outside of a city, village, or incorporated town, such outside territory cannot be included in the proposed district unless a majority in such outside territory votes in favor of organization.

Senate Bills 126 and 127, companion bills, relating to boys' and girls' 4-H Club Work, by Senator Lantz, the first providing that agricultural extension clubs may participate in the distribution of the newly named state, county fair and agricultural extension premium fund; the second setting forth the requirements for participation in such premium fund by members of agricultural extension clubs.

House Bill 361, sponsored by the Farmers Grain Dealers Association of Illinois, and introduced by Representative Hunter, amending section 50a of the Act of 1874 regarding liens, and providing that a thresherman's lien shall not be valid and enforcible against a purchaser of crops from the owner or lawful possessor thereof unless the lien holder shall, previous to or at the time of making final settlement for such crops by such purchaser, serve upon such purchaser a notice in writing of the existence of such lien.

In determining the provisions of this bill and in its passage in the General Assembly, the Illinois Agricultural Association cooperated with the Farmers Grain Dealers Association of Illinois. This followed a meeting of representatives of the two organizations in which the legislative program of both organizations was reviewed.

RESIST TAX INCREASES

In every recent session, the General Assembly has had scores of bills to increase taxes either by making appropriations for new purposes, by increasing appropriations for present activities, by increasing maximum tax rates, or by removal of limitations on tax rates or on the power to issue bonds. In this respect the Fifty-sixth General Assembly was no exception. In spite of the general recognition of the gross injustice of the present general property tax, especially on real estate, many bills were enacted into law which cannot fail to increase the present burden of taxes. Apart from certain taxes for state purposes, most of the increases in taxes were sought by city representatives and will fall upon owners of urban property. Some of the increases, however, especially for state purposes, will fall in part upon owners of farm property.

The Conerton Bills

Representatives of the Association actively opposed a series of bills introduced in the House by Mr. Conerton, of La Salle county, and sponsored by the state associations of supervisors, county commissioners, county and probate clerks and county auditors. The purpose of these bills was to increase from 25 cents to 40 cents the maximum rate that can be used for county purposes without a referendum. This proposed increase of 60 per cent in the county tax rate would have permitted in the state as a whole, an increase of nearly $13,000,000 in county taxes. There can be little doubt that if these bills had been enacted into law, most of the possible increase would have been made in taxes to be paid next spring and that nearly all of the possible increase would have been made within a few years. In the state as a whole nearly one-fourth of the increase would have fallen on farm property. In many counties most of the increase would have been paid by farm property.

When the bills were before the Revenue Committee of the House and again later were before a sub-committee of the Revenue Committee, representatives of the Association pointed out that the proper remedy for a shortage of funds in many counties is either equalization upwards of low valuations of some classes of property, or a general increase of valuations to the level of valuations in the state as a whole. If either or both of these remedies are not applicable to some counties, any such county has the constitutional and statutory right to submit to a referendum vote of its people a temporary increase in its county tax rate.

Tax Increase Fails

Representatives of the state associations of supervisors, county commissioners, county and probate clerks, and county auditors, objecting to all of these remedies as politically inexpedient, urged a favorable report on the Conerton bills. However, neither the sub-committee of the Revenue Committee of the House, nor the Revenue Committee as a whole, was willing to assume the responsibility which the county officials were trying to shift to the General Assembly.

Until the present revenue system is so revised that taxes can be distributed equitably among all persons able to pay them, owners of some kinds of property, especially real estate, are compelled to resist further increases in taxes. The present inadequacy of funds for many purposes is due to such resistance. More serious inadequacy of funds, however undesirable, may prove to be the surest and speediest means of changing the taxing system.

The defeat of the Conerton bills is a striking example of one type of service which the Association can perform by having its representatives in Springfield. To prepare and sponsor constructive measures in the interest of agriculture is an important type of service. To be watchful for bills which would injure agriculture is an equally necessary duty. Tune in on the I. A. A. Forum from Station WLS every Thursday night at 6:30 p. m., Central Standard Time.

The daily farm program of the I. A. A. from Station WJJD, Mooseheart (265 meters) is broadcast between 12:00 and 12:20 p. m., Monday to Friday inclusive. Hear the daily Chicago livestock market from the Producers, and each Friday the weekly market review. Outlook reports, reviews, and talks by I. A. A. staff members, officials, and leaders in farm thought are broadcast daily.

Mrs. Vera M. Biddle, of Knoxville, Tenn., sister of President Earl C. Smith, appeared on the I. A. A. Forum program from WLS on July 25. Many favorable comments were received following her singing. Mrs. Biddle is active in musical circles in her home city and has sung to radio audiences from several southern stations. She was accompanied by her daughter, Greta. Mr. and Mrs. Biddle and their two children were guests of Mr. and Mrs. Smith at Detroit and Chicago before returning home.

Donald Kirkpatrick was the Forum speaker on August 15, and L. A. Williams is scheduled to appear on the I. A. A. Forum program on August 22.

Chas. A. Stewart, secretary of the National Livestock Producers Association, will discuss the national feeder lamb and calf pool on the I. A. A. Forum program Aug. 29.

Baseball

Cass county suffered its first defeat of the season from Greene county in the ten-inning game at Carrollton on August 3. It was one of the hard-fought games of the year and the winning run came in the last of the tenth.

The official score sheet credits Greene county with five runs, nine hits, five errors, and Cass county four runs, five hits, three errors. Home runs were made by Robinson for Greene and Fanning for Cass.

The Effingham County Farm Bureau, the Illinois Equity Exchange, the Effingham Equity Exchange, the Dieterich Equity Exchange, and farm organizations in Effingham county are co-operating in holding a county picnic in Reichhelms Grove at Effingham, Ill., on Thursday, August 22.

Leroy Melton, Greenville, president of the National Equity Union, has been scheduled as speaker.

Randolph, Union, and Pulaski counties were represented at the I. A. A. district conference held on July 29 at Carbondale.

Roy Chatton of the Egyptian Seed Growers' Exchange, Flora, discussed their proposed supply company for handling petroleum products.

The Mercer County Farm Bureau is stronger today than at any time in its history. The membership recently passed the 900 mark which represented a gain of 127 members over the previous three-year period.

WELCOME TO STATE FAIR

Farm Bureau Day Set for August 23

"ALTHOUGH we set aside Friday, August 23, as 'Farm Bureau Day' at the Illinois State Fair, I like to think of every day of this agricultural exposition as a day that farmers and their families can enjoy, and call their own," writes Director Clarence F. Buck of the Illinois Department of Agriculture in a message of welcome to Illinois Farm Bureau members.

"We want your organization to feel perfectly free to plan such entertainment features or demonstrations as you may choose to present. However, we heartily agree with you in that there is abundant entertainment now provided, without any added features that would demand considerable time and effort on the part of your membership—time and effort that, as you say, would be spent more profitably in the enjoyment of established features of the fair.

"Your ideas of conducting a restful, homelike and comfortable headquarters will undoubtedly meet with the genuine approval of the public. Such a haven as your association will provide will be a boon to visitors who become fatigued from the exertion of viewing the many enlightening features of the fair.

"Voicing the wishes of the entire branch of Illinois state service that conducts the exposition—from Governor Emmerson on down to the workmen who will assist in making provisions for Farm Bureau headquarters—it is a pleasant privilege to bid the agricultural public welcome through the agency that your association represents."

The entire executive committee of the I. A. A. will entrain for Springfield to attend Farm Bureau Day following its regular monthly meeting on August 22. Many of the staff members also will attend.

Exhibits showing the services and activities of the Association will occupy part of the Farm Bureau tent. Last year the Association sponsored a joint debate between representatives of the Democratic and Republican national committees on the agricultural planks in the party platforms. Senator Caraway from Arkansas and Congressman Dickinson from Iowa were the debators, and in spite of cold disagreeable weather talked to a large number of people in the grand-stands.

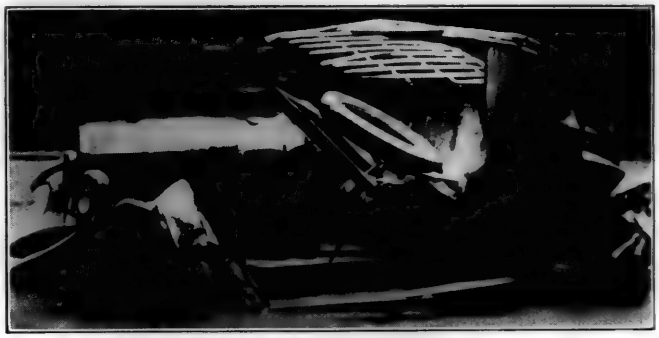
By L. A. Williams

"COUNTRY LIFE'S" 20 year endowment policy now available, is very attractive to children. At the younger ages children do not attach the protection value to life insurance that they will in future years when they take on added responsibilities.

It is, therefore, the lure of saving money which is the main appeal. Parents appreciate how difficult it is to maintain a savings account. They appreciate the fact that a bank cannot come to them and say, "Now, you should deposit so much regularly." But the Insurance Company comes with a bill or a statement, and keeps after the insured, and sees that regular deposits are made.

When a child appreciates that the most he could pay in in 20 years is about $800, that he is guaranteed $1,000 at the end of twenty years, and that on top of this $200 profit is certain of annual dividends which will increase his profits tremendously, he takes a great interest in watching his total cash worth increase from year to year.

In later years, when he has added responsibilities, he will increase the amount of insurance he carries. He will then take straight life insurance. You have taught him the value of protection by starting him on the first endowment policy, and having the appreciation of that contract teach him the lesson of old line protection. The child whom you start on a $1,000 policy may carry $25,000 or $50,000 of life insurance in the next twenty years, where you today consider that $5,000 or $10,000 of life insurance was a large amount.



Life insurance eliminates chance from the life program of the farmer by guaranteeing an estate regardless of prosperity. Incidentally, should he arrive at age 65, having carried insurance as a guarantee of an estate, he does not arrive at 65 penniless, regardless of ill fortune. He sees the value of his life insurance whether it be straight life, 20 Payment Life, or 20 year endowment.

Uncle Abe says: "The best reformers are those who are all the time trieing tew reform themselfs, thus presenting tew the world one good example, worth at least a dozen precepts."

On Wrong Side of Road

WHERE A HIGHWAY was constructed of concrete with gravel on either side, a driver who continued to drive with his left wheels on the gravel on the left side until he collided with another vehicle, was held negligent as matter of law.

Public liability and property damage in the Illinois Agricultural Mutual Insurance Co. protects the policy holder against even when his own negligence is responsible for the accident.

ONE MAN KILLED AND ANOTHER INJURED AS A RESULT OF THIS ACCIDENT

This Collision Cost the Company $7,771.11

THE mass of wreckage shown above resulted from a terrible accident. The driver of the wrecked car was killed, his father riding beside him seriously injured.

The other driver, a policy holder in the Illinois Agricultural Mutual not only escaped uninjured but suffered no financial loss. The company immediately assumed all financial responsibility and finally settled for the sum of $7,771.11. This would have been a heavy loss for one man to bear, but not for a company having assets of $342,717.52.

THIS service which includes protection against liability for personal injury and damages inflicted by your car, damage to your car, fire, windstorm and theft is all provided in a full coverage policy available to members at cost.

A full coverage policy insures you against worry and financial responsibility for hospital and doctor bills, against court costs and attorney's fees, repair bills, and other attending expenses in case of accident. In addition your estate is protected.

THE assessments made every six months after the initial deposit are surprisingly low, so low that no member can afford not to be insured. Losses spread over thousands of preferred risks, low overhead expenses, no private profits or management expense to pay, and all savings reflected back to members in low assessments make possible this exceptional service to members.

DEAN H. W. STUNT
COLLEGE OF AGRICULTURE
UNIVERSITY OF ILLINOIS
URBANA, ILL.

The Story of Agriculture and Miss Equality

ONCE upon a time there was a young country lad named Agriculture. He was an ambitious, hard-working young man, trying to succeed in his chosen profession. He was madly in love with a beautiful maiden whose name was Equality. He realized that other suitors for the hand of Equality, however, were favored above him. He felt their superiority. They appeared to be smarter, looked more prosperous, and apparently succeeded in acquiring a much larger portion of the world's goods than he. These suitors were Organized Industry, Great Mergers, Chain Stores, Big Business, and their brothers.

IT OCCURRED to him that if he were to win the hand of Equality it must be by overcoming his bashfulness, his lack of organization, individualism, and other handicaps. So he started to organize and educate himself, to build commodity marketing associations, to practice volume buying to reduce costs of production, and to protect himself against the countless hazards of his business through mutual insurance service.

AND finally he conceived the possibilities and advantages of a strong life insurance company, with great savings made possible by eliminating unnecessary agency and selling expense, and by doing business in large volume. He put this plan into action and accomplished his purpose to the admiration and respect of those who watched his career. He discovered that his business was the business of his people and that by minding it well he could gain the admiration and respect of Equality.

SO ONE day the world marveled and admired the progress made by this young man in improving himself and his industry. Equality came to him and said: "You are doing great things. You have overcome your handicaps. I felt confident you would succeed when you became fully conscious of your strength and possibilities. I prefer you above all the others." And so they lived happily ever after.

Selling the Farm Bureau to the Non-Member

MAINTAINING the organization is a never-ending task. Thousands of loyal members in the 95 organized counties of Illinois have made possible the success the I. A. A. and the County Farm Bureaus have attained in this important work.

NOW a renewed effort is being made to tell the Farm Bureau story to the non-members in papers of general circulation. The advertisement above is the first of a series now appearing in Prairie Farmer.

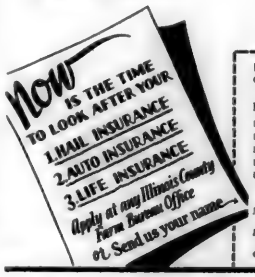
EACH member can lend his aid to this great self-help program by informing himself thoroughly about the available services and the accomplishments of his organization. Each additional member enlisted from the ranks of the non-members will make possible greater service and more effectiveness in advancing the interests of our great industry.

The Greatest Self Help Program Is *Successfully Operating*

60,000 Illinois Farmers Are Organized for Service

"Give Your Farm Bureau the Chance to Serve You"

THE Illinois Agricultural Association (I. A. A.) and its 95 Affiliated Farm Bureaus have proved that cooperation is workable. Ten years of development finds the program of the I. A. A. so firmly established as to rate this farmer organization one of the largest trade organizations in the State.



One after another those projects have been made a part of the routine service of the I. A. A.:

DAIRY MARKETING · FRUIT AND VEGETABLE MARKETING CO-OPERATIVE LIMESTONE-PHOSPHATE BUYING · LIVESTOCK MARKETING · PRODUCE MARKETING · TAXATION SERVICE HOG CHOLERA CONTROL TRANSPORTATION CLAIMS and a complete INSURANCE SERVICE, including "COUNTRY LIFE" the only Farm Bureau owned life insurance company.

Organization makes possible these advantages not available to others or not available elsewhere at as low a cost. Every additional membership further improves Farm Bureau Service and opens wider the doors of opportunity for effective Self Help.

If you are one of the many who have not thoroughly investigated the successful operation of the Illinois Agricultural Association's enterprises, stop in at the County Farm Bureau Office at your next opportunity and ask for full information. If more convenient fill out the attached coupon and send direct for information on any form of service in which you are interested.

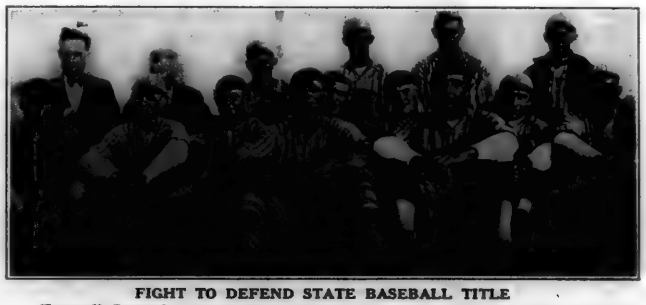
Three Teams Fight For Baseball Honor

Tazewell Defends Title Against Rivals For Illinois State Championship

THE elimination of Henry county by McDonough at Macomb on August 31 in the third game of the hard-fought series narrowed the race for the 1929 championship in the Illinois Farm Bureau Baseball League to three teams, McDonough, McLean, and Tazewell.

The executive committee of the League insists that Tazewell eliminate at least one of the championship contenders before it be entitled to play in the final series for the high honor. This means that Tazewell must play the loser of the McDonough-McLean series. If it can successfully defend its title against one of these two teams it may play the other to decide the annual contest.



Action Necessary

This action was made necessary because of the uneven number of divisional champions eligible for semi-final competition. By virtue of winning the championship last year, Tazewell was given the preferred position in the play-off. As a result it has scheduled no official games since it defeated Marshall-Putnam for the divisional championship. McLean and McDonough were scheduled to play the first game on September 10 at Monmouth. It is hoped that the state contest will be over well before the end of the month.

The experiences of the season have been encouraging. Better sportsmanship and a spirit of fair play have been apparent. In this respect civilization has come a long ways since the turn of the century. Old-time baseball was frequently attended by savage and brutal gang wars and fights between opposing teams and their backers. There is little of this today, although the desire to win and the fighting spirit is none the less evident. High schools have had a powerful influence in improving sportsmanship.

"Our Farm Bureau baseball team played Stark county at our picnic last Saturday," writes J. W. Whisenand, Peoria county farm adviser. "The score was 21 to 7 in our favor. Our team got 17 hits and Stark county 10. Peoria's pitcher, Patton, struck out eight men and their three pitchers, Sniff, W. Seger, and Best struck out nine.

"Walter and Ed Doubet won the doubles horseshoe tournament by narrow margins."

FIGHT TO DEFEND STATE BASEBALL TITLE

Tazewell County's scrappy Farm Bureau nine must defeat the McDonough and McLean County teams—both dangerous contenders—to retain the state championship.

Light and Power From Corn Stalks

RECOVERY of methane or marsh gas from cornstalks in sufficient quantities to light and heat farm homes and even small cities, was announced at the American Chemical Society's 78th annual convention at Minneapolis by Dr. A. M. Buswell, professor of sanitary chemistry at the University of Illinois.

From the waste of sewage and plain cornstalks, large quantities of the gas have been developed at the university capable of use for heating, operating automobiles in place of gasoline, and driving engines to produce electricity, as well as to form the principal ingredients of "dry ice."

The apparatus used in the delivery of the gas, according to the Professor, is so simple that it can be installed by any farmer to develop a private heating plant for his own use from the effect of sewage on waste cornstalks.

"After drying," Buswell states, "the stalks are shredded with an ordinary shredding machine, boiled, soaked in water or in lime. The apparatus is simply a small tank provided with a cover to collect gasses."

From a large commercial standpoint, he estimated a circle eight miles in diameter of corn land would produce enough stalks to supply usual gas needs of a city of 30,000 population.

John C. Watson, director of taxation, has been appointed on a special investigational committee by William H. Malone, chairman of the state tax commission. The committee will study and report on the administration of the personal property tax in Illinois.

Policyholders Heed Anti-Accident Drive

First Week In September Shows 33 Per Cent Drop Compared With August

AUTOMOBILE accidents among policyholders of the Illinois Agricultural Mutual Insurance Company dropped 33 per cent the first week of September following the state-wide campaign against auto accidents in which the County Farm Bureaus and the I. A. A. are co-operating.

Thousands of policyholders have attached the tags bearing the slogan "No Auto Accidents in September" to the steering wheels of their cars. Pamphlets carrying the message of accident prevention were mailed to all the 16,000 odd members of the company. The influence of the drive is already being felt.

Every 23 Minutes

Every 23 minutes someone is killed in a motor vehicle accident in the United States. Last year there were more than 27,500 fatalities as a result of auto accidents in this country.

Every auto accident, according to V. Vaniman, director of the safety campaign, is due to ignorance or carelessness. None is excusable. Many collisions and upsets are due to inferior intelligence or slow reaction to danger. Defective eyesight, poor memory and poor reasoning ability are other causes.

An intelligent driver senses danger at once. He is continually on the alert, particularly at intersections. He not only watches his own driving but he thinks for the other driver, always alive to possible poor judgment and mistakes of the other fellow.

He Is No Dreamer

The careful driver keeps his mind on his work, especially when driving on the pavement. He is no dreamer or sky gazer. He minds his business, watches the road, not the landscape. Accidents are often criminal and when the courts take full cognizance of this truth and punish those who are negligent by imprisonment and deprivation of a driver's license there will be some hope for reducing losses and fatalities from motor collisions.

How Accidents Occur

A study of the losses reported to the Illinois Agricultural Mutual since it began operating reveals that 366 accidents occurred when mak-

From a large commercial standpoint, he estimated a circle eight miles in diameter of corn land would produce enough stalks to supply usual gas needs of a city of 80,000 population.

John C. Watson, director of taxation, has been appointed on a special investigational committee by William H. Malone, chairman of the state tax commission. The committee will study and report on the administration of the personal property tax in Illinois.

FIGHT TO DEFEND STATE BASEBALL TITLE

Tazewell County's scrappy Farm Bureau nine must defeat the McDonough and McLean County teams—both dangerous contenders—to retain the state championship.

Policyholders Heed Anti-Accident Drive

First Week In September Shows 33 Per Cent Drop Compared With August

AUTOMOBILE accidents among policyholders of the Illinois Agricultural Mutual Insurance Company dropped 33 per cent the first week of September following the state-wide campaign against auto accidents in which the County Farm Bureaus and the I. A. A. are co-operating.

Thousands of policyholders have attached the tags bearing the slogan "No Auto Accidents in September" to the steering wheels of their cars. Pamphlets carrying the message of accident prevention were mailed to all the 16,000 odd members of the company. The influence of the drive is already being felt.

Every 23 Minutes

Every 23 minutes someone is killed in a motor vehicle accident in the United States. Last year there were more than 27,500 fatalities as a result of auto accidents in this country.

Every auto accident, according to V. Vaniman, director of the safety campaign, is due to ignorance or carelessness. None is excusable. Many collisions and upsets are due to inferior intelligence or slow reaction to danger. Defective eyesight, poor memory and poor reasoning ability are other causes.

An intelligent driver senses danger at once. He is continually on the alert, particularly at intersections. He not only watches his own driving but he thinks for the other driver, always alive to possible poor judgment and mistakes of the other fellow.

He Is No Dreamer

The careful driver keeps his mind on his work, especially when driving on the pavement. He is no dreamer or sky gazer. He minds his business, watches the road, not the landscape. Accidents are often criminal and when the courts take full cognizance of this truth and punish those who are negligent by imprisonment and deprivation of a driver's license there will be some hope for reducing losses and fatalities from motor collisions.

How Accidents Occur

A study of the losses reported to the Illinois Agricultural Mutual since it began operating reveals that 366 accidents occurred when mak-

ing left-hand turns. Ignorance and carelessness were responsible for these. Three hundred and sixteen collisions occurred at intersections, 209 were cases of sideswiping, 131 reported "unable to stop," 80 said that they failed to stop when approaching the concrete highway, 41 came to grief while driving on the left side of the road. These were recorded from a total of 3,330 claims.

Throughout September accident prevention will be the dominant topic for discussion at meetings of Farm Bureau insurance agents, policyholders, and Farm Bureau members in Illinois. Policyholders realize that the way to reduce further their low cost insurance is to cut the number of accidents.

Here Are Rules

In an insurance meeting at Ottawa, LaSalle county, on September 3 the "No Auto Accident Campaign" featured the program. A set of rules for the guidance of all Farm Bureau members in the county were adopted as follows:

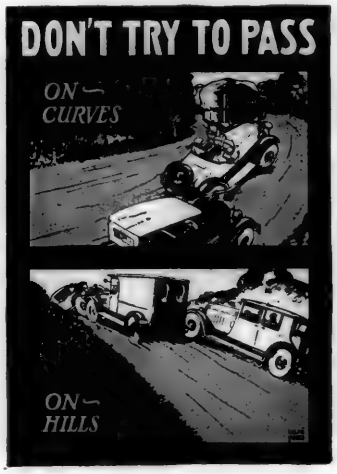
1. Always stop on approaching a paved highway and look in both directions.
2. When you run off the pavement slow up before going back on.
3. Always signal and look in both directions before making a left-hand turn.
4. In going around cars blow your horn and be certain the right-of-way is clear.
5. Never try to beat a train at a crossing.
6. Don't try to pass going around curves.
7. Never pass another car going up a hill when oncoming cars can't be seen.

Every county is being asked to keep a record indicating the days on which no accidents occur among Farm Bureau member policyholders. "Every county having no auto accidents among its members during September will automatically become a member of the 'No Auto Accidents in September Club,'" announces Vaniman.

Campaign Slogans

"Highway Courtesy"

The unwritten law of the highway. Play fair with the other fellow. You'll both feel better for it. Qualities of true gentlemen are reflected in highway courtesy.



A few of the campaign slogans broadcast throughout the state are:

1. A moment's neglect may cause regret for a lifetime.
2. You are not thrifty if you are not a safe man.
3. Prevention of accidents is prevention of suffering.
4. Accidents don't just happen—there is a cause.
5. A minute for safety beats a month for repairs.
6. A man at work is worth two in a hospital.
7. Forethought is cheap; afterthought is expensive.
8. You may be dead right but dead a long time.

The effectiveness of accident prevention campaigns is seen in records compiled at San Diego, California. Actuated by distressing traffic accidents in that city of 140,000 people, the chief of police on July 1, 1927 ordered all accidents carefully investigated, witnesses secured, and the guilty parties brought to court and punished.

Curve Was Upward

During the first half of the year the curve of accidents in that city was continually upward as it had been during preceding years. In six months there had been 404 accidents, 594 personal injuries. In the six months following the order despite an increased volume of traffic, there were only 351 accidents recorded, a drop of 25.9 per cent. Injuries dropped to 425, a decrease of 28.4 per cent.

There were 800,000 automobile accidents in the United States during 1928, according to estimates of the National Safety Council. Twenty-seven thousand lives were taken and an economic loss of $850,000,000 was involved.

Drastic Treatment

"Mental Equipment"

It is even more important than mechanical equipment. Don't count too much on the common sense of the other fellow. No one is 100 per cent alert at all times.

Accident prevention is much less a question of speed than of skill and clear-headedness. Competency and responsibility should be determined before a license is issued or before a person is allowed to drive a car without the supervision of an experienced driver. Evidence of incompetent or irresponsible driving—regardless of speed—should result in forfeiture of the license, and does in a number of states.

License Granted For Liability Insurance

1100 Farmer Employers Now Protected Against Liability For Injuries To Hired Help

EMPLOYERS' liability insurance is now in operation for more than 1,100 Illinois Farm Bureau members whose applications are on file in the office of the Illinois Agricultural Mutual Insurance Company.

The new service became effective at noon on Saturday, August 31, a telegram from the State Insurance Department announced. The amended license reproduced herewith authorizes the Illinois Agricultural Mutual to engage both in automobile and employers' liability insurance.

Deposits Required

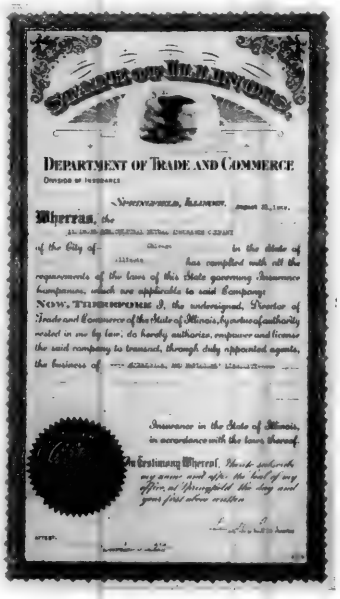
A special reserve deposit of $25,000 was required before the new service could become operative. Each applicant was required to make a deposit of $25 based on a yearly payroll up to $1,250. This includes the $5 policy fee, a $10 premium deposit, and $10 for reserve. The policyholder retains his ownership in the $20 for premium and reserve which will be refunded if he withdraws from the Company. Assessments will be made annually, although the company may make semi-annual assessments if it so desires.

The basis for estimating premium deposits hereafter will be slightly different. An additional $5 must be deposited on application for each additional six months of hired labor or fraction thereof.

What Protection Is

This insurance protects the policyholder against the common law liability of an employer's negligence leading to the injury of his employee. The law imposes certain responsibilities upon the employer in relation to the employee. He must provide safe tools and use reasonable care in removing hazards. He must not only use care in selecting employees but should caution such employees regarding the dangers of their employment.

On the other hand before the employee can collect damages he must prove to the court or jury that his employer was negligent and did not use reasonable care in preventing the accident.



A Typical Case

An Illinois farmer was sued by a hired hand for an injury sustained when the team of mules he was driving ran away. It was shown in court that the team of mules had run off before, therefore the jury decided they were dangerous and the farm employer was guilty of negligence and carelessness because he did not warn the employee that the team of mules was dangerous. Judgment was rendered against the employer for $5,000.

Limit of Protection

The new employers' liability insurance in the Illinois Agricultural Mutual protects the policyholder up to $5,000 per personal injury or

Springfield, Illinois, August 31, 1929.

Whereas, the

of the City of Chicago in the State of Illinois has complied with all the requirements of the laws of this State governing Insurance companies, which are applicable to said Company;

NOW, THEREFORE, I, the undersigned, Director of Trade and Commerce of the State of Illinois, by virtue of authority vested in me by law, do hereby authorize, empower and license the said company to transact, through duly appointed agents, the business of

Insurance in the State of Illinois, in accordance with the laws thereof.

In Testimony Whereof, I have subscribed my name and affixed the seal of my office, at Springfield the day and year first above written.

License Allows Employers' Liability Insurance

Thousands Attend Farm Bureau Picnics

14th District Gathering at Monmouth Leads All in Size

Monmouth, Ill., Aug. 27:

A CROWD estimated at 15,000 gathered here today in the picturesque city park at the edge of town for the 14th district I. A. A.-Farm Bureau picnic. An ideal day and a morning baseball game between Warren and Henderson counties induced a large early attendance. The crowd came from Warren, Mercer, Hancock, Henderson, and Rock Island counties. All were well represented.

Henderson defeated Warren in the morning baseball game, while McDonough won a close decision from Henry, championship contenders, in the afternoon contest. The score was 3 to 1. Heavy hitting by "Boots" Runkle, star shortstop for McDonough turned the tide of victory. The game was hard fought and well played by both teams.

Harold Kessinger, state senator from Aurora, was introduced by his colleague, Senator Hannah of Monmouth. Kessinger spoke optimistically about the future of agriculture, emphasizing the need for thorough organization. M. G. Lambert of Ferris presided. All Farm Bureau presidents in the district were there.

Games, contests, races, and good music provided in both morning and afternoon kept the crowd entertained. Observers declared this the largest farmers' picnic held during the year in Illinois.

Bloomington, Ill., Aug. 28:

Threatening clouds in the morning and a light shower early in the afternoon cut the attendance at the 17th district Farm Bureau picnic held at Miller Park here today. The crowd was somewhat smaller than that of last year when 8,000 to 10,000 people attended a similar gathering.

McLean bested Woodford county in the morning baseball game played on the Teachers' College grounds at Normal. C. V. Gregory, editor of Prairie Farmer and speaker of the afternoon, gave a scholarly address tracing the history of agriculture and farm relief from biblical times to the present day. He spoke optimistically of the future, the agricultural marketing act, and the federal farm board. The Middle West has lagged behind in organizing grain marketing cooperatives, he said. Farmers must federate to secure the benefit of the new legislation.

Sparta, Aug. 29:

The 4-H Club pageant in which nearly a hundred boys and girls from every part of Randolph county participated, featured the 25th district picnic held here today. The 4-H program provided the evening entertainment in the lighted grandstand on the fair grounds.

Congressman Henry T. Rainey, the speaker of the afternoon, talked to a full grandstand on farm relief and the marketing act. Mr. Rainey, a Democrat, was for the equalization fee and the debenture plan, and said so. His talk was well received.

Farm adviser C. J. Thomas of Jackson county broke his leg while sliding into home during the baseball game between local pickup teams. A crowd estimated at 4000 attended.

Others who spoke briefly were Sec. Geo. E. Metzger and Pres. E. W. Tiedeman of the Sanitary Milk Producers. Fred Dietz of DeSoto presided.

Olney, Ill., Aug. 30:

A crowd that overflowed the grandstand and the Richland county fair grounds heard gray-haired Sam Thompson, president of the American Farm Bureau Federation tell about the struggle for farm relief here today. The crowd of 8,000 to 10,000 was similar to that of last year. Mr. Thompson said he started his speaking career as president of the Illinois Agricultural Association at Olney about six years ago. "Our Sam" spoke interestingly and optimistically about the future of agriculture.

Baseball between Clay and Wabash County Farm Bureau teams featured the morning program along with barnyard golf. Boy scout demonstrations, and a style show by 4-H club girls preceded the speaker in the afternoon. A variety of games and races entertained the picnickers until evening. W. L. Cope of Salem presided, getting the program underway and finishing on schedule time.

Ottawa, Ill., Aug. 31:

The story of the Cook county reassessment and the long struggle for a fair and equitable valuation of real estate was told here today in a short vigorous address at the annual LaSalle County Farm Bureau picnic by William H. Malone, chairman of the Illinois Tax Commission. Mr. Malone accompanied by Mrs. Malone arrived in a great tri-motored metal monoplane which after circling about over the picnic crowd landed at the Ottawa airport two miles from the city.

Mr. Malone commended the Farm Bureau and Illinois Agricultural Association for their fairness in tax matters before the Commission. "I have never heard Farm Bureau representatives ask the commission for tax reduction," he said. "They invariably appealed for tax equalization and when the facts showed that inequalities existed we have not hesitated to grant relief."

A 4-H club style show, a baby beef club demonstration, baseball, horseshoe pitching and other events featured the program.

The largest county picnic in the history of the Marshall-Putnam Farm Bureau was held on the Swaney school grounds near McNabb on Aug. 27, according to R. J. Laible, county adviser. The crowd was estimated at 8,000 by experienced gatekeepers.

The speaker, Wm. H. Malone, chairman of the state tax commission, arrived in a Curtiss-Robin airplane from Chicago.

Four hundred twenty-five members already have been signed in the renewal campaign of the Henderson County Farm Bureau, and the membership shows prospects of approaching 500 within the next week or two, according to R. J. Hamilton, district organization manager. The old membership in Henderson county was 434. Practically all the new members are signed by voluntary solicitors.

Loyd V. Steere, American Agricultural Commissioner at Berlin, Germany, and Dr. Erich Kraemer from the same country were visitors at the I. A. A. office recently. Representatives of the Soviet Government from Moscow, Russia, spent a day at I. A. A. headquarters several weeks ago studying the Farm Bureau setup and program of service in Illinois.

Don't fail to read page 11 of this issue.

These signs near the main entrance greeted State Fair visitors, Aug. 19-24.

The I. A. A. pavilion was a popular meeting place for farmers throughout Fair week at Springfield.

MEMBERS FIND QUIET AND REST AT STATE FAIR

ing left-hand turns. Ignorance and carelessness were responsible for these. Three hundred and sixteen collisions occurred at intersections, 209 were cases of sideswiping, 131 reported "unable to stop," 80 said that they failed to stop when approaching the concrete highway, 41 came to grief while driving on the left side of the road. These were recorded from a total of 3,330 claims.

Throughout September accident prevention will be the dominant topic for discussion at meetings of Farm Bureau insurance agents, policyholders, and Farm Bureau members in Illinois. Policyholders realize that the way to reduce further their low cost insurance is to cut the number of accidents.

Here Are Rules

In an insurance meeting at Ottawa, LaSalle county, on September 5 the "No Auto Accident Campaign" featured the program. A set of rules for the guidance of all Farm Bureau members in the county were adopted as follows:

1. Always stop on approaching a paved highway and look in both directions.
2. When you run off the pavement slow up before going back on.
3. Always signal and look in both directions before making a left-hand turn.
4. In going around cars blow your horn and be certain the right-of-way is clear.
5. Never try to beat a train at a crossing.
6. Don't try to pass going around curves.
7. Never pass another car going up a hill when oncoming cars can't be seen.

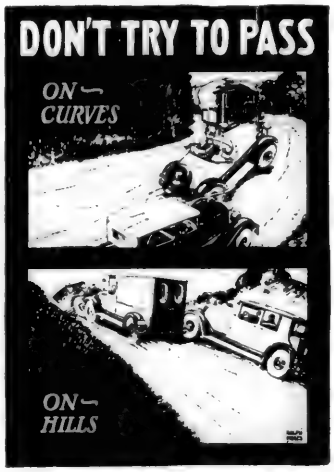
Every county is being asked to keep a record indicating the days on which no accidents occur among Farm Bureau member policyholders. "Every county having no auto accidents among its members during September will automatically become a member of the 'No Auto Accidents in September Club,' announces Vanman.

Campaign Slogans

"Highway Courtesy"

The unwritten law of the highway. Play fair with the other fellow. You'll both feel better for it. Qualities of true gentlemen are reflected in highway courtesy.

A few of the campaign slogans broadcast throughout the state are:



1. A moment's neglect may cause regret for a lifetime.
2. You are not thrifty if you are not a safe man.
3. Prevention of accidents is prevention of suffering.
4. Accidents don't just happen there is a cause.
5. A minute for safety beats a month for repairs.
6. A man at work is worth two in a hospital. Forethought is cheap; afterthought is expensive.
7. You may be dead right but dead a long time.

The effectiveness of accident prevention campaigns is seen in records compiled at San Diego, California. Actuated by distressing traffic accidents in that city of 140,000 people, the chief of police on July 14, 1927 ordered all accidents carefully investigated, witnesses secured, and the guilty parties brought to court and punished.

Curve Was Upward

During the first half of the year the curve of accidents in that city was continually upward as it had been during preceding years. In six months there had been 404 accidents, 594 personal injuries. In the six months following the order despite an increased volume of traffic, there were only 351 accidents recorded, a drop of 25.9 per cent. Injuries dropped to 425, a decrease of 28.4 per cent.

There were 800,000 automobile accidents in the United States during 1928, according to estimates of the National Safety Council. Twenty-seven thousand lives were taken and in economic loss of $850,000,000 was involved.

Drastic Treatment

"Mental Equipment"

It is even more important than mechanical equipment. Don't count too much on the common sense of the other fellow. No one is 100 per cent alert at all times.

Accident prevention is much less a question of speed than of skill and clear-headedness. Competency and responsibility should be determined before a license is issued or before a person is allowed to drive a car without the supervision of an experienced driver. Evidence of incompetent or irresponsible driving—regardless of speed—should result in forfeiture of the license, and does in a number of states.

License Granted For Liability Insurance

1100 Farmer Employers Now Protected Against Liability For Injuries To Hired Help

EMPLOYERS' liability insurance is now in operation for more than 1,100 Illinois Farm Bureau members whose applications are on file in the office of the Illinois Agricultural Mutual Insurance Company.

The new service became effective at noon on Saturday, August 31, a telegram from the State Insurance Department announced. The amended license reproduced herewith authorizes the Illinois Agricultural Mutual to engage both in automobile and employers' liability insurance.

Deposits Required

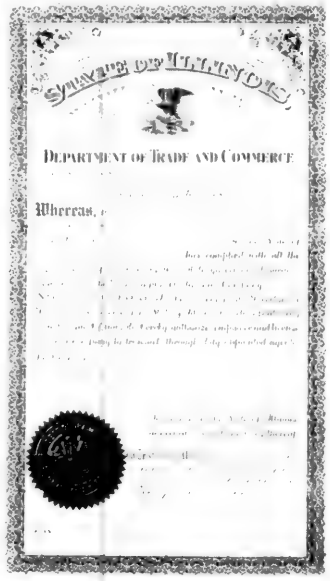
A special reserve deposit of $25,000 was required before the new service could become operative. Each applicant was required to make a deposit of $25 based on a yearly payroll up to $1,250. This includes the $5 policy fee, a $10 premium deposit, and $10 for reserve. The policyholder retains his ownership in the $20 for premium and reserve which will be refunded if he withdraws from the Company. Assessments will be made annually, although the company may make semi-annual assessments if it so desires.

The basis for estimating premium deposits hereafter will be slightly different. An additional $5 must be deposited on application for each additional six months of hired labor or fraction thereof.

What Protection Is

This insurance protects the policyholder against the common law liability of an employer's negligence leading to the injury of his employee. The law imposes certain responsibilities upon the employer in relation to the employee. He must provide safe tools and use reasonable care in removing hazards. He must not only use care in selecting employees but should caution such employees regarding the dangers of their employment.

On the other hand before the employee can collect damages he must prove to the court or jury that his employer was negligent and did not use reasonable care in preventing the accident.



A Typical Case

An Illinois farmer was sued by a hired hand for an injury sustained when the team of mules he was driving ran away. It was shown in court that the team of mules had run off before, therefore the jury decided they were dangerous and the farm employer was guilty of negligence and carelessness because he did not warn the employee that the team of mules was dangerous. Judgment was rendered against the employer for $5,000.

Limit of Protection

The new employers' liability insurance in the Illinois Agricultural Mutual protects the policyholder up to $5,000 per personal injury or

Thousands Attend Farm Bureau Picnics

14th District Gathering at Monmouth Leads All in Size

Monmouth, Ill., Aug. 27:

A CROWD estimated at 15,000 gathered here today in the picturesque city park at the edge of town for the 14th district I. A. A.-Farm Bureau picnic. An ideal day and a morning baseball game between Warren and Henderson counties induced a large early attendance. The crowd came from Warren, Mercer, Hancock, Henderson, and Rock Island counties. All were well represented.

Henderson defeated Warren in the morning baseball game, while McDonough won a close decision from Henry, championship contenders, in the afternoon contest. The score was 3 to 1. Heavy hitting by "Boots" Runkle, star shortstop for McDonough turned the tide of victory. The game was hard fought and well played by both teams.

Harold Kessinger, state senator from Aurora, was introduced by his colleague, Senator Hannah of Monmouth. Kessinger spoke optimistically about the future of agriculture, emphasizing the need for thorough organization. M. G. Lambert of Ferris presided. All Farm Bureau presidents in the district were there.

Games, contests, races, and good music provided in both morning and afternoon kept the crowd entertained. Observers declared this the largest farmers' picnic held during the year in Illinois.

Bloomington, Ill., Aug. 28:

Threatening clouds in the morning and a light shower early in the afternoon cut the attendance at the 17th district Farm Bureau picnic held at Miller Park here today. The crowd was somewhat smaller than that of last year when 8,000 to 10,000 people attended a similar gathering.

McLean bested Woodford county in the morning baseball game played on the Teachers' College grounds at Normal. C. V. Gregory, editor of Prairie Farmer and speaker of the afternoon, gave a scholarly address tracing the history of agriculture and farm relief from biblical times to the present day. He spoke optimistically of the future, the agricultural marketing act, and the federal farm board. The Middle West has lagged behind in organizing grain marketing cooperatives, he said. Farmers must federate to secure the benefit of the new legislation.

Sparta, Aug. 29:

The 4-H Club pageant in which nearly a hundred boys and girls from every part of Randolph county participated, featured the 25th district picnic held here today. The 4-H program provided the evening entertainment in the lighted grandstand on the fair grounds.

Congressman Henry T. Rainey, the speaker of the afternoon, talked to a full grandstand on farm relief and the marketing act. Mr. Rainey, a Democrat, was for the equalization fee and the debenture plan, and said so. His talk was well received.

Farm adviser C. J. Thomas of Jackson county broke his leg while sliding into home during the baseball game between local pickup teams. A crowd estimated at 4000 attended.

Others who spoke briefly were Sec. Geo. E. Metzger and Pres. E. W. Tiedeman of the Sanitary Milk Producers. Fred Dietz of DeSoto presided.

Olney, Ill., Aug. 30:

A crowd that overflowed the grandstand and the Richland county fair grounds heard gray haired Sam Thompson, president of the American Farm Bureau Federation tell about the struggle for farm relief here today. The crowd of 8,000 to 10,000 was similar to that of last year. Mr. Thompson said he started his speaking career as president of the Illinois Agricultural Association at Olney about six years ago. "Our Sam" spoke interestingly and optimistically about the future of agriculture.

Baseball between Clay and Wabash County Farm Bureau teams featured the morning program along with barnyard golf. Boy scout demonstrations, and a style show by 4-H club girls preceded the speaker in the afternoon. A variety of games and races entertained the picnickers until evening. W. L. Cope of Salem presided, getting the program under way and finishing on schedule time.

Ottawa, Ill., Aug. 31:

The story of the Cook county reassessment and the long struggle for a fair and equitable valuation of real estate was told here today in a short vigorous address at the annual LaSalle County Farm Bureau picnic by William H. Malone, chairman of the Illinois Tax Commission. Mr. Malone accompanied by Mrs. Malone arrived in a great tri-motored metal monoplane which after circling about over the picnic crowd landed at the Ottawa airport two miles from the city.

Mr. Malone commended the Farm Bureau and Illinois Agricultural Association for their fairness in tax matters before the Commission. "I have never heard Farm Bureau representatives ask the commission for tax reduction," he said. "They invariably appealed for tax equalization and when the facts showed that inequalities existed we have not hesitated to grant relief."

A 4-H club style show, a baby beef club demonstration, baseball, horseshoe pitching and other events featured the program.

Executive Committee States Views on Marketing Act

RECOGNIZING the differing views being expressed by many of our members relative to the Agricultural Marketing Act and efforts to put same into effect, the executive committee of the Illinois Agricultural Association at its meeting on August 22, 1929, gave careful consideration to the matter and unanimously expressed the belief that the following attitude should be assumed by all members of the Association and those with whom they might have proper influence:

"That the Agricultural Marketing Act passed by the special session of congress was the result of the continuing efforts of organized agriculture over recent years to secure recognition of the agricultural industry by our national government;

"That while full credit and responsibility rests entirely with the Administration for the passage of this act, it is the duty of all farmers and friends of agriculture to give their full support and co-operation that agriculture may secure the utmost benefits to be derived under the present law.

"Regardless of any differing views that may be held by farmers relative to fundamental principles necessary to restore agriculture to a fair basis in our economic life, such differences should not be allowed to detract in any way from the support and co-operation extended by thinking farmers to efforts being made to help agriculture."

The committee expressed the belief that only by following such a policy and keeping our forces welded together in one common unit through such co-operation, could we expect to be prepared to seek the immediate correction of any weaknesses or limitations that may develop in placing this law into effect.

Dairy Show Oct. 12-19

ILLINOIS farmers will have a fine opportunity to attend the National Dairy Show next month at St. Louis. The dates are October 12-19. The trend of eating habits of the American public toward dairy products in recent years attaches unusual significance to this great exposition.

While production of milk and dairy products is adequate to supply the demand at present, the natural increase in population and per capita consumption of milk, butter, ice cream, cheese, and the like offers a promising future for dairy husbandry. In no branch of farming is skill and good management at a higher premium than in the dairy business.

The National Dairy Show is a great teacher of methods and practices that make for success. Farmers now engaged in dairying and those looking in that direction for a future livelihood will do well to attend the exposition at St. Louis the third week in October.

Labor and Recreation

THE Illinois Farm Bureau Baseball League is winding up its sixth successful year. Three of the top-notch teams, McDonough, McLean, and Tazewell, are still in the running for the state championship. While the spirit of friendly rivalry and competition between the 21 Farm Bureau county teams that played this year provides the life and inspiration for the game, systematic recreation and diversion from the routine labor of the farm was the real motive that led to the formation of the League six years ago.

Farmers are as much benefited by recreation and diversion as are office workers and laborers in the city. There are those on the farm as well as in the city who carry recreation to excess. Then it becomes plain loafing. We hold no brief for the idler.

But there is ample proof supporting the belief that a half holiday a week is an aid to farm efficiency rather than a detriment.

The State Baseball League stands for more than its name implies. It sets up a principle, a policy that would have a tremendous influence for good in rural life if more generally practiced. All work and no play makes Johnny a dull boy. In the same way continual labor, unbroken by recreation, takes the joy and enthusiasm out of life.

There should be system and plan in recreation as there is in labor. Hard application to the job, followed by brief intervals of rest and recreation, will get one the farthest whether the occupation be farming, selling, sawing wood, or what-not.

The Deep Waterway

ONE of our major problems is to provide an outlet for middle west farm products at a minimum of cost," President Earl C. Smith declared at the recent waterway meeting in Peoria sponsored by the Illinois Manufacturers' Association.

"A study of present rate schedules discloses that on corn alone shipped from this county there would be a saving in transportation cost, if all were exported, of an amount approximating one-half of the total annual taxes assessed on farm lands in Peoria county. In arriving at this conclusion I am assuming only one thing, that is, that the cost of transportation by waterway from Peoria to New Orleans would not be more than the present rate from New Orleans to Liverpool.

"This example is used merely for comparison, realizing that only a limited amount of corn is shipped for export. Not only will the deep waterway accomplish this, but it will attract to this territory many industries using raw materials produced on our farms, thus reducing first cost and reflecting the savings to the producers of this section."

Turning to Secretary of War Good and Governor Emmerson who led the tour down the Illinois, Smith stated that "the Illinois Agricultural Association is ready, willing and anxious to assist in every possible way to secure the realization of this great improvement at the earliest possible date."

Tune in on the I. A. A. Forum from Station WLS every Thursday night at 6:30 p. m., Central Standard Time.

The daily farm program of the I. A. A. from Station WJJD, Mooseheart (265 meters) is broadcast between 12:00 and 12:20 p. m., Monday to Friday inclusive. Hear the daily Chicago livestock market from the Producers, and each Friday the weekly market review. Outlook reports, reviews, and talks by I. A. A. staff members, officials, and leaders in farm thought are broadcast daily.

Charles W. Hadley, chairman of the Illinois Commerce Commission, is tentatively scheduled to appear on the I. A. A. Radio Forum from station WLS on Thursday night, Sept. 26.

James L. Donnelly, executive vice-president of the Illinois Manufacturers' Association, gave an interesting talk on the Illinois waterway on the I. A. A. Forum, Sept. 5.

Mr. Donnelly recognizes the need for friendly co-operation between the farmer and the manufacturer. He will be with us again at a later date to discuss the possibilities for increased farm income in the utilization of farm wastes and by-products.

Reports are coming in that reception of Chicago stations in the St. Louis territory is not so good. We will appreciate letters from our members in that territory advising whether or not stations WLS and WJJD can be clearly heard.

I. A. A. Radio Forum—WLS

"Dear Mr. Williams:

"I have just listened over the radio to your most excellent talk, 'The Passing of the Hick,' and am very much impressed with it. Please send me a copy. If there is no objection on your part, I would like to embody your thought in a circular letter I am addressing to all 'nons' on this railroad. I will have to modify the text to fit our class and will be glad to give you full credit in same for the thought and be pleased to send you a copy.

"As general chairman of the Order of Railroad Telegraphers on the Nickel Plate Road, I have recently, through government arbitration, secured 3.5 cents per hour per position to each employee coming under the provisions of the Telegraphers' Agreement, but in our midst as with the farmers, there lurks and thrives the blood sucking non-member, precisely as pictured by you.

"We are starting a drive for new members and are endeavoring to make the railroad 100 per cent strong and we need just the thought you have given me to put in my introductory circular."

C. I. Turner, General Chairman,
Order of Railroad Telegraphers,
System Division No. 18,
Ambia, Indiana.

I. A. A. Forum—WLS

"Would you please send several copies of Larry William's talk? I just came in in time to hear the last few words of his talk.

"Those talks would come in handy for our Farm Bureau membership drive.

"Thanking you and assuring you we enjoy the WLS programs."

Otto Berlage, Jo Daviess county.

(Courtesy Marshall-Putnam Farm Bureau)

MARSHALL-PUTNAM SPEAKER ARRIVES IN AIRPLANE

President F. S. Clift of the Marshall-Putnam Farm Bureau welcomes Wm. H. Malone, Chairman of the Illinois Tax Commission, who arrived in a Curtiss-Robin airplane from Chicago to address the annual Marshall-Putnam Farm Bureau picnic on the Swaney School Grounds, Aug. 27. At the right is W. M. Dewey, manager of the Edgewater Beach Hotel, Chicago, who accompanied Malone. More than 8,000 people—a record crowd—attended, according to Farm Adviser R. J. Laible. Malone travelled by airplane to Sangamon and LaSalle Counties where he likewise addressed Farm Bureau picnics.

Smith Asks Support For Marketing Act

Reiterates Sentiment Expressed By Executive Committee

AN APPEAL for full support and co-operation to give the Agricultural Marketing Act every chance to accomplish the purpose set forth in its declaration of principles was made by the president of the Illinois Agricultural Association, Earl C. Smith, in a series of talks before Farm Bureau picnics at Canton, Kankakee, Morrison, and at the Fairbury Fair recently.

Earl C. Smith

At the same time President Smith reiterated the sentiment expressed by the I. A. A. Executive Committee at its August meeting to the effect that full credit and responsibility for the passage of the Marketing Act rests entirely with the present administration at Washington.

Differences of View

"It is well known that there are fundamental differences of view among farm organizations, politicians and business men, as to the essential fundamentals to restore the industry," said Smith. "Those differences have been discussed from the platform, in the press and even from the pulpit; and it seems to me, at least, the time has arrived when all should throw their forces together—welded in one common unit—to get the utmost benefits that can be derived under the limitations of this Act, thereby proving in practical trial the economic and practical soundness of our differing views. Only by such co-ordination of thought and action can we be brought together so that in a short period of time any weaknesses or limitations that may develop in attempting to place this act into practical administration can be most readily corrected.

"If there ever was any justification for the organization of farmers, it is doubly necessary since the passage of this legislation. We all must recognize the impossibility of each farmer speaking for himself in matters of this character, and the only hope of having proper representation and voice in matters of state and national character is through organizations such as the Farm Bureau provides."

License Granted

(Continued from page 4)

death to one person, and with that limit per person $10,000 for any single accident. The service is limited to Farm Bureau members. The cost of the insurance is expected to be low. It is reasonably certain that the cost will not be more than the premiuin deposit required with application.

The policyhôlder will be protected against attorneys' fees, court costs, hospital bills, and a possible judgment against him (within the limits mentioned) if his negligence as established in court led to the injury.

Unable to Get Out of the Rut

WHERE A MOTORIST saw that an automobile he was meeting could not be driven out of a rut when six rods away, and he did nothing to avoid a collision therewith, he could not recover for resulting damages.

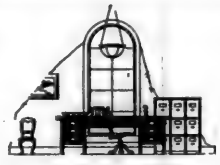
But if he were insured in the I. A. A. Farm Bureau Company his policy would protect him against loss.

Observations

FROM Roosevelt to Hoover represents only a short span of years, yet great changes have come about in the attitude of the public toward corporations and trusts during this period.

"Busting" the trusts, one of Roosevelt's spectacular projects was applauded by the general public. Today the Sherman Anti-Trust Act is forgotten. The rank and file largely own the trusts and are cashing in on at least part of their prosperity. The trend of the great American public toward part ownership through stock purchases is having, and will continue to have a far-reaching influence on the attitude of the federal government toward monopolies.

The American Telephone and Telegraph Company boasts more than 475,000 stock holders, no one of which has as much as one per cent of this great corporation's common stock. Widespread ownership of public utilities is suppressing fear of their socialization.



Common stocks in successful corporations are now selling on the exchanges to yield a very low return at present market prices. Speculation in stocks has captured the public interest. Bucket shops and wire houses throughout the country are crowded from day to day. In the meantime good farm land, once the premier investment, goes begging. What can be done about it? Real estate and land agents are working on the problem.

Already has come the suggestion that stock-companies be created to buy town and city lots and tracts of farm lands. To make land ownership more readily available to the small investor is the object. Well why not get more consumers financially interested in farming? Why not turn the public interest in speculation and stock ownership to the benefit of agriculture as the utilities have done with profit to their stockholders?

If this is accomplished the stock exchanges of the future may list Daisy Farms A common, Broadacres convertible 7 per cent preferred, etc. What a difference it might make. How much more willing would be the consumer stockholder to patronize his "company" and pay the price asked for its products—food. The farm operator or manager would be situated to cash in on the public's flare for speculation as "insiders" in the big corporations are doing today.

Just before announcing some bad news he might sell his stock short, and buy in again after the drop. After a few bullish statements were released and the market on Blackacres skyrockets, he might sell, take his profit, and go to Europe leaving the luckless small fry speculators holding the sack. That's what is happening in the stock market today. Why shouldn't farmers get in on the racket?

Any kind of farm relief we wanted would be as easy under such a system as it is now to get a higher tariff on steel or aluminum. Farming would then be a business as well as a way of living. Perhaps this Utopian dream may come to pass. Who knows? E. G. T.

"WORK YOUR LITTLE BEAN"

By C. C. SWARTZ

WHEN you want to accomplish something
That you're after good and keen,
My boy, there's just one method,
And that's to work your bean.

Just faithfully keep trying
To get your work across,
And then 'tis almost certain
You'll be solid with the boss.

For a boss is no whit different
From the ordinary man,
You may find him just a brother
Who has worked his little plan.

But the way he gained advancement
Can readily be seen—
The same as you, if you'll but try
To work your little bean.

—Longi Courier.

Watch Farm Seeds

ILLINOIS farmers are advised to purchase their seed from Illinois dealers who must comply with the State Seed Law, which does not control dealers in other states, announces Phil S. Haner, superintendent of the State Division of Plant Industry.

"Complaints have reached me that seed bought by some individuals was found to be of lower quality than the Seed Law requires," said Mr. Haner. "An investigation of the source of this seed revealed the origin to be outside of Illinois.

"Considerable seed is sold from farmer to farmer without the analysis tag. This is a violation of the law and I will appreciate your help in getting your members to understand this."

Albert C. Wilson was reappointed as chief seed analyst.

Decatur Herald Has Farm Bureau Edition

AN eight-page Farm Bureau supplement appeared with the Sunday edition of the Decatur Herald on September 1.

The Macon County Farm Bureau, with the able co-operation of this progressive daily, gathered and wrote the material for the special edition. The supplement announced the new drive for members to be carried on during September, contained statements from the presidents of the American Farm Bureau Federation and the I. A. A., feature articles by County Adviser Walworth, W. H. Kercher of the Decatur Herald, and officers and members of the Macon County Farm Bureau. Staff members of the I. A. A., likewise, contributed to the issue. Local business groups also were represented.

This is one of the best Farm Bureau editions ever published in Illinois and is a splendid example of excellent co-operation between the Farm Bureau, the local press, and other organized groups.

DUST away YOUR WEEDS

Simply shake Atlacide powdered Weed Killer from the perforated container.

CALCIUM CHLORATE

as used in Atlacide is recommended by Experiment Stations and Farm Agencies for the control and eradication of all noxious weeds such as

Bindweed — Canada Thistle
Quack Grass — Russian Thistle
Wild Morning Glory — White Top

ATLACIDE
CALCIUM CHLORATE KILLS WEEDS

CONTAINS 45.5% CHLORIC ACID (ClO_3)
Calcium Chlorate Equivalent 56.4%

Dissolves Easily. Crops may be grown on treated soil a few months after application. Apply as a spray for large areas. Apply as a dust for small areas.

Packed in 3¼ lb. sifter cans for dusting on small areas and in 200 lb. and 50 lb. drums for use in standard spray tanks.

Satisfactorily used on 15,000 miles of railroad track last year.

Non-poisonous to animals or people. No fire hazard.

Use Atlacide dissolved in water for horse drawn or motor sprayers

ILLINOIS FARM SUPPLY COMPANY,
Room 1200-608 S. Dearborn St., Chicago, Ill.

STATE CHAMPION LIVESTOCK JUDGING TEAM, LASALLE COUNTY
Left to right: L. C. Cunningham, county club leader; Ralph Swift, Russell Stockley, Herman Rupp.

Illinois 4-H Club Winners

Many Will Compete in National Contest at Coming International, Chicago

FIFTY-FOUR teams from 31 counties competed in the state judging contest held last month at Urbana. Twenty counties had 22 teams entered in the dairy judging contest, and 26 counties had 32 teams in the livestock judging contest.

The LaSalle county team, coached by L. C. Cunningham, won the livestock contest. Two of its members, Russell Stockley, and Ralph Swift, placed third and fourth respectively. The LaSalle team will represent Illinois in the junior judging contest at the International Livestock Show which opens on November 30.

The winning team in the dairy contest came from Bureau county. All members were from the Walnut 4-H Club, coached by C. M. Hatland, vocational teacher. Lloyd Espel, a member of the team, was high man scoring 545 out of a possible 600. The Bureau county dairy judging team will train for the national dairy judging contest to be held at St. Louis, October 12 to 19 during the National Dairy Show.

Each team receives $50 for expenses to the national contest.

The first five teams in both divisions with their scores are as follows:

Car Stopped at Roadside

WHERE AN AUTOMOBILE was standing at the right margin of a road and one who was approaching it in another car saw, or by the exercise of ordinary care and caution could have seen it in time to have turned aside and did not do so but collided with it, he was held guilty of negligence.

Chicago Producers Report Good Year

Increased Percentage of Livestock Handled in Face of Decreased Receipts

THE Chicago Producers' Commission Association finished its seventh fiscal year on June 29, 1929, with an increase in the percentage of all kinds of livestock handled, although there was a 14 per cent decrease in the total number of cars sold at the Chicago market. Part of this decrease was due to an increase of approximately 75 per cent in the number of rail cars shipped direct to the packers. The decrease in the Chicago Producers' total volume was only 11 per cent as compared with 14 per cent for the Chicago market as a whole, while the increases in percentage handled enabled the Producers' to earn a small profit on the commission business amounting to $10,945.86.

About 11 per cent of the hogs received at Chicago were shipped direct to the packers during the first six months of 1928. During the first six months of 1929 more than 25 per cent were received direct.

The average day's busines during the past year was more than $200,000, a number of days more than $200,000, and one day over a quarter of a million dollars. Unevenness in daily and seasonal receipts necessitates maintaining a more extensive working force than if most of the days were about average in volume.

DAIRY Marketing

By Art Lynch

ORGANIZED markets sell more dairy products per capita than is sold where dairymen are selling as individuals.

* * *

TWIN City Milk Producers, the dairymen's organization on the St. Paul and Minneapolis markets, has advertised milk all through its 12 years of existence. Result—the consumption of fluid milk has doubled and substantial increases have been achieved in the sale of butter, cheese and ice cream.

* * *

THE organized dairymen at Philadelphia have made it a part of their business to tell consumers about dairy products. Their fluid sales went up 29 per cent over a four year period. Philadelphians eat 23 pounds of butter on the average, according to recent surveys. This is about 6 pounds more than the average for the United States.

* * *

ASK Jack Connery of Quincy Milk Producers if advertising pays and he will tell you, "increased our sales 25%."

* * *

ASK Ryland Capron of the dairymen's organization at Peoria if advertising is a good thing and he will say, "you betcha." Peoria fluid sales increased 6% through advertising.

* * *

JULIUS REINHARDT of Highland Producers organization says, "our business would be only half as big if we had not told folks about our product."

* * *

IT PAYS to advertise. Milk, for which there is no substitute, offers a great field.

* * *

MILK is the health giver, the builder and the beautifier. Laborers drink a quart at a meal—it used to be beer. Women drink milk because it keeps them healthy. And health is beauty.

* * *

FOLKS used to talk about milk by showing the advantages it possesses over other farm products. This was wrong. It isn't done that way now. More milk is constantly being sold on its own merits.

* * *

HOW is it done? The dairymen's organization puts in one cent per cwt. into a fund. The dealers match it with one cent. They employ the National Dairy Council to do the educational work creating a lasting interest in milk products in the schools, clubs, organizations and to others thru news material and paid advertising.
